piquette (pē-ket′), *n.* [F., < *piquer*, sting: see *pique*[2], *v.*] A drink made by steeping in water the skins, etc., of grapes that have already been pressed for wine-making; hence, thin, small, and sour wine.

piquet-work, *n.* Same as *piqué-work*.

piqué-work (pē-kā′wėrk), *n.* Decoration by means of small points, sometimes pricked or impressed, and then generally forming patterns, sometimes inlaid in other materials flush with the surface or in slight relief.

piquia-oil (pē′ki-ä-oil), *n.* [< S. Amer. *piquia* + E. *oil*.] A sweet concrete food-oil derived from the fruit of *Caryocar Brasiliense*.

piquillin (pi-kwil′in), *n.* [S. Amer.] A bush, *Condaliopsis Microphylla*, of the *Rhamnaceæ*, found in Chile and the Argentine Republic. ★It bears an edible sweet drupaceous fruit.

piracy (pī′rā-si), *n.* [< ML. *piratia*, for L. *piratica*, piracy, fem. of *piraticus*, piratic: see *piratic*.] 1. Robbery upon the sea; robbery by pirates; the practice of robbing on the high seas. Specifically, in the *law of nations*, the crime of depredations or wilful and aggressive destruction of life or property committed on the seas by persons having no commission or authority from any established state. As commonly used it implies something more than a simple theft with violence at sea, and includes something of the idea of general hostility to law. According to the opinion of some, it implies only unlawful interference with a vessel; according to others, it includes also depredations on the coast by a force landing from the sea. The slave-trade was declared piracy by statute in the United States May 15, 1820, by Great Britain in 1824, and since the treaty of 1841 by Austria, Prussia, and Russia.

The trauel thither [to Japan] both for ciuil discord and great *piracie*, and often shipwracks, is very dangerous. *Hakluyt's Voyages*, II. ii. 80.

Piracy is robbery on the sea, or by descent from the sea upon the coast, committed by persons not holding a commission from, or at the time pertaining to, any established state. *Woolsey*, Introd. to Inter. Law, § 137.

2. Literary theft; any unauthorized appropriation of the mental or artistic conceptions or productions of another; specifically, an infringement of the law of copyright.

piragua (pi-rä′gwä), *n.* Same as *periagua*.

pirai (pi-rī′), *n.* Same as *piraya*.

pirameter (pī-ram′e-tėr), *n.* [Irreg. < Gr. πειρᾶν, try, test, + μέτρον, measure.] An instrument or apparatus for testing the relative resistance of roads to the draft of vehicles. The original instrument was a rude form of dynamometer dragged on the ground, and indicating resistance by a finger on a dial. Draft-springs with graduated scales, resembling the ordinary spring-scales for weighing, are now used, the draft-power being applied directly to the springs. Also spelled *peirameter*.

piramidig (pi-ram′i-dig), *n.* [So called, it is said, from its note.] Same as *night-hawk*, 1.

piramist, *n.* See *pyramis*.

piramuta (pir-a-mö′tä), *n.* [Braz.] A siluroid fish, *Piramutana piramuta*, of the common South American catfish type, but with teeth on the palate and with granulated head. It occurs in the Rio Negro and Rio Madeira.

Piranga (pī-rang′gä), *n.* [NL. (Vieillot, 1807), also *Pyranga* (Vieillot, 1816).] A genus of *Tanagridæ*, having the beak dentate near the middle of the tomia. It is the only genus which is extensively represented in North America. There are several species, extending from Canada to Chili. The common scarlet tanager or black-winged redbird of the United States is *P. rubra*, the male of which is scarlet, with black wings and tail, and the female greenish and yellowish. The summer redbird is *P. æstiva*; the male is entirely rose-red. The Louisiana tanager, *P. ludoviciana*, extensively distributed in the western parts of the United States, is bright-yellow with a black back and wings and scarlet head. The rose-throated tanager, *P. roseigularis*, is a rare and beautiful species found in tropical America. The genus is also called ★*Phœnicosoma*. See also cut under *tanager*.

Rose-throated Tanager (*Piranga roseigularis*).

pirate (pī′rāt), *n.* [Formerly also *pirat*, *pyrate*, *pyrat*; = D. *piraat* = G. Sw. Dan. *pirat*; < OF. *pirate*, F. *pirate* = Sp. Pg. It. *pirata*, < L. *pirata*, a pirate, < Gr. πειρατής, a pirate, lit. one who at-

tacks or attempts, < *πειρᾶν*, attempt, try, attack, < *πεῖρα*, an attempt, trial, attack, assault, akin to *πορᾶν*, pass over or through, pass, < *πόρος*, passage, etc., and to E. *fare:* see *fare*[1]. Cf. *empiric*, etc.] 1. One who without authority and by violence seizes or interferes with the ship or property of another on the sea; specifically, one who is habitually engaged in such robbery, or sails the seas for the robbery and plunder of merchant vessels; a freebooter or corsair; a sea-robber. See *piracy*.

There be land-rats and water-rats, water-thieves and land-thieves, I mean *pirates*. *Shak.*, M. of V., i. 3. 25.

Nor swelling Seas, nor threatening Skies,
Prevent the *Pirate's* Course.
Congreve, Pindaric Odes, ii.

2. An armed vessel which sails without a legal commission, for the purpose of plundering other vessels indiscriminately on the high seas. —3. A publisher, compiler, or bookseller who appropriates the literary or artistic labors of an author without compensation or permission; specifically, one who infringes on the copyright of another.

Mores refers to them [Shakspere's "Sonnets"] in 1598 in a manner which implies that though unpublished they were well known among the poet's private friends, . . . and in 1599 two of them were printed by the *pirate* Jaggard. *Shakespeariana*, VI. 105.

4. Any pirate-perch. =Syn. 1. *Thief, Brigand*, etc. (see *robber*), corsair, bucaneer.

pirate (pī′rāt), *v.*; pret. and pp. *pirated*, ppr. *pirating*. [< *pirate, n.*] **I.** *intrans.* 1. To play the pirate; rob on the high seas.

They robbed by land, and *pirated* by sea. *Arbuthnot.*

2. To appropriate and reproduce the literary or artistic work of another without right or permission; specifically, to infringe on the copyright of another.

I am told that, if a book is anything useful, the printers have a way of *pirating* on one another, and printing other persons' copies; which is very barbarous.
W. King, Art of Cookery, letter vii.

We are doing all the *pirating* in these days; the English used to be in the business, but they dropped out of it long ago. *New Princeton Rev.*, V. 50.

II. *trans.* 1. To commit piracy upon; play the pirate toward.

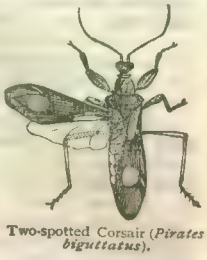
In the yeere 698, a puissant Pirat named Abeuchapeta, passed from Asia into Africa, leading with him 70 Galleyes, and 100 other vessels furnished for his exploite, with which he pilled and *pirated* such as he met with all by Seas. *Guevara*, Letters (tr. by Hellowes, 1577), p. 329.

2. To appropriate and publish without permission or legal right, as books, writings, etc.; use or reproduce illegally.

They advertised they would *pirate* his edition. *Pope.*

It [Galignani's edition of Coleridge, Shelley, and Keats] was a *pirated* book, and I trust I may be pardoned for the delight I had in it. *Lowell*, Coleridge.

pirate-fish (pī′rāt-fish), *n.* The glutinous hag, *Myxine glutinosa*. [Local, Eng.]



pirate-perch (pī′rāt-pėrch), *n.* A fish of the family *Aphredoderidæ*, *Aphredoderus sayanus*, of the United States: so named from its voracity.

Pirate-perch (*Aphredoderus sayanus*).

This fish is of a dark-olive color profusely dotted with black, and has two dark bars at the base of the caudal fin. It is notable for the peculiar fins and the position of the anus, which in the adult is under the throat. It occurs in sluggish streams and bayous coastwise from New York to Louisiana and westward to Illinois. It reaches a length of about 5 inches. See *Aphredoderus*.

Pirates (pī-rā′tēz), *n.* [NL. (Burmeister, 1835), < Gr. *πειρατής*, a pirate: see *pirate*.] A genus of reduvioid bugs, typical of a subfamily *Piratinæ*, having the third joint of the hind tarsi as long as the first and second joints together, and that part of the head which bears the ocelli slightly elevated. They are predaceous, and inhabit both North and South America. *P. biguttatus*, sometimes called the *two-spotted corsair*, occurs from Virginia and Florida to California. It lurks in trees and bushes for its insect prey, and has been found in houses in beds, where it is supposed to have come in search of bedbugs. Now placed in *Rasahus*.

Two-spotted Corsair (*Pirates biguttatus*).

piratic (pī-rat′ik), *a.* [= F. *piratique* = Sp. *piratico* = Pg. It. *piratico*, < L. *piraticus*, < Gr. *πειρατικός*, of or belonging to a pirate, < *πειρατής*, a pirate: see *pirate*.] Same as *piratical*.

piratical (pī-rat′i-kal), *a.* [< *piratic* + *-al*.] 1. Of or pertaining to a pirate or piracy; of the nature of piracy: as, *piratical* acts.

All naval war, not only during the middle ages but down to the seventeenth century, was more or less *piratical*.
Stubbs, Medieval and Modern Hist., p. 190.

2. Engaged in piracy, or robbery on the high seas: as, a *piratical* ship or commander.—3. Pertaining to or practising literary piracy: as, *piratical* publishers.

The errors of the press were . . . multiplied . . . by the avarice and negligence of *piratical* printers.
Pope, Letters, Pref.

piratically (pī-rat′i-kal-i), *adv.* In a piratical manner; by piracy.

piratously† (pī′rā-tus-li), *adv.* [< **piratous* (< *pirate* + *-ous*) + *-ly*[2].] Piratically.

Divers merchants . . . have had their goods *piratously* robbed and taken. *State Trials*, Lord Seymour, an. 1549.

piraya (pi-rä′yä), *n.* [Tupi *piranha*.] A characinoid fish, *Serrasalmo piraya*, of tropical America. It has a deep compressed body with a keeled serrated belly. The mouth is moderate, but its jaws are armed with lancet-shaped teeth as sharp as those of the shark. Cattle when fording rivers are sometimes badly bitten by it. The natives of Guiana sharpen their tiny arrows for the blow-gun by drawing them between two of the teeth, which shave them to a point with their sharp edges. The fish sometimes becomes 3 or 4 feet in length. Also called *caribe* and *pirai*. See cut under *Serrasalmo*.

pire[1]†, *v. i.* A Middle English form of *peer*[1].

pire[2]†, *n.* A Middle English form of *pear*[1].

pirl (pėrl), *v.* and *n.* See *purl*[1].

pirlie-pig (pėr′li-pig), *n.* A tirelire or money-box. [Scotch.]

pirn (pėrn), *n.* [< ME. *pyrne:* origin obscure. Now Sc. and N. of Eng.; cf. *pirl*, *purl*[1].] 1. A small cylinder, a section of hollow reed, or the like, on which thread or yarn is wound for use in a weaver's shuttle; a bobbin; a spool.

Pyrne of a webstarys lome. *Prompt. Parv.*, p. 462.

2. A small reel, such as that attached to a fishing-rod.— 3. The amount of thread, yarn, or line wound on a spool or reel.— 4. A stick with a loop attached for twisting the nose of a refractory horse.

pirnie (pir′ni), *n.* A striped woolen nightcap made in Kilmarnock, Scotland. *Simmonds.* [Scotch.]

Pirogoff's operation. See *operation*.

pirogue (pi-rōg′), *n.* [Also *perogue;* =G. *pirogue* = Dan. *piroge* = Sw. *pirog, pirok* = It. Pg. *piroga;* < F. *pirogue*, < Sp. *piragua*, a canoe, dugout (see *periagua*); orig. W. Ind.] 1. A canoe made from the trunk of a tree hollowed out. Pirogues are sometimes large, decked, rigged with sails, and furnished with outriggers. In Louisiana the terms *pirogue* and *canoe* are used indifferently. See *periagua*, 2.

A number of officers, with three hundred and twenty soldiers, twenty women, and seventeen children, left New Orleans on the 27th of February, under the command of an officer named Loftus, in ten boats and two *pirogues*.
Gayarré, Hist. Louisiana, II. 102.

The earliest improvement upon the canoe was the *Pirogue*, an invention of the whites. Like the canoe, this is hewed out of the solid log; the difference is that the *pirogue* has greater width and capacity, and is composed of several pieces of timber—as if the canoe was sawed in two equal sections and a broad flat piece of timber inserted in the middle, so as to give greater breadth of beam to the vessel. This was probably the identical process by which Europeans, unable to procure planks to build boats, began in the first instance to enlarge canoes to suit their purposes.
James Hall, Notes on the Western States (1838), p. 218.

On rounding a point a *pirogue*, skilfully paddled by a youth, shot out.
S. L. Clemens, Life on the Mississippi, App. A, p. 597.

The white and the red man were on most friendly terms, and the birch canoe and *pirogue* were seen carrying, in mixed company, both races.
W. Barrows, Oregon, p. 39.

2. Same as *periagua*, 3.

Pirogue.—In modern usage in America, a narrow ferry-boat, carrying two masts and a leeboard. *Webster*, 1828.

She is what they call a *pirogue* here [West Indies], but not at all what is called a pirogue in the United States: she has a long narrow hull, two masts, no deck: she has usually a crew of five, and can carry thirty barrels of tafia.
Harper's Mag., LXXIX. 851.

pirogue-rig (pi-rōg′rig), *n.* A boat's rig consisting of two leg-of-mutton sails. See *bateau*. [Florida.]

pirol (pir′ol), *n.* [= Dan. *pirol*, < G. *pirol, pirolt*, < ML. *pirulus, pyrrhula*, an oriole, < Gr. *πυρροῦλας*, some red or yellow bird, cf. *πύρρα*, some red or yellow bird, < *πυρρός*, flame-colored, red or yellow, < *πῦρ*, fire: see *fire*.] The European oriole, *Oriolus galbula*. See first cut under *oriole*.

piroroco (pē-rō-rō′kō), *n.* [Tupi.] A tidal wave or bore on the Amazon river.

The "bore," or *piroroco*, is a colossal wave at spring tide, rising suddenly along the whole width of the Amazon to a height of twelve or fifteen feet, and then collapsing with a frightful roar.
Orton, The Andes and the Amazon (1876), p. 275.

pirouette (pir-ō-et′), *n.* [Formerly also *piroet;* < F. *pirouette*, a whirligig, a whirling about, a pirouette in dancing; OF. also *pirouet*, m.; also *pirevollet*, a whirligig (Cotgrave); dim. of F. dial. *piroue*, a whirligig, a little wheel; cf. *pirr, pirry*.] 1. In *dancing*, a rapid whirling on one leg or on the points of the toes, as performed by ballet-dancers.—2. In the *manège*, a quick, short turn or whirl of a horse.

pirouette (pir-ō-et′), *v. i.*; pret. and pp. *pirouetted*, ppr. *pirouetting*. [< F. *pirouetter*, perform a pirouette, < *pirouette*, a pirouette: see *pirouette, n.*] To perform a pirouette; turn or whirl on one leg, or on the toes, as in dancing; advance or move along in a series of pirouettes, or short graceful turns, as a horse.

pirr (pėr), *n.* A ruffling wind. [Scotch.]

pirry† (pir′i), *n.* [Early mod. E. also *pirrie, perry, perrie, pyrry, pirie;* < ME. *pirie, pyrie, perrie, pyry*, also *berry, berrie*. Hence Gael. *piorradh* = Ir. *piorra*, a squall, blast. Cf. *pirr* and *birr*[1].] A storm of wind; a squall or gust. *Palsgrave.*

For sodainly there rose a straunge storme and a quicke *pirie*, so mischevous and so pernicious that nothinge more execrable, or more to be abhorred, could happen in any Christian region. *Hall*, Henry VI., f. 55. (*Halliwell.*)

A *pirrie* came, and set my ship on sands.
Mir. for Mags., p. 502. (*Nares.*)

Nat men and children only, but also . . . horses . . . shulde [by learning to swim] more aptely and boldly passe ouer great riuers, . . . and nat be aferde of *pirries* or great stormes. *Sir T. Elyot*, The Governour, i. 17.

Pisan[1] (pē′zan), *a.* and *n.* [It. *Pisano*, < *Pisa* (see def.) + *-an*.] Of or relating to the city of Pisa in northern Italy, or its inhabitants, or its school of art; of or relating to the province of Pisa; an inhabitant of Pisa.

piscicolous (pi-sik′ō-lus), *a.* [< L. *piscis*, fish, + *colere*, inhabit.] Parasitic upon or infesting fishes, as fish-lice.

piscicultural (pis-i-kul′tū-ral), *a.* [< *pisciculture* + *-al*.] Of or pertaining in any way to pisciculture; fish-cultural.

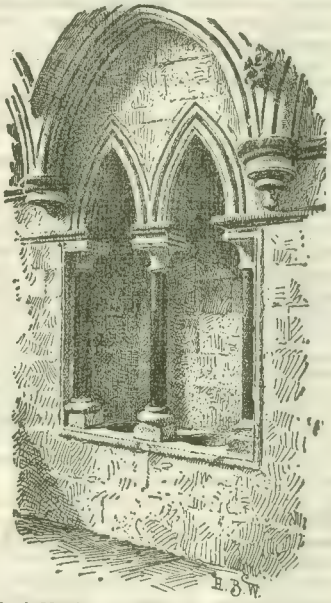
pisciculture (pis′i-kul″tūr), *n.* [= F. *pisciculture* = Pg. *piscicultura*, < L. *piscis*, fish, + *cultura*, cultivation: see *culture*.] The breeding, rearing, preservation, feeding, and fattening of fish by artificial means; fish-culture. Pisciculture has been practised from very early ages. It appears to have been in use in ancient Egypt, and was followed in China in early times on a very large scale. It was introduced in Great Britain by Mr. Shaw of Drumlanrig, in Dumfriesshire, Scotland, in 1837. An important branch of modern pisciculture is the propagation and rearing of young fish in artificial ponds, with the view of introducing fish previously not found in the locality, or of increasing the supply of desirable food-fishes. Salmon- and trout-ova sent from Great Britain have been successfully propagated in Australia and New Zealand. Of late years America has taken the lead in fish-culture, under the administration of the United States Fish Commission, and millions of ova and fry have been planted in various rivers.

pisciculturist (pis′i-kul″tūr-ist), *n.* [< *pisciculture* + *-ist*.] One who practises pisciculture, or is devoted to the breeding and rearing of fishes; a fish-culturist.

Piscidia (pi-sid′i-ä), *n.* [NL., < L. *piscis*, fish, + *cædere*, kill.] A name given by Linnæus in 1759 to *Ichthyomethia*, a genus of plants of the family *Fabaceæ*, characterized by wing-petals adherent to the keel, and long thick pods longitudinally four-winged. The only species, *Ichthyomethia Piscipula*, a native of the West Indies, is a tree with alternate pinnate leaves, white and red flowers in short lateral panicles, and many-seeded indehiscent linear pods. It is known as *Jamaica* or *white dogwood*, reaches a height of about 35 feet, extends into Florida and Mexico, and produces a valuable, very hard, close-grained wood, yellowish-brown in color and taking a high polish, used in its native region for boat-building, firewood, and charcoal. (For the use of its powdered leaves and twigs to stupefy fish, see *fish-poison*.) Its gray or brown acrid bark is imported into the United States for its narcotic properties.

piscifactory (pis′i-fak-tō-ri), *n.* [< L. *piscis*, fish, + E. *factory*.] A place where pisciculture is carried on. [Rare.]

The establishment in 1850 at Huningue (Hüningen) in Alsace by the French Government of the first fish-breeding station, or *piscifactory*, as it was named by Professor Coste, is of great significance. *Encyc. Brit.*, XIX. 128.



piscifauna (pis′i-fâ-nä), *n.* [< L. *piscis*, fish, + NL. *fauna*: see *fauna*.] The fauna of any region or country, in so far as it is composed of fishes: correlated with *avifauna*. See *fauna*.

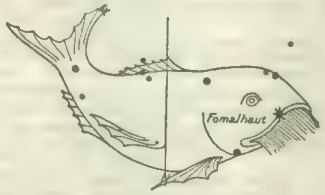
pisciform (pis′i-fôrm), *a.* [= F. *pisciforme*, < L. *piscis*, fish, + *forma*, form.] Having the form of a fish; like a fish in shape; technically, fish-like in structure or affinities; ichthyopsidan; ichthyomorphic.

piscina (pi-sī′nä), *n.*; pl. *piscinæ* (-nē). [L.: see *piscine*[1].] 1. A basin or tank, usually ornamental, as for a fountain or a bath; sometimes, a large shallow vase for ornamental fishes or aquatic plants; also, any tank or cistern of moderate size.

In the garden of the *piscina* [at Fontainebleau] is an Hercules of white marble. *Evelyn*, Diary, March 7, 1644.

2. *Eccles.*, a stone basin, in old churches generally established within a canopied niche placed close to the altar, used to receive the water in which the priest washes his hands before the celebration of the eucharist, and washes the chalice after the celebration. Now rarely used in the sanctuary, but often in sacristies.

Piscina in Morning Chapel, Lincoln Cathedral, England.



piscinal (pis′i-nal), *a.* [< ML. **piscinalis* (LL. *piscinalis*, pertaining to a bath), < L. *piscina*, a fish-pond: see *piscina*.] Of or pertaining to a piscina.

piscine[1]† (pis′in), *n.* [< ME. *pyscyne*, < OF. (and F.) *piscine* = Sp. Pg. It. *piscina*, < L. *piscina*, a fish-pond, a pool, cistern, basin, < *piscis*, fish: see *fish*[1].] A fish-pond.

And fyll all the *pyscynes*, whiche are in grett nowmber, and myche watir renneth now to waste.
Torkington, Diarie of Eng. Travell, p. 38.

piscine[2] (pis′in), *a.* [< NL. *piscinus*, < L. *piscis*, fish: see *fish*[1].] Pertaining in any way to fish or fishes; ichthyic: as, *piscine* remains; *piscine* affinities.

Piscis Australis (pis′is âs-trā′lis). [NL.: L. *piscis*, fish; *australis*, southern: see *austral*.] An ancient southern constellation, the Southern Fish. It contains the 1.3 magnitude star Fomalhaut, which is 30 degrees south of the equator, and is in opposition on the 3d of September. The figure represents a fish which swallows the water poured out of the vase by Aquarius.

The Constellation Piscis Australis.

Piscis Volans (pis′is vō′lanz). [NL.: L. *piscis*, fish; *volans*, flying: see *volant*.] The Flying-Fish, one of the southern constellations introduced by Theodori, or Keyser, at the end of the sixteenth century. It is situated west of the star β Argus, and contains two stars of the fourth magnitude. Also called *Volans*.

piscivorous (pi-siv′ō-rus), *a.* [= F. *piscivore* = Pg. It. *piscivoro*, < L. *piscis*, fish, + *vorare*, devour.] Fish-eating, as a bird; habitually eating or feeding upon fishes; ichthyophagous.

The meat is swallowed into the crop, or into a kind of antestomach observed in *piscivorous* birds.
Ray, Works of Creation.

pisé (pē-zā′), *n.* [F., < *piser*, build in pisé, < L. *pisere*, *pinsere*, beat, pound, bray, crush.] In *arch.*, stiff earth or clay, as used to form walls or floors, being rammed down until it becomes firm. This method is as old as the days of Pliny, and is still employed in France and in some parts of England.

pisgy (piz′gi), *n.* A dialectal form of *pixy*.

pish (pish), *interj.* [Imitative of a sound made to show contempt.] An exclamation of contempt.

It is not words that shake me thus. *Pish!* Noses, ears, and lips.—Is 't possible? *Shak.*, Othello, iv. 1. 42.

pish (pish), *v.* **I.** *intrans.* To express contempt by or as by the exclamation "Pish!"

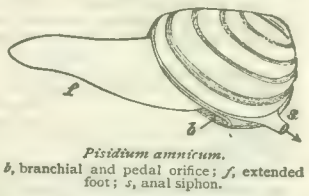
Our very smiles are subject to constructions;
Nay, sir, it 's come to this, we cannot *pish*
But 'tis a favour for some fool or other.
Fletcher, Wit without Money, iii. 1.

Bob. This is a Toledo! Pish!
Step. Why do you *pish*, captain?
B. Jonson, Every Man in his Humour, iii. 1.

II. *trans.* To say "Pish!" to.

Hor. Pish; ha, ha!
Lup. Dost thou *pish* me? Give me my long sword.
B. Jonson, Poetaster, v. 1.

pishamin (pish′a-min), *n.* Same as *persimmon*.—Swee[t] and **sour pishamin**, in Sierra Leone, two climbing shrubs, *Carpodinus dulcis* and *C. acida*, of the *Apocynaceæ*, bearing edible fruits resembling the persimmon: so called by colonists from the southern United States.



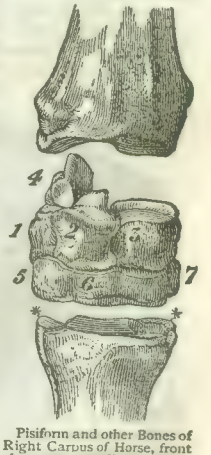
pishaug (pi-shâg′), *n.* [Narr. Ind. *npeshawog*.] The female or young of the surf-scoter, a duck, *Œdemia perspicillata*. [Mass.]

pish-pash (pish′pash), *n.* [E. Ind.] A broth of rice mixed with small bits of meat, much used as food for Anglo-Indian children.

It [a child] surfeits itself to an apoplectic point with *pish-pash*; it burns its mouth with hot curry, and bawls.
J. W. Palmer, The New and the Old, p. 341.

pishymew (pish′i-mū), *n.* A small white gull. [New Eng.]

Pisidiidæ (pis-i-dī′i-dē), *n. pl.* [NL., < *Pisidium* + *-idæ*.] A family of dimyarian bivalves, typified by the genus *Pisidium*. They have the branchial and pedal orifices confluent, the anal siphonate, the foot large, the shell equivalve and oval or cuneiform, with the area in front of the umbones larger than that behind, the hinge with two divergent cardinal teeth in each valve and four lateral teeth in the right and two in the left valve, and an external ligament. These small bivalves inhabit fresh water, and are remarkable for the posterior position of the umbones.



Pisidium amnicum.
b, branchial and pedal orifice; *f*, extended foot; *s*, anal siphon.

Pisidium (pī-sid′i-um), *n.* [NL. (Pfeiffer, 1821), dim. of *Pisum*, q. v.] The typical genus of *Pisidiidæ*, containing such forms as *P. amnicum*.

pisiform (pī′si-fôrm), *a.* and *n.* [< NL. *pisiformis*, < L. *pisum*, a pea (see *pease*[1], *Pisum*), + *forma*, form.] **I.** *a.* Having the form of a pea, as an ossification in tendons at joints; having a structure resembling peas. A variety of iron ore is called *pisiform*, from its being made up of small rounded masses about the size of a pea.

II. *n.* In *anat.*, a sesamoid bone, of about the size and shape of a pea, developed in the tendon of the flexor carpi ulnaris muscle of man and some other animals. It is generally reckoned as one of the carpal bones, making eight in all, in man, but is not morphologically an element of the carpus. It is often of irregular shape, and sometimes one of the largest bones in the carpus, as in the horse. See also cuts under *Artiodactyla*, *Perissodactyla*, *solidungulate*, and *hand*.

Pisiform and other Bones of Right Carpus of Horse, front view, corresponding to back of human wrist. The large bone above is the lower end of the radius. The large bone below is the upper end of the middle metacarpal, or cannon bone, showing also the ends of the lateral metacarpals, or splint-bones, * *. Between these are the carpal bones—1, cuneiform; 2, lunar; 3, scaphoid; 4, pisiform; 5, unciform; 6, magnum; 7, trapezoid.

pisiforme (pī-si-fôr′mē), *n.*; pl. *pisiformia* (-mi-ä). [NL., neut. of *pisiformis*: see *pisiform*.] The pisiform bone: more fully called *os pisiforme*.

pisk (pisk), *n.* Same as *night-hawk*, 1.

piskashish (pis′ka-shish), *n.* [Amer. Ind.] Same as *Hutchins's goose* (which see, under *goose*).

pisle†, *n.* An obsolete form of *pizzle*. *Purchas*, Pilgrimage, p. 503.

pismire (pis′mīr), *n.* [Early mod. E. also *pismyre*, *pysmyre*; < ME. *pismire*, *pissemyre*, *pys-*

mere, *pismoure*, *pyssmoure* (= MD. *pismiere*), an ant; < *piss* (with ref. to the strong urinous smell of an ant-hill) + *mire*[2], an ant: see *mire*[2]. Cf. MD. *pisimme*, *pisemme*, an ant, < *pissen*, piss, + **emme*, *emte*, ant: see *ant*[1].] An ant or emmet.

pismire-hill† (pis'mīr-hil), *n.* [< ME. *pismoure hylle* (also *pysmerys hylle*); < *pismire* + *hill*[1].] An ant-hill. *Cath. Ang.*, p. 281.

pisnet†, *n.* Same as *pinsnet*[2].

pisohamatus (pī'sō-hā-mā'tus), *n.* [NL., < Gr. πίσος, a pea, + L. *hamatus*, furnished with a hook, hooked.] Same as *piso-uncinatus*.

pisolite (pī'sō-līt), *n.* [< Gr. πίσος, a pea, + λίθος, stone.] Limestone having an oölitic structure, in which the individual grains or globules are as large as peas. This mode of occurrence is very characteristic of certain parts of the Oölitic or Jurassic series in England. (See *pea-grit*.) The name "Coral-Rag and *Pisolite*" was given by W. Smith, in 1815, to what are now generally called the "Corallian beds," a member of the Middle Oölitic series in England. Also *peastone*.

Pisolitic Structure.

pisolitic (pī-sō-lit'ik), *a.* [< *pisolite* + *-ic*.] Having the structure indicated by the term pisolite: as, *pisolitic* iron ore, etc. See *pisolite*.—**Pisolitic limestone**, a division of the Cretaceous, of some importance in the north of France, where it lies unconformably in patches on the top of the white chalk.

Pisonia (pī-sō'ni-ä), *n.* [NL. (Linnæus, 1737), named after Dr. *Pison*, a traveler in Brazil.] A genus of trees and shrubs, of the family *Nyctaginaceæ*, type of the tribe *Pisonieæ*, characterized by the terminal stigma and six to ten exserted stamens. There are about 30 species, mainly of tropical America. They bear opposite or scattered oblong-ovate or lanceolate leaves, small dicœcious rose, yellow, or greenish funnel-shaped flowers in panicled cymes, and a rigid or stony, rarely fleshy, elongated fruit (an anthocarp), often with rough and glutinous angles. Several species are trees cultivated for ornament. *P. Brunoniana* is the New Zealand para-para tree, a hardy evergreen; others are greenhouse shrubs with green flowers, as the fingrigo or cockspur, a rambling prickly bush of the West Indies with glutinous bur-like fruit, forming thickets. See *beefwood*, 2, *corkwood*, *loblolly-tree*.

Pisonieæ (pis-ō-nī'ē-ē), *n. pl.* [NL. (Reichenbach, 1827), < *Pisonia* + *-eæ*.] A tribe of apetalous plants of the family *Nyctaginaceæ*, characterized by the straight embryo and the elongated utricle included within the enlarged and closed calyx-tube. It includes about 60 species, of 2 genera, *Pisonia* being the type.

pisophalt† (pis'ō-falt), *n.* A corrupt form of *pissasphalt*.

piso-uncinatus (pī-so-un-si-nā'tus), *n.* [NL., < Gr. πίσος, a pea, + L. *uncinatus*, furnished with hooks or tenters, barbed.] A muscle, of rare occurrence, replacing the ligamentum pisohamatum, the short ligament passing from the pisiform to the uncinate bone.

piss (pis), *v.* [< ME. *pissen*, *pyssen*, *pischen* = OFries. *pissia* = D. MLG. LG. *pissen* = G. *pissen* = Icel. Sw. *pissa* = Dan. *pisse*, < F. *pisser* = Pr. *pissar* = It. *pisciare*, piss; supposed to be of imitative origin, perhaps orig. suggested by L. *pitissare*, *pytissare*, < Gr. πυτίζειν, spurt out water, spit frequently, freq. of πτύειν, = L. *spuere*, spew, spit: see *spew*.] **I.** *intrans.* To discharge the fluid secreted by the kidneys and detained in the urinary bladder; urinate.

> The moste Synne that ony man may do is to *pissen* in hire Houses that thei dwellen in.
> *Mandeville*, Travels, p. 242.

II. *trans.* To eject as urine. *Shak.*, M. W. of W., v. 5. 16.

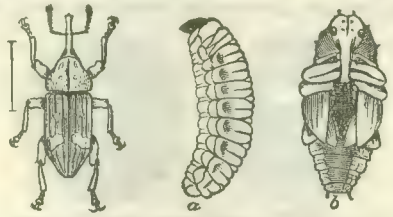
piss (pis), *n.* [< ME. *pysse* = D. *pis* = MLG. *pisse* = G. *pisse* = Icel. Sw. *piss* = Dan. *pis*; from the verb.] Urine.

piss-a-bed (pis'ą-bed), *n.* [= D. *pissebed*; tr. F. *pissenlit*, dandelion; so called with ref. to the diuretic properties of the expressed juice of the root.] The dandelion. [Vulgar.]

pissasphalt (pis'as-falt), *n.* [= F. *pissasphalte* = Sp. *pisasfalto* = Pg. *pissasphalto* = It. *pissasfalto*, < L. *pissasphaltus*, < Gr. πισσάσφαλτος, a compound of asphalt and pitch, < πίσσα, pitch, + ἄσφαλτος, asphalt.] A variety of bitumen. The word is only used as the equivalent in English of the corresponding Greek and Latin words cited in the etymology. As used by ancient writers, *pissasphalt* seems to have been an occasional designation of the semi-fluid variety of bitumen now called *maltha*. Also *pisasphalt*.

pissasphaltum (pis-as-fal'tum), *n.* [NL., neut. of L. *pissasphaltus*, m.: see *pissasphalt*.] Same as *pissasphalt*.

piss-bowl†, *n.* A chamber-pot. [Low.]



> She, beyng moche the more incensed by reason of her housbandes quietnesse and stilnesse, powred doune a *pissebolle* upon hym out of a windore.
> *Udall*, tr. of Apophthegms of Erasmus, p. 25. (*Davies*.)

piss-burnt (pis'bėrnt), *a.* Stained brown, as if scorched with urine: said of clothes. *Johnson*. [Low.]

piss-clam (pis'klam), *n.* The common long clam, *Mya arenaria*: so called from its squirting. [Local, U. S.]

pissing-while† (pis'ing-hwīl), *a.* A very short time. *B. Jonson*, Magnetick Lady, i. 7. [Low.]

Pissodes (pi-sō'dēz), *n.* [NL., < Gr. πισσώδης, like pitch, < πίσσα, pitch, + εἶδος, form.] A genus of weevils of the family *Curculionidæ*. *P. strobi* is a species whose larva injures pines.

White-pine Weevil (*Pissodes strobi*). *a*, larva; *b*, pupa. (Line shows natural size.)

piss-pot (pis'pot), *n.* [= D. *pispot* = MLG. *pissepot* = G. *pisspot* = Sw. *pisspotta* = Dan. *pissepotte*; as *piss* + *pot*.] A chamber-pot. [Low.]

pist[1], **piste** (pist), *n.* [< F. *piste* = Sp. Pg. *pista* = It. *pesta*, a track, < L. *pistus*, pp. of *pinsere*, *pisere*, beat, pound.] The track or footprint of a horseman on the ground he goes over; also, a race-track or training-ground.

pist[2] (pist), *interj.* [A sibilant syllable like *hist*, *whist*, *'st*.] Same as *hist*.

> *Pist!* where are you?
> *Middleton*, Changeling, v. 1.

pistace†, *n.* A Middle English form of *pistachio*.

pistache (pis-tash'), *n.* [< ME. *pistace*, < OF. and F. *pistache*: see *pistachio*.] Same as *pistachio*.

pistachio (pis-tä'shiō), *n.* [Formerly *pistacho*; < Sp. *pistacho* = F. *pistache* = Pg. *pistacha*, *pistacia* = It. *pistacchio*, *pistacio* = D. *pistasje* = G. *pistazie* = Sw. > *Bacon*, Nat. Hist., § 50.
>
> They [the Italians] call it *Pistachi*, a fruit much used in their dainty banquets. *Coryat*, Crudities, I. 184.

pistachio-green (pis-tä'shiō-grēn), *n.* A bright green much used in Eastern decoration.

pistachio-nut (pis-tä'shiō-nut), *n.* The nut of the *Pistacia vera*. It contains a greenish-colored kernel of a pleasant almond-like taste, which is extensively used by the Turks, Greeks, etc., as a dessert-nut or in confections, and is also exported. It yields a wholesome food-oil, which, however, soon becomes rancid. Sometimes called *bladder-nut*. Also *pistachio*, *pistacia-nut*. See *Pistacia*.

pistachio-tree (pis-tä'shiō-trē), *n.* See *Pistacia*.

Pistacia (pis-tā'shi-ä), *n.* [NL. (Linnæus, 1737), < L. *pistacia*, < Gr. πιστάκη, the pistachio-tree: see *pistachio*.] 1. A genus of trees, of the family *Anacardiaceæ* and tribe *Rhoideæ*, distinguished as the one apetalous genus of that polypetalous family. The 5 species are natives of western Asia, the Mediterranean region, the Canary Islands, and Mexico. They are large or small trees, exuding a resin (terebinth or mastic), and bearing alternate evergreen or deciduous leaves, pinnate or of three leaflets, and axillary panicles or racemes of small dicœcious flowers. (See *mastic*, I, *mastic-tree*, 1, *lentisk*, *balsam-tree*, *terebinth*, *turpentine-tree*, *Chian turpentine* (under *Chian*), *alk*[2], *alk-gum*, *pistachio-nut*, and *bladder-nut*, 2.) Several species yield useful wood, resins, and galls. The galls of a variety of *P. Khinjuk*, of northwestern India, are sold in the Indian bazaars for tanning, and are there known as *kakra singhi*.

pistacio, *n.* Same as *pistachio*.

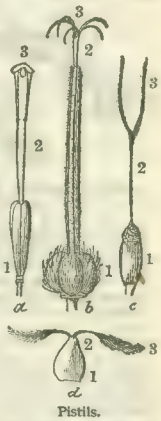
pistacite (pis'tā-sīt), *n.* [So called from its color; < *Pistacia* + *-ite*[2].] In *mineral.*, same as *epidote*. Also *pistazite*.

pistacite-rock (pis'tā-sīt-rok), *n.* Same as *epidosite*.

pistareen (pis-ta-rēn'), *n.* [Origin uncertain.] In the West Indies, the peseta.

piste, *n.* See *pist*[1].

pistel†, *n.* See *pistle*.



pisteller†, *n.* [ME., by apheresis from *epistler*.] Same as *epistler*.

Pistia (pis'ti-ä), *n.* [NL. (Linnæus, 1737), < Gr. πιστός, liquid, < πίνειν, drink.] A genus of monocotyledonous water-plants of the family *Araceæ*, constituting the subfamily *Pistioideæ*. It is characterized by the absence of perianth, and the position of the solitary or few staminate flowers on the short free apex of a spadix which is adnate below to the small white spathe, and bears at the base a single obliquely globose one-celled ovary with thick style and cup-like stigma. The only species, *P. Stratiotes*, is common throughout the tropics excepting Australia and the Pacific islands. It consists of a rosette of pale pea-green rounded and downy leaves. It floats unattached, its tufts of long feathery roots often not reaching the bottom, and increases by runners, often soon covering ponds and tanks, keeping the water fresh and cool. It bears the name of *tropical duckweed*, and in the West Indies of *water-lettuce*.

pistic† (pis'tik), *a.* [< Gr. πιστικός, in the N. T., qualifying νάρδος, nard; taken to mean 'liquid,' < πιστός, liquid (< πίνειν, drink). By some identified with πιστικός, faithful, genuine, < πιστός, faithful, < πείθειν, πιθεῖν, persuade, πείθεσθαι, πιθέσθαι, believe.] An epithet of nard: as, *pistic* nard.

> An alabaster box of nard *pistic* was sent as a present from Cambyses to the king of Ethiopia.
> *Jer. Taylor*, Works (ed. 1835), I. 245.

pistil (pis'til), *n.* [= F. *pistil* = Sp. *pistilo* = Pg. It. *pistillo* = G. Sw. *pistill* = Dan. *pistil*, < NL. *pistillum*, a pistil, so called from the resemblance in shape to the pestle of a mortar; < L. *pistillum*, *pistillus*, a pestle: see *pestle*.] In *bot.*, the female or seed-bearing organ of a flower. A complete pistil consists of three parts, *ovary*, *style*, and *stigma*. The ovary is the hollow part at the base which contains the ovules, or bodies destined to become seeds. The style is simply a prolongation of the ovary, and may sometimes be entirely wanting. The stigma is a part of the surface of the pistil denuded of epidermis, upon which the pollen for fertilizing the ovules is received, and through which it acts upon them. The form of the stigma is very various in different plants, being sometimes a mere knob or point at the apex of the style, a line, or double line, or of various shapes. There are usually several pistils, or at least more than one pistil, in each flower; collectively they are termed the *gynœcium*. See also cuts under *anticous*, *Lemna*, *lily*, *madder*, *Oxalis*, and *pitcher plant*.—**Compound pistil**. See *compound*[1].

pistillaceous (pis-ti-lā'shius), *a.* [< *pistil* + *-aceous*.] In *bot.*, of or belonging to the pistil.

pistillary (pis'ti-lą-ri), *a.* [= F. *pistillaire* = Pg. *pistillar*, < NL. **pistillaris*, < *pistillum*, pistil: see *pistil*.] In *bot.*, of or belonging to the pistil.—**Pistillary cord**, a channel which passes from the stigma through the style into the ovary.

pistillate (pis'ti-lāt), *a.* [= F. *pistillé*, < NL. *pistillatus*, < *pistillum*, pistil: see *pistil*.] In *bot.*, having a pistil: noting a plant or flower provided with a pistil, and most properly said of one having pistils only. See cuts under *Abietineæ*, *breadfruit*, and *croton*.

pistillation† (pis-ti-lā'shon), *n.* [< L. as if **pistillatio*(*n*-), < *pistillum*, *pistillus*, a pestle: see *pestle*.] The act of pounding with a pestle in a mortar.

> The best [diamonds] . . . are so far from breaking hammers, that they submit unto *pistillation*, and resist not an ordinary pestle. *Sir T. Browne*, Vulg. Err., ii. 5.

pistillidium (pis-ti-lid′i-um), *n.*; pl. *pistillidia* (-ä). [NL., < *pistillum*, a pistil, + Gr. *εἶδος*, form.] In cryptogams, same as *archegonium*.

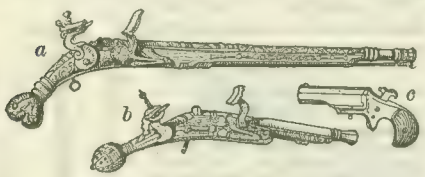
pistilliferous (pis-ti-lif′e-rus), *a.* [= F. *pistilifère* = Pg. *pistillifero*, < NL. *pistillum*, a pistil, + L. *ferre* = E. *bear*[1].] In *bot.*, bearing or having a pistil or pistils.

pistilline (pis′ti-lin), *a.* [< *pistil* + *-ine*[1].] In *bot.*, relating or belonging to the pistil.

The *pistilline* whorl is very liable to changes.
Encyc. Brit., IV. 128.

pistillody (pis′ti-lō-di), *n.* [< NL. *pistillum*, pistil, + Gr. *εἶδος*, form.] In *bot.*, the metamorphosis or transformation of other organs into pistils or carpels. Pistillody may affect the perianth, the sepals, very frequently the stamens, and rarely the ovule. See *metamorphosis*.

Pistioideæ (pis-ti-oi′dē-ē), *n. pl.* [NL. (Engler, 1876), < *Pistia* + *-oideæ*.] A subfamily of monocotyledonous plants, family *Araceæ*, consisting of the genus *Pistia*, and distinguished by the unappendaged spadix united to the back of the longer spathe, the two connate stamens, the numerous orthotropous ovules, and the single soft berry which constitutes the fruit.



pistle†, **pistel**†, *n.* [ME. *pistel*, *pystyl*, < AS. *pistol*, with apheresis of initial vowel < L. *epistola*, *epistula*, epistle: see *epistle*. For the apheresis, cf. *postle*, ult. < LL. *apostolus*, and *bishop*, ult. < LL. *episcopus*.] An epistle; a communication.

Piers Plowman (C), xvii. 289.

pistle-cloth†, *n.* A covering or wrapper for the ★books of the epistles.

pistol (pis′tol), *n.* [Formerly also *pistoll*; = D. *pistool* = G. *pistole* = Sw. Dan. *pistol*, < OF. *pistole* = Sp. Pg. *pistola*, < It. *pistola*, "a dag or pistoll" (Florio); cf. *pistolese*, "a great dagger, a wood-knife" (Florio), OF. *pistoyer*, a dagger; said to have been orig. made at Pistoria, < **Pistola*, now *Pistoia*, a town near Florence, < L. *Pistorium*, a city in Etruria, now *Pistoia*. The name appears to have been transferred from a dagger (a small sword) to a pistol (a small gun). Cf. *pistole*, and *pistolet*[1], *pistolet*[2].] A firearm intended to be held in one hand when aimed and fired. It came into use early in the sixteenth century, perhaps as early as 1500, for by 1520 it was common as a weapon of the reiters or German mercenary cavalry,

Pistols.

who were called *pistoleers* from its use. The early pistol was fitted with the wheel-lock, which was superseded by the flint-lock, and the latter by the percussion-lock. Pistols with more than one barrel have been in use from the introduction of the weapon, those with two having the barrels sometimes side by side, sometimes one over the other. The stock of the pistol has been made of many forms, the old cavalry pistol having it only slightly curved, so that it was held, when pointed at an object, by the right hand, with the lock uppermost, the barrel to the left, the trigger to the right. When accurate aiming was required, as in dueling-pistols, the handle was made much more curved. See *revolver*.—**Volta's pistol**, a metallic vessel, closed by a cork, containing an explosive mixture of gases which may be ignited by an electric spark.

pistol (pis′tol), *v. t.*; pret. and pp. *pistoled* or *pistolled*, ppr. *pistoling* or *pistolling*. [= F. *pistoler*; from the noun.] To shoot with a pistol.

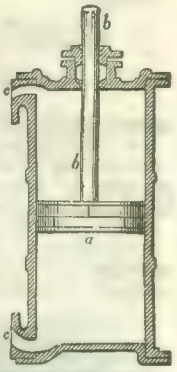
N. Ward, Simple Cobler, p. 88.

pistol-grip (pis′tol-grip), *n.* A handle, shaped like the butt of a pistol, attached to the under side of the small of the stock of fowling-pieces and rifles. It affords a better hold for the hand than the ordinary form of stock. Also *pistol-hand*. See cut under *gun*.

pistolier, *n.* See *pistoleer*.

pistol-pipe (pis′tol-pīp), *n.* In *metal-working*, the twyer of a hot-blast furnace. *E. H. Knight*.

pistol-router (pis′tol-rou″tėr), *n.* A form of carpenters' plane; a router having a handle shaped like a pistol-butt.



pistol-shaped (pis′tol-shāpt), *a.* Having the general form of a pistol—that is, partly straight, with a curved addition or extension like the stock of a pistol.

pistol-shot (pis′tol-shot), *n.* 1. The shot from a pistol, or the report from the firing of a pistol.—2. As an estimate of distance, the range, or the approximate range, of a pistol-ball.—3. One who shoots with a pistol; a marksman with the pistol: as, a good *pistol-shot*.

pistol-splint (pis′tol-splint), *n.* In *surg.*, a splint shaped like a pistol, employed especially in fractures of the lower end of the radius.

pistomesite (pis-tom′ē-sīt), *n.* [< Gr. *πιστός*, true, + *μέσον*, middle.] A carbonate of iron and magnesium like mesitite, intermediate between magnesite and siderite, but more closely related ★to the latter.

piston (pis′ton), *n.* [< F. *piston*, a piston, formerly also a pestle, = Sp. *pistón*, a piston, < It. *pistone*, a piston, var. of *pestone*, a large pestle, < *pestare*, pound, < ML. *pistare*, *pestare*, pound, freq. of L. *pinsere*, *pisere*, pp. *pistus*, beat, pound: see *pestle*, *pistil*.] 1. In *mach.*, a movable piece, generally of a cylindrical form, so fitted as to fill the sectional area of a tube, such as the barrel of a pump or the cylinder of a steam-engine, and capable of being driven alternately in two directions by pressure on one or the other of its sides. One of its sides is fitted to a rod, called the *piston-rod*, to which it imparts reciprocatory motion, as in the steam-engine, where the motion given to the piston-rod is communicated to the machinery, or by which, on the other hand, it is itself made to move, as in the pump. Two sorts of pistons are used in pumps—one hollow with a valve, used in the suction-pump, and the other solid, which is employed in the force-pump. The latter is also called a *plunger*.

Section of Steam-cylinder and Piston.
a, piston; *b b*, piston-rod; *c c*, steam-ports.

2. In musical wind-instruments of the trumpet family, one of the forms of valve whereby a crook is temporarily added to the tube and the pitch of the tones altered. It is operated by depressing a finger-knob, and thus pushing a plunger into a cylinder. The plunger has channels for changing the direction of the air-column. Pistons have been applied to various instruments, but especially to the cornet, which is therefore called the *cornet-à-pistons*.

3. In *organ-building*, a thumb-knob which may be pushed in like a piston, whereby some change in registration is pneumatically effected; a pneumatic coupler or combination knob.—4. The central retractile part of the acetabulum or sucker of a cephalopod, whose action in producing a vacuum resembles that of the piston of an air-pump.—**Differential piston.** See *differential*.—**Double-piston locomotive.** See *locomotive*.—**Oscillating piston**, an engine-piston which oscillates in a sector-shaped chamber.—**Piston blowing-machine.** See *blowing-machine*.

piston-head (pis′ton-hed), *n.* The disk which is fitted closely to the interior of the cylinder, and is the direct receiver or transmitter of the power developed: distinguished from the *piston-rod*.

piston-knob (pis′ton-nob), *n.* Same as *piston*, 3.

piston-packing (pis′ton-pak″ing), *n.* 1. Any material used to pack or make tight the space between the perimeter of a piston-head and the interior of the cylinder or -barrel in which it moves. Many different materials have been used for piston-packings, among which are hemp (usually in the form of a braided gasket), either by itself or saturated with tallow or mixtures of various oily or fatty materials, india-rubber or compositions of which india-rubber is a principal ingredient, leather, metallic alloys, etc. Piston-packings are usually inserted in a groove or depression in the perimeter of the piston-head, and expanded by mechanical compression to make a steam-tight, air-tight, water-tight, or gas-tight joint.

2. A mechanical device for packing pistons, in which the operation depends more upon the construction than upon the fibrous, plastic, or compressible properties of the packing-material.—**Piston-packing expander**, a steel spring in a piston-head serving to expand the packing against the interior of the cylinder; a piston-spring. *E. H. Knight*.

piston-pump (pis′ton-pump), *n.* A pump consisting of a pump-cylinder or -barrel in which a reciprocating piston works. It is provided with appliances for moving the piston, as a piston-rod or pump-rod, and a hand-lever actuating the pump-rod, or the cross-head of an engine attached to it; an induction-port or -ports covered with valves which permit a fluid to enter the pump-barrel, but prevent its return; and an eduction-port or -ports provided with valves which permit efflux of the fluid from the pump-barrel, but prevent its return. These are the essential features of piston-pumps. They usually also have induction- or suction-pipes, and frequently eduction- or discharge-pipes. See *pump*[1], *lift-pump*, *force-pump*, *plunger-pump*, and *suction-pump*.

piston-rod (pis′ton-rod), *n.* See *piston*, 1.—**Piston-rod packing.** (*a*) A material placed in the stuffing-box of a cylinder to make a steam-tight joint about the piston. (*b*) The stuffing-box of a piston.

piston-sleeve (pis′ton-slēv), *n.* The hollow trunk of a trunk-engine, within which the connecting-rod vibrates as it follows the crank. Such a piston has a hollow cylinder (sleeve) cast upon it in order to give it sufficient bearing-length to enable it in itself to perform also the function of a cross-head, the walls of the cylinder then performing the function of the cross-head slides, the pin which directly connects the pitman with the piston taking the place of the ordinary

cross-head pin, and no piston-rod being used. This construction enables the engine to be much shortened in the line of its stroke. See *trunk-engine*.

piston-spring (pis'ton-spring), *n.* A steel or brass spring within or behind a metallic packing ring of a piston.

piston-valve (pis'ton-valv), *n.* A reciprocating valve resembling a long or double piston, moved in a tubular passage to open or close a port or ports for alternately admitting steam to or exhausting it from the cylinder of an engine.

piston-wheel (pis'ton-hwēl), *n.* 1. In a rotary engine or pump, a disk or wheel carrying at its outer margin one or more pistons.—2. In a chain-pump, a wheel carrying an endless chain to which are attached pistons working in a tube or barrel. See *rotary engine* (under *rotary*), and *chain-pump*.

piston-whistle (pis'ton-hwis″l), *n.* A whistle in which, by shortening or lengthening the vibrating air-column through the movement of a piston sliding in the tube (or *bell*, as it is called in steam-whistles), a sound of varying pitch is emitted. See *Modoc whistle*, under *whistle*.

Pisum (pī'sum), *n.* [NL. (Rivinus, 1691), < L.: see *pease*[1], *pea*[1].] 1. A genus of leguminous plants of the tribe *Vicieæ*, distinguished from the large related genus *Lathyrus* by the dilated summit of the style, which is inflexed and hardened, with reflexed margins above, and bearded on the inner face. There are 6 species, natives of the Mediterranean region. The common garden- and field-pea is *P. sativum*. See *pea*[1].

2. In *zoöl.*, a genus of bivalves. *Megerle*, 1811.

pit[1] (pit), *n.* [< ME. *pit*, *put*, *pyt*, *pette*, *putte*, *pytte*, < AS. *pyt*, *pytt*, a pit, hole, = OFries. *pet* = D. *put* = OLG. *pute*, MLG. LG. *putte* = OHG. *puzzi*, *phuzzi*, *pfuzi*, also *puzza*, *putza*, *buzza*, etc., MHG. *butze*, *bütze*, *pfütze*, G. *pfütze* = Icel. *pyttr* = Sw. *puss* = Dan. *pyt* = F. *puits* = Wall. *putz* = Pr. *potz*, *poutz* = Sp. *poza* = Pg. *poço* = It. *pozzo*, a well, < L. *puteus*, a well, a pit; perhaps orig. a spring of pure water, < √ *pu* in *purus*, pure: see *pure*.] 1. A hole or cavity in the ground, whether natural or made by digging.

And faste by it is a litylle *pytt* in the Erthe, where the foot of the Pileer is zit entered. *Mandeville*, Travels, p. 94.

And as the child gan forby for to pace,
This cursed Jew him hent and held him faste,
And kitte his throte, and in a *pit* him caste.
Chaucer, Prioress's Tale, l. 119.

Specifically—(*a*) An excavation or hole in the ground, covered or otherwise concealed, for snaring wild beasts; a pitfall. (*b*) A hole dug in the soil of a potato- or turnip-field, for storing potatoes, etc., during the winter. The vegetables stored are usually piled up to some height and covered with earth to keep out the frost. [Great Britain.] (*c*) In *hort.*, an excavation in the soil, generally covered by a glazed frame, for protecting tender plants, or for propagation. (*d*) In *founding*, a cavity scooped in the floor to receive cast-metal. (*e*) The shaft of a coal-mine, or the mine itself. (*f*) A vat, such as is used in tanning, bleaching, dyeing, etc.

2. A cavity or depression in the body: as, the *pit* of the stomach; the armpits.

For person and complexion, they haue broad and flat visages, . . . thin haired vpon the upper lip and *pit* of the chin, light and nimble-bodied with short legges. *Purchas*, Pilgrimage, p. 421.

I found him lying on his bed with his clothes on, his shoes merely slipped off, and his hat held securely over the *pit* of his stomach. *H. B. Stowe*, Oldtown, p. 415.

3. A very small depression or dent, such as that left on the flesh by a pustule of the smallpox; a dimple.

Look what a pretty *pit* there's in her chin!
Middleton, Spanish Gypsy, iii. 2.

The sandstone surface is distinctly marked by raindrop *pits* and by ripple or wave marks. *Science*, IV. 273.

4. In *bot.*, one of the pores or thin places in the more or less lignified cell-walls of many plants. The bordered pits, which are especially characteristic of the wood of coniferous plants, have developed internally along the border of each thin area on the tracheid wall, an overarching ring of thickening material. They are very regularly arranged.

5. A hollow or cup.

Flowers on their stalks set
Like vestal primroses, but dark velvet
Edges them round, and they have golden *pits*.
Keats, Endymion, i.

6. A deep place; a gulf; an abyss. Specifically—(*a*) The grave.

Frendes, I am poor and old,
And almost, God wot, on my *pittes* brynke.
Chaucer, Merchant's Tale, l. 157.

Thou hast brought up my soul from the grave; thou hast kept me alive, that I should not go down to the *pit*. Ps. xxx. 3.

(*b*) The abode of evil spirits; hell.

We also saw there the Hobgoblins, Satyrs, and Dragons of the *pit*. *Bunyan*, Pilgrim's Progress, p. 181.

Each one reels
Under the load towards the *pit* of death.
Shelley, Prometheus Unbound, ii. 4.

7. An inclosed place or area for the exhibition of combats of dogs or cocks, or where dogs are trained or exhibited in killing rats: as, a dog-*pit*; a cock*pit*.

Sir Thomas Jermin, meaning to make himself merry, and gull all the cockers, sent his man to the *pit* in Shoe-lane with an hundred pounds and a dunghill cock, neatly cut and trimmed for the battle.
Harl. MS., No. 6395, quoted in Strutt's Sports and Pastimes, p. 376.

What though her chamber be the very *pit*
Where fight the prime cocks of the game for wit.
B. Jonson, An Epigram on the Court Pucell.

8. That part of a theater which is on the floor of the house, somewhat below the level of the stage, and behind the usual station of the musicians. In the United Kingdom the name is now often given to the inferior seats behind the stalls. In the United States it has been superseded by *orchestra* or *parquet*.

I and my wife sat in the *pitt*, and saw "The Bondman" done to admiration. *Pepys*, Diary, March 26, 1661.

But we, the Actors, humbly will submit,
Now, and at any time, to a full *Pit*.
Wycherley, Country Wife, Prol.

All bad Poets we are sure are Foes,
And how their Number's swell'd the Town well knows;
In shoals I've mark'd 'em judging in the *Pit*.
Congreve, Way of the World, Epil.

The *Pit* is an Amphitheater, fill'd with Benches without Back boards, and adorn'd and cover'd with green Cloth.
Quoted in *Ashton's* Social Life in Reign of Queen Anne, II. 6.

9. Those who occupy the pit in a theater; the people in the pit.

Now, sir, your soliloquy—but speak more to the *pit*, if you please—the soliloquy always to the *pit*—that's a rule. *Sheridan*, The Critic, iii. 1.

He [King George IV.] was received with immense acclamations, the whole *pit* standing up, hurrahing and waving their hands. *Greville*, Memoirs, Feb. 7, 1821.

10. That part of the floor of an exchange where a special kind of business is carried on: as, a grain-*pit*; a provision-*pit*. [U. S.]—11. The cockpit of a ship.—12. The framework in a belfry which supports the pivoted yoke of a swinging bell. *Sir E. Beckett*, Clocks and Watches, p. 359. [Now little used.]—**Gjers soaking-pit**, a cavity lined with refractory material, used in metal-working to inclose large ingots, in order to preserve them at a high temperature, and thus avoid the necessity of reheating.—**Olfactory pits**, certain hollows of the embryonic skull which will become nasal passages.—**Pine-pit**, in *hort.*, a pit adapted for raising young plants to replenish pineries.—**Pit and gallows**, in feudal times, the privilege granted by the crown to barons of executing persons convicted of theft by hanging the men on a gallows and drowning the women in a pit. Also *pot and gallows*.—**The bottomless pit**, hell.

And I saw an angel come down from heaven, having the key of *the bottomless pit* and a great chain in his hand. Rev. xx. 1.

Your deep-conceited cutpurse, who by the dexterity of his knife will draw out the money and make a flame-coloured purse show like *the bottomless pit*, but with never a soul in 't. *Middleton*, The Black Book.

To shoot or fly the pit, to turn tail and try to escape, like a craven cock in a pit.

The whole nation . . . expressing utmost detestation and abhorrence of the Whig principles, which made the whole party *shoot the pit* and retire.
Roger North, Examen, p. 327. (*Davies.*)

We were all to blame to make madam here *fly the pit* as she did. *Richardson*, Pamela, ii. 308. (*Davies.*)

pit[1] (pit), *v.*; pret. and pp. *pitted*, ppr. *pitting*. [< *pit*[1], *n.*] I. *trans.* 1. To catch, lay, or bury in a pit.

They lived like beasts and were *pitted* like beasts.
Granger, On Ecclesiastes (1621), p. 213. (*Latham.*)

2. To form a little pit or hollow in; mark with little dents, as by the pustules of the smallpox.

An anasarca, a species of dropsy, is characterized by the shining and softness of the skin, which gives way to the least impression, and remains *pitted* for some time.
Sharpe.

The red acid acts too powerfully and *pits* the copper.
Workshop Receipts, 1st ser., p. 172.

3. To impress with rounded cup-like hollows, as the mold for a metal casting which is to have rounded bosses on it.—4. To put or set in the pit or area for fighting; match as contestants or opponents, one against another, as dogs or cocks: used figuratively of any competitors: generally followed by *against*.

The *pitting* of them [cocks], as they call it, for the diversion and entertainment of man, . . . was, as I take it, a Grecian contrivance. *Archæologia*, III. 133.

Socrates is *pitted against* the famous atheist from Ionia, and has just brought him to a contradiction in terms.
Macaulay, Athenian Orators.

II. *intrans.* To become marked or spotted with pits or depressions; retain the mark of pressure by or as by the fingers: as, in dropsy the skin *pits* on pressure.

The Carriage Monthly tells its readers how to remove varnish from a panel after it has *pitted*.
Sci. Amer., N. S., LVII. 276.

pit[2] (pit), *n.* [A var. of *pip*[2], by confusion with *pit*[1].] The stone of a fruit, as of a cherry or plum. [U. S.]

pit[3] (pit), *v. t.* A Middle English and Scotch form of *put*[1].

pita (pē'tä), *n.* [Sp., < Quichua *pita*.] 1. The maguey, *Agave Americana*, and other species of the genus.—2. The fiber derived from *Agave* leaves. It is of great strength, utilized for cordage, etc., and likely to be of commercial importance. Sometimes called *pita-flax*, *pita-hemp*, or *pita-thread*. The name is applied less properly to the istle-fiber (see *istle*) and to that of *Furcræa fœtida*.

pita-fiber (pē'tä-fī″bėr), *n.* Same as *pita*, 2.

pitahaya (pē-tä-hä'yä), *n.* [Haytian *pitahaya* or *pitaaya*.] On the islands of Hayti and Cuba, the aboriginal name of the fruit of *Cereus triangularis*. This name was applied by the Spanish conquistadores at a very early date to similar fruits of other species of *Cereus* and of *Echinocereus* growing in Mexico. See *strawberry-pear*, and ★*pitayita* in the supplement.—**Pitahaya-woodpecker**, *Centurus uropygialis*, the Gila woodpecker, which abounds in southern Arizona, and usually nests in the giant cactus. Also called *saguaro woodpecker*.

Pitahaya-woodpecker (*Centurus uropygialis*).

pitailet, petailet, *n.* [ME., also *pitaill*, *pitall*, *pettaill*; < OF. *pitaille*, *pietaille*, *pedaile*, foot-soldiers, infantry, the populace, < *piet*, *pied*, foot, < L. *pes* (*ped-*), foot: see *foot*. Cf. *peon*.] Foot-soldiers; infantry; rabble.

Than Orienx chese oute of peple as many as hym liked, that were wele xl^ml with-outen the *petaile* that after hem folowed. *Merlin* (E. E. T. S.), ii. 253.

Pitaka (pit'a-kä), *n.* [Skt., lit. 'basket.'] One of the three doctrinal divisions of the Buddhist canon. See *Tripitaka*.

The great Tibetan teacher . . . had no access to the Pāli *Pitakas*. *Encyc. Brit.*, XIV. 230.

pitancet, *n.* A Middle English form of *pittance*.

pitangua (pi-tang'gwä), *n.* [Tupi.] A Brazilian tyrant-flycatcher with an enormous bill, *Megarhynchus pitangua*. See cut under *Megarhynchus*.

Pitangus (pi-tang'gus), *n.* [NL. (Swainson, 1827), < Tupi *pitangua*.] A genus of clamatorial passerine birds of the family *Tyrannidæ*, or tyrant-flycatchers; the Derbian flycatchers, not including the pitangua. They have a long and straight stout bill hooked at the end, rounded wings longer than the nearly square tail, the plumage brown above and yellow below, the head marked with black, white, and orange, the wings and tail extensively rufous. There are several species, inhabiting the warmer parts of America, as *P. sulphuratus*. One is found in Mexico and Texas, *P. derbianus*, about 10½ inches long. Also called *Saurophagus* and *Apolites*.

pitapat (pit'a-pat), *adv.* [Also *pitpat*, *pitypat*, *pittypat*; a varied reduplication of *pat*[1].] With a quick succession of beats; in a flutter; with palpitation.

Y. Arch. Lord, how my heart leaps!
Pet. 'Twill go *pit-a-pat* shortly.
Fletcher, Loyal Subject, ii. 2.

His heart kep' goin' *pity-pat*,
But hern went pity Zekle.
Lowell, The Courtin'.

pitapat (pit'a-pat), *a.* [< *pitapat*, *adv.*] Fluttering.

She immediately stepped out of her pew and fell into the finest *pitty-pat* air. *Steele*, Spectator, No. 503.

pitapat (pit'a-pat), *n.* [< *pitapat*, *adv.*] A light quick step; a succession of light beats or taps.

Now again I hear the *pit-a-pat* of a pretty foot through the dark alley. *Dryden*, Don Sebastian, iii. 2.

pitapat (pit'a-pat), *v. i.* [< *pitapat, adv.*] To go pitapat.

Run bow'd with burthens to the fragrant Fat,
Tumble them in, and after *pit-a-pat*
Vp to the Waste.
Sylvester, tr. of Du Bartas's Weeks, ii., The Magnificence.

pita-wood (pē'tä-wud), *n.* The pith-like wood of *Furcræa gigantea*, used sometimes in Rio Janeiro as a slow-match, and sometimes to line drawers for holding insects.

Pitaya bark. See *bark*[2] and *Cinchona*.

pit-bottom (pit'bot"um), *n.* In *coal-mining*, the entrance to a mine and the underground roads in the immediate vicinity, whether at the bottom of the pit or at any point in it beneath the surface at which the cages are loaded. Also *pit-eye*. [Eng.]

Pitcairnia (pit-kār'ni-ä), *n.* [NL. (L'Héritier, 1788); named after Archibald *Pitcairne* (1652–1713), professor of medicine at Edinburgh.] A genus of monocotyledonous herbs, of the family *Bromeliaceæ*, type of the tribe *Pitcairnieæ*, characterized by the terminal raceme with filiform styles and septicidally three-valved capsules. There are about 140 species, natives of tropical America. They bear close-clustered linear short or elongated rigid leaves, generally with spiny margins, and many showy narrow flowers of scarlet, yellow, or other colors, often with large colored bracts. They are considered handsome greenhouse-plants. See *Bromeliaceæ*.

Pitcairnieæ (pit-kār-ni'ē-ē), *n. pl.* [NL. (A. Richard, 1842), < *Pitcairnia* + *-eæ*.] A tribe of plants of the family *Bromeliaceæ* and the pineapple family, characterized by the superior ovary, and seeds with linear entire or wing-like appendage. It is now restricted to 3 genera, all of tropical America, of which *Pitcairnia* is the type and ★most important genus.

pitch[1] (pich), *v.*; pret. and pp. *pitched*, formerly *pight*, ppr. *pitching*. [< ME. *picchen, pycchen* (pret. *pighte, pizte*, pp. *pight, pizt, pyzt*), pitch, fix, pick, etc.; assibilated form of *picken, pikken*, pick: see *pick*[1], *v.*] **I.** *trans.* **1†.** To pierce with a sharp point; divide with something sharp and pointed; transfix.

Christus, thi sone, that in this world alighte
Upon the cross to suffre his passioun,
And eek suffred that Longius his herte *pighte*.
Chaucer, A. B. C., l. 163.

2. To thrust into the ground, as a stake or pointed peg; hence, to plant or fix; set up; place: as, to *pitch* a tent or a camp; to *pitch* the wickets in cricket.

Ther thei *pight* the kynges teynte, by the feirest welle and the moste clere that thei hadde seen.
Merlin (E. E. T. S.), ii. 150.

Sharp stakes . . .
They *pitched* in the ground.
Shak., 1 Hen. VI., i. 1. 118.

Where he spied a parrot or a monkey, there he was *pitched*; . . . no getting him away.
B. Jonson, Bartholomew Fair, i. 1.

The Southern lords did *pitch* their camp
Just at the bridge of Dee.
Bonny John Seton (Child's Ballads, VII. 231).

After their thorrow view of ye place, they began to *pitch* them selves upon their land & near their house.
Bradford, Plymouth Plantation, p. 340.

Wickets were *pitched* at the orthodox hour of eleven a. m.
First Year of a Silken Reign, p. 84.

3. To fix or set in order; array; arrange; set.

A hundrith shippes full shene with sharp men of armys,
Pight full of pepull & mony prise knight.
Destruction of Troy (E. E. T. S.), l. 4056.

There was no need that the book [the Book of Common Prayer] should mention either the learning of a fit, or the unfitness of an ignorant minister, more than that he which describeth the manner how to *pitch* a field should speak of moderation and sobriety in diet.
Hooker, Eccles. Polity, v. 31.

Having thus *pitched* the fields, from either part went a Messenger with these conditions.
Quoted in *Capt. John Smith's* Works, I. 135.

4. To fix, as a rate, value, or price; rate; class;

Whose vulture thought doth *pitch* the price so high.
Shak., Venus and Adonis, l. 551.

They *pitched* their commodities at what rate they pleased.
Quoted in *Capt. John Smith's* Works, II. 163.

5. To fling or throw; hurl; toss: as, to *pitch* a pike or a dart; to *pitch* a ball or a penny.

He [his horse] *pighte* him on the pomel of his heed.
Chaucer, Knight's Tale, l. 1831.

Now, if thou strik st her but one blow,
I'll *pitch* thee from the cliff as far
As ever peasant *pitched* a bar!
Scott, L. of the L., iv. 23.

As for his cousin Ringwood Twysden, Phil had often entertained a strong desire to wring his neck and *pitch* him down stairs.
Thackeray, Philip, xiii.

6. Specifically, in *base-ball*, to serve (the ball) to the batter. See *base-ball*.—**7.** In *music*, to determine or set the key (tonality) or key-note of; fix the relative shrillness or height of; start or set (a piece) by sounding the key-note or first tone: as, to *pitch* a tune high.—**8.** To pave roughly; face with stones.

A plaine *pitched* walke subdio, that is vnder the open ayre.
Coryat, Crudities, I. 30.

9. In certain card-games, to lead one of (a certain suit), thereby selecting it as trump.—**Pitched battle.** See *battle*[1].—**Pitched work,** in *masonry*, work in rough stones which are neither thrown down indiscriminately nor laid in regular courses, but let fall into place with approximate regularity, so as to bind one another. It is used in hydraulic engineering for the facing of breakwaters, the upper parts of jetties, etc.

II. *intrans.* **1.** To fix a tent or temporary habitation; encamp.

Laban with his brethren *pitched* in the mount of Gilead.
Gen. xxxi. 25.

2†. To come to rest; settle down; sit down; alight.

There *pitching* down, once more adieu, said she,
Dull home, which no such seat couldst spread for me.
J. Beaumont, Psyche, ii. 19.

Take a branch of the tree whereon they [the bees] *pitch*, and wipe the hive.
Mortimer, Husbandry.

A bud which . . . flowers beneath his sight;
And, in the middle, there is softly *pight*
A golden butterfly.
Keats, Endymion, ii.

3. To fix or decide: with *on* or *upon*.

He's the man I've *pitched on*
My housband for to be.
Margaret of Craignargat (Child's Ballads, VIII. 252).

Pitch upon the best course of life, and custom will render it the most easy.
Tillotson.

Having *pitched upon* a time for his voyage, when the skies appeared propitious he exhorted all his crews to take a good night's rest.
Irving, Knickerbocker, p. 108.

4. To plunge or fall headlong.

Thereupon Zed *pitched* headforemost upon him across the streaming pile, and the couple rolled and pounded and kicked and crushed as before.
W. M. Baker, New Timothy, p. 210.

5. *Naut.*, to plunge with alternate fall and rise of bow and stern, as a ship passing over waves. The motion is most marked when running into a head sea.—**6.** To throw, toss, or hurl a missile or other object; throw a ball; specifically, in games of ball, to fill the position of pitcher; serve the ball to the batsman.—**7.** To buck; jump from the ground with the legs bunched together, as a mustang or mule. *Sportsman's Gazetteer.* See cut under *buck*[2].—**Pitch and pay†,** pay down at once; pay ready money.

Let senses rule; the word is "*Pitch and pay*";
Trust none.
Shak., Hen. V., ii. 3. 51.

To pitch in, to begin; set to work with promptness or energy. [Colloq.]—**To pitch into,** to attack; assault. ★[Colloq.]

pitch[1] (pich), *n.* [< *pitch*[1], *v.* In def. 14 an assibilated form of *pick*[1], *n.*, of same ult. origin.] **1.** The highest point or reach; height; acme.

Boniface the Third, in whom was the *pitch* of pride, and height of aspiring haughtiness.
Fuller.

2. Height (or depth) in general; point or degree of elevation (or of depth); degree; point.

If a man begin too high a *pitch* in his favours, it doth commonly end in unkindness and unthankfulness.
Bacon, Advancement of Learning, ii. 312.

To lowest *pitch* of abject fortune thou art fallen.
Milton, S. A., l. 169.

The chief actor in the poem falls from some eminent *pitch* of honour and prosperity into misery and disgrace.
Addison, Spectator, No. 297.

To such an absurd *pitch* do the Moos'lims carry their feeling of the sacredness of women that entrance into the tombs of some females is denied to men.
E. W. Lane, Modern Egyptians, I. 224.

3. In *acoustics* and *music:* (*a*) That characteristic of a sound or a tone which depends upon the relative rapidity of the vibrations by which it is produced, a relatively acute or high pitch resulting from rapid vibrations, and a relatively grave or low pitch from slow vibrations. Pitch is therefore coördinate with force, timbre, and duration. It is estimated and stated in terms of the vibration per second of the sounding body. It is experimentally determined either by direct comparison with a standard tuning-fork or by such instruments as the siren. (*b*) A particular tonal standard or example with which given tones may be compared in respect to their relative height: as, concert *pitch;* French *pitch.* Various standards have from time to time been used or promulgated—as, for example, *classical pitch*, during the last half of the eighteenth century, for the A next above middle C about 415 to 430 vibrations per second; *concert pitch* (commonly called *high pitch*), used in concert and operatic music during the middle of the nineteenth century, varying for the same A from about 440 to 455 vibrations; *French pitch* (commonly called *low pitch*), the diapason normal adopted by the French Academy in 1859, for the same A 435 vibrations; *philosophical pitch*, an arbitrary pitch for middle C, obtained by taking the nearest power of 2, that is, 256 vibrations, or for the next A above about 427 vibrations; *Scheibler's pitch*, adopted by the Stuttgart Congress of Physicists in 1834, for the same A 440 vibrations.

Specifically—**4.** The height to which a hawk rises in the air when waiting for game to be flushed, or before stooping on its prey.

The greatness of thy mind does soar a *pitch*
Their dim eyes, darken'd by their narrow souls,
Cannot arrive at.
Fletcher (and another), False One, v. 4.

5†. Stature; height.

So like in person, garb, and *pitch*.
S. Butler, Hudibras, III. iii. 78.

6. Inclination; angle to the horizon.—**7.** In *mech.*: (*a*) The distance between the centers of two adjacent teeth in a cog-wheel, measured on the pitch-line, which is concentric with the axis of revolution, and so far from the base of the teeth as to have the velocity which the periphery of the wheel would have if it drove the other by contact of surfaces. (*b*) The distance between the medial lines of any two successive convolutions or threads of a screw, measured in a direction parallel to the axis: the pitch of a propeller-screw is the length measured along the axis of a complete turn. (*c*) The distance between the paddles of a steamship, measured on the circle which passes through their centers. (*d*) The distance between the stays of marine and other steam-boilers. (*e*) The distance from center to center of rivets. (*f*) The rake of saw-teeth (see *rake*).—**8.** A throw; a toss; the act by which something is thrown or hurled from one or at something. Specifically, in *base-ball:* (*a*) A throw or serve of the ball to the batter. (*b*) The right or turn to pitch the ball.

9. A place at which one stations oneself or is stationed; specifically, a place on which to pitch or set up a booth or stand for the sale or exhibition of something; a stand. [Eng.]

In consequence of a New Police regulation, "stands" or "*pitches*" have been forbidden.
Mayhew, London Labour and London Poor, I. 12.

10. A variation of all-fours in which the players bid for the trump and the successful bidder must lead or pitch the suit he selects.—**11.** In *mining*, a certain length on the course of the lode, taken by a tributor, or to work on tribute. Also called *tribute-pitch*. [Cornwall, Eng., chiefly.]—**12.** In *floor-cloth printing*, one of the guide-pins used as registering-marks, corresponding to the register-points in lithographic printing.—**13.** In *naval arch.*, downward angular displacement of the hull of a vessel, measured in a longitudinal vertical plane at right angles with and on either side of a horizontal transverse axis passing through the center of flotation: a correlative of *scend* (which see).—**14.** An iron crowbar with a thick square point, for making holes in the ground. *Halliwell.* [Prov. Eng.]—**Auction-pitch,** a game of pitch in which the player entitled to pitch the trump may sell the privilege to the highest bidder, adding the points bid to his score before play, or may reject all bids and himself lead the play, failure to make as many points as the highest bid reducing the pitcher's score correspondingly.—**Gaining pitch,** in a screw propeller, a pitch which increases from the leading edge of the wings to the following edge. *E. H. Knight.*—**Head of the pitches,** in *angling*. See *head*.—**Natural pitch.** See *natural*.—**Pitch and hustle.** See *hustle*.—**Pitch and toss.** See *pitch-and-toss*.—**Pitch hyperbola.** See *hyperbola*.—**Pitch of an arch,** the rise or height of an arch.—**Pitch of a plane,** the angle at which the iron is set in the stock. *Common pitch*, of 45° from the horizontal line, is used in bench-planes adapted for soft woods; *half pitch*, or 60°, is used in molding-planes for mahogany and other woods difficult to work; *middle pitch*, or 55°, is used in molding-planes for deal and smoothing-planes for mahogany and woods of like character; *York pitch*, or 50° from the horizon, is used in bench-planes for mahogany and other hard or stringy woods, and for wainscoting. The pitch of metal-planes and scraping-planes is 80°.—**Pitch of a roof,** the inclination of a roof. It is expressed in angular measurement, in parts of the span, or in the proportion which the rafters bear to the span. The *common pitch* has a rafter three quarters the length of the span; the *Gothic* has a rafter of the full length of the span; the *Elizabethan*, a rafter longer than the span; the *Greek*, an angle of from 12° to 16°; and the *Roman*, an angle of from 23° to 24°.—★**Pitch of a saw,** the inclination of the face of the teeth.

pitch[2] (pich), *n.* [< ME. *pich, pych, pyche, pycche*, assibilated forms of *pik, pyk, pikke, pykke* (> Sc. *pick*), < AS. *pic* = OS. OFries. *pik* = MD. *pik*, D. *pek* = MLG. *pik, pek* = OHG. *peh, pech, beh*, MHG. *pech, bech*, G. *pech* = Icel. *bik* = Sw. *beck* = Dan. *beg* = Gael. *pic* = W. *pyg* = OF. *peiz, pois* (> ME. *peys, pays, pais*), F. *poix* = Sp. Pg. *pez* = It. *pece*, < L. *pix* (*pic-*), pitch, = Gr. *πίσσα*, Attic *πίττα* (for **πίκυα*), pitch, turpentine, also the fir-tree, = Lith. *pikkis*, pitch; prob. akin to Gr. *πίτυς*, the pine-tree, L. *pīnus* (for **picnus*), the pine-tree: see *pine*[1].] **1.** A thick

tenacious bituminous substance, hard when cold, the residuum of tar after its volatile elements have been expelled: obtained also from the residues of distilled turpentine. It is manufactured mostly in tar-producing countries, especially Russia. It is largely used to cover the seams of vessels after calking, and to protect wood from the effects of moisture; also medicinally in ointments, etc.

The liquid *pitch* or tarre throughout all Europe is boiled out of the torch tree; and this kind of *pitch* serveth to calke ships withall, and for many other uses.
Holland, tr. of Pliny, xvi. 11.

2. The sap or crude turpentine which exudes from the bark of pines. [An improper use.]—3. Bitumen: a word of indefinite meaning used to designate any kind of bituminous material, but more especially the less fluid varieties (maltha and asphaltum).

And the streams thereof shall be turned into *pitch*, and the dust thereof into brimstone, and the land thereof shall become burning *pitch*. Isa. xxxiv. 9.

Burgundy or **white pitch**, the yellowish, hard and brittle, strongly adhesive aromatic resin derived by incision from the Norway spruce, *Picea Abies*, and probably other conifers: obtained in various parts of Europe, perhaps formerly in Burgundy. It is used as a mild rubefacient, and for non-medicinal purposes. It is often replaced by inferior artificial substitutes.—**Canada pitch**, a resin exuding from the bark of the hemlock-spruce, *Tsuga Canadensis*, in North America. It is used in medicine like Burgundy pitch. Also called *hemlock-pitch* and (improperly) *hemlock-gum*.—**Elastic mineral pitch**. See *elastic*.—**Jew's pitch**, mineral pitch; bitumen.—**Mineral pitch**. See *mineral*.

pitch[2] (pich), *v. t.* [< ME. *pitchen* (= Sw. *becka* = Dan. *bege*); from the noun.] 1. To smear or cover over with pitch: as, to *pitch* the seams of a ship.

Then into a *pitched* potte he wol hem clene [collect],
Or salt water oon day and nyght hem lene.
Palladius, Husbondrie (E. E. T. S.), p. 90.

Great and well *pitched* Cables were twined about the masts of their shippes. *Hakluyt's Voyages*, I. 593.

Pitch it [the ark] within and without with pitch.
Gen. vi. 14.

2. To make pitch-dark; darken. [Rare.]

The welkin *pitched* with sudden cloud. *Addison.*

3. In *brewing*, to add to (wort) the yeast for the purpose of setting up fermentation.—**Pitched paper**. See *paper*.

pitch[3] (pich), *v. i.* [An assibilated form of *pick*[4], var. of *peak*[2].] To lose flesh in sickness; fall away; decline. *Halliwell.* [Prov. Eng.]

pitch-and-toss (pich'and-tos'), *n.* A game in which the players pitch coins at a mark, that one whose coin lies nearest to the mark having the privilege of tossing up all the coins together and retaining all the coins that come down "head" up. The next nearest player tosses those that are left, and retains all that come down "head" up, and so on until the coins are all gone.

Two or three chimney sweeps, two or three clowns
Playing at *pitch and toss*, sport their "Browns."
Barham, Ingoldsby Legends, II. 109.

pitch-back wheel. See *breast-wheel*.

pitch-black (pich'blak), *a.* Black as pitch.

pitchblende (pich'blend), *n.* A mineral containing uranium oxid with other rare elements, occurring in pitchy black masses, rarely in octahedrons. See the supplement.

pitch-block (pich'blok), *n.* In *metal-working*, a bed for supporting the object to be worked in such a manner that it can be turned at any pitch or angle. The bottom of the block is hemispherical, and is supported in a corresponding hollow of a bed or foundation block. For certain work a pad of leather is interposed between this and the pitch-block. It is used especially to support sheet-metal ware during the operation of chasing.

pitch-board (pich'bōrd), *n.* A guide used by stair-builders in their work, to regulate the angle of inclination. It consists of a piece of thin board cut to the form of a right-angled triangle, of which the base is the exact width of the tread of the steps, and the perpendicular the height of the riser.

pitch-boat (pich'bōt), *n.* A boat in which pitch is melted for paying seams, as a precaution against danger of fire from melting it on board ship.

pitch-chain (pich'chān), *n.* A chain composed of metallic plates bolted or riveted together, to work in the teeth of wheels.

pitch-circle (pich'sėr″kl), *n.* In toothed wheels, the circle which would bisect all the teeth. When two wheels are in gear, they are so arranged that their pitch-circles touch one another. Also called *pitch-line*.

pitch-coal (pich'kōl), *n.* 1. A kind of bituminous coal.—2. Same as *jet*[2]. *Brande and Cox.*

pitch-dark (pich'därk), *a.* Dark as pitch; very dark.

There was no moon; the night was *pitch dark*.
Thackeray, Bluebeard's Ghost.

pitched (picht), *p. a.* 1. Fully prepared for beforehand, and deliberately entered upon by both sides with formal array: used specifically of a battle.

In the mean-time, two Armies flye in, represented with foure swords and bucklers, and then what harde heart will not receiue it for a *pitched* fielde?
Sir P. Sidney, Apol. for Poetrie.

In five *pitched* fields he well maintained
The honoured place his worth obtained.
Scott, Rokeby, iv. 16.

The event of a *pitched* battle won gave the rebellion and the Confederate government a standing and a sudden respectability before foreign powers it had hardly dared hope for. *The Century*, XXXVI. 288.

2. Sloped; sloping: as, a high-*pitched* roof.

Wall fixtures . . . are equally serviceable where roofs are *pitched* as when they are flat.
T. D. Lockwood, Elect., Mag., and Teleg., p. 157.

pitchelongest†, *adv.* [ME.; < *pitch*[1] + *-long* + adv. gen. *-es*.] Steeply; with a slope.

Hede it that the hedes of hem alle
Into sum greet diche *pitchelonges* falle.
Palladius, Husbondrie (E. F. T. S.), p. 150.

pitcher[1] (pich'ėr), *n.* [< *pitch*[1] + *-er*[1].] 1. One who pitches. (*a*) In ball-games, the player who serves the ball to the batsman. See *base-ball*. (*b*) The person who pitches reaped grain or hay upon the wagon. 2. In *coal-mining*, one who attends to loading at the shaft or other place of loading. [North. Eng.]—**Pitcher's box**, in *base-ball*, the station of the pitcher.

★**pitcher**[2] (pich'ėr), *n.* [< ME. *picher*, *pycher*, *pychere*, *pychar*, *pychare*, *pecher*, < OF. *picher*, *pichier*, *pechier*, F. *picher* (obs.), *pichet*, a small jug, = Sp. *pichel*, mug, = Pg. *picheira*, a pitcher, *pichel*, tankard, = It. *pecchero*, *bicchiere*, a goblet (= OHG. *pechāri*, G. *becher*), < ML. *picarium*, *bicarium*, a goblet, < Gr. *βῖκος*, an earthen wine-cup, wine-jar: see *beaker*.] 1. A vessel with an open spout and generally with a handle, used for holding water, milk, or other liquid.

And . . . behold, Rebekah came forth with her *pitcher* on her shoulder; and she went down unto the well, and drew water. Gen. xxiv. 45.

I'll take a *pitcher* in ilka hand,
And do me to the well.
Sir William Wallace (Child's Ballads, VI. 239).

Dipping deep smooth *pitchers* of pure brass
Under the bubbled wells.
A. C. Swinburne, At Eleusis.

2. In *bot.*, a specially adapted tubular or cup-shaped modification of the leaf of certain plants, particularly of the genera *Nepenthes* and *Sarracenia*; an ascidium. See *ascidium*, *pitcher-plant*, *Nepenthes*, and *Sarracenia*.—**Pitchers have ears**, there may be listeners overhearing us: a punning proverb. In the form *little pitchers have long ears* it applies to children.

Not in my house, Lucentio, for, you know,
Pitchers have ears, and I have many servants.
Shak., T. of the S., iv. 4. 52.

pitcher-man† (pich'ėr-man), *n.* A hard drinker.

For not one shoemaker in ten
But are boon blades, true *pitcher-men*.
Poor Robin (1738). (*Nares.*)

pitcher-mold (pich'ėr-mōld), *n.* A terra-cotta mold in which large pieces of stoneware and other pottery were formerly made. See *pitcher-molding*.

pitcher-molding (pich'ėr-mōl″ding), *n.* In *ceram.*, the operation of casting in a pitcher-mold. The mold is filled with the clay in a very diluted form; this being poured out, a little remains adhering to the mold; as soon as this is dry, the operation is repeated, and so on until the requisite thickness is obtained. The vessel so cast is separated from the mold by drying at a low heat; and the handles, spout, etc., are attached afterward.

pitcher-nose (pich'ėr-nōz), *n.* A form of faucet with a bent-down lip.

pitcher-plant (pich'ėr-plant), *n.* A plant whose leaves are so modified as to form a pitcher or ascidium. See cut under *ascidium*. The pitcher commonly contains a liquid, and is adapted to the capture and assimilation of insects. The common North American pitcher-plant is *Sarracenia purpurea* (see cut in next column), and the parrot-beaked pitcher-plant of Georgia and Florida is *S. psittacina*. (See *Sarracenia*.) The Californian pitcher-plant, sometimes called *calf's-head*, forms the allied genus *Chrysamphora*. *Heliamphora nutans*, of the *Sarraceniaceæ*, is a pitcher-plant of the mountains of Venezuela. A large and quite different group, the East Indian pitcher-plants, is formed by the genus *Nepenthes*. For the Australian pitcher-plant, see *Cephalotus*.

pitcher-shaped (pich'ėr-shāpt), *a.* In *bot.*, having the shape of a pitcher. See *ascidium*, 2.

pitcher-vase (pich'ėr-vās), *n.* A vase having the form of an aiguière with spout and handle on opposite sides: distinguished from a pitcher in that it is merely decorative.

pitch-faced (pich'fāst), *a.* In *masonry*, having the arris cut true, but the face beyond the arris-

Pitcher-plant (*Sarracenia purpurea*).
a, a flower, showing the calyx, one of the stamens, and the style with its umbrella and hook-like stigmas, the petals removed; *b*, longitudinal section of the whole pistil; *c*, the umbrella of the style, seen from above.

edge left projecting and comparatively rough, being simply dressed with a pitching-chisel: said of a block or of a whole piece of masonry.

pitch-farthing (pich'fär″ᴛʜing), *n.* [< *pitch*[1], *v.*, + obj. *farthing*.] Same as *chuck-farthing*.

pitch-field† (pich'fēld), *n.* A pitched battle.

There has been a *pitchfield*, my child, between the naughty Spaniels and the Englishmen.
Beau. and Fl., Knight of Burning Pestle, ii. 2.

★**pitchfork** (pich'fôrk), *n.* 1. A fork for lifting and pitching hay or the like. (*a*) A fork with a long handle and usually two prongs or tines, used for moving hay, sheaves of grain, straw, etc. (*b*) A fork with a short handle and three or four prongs, used for lifting manure, etc.; a dung-fork. 2. A tuning-fork.

pitchfork (pich'fôrk), *v. t.* [< *pitchfork*, *n.*] 1. To lift or throw with a pitchfork. Hence—2. To put, throw, or thrust suddenly or abruptly into any position.

Your young city curate *pitchforked* into a rural benefice, when all his sympathies and habits and training are of the streets streety, is the most forlorn, melancholy, and dazed of all human creatures.
Nineteenth Century, XXII. 277.

pitchiness (pich'i-nes), *n.* The state or quality of being pitchy; hence, blackness; darkness.

pitching (pich'ing), *n.* [Verbal n. of *pitch*[1], *v.*] 1. The act of throwing or hurling.—2. A facing of dry stone laid upon a bank as a protection against the wash of waves or current; a lining or sheathing of masonry.

Timber laden steamers of nearly, if not quite, 1000 tons burthen run up to Wisbech, some twelve miles up the Nene, the banks of which, moreover, are steep, being held up by faggotting and stone *pitching*.
The Engineer, LXVII. 139.

The channel is to be made of clay with rubble stone *pitching*. *Rankine*, Steam Engine, § 140.

3. In *leather-manuf.*, same as *bloom*[1], 6 (*d*). *Encyc. Brit.*, XIV. 384.—4. In *brewing*, the admixture of yeast with the wort to initiate fermentation. Also called *setting the wort*.

pitching (pich'ing), *p. a.* [< *pitch*[1], *v.*] In *gun.*, noting the fire of cannon at full charge against an object covered in front by a work or a natural obstacle. *Farrow*, Mil. Encyc., II. 531.

pitching-machine (pich'ing-ma-shēn″), *n.* A machine used by brewers for coating the interiors of barrels or casks with pitch.

pitching-pence (pich'ing-pens), *n.* Money paid for the privilege of pitching or setting down merchandise in a fair or market, generally one penny per sack or pack. [Great Britain.]

pitching-piece (pich'ing-pēs), *n.* In *joinery*, same as *apron-piece*.

pitching-stables (pich'ing-stā″blz), *n. pl.* Cornish granite paving-blocks about 6 in. long.

pitching-temperature (pich'ing-tem″pėr-ā-tūr), *n.* In *brewing*, the temperature of the wort at the time the yeast is added to it. This temperature has an important influence on the activity of the fermentation. The English practice is to cool the wort to from 51° to 64° F. The Bavarian brewers cool the wort to from 45° to 50° F. Between these extremes the temperature is regulated according to the temperature of the tun-room or fermenting-room and the strength of the wort, which is pitched at a lower temperature in summer than in winter, and at a lower temperature with light beers intended for immediate use than for strong stock-ales or porter. Wort for pale ales is also pitched at a low temperature.

pitching-tool (pich'ing-tōl), *n.* 1. A kind of stone-chisel or knapping-tool, made of antler or other hard substance, and anciently used with a hammer for flaking off stone in making arrow-heads, etc.—2. In *watch-making*, a tool for placing the wheels of watches in position between the plates.

pitching-yeast (pich'ing-yēst), *n.* In *brewing:* (*a*) Yeast obtained from fermentation of beer, and intended for use in pitching worts. (*b*) Yeast which has been prepared for pitching worts by washing it with pure cold water in the stuff-vat, and allowing it to stand covered in the vat in a cool place for a day or longer.

pitch-kettle (pich'ket″l), *n.* Same as *pitch-pot.*

pitchkettled (pich'ket″ld), *a.* [< *pitch-kettle* + *-ed*².] Covered as if with a pitch-kettle, and thus cast into helpless darkness; puzzled. [Rare.]

> Thus, the preliminaries settled,
> I fairly find myself *pitchkettled,*
> And cannot see, though few see better,
> How I shall hammer out a letter.
> *Cowper,* Epistle to Robert Lloyd, l. 32. (*Davies.*)

pitch-ladle (pich'lā″dl), *n.* See *ladle.*

★**pitch-line** (pich'līn), *n.* Same as *pitch-circle.*

pitch-mineral (pich'min″ē-ral), *n.* Same as *bitumen* and *asphaltum.*

pitch-opal (pich'ō″pal), *n.* An inferior kind of opal.

pitch-ore (pich'ōr), *n.* Pitch-blende; uraninite.

pitch-pine, *n.* See *pine*¹.

pitch-pipe (pich'pīp), *n.* A small musical pipe of wood or metal to be sounded with the breath, by which the proper pitch of a piece of music may be given, or an instrument tuned. It is either a flue- or a reed-pipe, and may give either a fixed tone, as A or C, or one of several tones. In the latter case the variation is produced either by a movable plug or stopper altering the length of the air-column, or by a spring that alters the free length of the tongue of the reed.

> He had an ingenious servant, by name Licinius, always attending him with a *pitch-pipe,* or instrument to regulate the voice. *Steele,* Spectator, No. 228.

pitch-plaster (pich'plās″tėr), *n.* See *plaster.*

pitch-point (pich'point), *n.* The point of contact on the pitch-line common to two engaged wheels.

> The *pitch-point,* where its teeth are driven by those of the cogged ring, may be in the same vertical plane, parallel to the axis. *Rankine,* Steam Engine, § 153.

pitch-polisher (pich'pol″ish-ėr), *n.* An instrument of metal for polishing curved surfaces of glass, as lenses, specula, etc. It varies in form according to the nature of the work. Its surface is ruled accurately into squares by incised lines, and in use is coated with a prepared pitch. *Byrne,* Artisan's Hand-book.

pitch-pot (pich'pot), *n.* A large iron pot used for the purpose of boiling pitch for paying the seams of wooden ships after calking.

pitchstone (pich'stōn), *n.* An old volcanic rock, resembling hardened pitch in appearance. It is a natural glass resulting from the rapid cooling of those ancient lavas of which common feldspar (orthoclase) forms a considerable part. Some pitchstones have a spherulitic structure. See cut under *fluidal.*

pitch-tankard (pich'tang″kärd), *n.* A tankard covered inside with pitch. The pitch gives a flavor and perhaps a medicinal value to the beverage which the tankard contains. Pitch-tankards are still used in Germany with certain kinds of beer, such as the Lichtenhainer. The modern German pitch-tankards are made of wooden staves held together by wooden hoops, and the ancient English pitch-tankards were made in the same way.

pitch-tree (pich'trē), *n.* The kauri-pine or the Amboyna pine, as the sources of dammar-resins; also, the Norway spruce, as yielding Burgundy pitch.

Pitchurim bean. See *Pichurim bean.*

pitch-wheel (pich'hwēl), *n.* One of two toothed wheels which work together.

pitch-work (pich'wėrk), *n.* Work done in a mine under an arrangement that the workmen shall receive a certain proportion of the output.

pitchy (pich'i), *a.* [< *pitch*² + *-y*¹.] 1. Of, or of the nature of, or resembling pitch; like pitch.

> Native petroleum found floating upon some springs is no other than this very *pitchy* substance, drawn forth of the strata by the water. *Woodward,* On Fossils.
>
> The *pitchy* taint of general vice is such
> As daubs the fancy, and you dread the touch.
> *Crabbe,* Works, II. 100.

2. Smeared with pitch.

> The sides convulsive shook on groaning beams,
> And, rent with labour, yawn'd their *pitchy* seams.
> *Falconer,* Shipwreck, ii.

3. Black; dark; dismal.

> When saucy trusting of the cozen'd thoughts
> Defiles the *pitchy* night. *Shak.,* All's Well, iv. 4. 24.
>
> The *pitchy* blazes of impiety. *B. Jonson,* Sejanus, iv. 5.
>
> *Pitchy* and dark the Night sometimes appears,
> Friend to our Woe, and Parent of our Fears.
> *Prior,* Solomon, i.

4. In *zoöl.,* dark-brown inclining toward black; piceous.

pit-coal (pit'kōl), *n.* Mineral coal, or coal obtained from mines or pits: distinguished from *charcoal.* [Great Britain.]

> Divers . . . of the prime Lords of the Court have got the sole Patent of making all Sorts of Glass with *Pit-coal.*
> *Howell,* Letters, I. i. 2.

pit-cock (pit'kok), *n.* Same as *pet-cock. E. H. Knight.*

pit-crater (pit'krā″tėr), *n.* A volcanic crater at the bottom of a pit or gulf.

> The old cone had, like Mt. Loa or the Maui volcano, a great *pit-crater* at top.
> *Amer. Jour. Sci.,* 3d ser., XXXII. 251.

pite†, *n.* A Middle English form of *pity.*

piteous (pit'ē-us), *a.* [< ME. *piteous, pytyous, peteos, pitivous, pytevous, petevous, pitous, pitos,* < OF. *pitos, piteus,* F. *piteux* = Pr. *piatos, pietos, pitos, pidos* = Sp. *piadoso* = Pg. *piadoso, piedoso* = It. *piatoso, pietoso,* < ML. *pietosus,* pitiful, < L. *pieta(t-)s,* piety, ML. pity: see *pity.*] 1. Full of pity or compassion; compassionate; affected by pity.

> A more suetter, humble, and amyable,
> Gentile, debonair, sage, wise, and connyng,
> Curtois, *piteuous,* and charitable,
> Sche vnto the pore ful gret good doing.
> *Rom. of Partenay* (E. E. T. S.), l. 6247.
>
> But of his *peteose* tender moder, alasse!
> I am verray sure,
> The wo and payn passis alle othere.
> *MS. Bodl. Mus.,* 160. (*Halliwell.*)
>
> She gave him (*piteous* of his case,
> Yet smiling at his rueful length of face)
> A shaggy tapestry. *Pope,* Dunciad, ii. 141.

2. Such as to excite pity or move to compassion; affecting; lamentable; sorrowful; mournful; sad: as, a *piteous* look; a *piteous* case.

> And than he seide a *pitouse* worde: "Ha! Cleodalis," quod he, "I crye the mercy of the trespace that I haue don a-gein the, ffor I se well I am come to myn ende."
> *Merlin* (E. E. T. S.), ii. 354.
>
> The most *piteous* tale of Lear. *Shak.,* Lear, v. 3. 214.

3†. Pitiful; paltry; poor: as, *piteous* amends. *Milton.* =**Syn. 2.** Doleful, woful, rueful, wretched, distressing.

piteously (pit'ē-us-li), *adv.* [< ME. *petevously, pitously;* < *piteous* + *-ly*².] In a piteous manner; pleadingly; as if for pity or mercy; mournfully; sadly; dreadfully.

> Forsoth to hym spake full *peteuously.*

Pithecolobium (pi-thē-kō-lō′bi-um), *n.* [NL. (K. F. P. von Martius, 1829), so called from the resemblance of the curved pods to a monkey's ear; < Gr. πίθηκος, an ape, + λόβιον, dim. of λοβός, an ear, lobe, or legume.] A genus of shrubs or trees, of the family *Mimosaceæ* and tribe *Ingeæ*, having peculiar rigid pods, which are two-valved and flattened, curved, curled, or twisted, and somewhat fleshy. There are about 150 species, widely dispersed in the tropics, especially of America and Asia. They are either unarmed or thorny with axillary or stipular spines. They bear glandular bipinnate leaves of many small or few larger leaflets, and globose heads of white flowers, with long and very numerous stamens. The most important species, *P. dulce*, a large tree native to Mexico, and there called *guamuchil*, contains in its pods a sweet pulp, for which they are boiled and eaten. Introduced into the Philippine Islands, and thence into India, it is now cultivated there under the name *Manila tamarind*. (Compare *tamarind*.) Several other species produce edible pods, as *P. jiliciſolium*, the wild tamarind-tree of Jamaica, a large tree distinguished by the twice-pinnate leaves from the true tamarind, whose leaves are once-pinnate; and *P. Saman*, the genisaro, also called *saman*, *zamang*, and *rain-tree*. The bark of some species yields a gum, that of others an astringent drug, and that of others, as *P. bigeminum*, the soap-bark tree, and *P. micradenium*, the savonette or shagbark of the West Indies, is a source of soap. Several other species are cultivated as hardy evergreen trees under the name *curl brush-bean*. A smaller species, usually a shrub, is the cat's-claw, also called *nephritic tree* or *black bead-tree*, of Jamaica. See also *algarrobilla*.

Pittidæ (pit′i-dē), *n. pl.* [NL., < *Pitta* + *-idæ*.] A family of mesomyodian or songless passerine birds, typified by the genus *Pitta*; the Old World ant-thrushes. They are of stout form, with very short tail, and long and strong legs; the plumage is brilliant and varied. The leading genera besides *Pitta* are *Eucichla*, *Hydrornis*, and *Melanopitta*. These birds are characteristic of the Oriental and Australian regions, though one (*P. angolensis*) is African; they are specially abundant in the islands of the Malay archipelago. About 50 species are known.

Old World Ant-thrush (*Pitta cucullata*).

Pittinæ (pi-tī′nē), *n. pl.* [NL., < *Pitta* + *-inæ*.] The *Pittidæ* regarded as a subfamily of some other family. Before the peculiarities of the Old World ant-thrushes were known, they were wrongly associated with the South American formicarioid birds of somewhat similar superficial aspect, the name *ant-thrush* being given to both. See *ant-thrush*, and compare cuts under *Formicarius* and *Pittidæ*.

pittine (pit′in), *a.* Of or pertaining to the pittas, or ant-thrushes of the Old World.

pitting (pit′ing), *n.* [Verbal n. of *pit*[1], *v.*] 1. The act or operation of digging or sinking a hole or pit.

> The exact situation of the clay is first determined by systematic *pitting*, to a depth of several fathoms, or occasionally by boring. *Spons' Encyc. Manuf.*, I. 636.

2. The act or operation of placing in a pit or in pits: as, the *pitting* of potatoes; the *pitting* of hides.—3. A pit, mark, or hollow depression on the surface, such as that left on the flesh by a pustule of the smallpox.—4. A number of such pits considered collectively; a collection of pitmarks.—5. In *bot.*, the state or condition of being pitted.

> The peculiar *pitting* of the woody fibre of the fir.
> *Encyc. Brit.*, XIV. 411.

6. A corrosion of the inner surface of steam-boilers, whereby the metal becomes gradually covered with small cavities.—7. Corrosion of the bottom of iron and particularly of steel ships. Blisters, and afterward pits, are formed, apparently by the action of the carbonic acid and oxygen in seawater, producing ferric oxid under the protecting paint.

pittizite, pitticite (pit′i-zīt, -sīt), *n.* [Irreg. < Gr. *πιττίζειν, πισσίζειν, be like pitch (< πίττα, πίσσα, pitch), + *-ite*[2].] An arsenio-sulphate of iron, occurring in reniform masses; pitchy iron ore.

pittlet, *n.* Same as *pickle*[3], *pightle*. *Minsheu*.

pittle-pattle† (pit′l-pat″l), *v. i.* [A varied reduplication of *patter*[1], *patter*[2]; cf. *pitter*[1], and *prattle*, *tattle*, etc.] To talk unmeaningly or flippantly.

pittock (pit′ok), *n.* The coalfish. [Prov. Eng.]

Pittosporaceæ (pit″ō-spō-rā′sē-ē), *n. pl.* [NL. (Lindley, 1836), so called from their resinous capsules; < Gr. πίττα, πίσσα, pitch, + σπόρος, seed (see *spore*), + *-aceæ*.] A family of dicotyledonous choripetalous plants having numerous ovules, and regular flowers with five stamens. It is also characterized by its five imbricated sepals, five petals with their narrow bases or claws commonly forming an incomplete tube, versatile anthers, an ovary usually two-celled, a minute embryo in hard albumen, and loculicidal fleshy or papery fruit. There are 9 genera and about 105 species. *Pittosporum* (the type) is the only genus widely distributed, the others being all Australian. They are shrubs or shrubby twiners, sometimes procumbent, generally smooth, bearing alternate leaves, and white, blue, yellow, or rarely reddish flowers, solitary, nodding, and terminal, or variously clustered.

pittosporad (pi-tos′pō-rad), *n.* A plant of the family *Pittosporaceæ*.

Pittosporeæ (pit-ō-spō′rē-ē), *n. pl.* [NL. (R. Brown, 1814), < *Pittosporum* + *-eæ*.] A tribe of plants of the family *Pittosporaceæ*, containing *Pittosporum* and three other genera.

Pittosporum (pi-tos′pō-rum), *n.* [NL. (Banks, 1788), so called from the viscous pulp commonly enveloping the seeds; < Gr. πίττα, Attic for πίσσα, pitch, + σπόρος, seed.] A genus of plants, type of the family *Pittosporaceæ*, characterized by the thick wingless seeds, and thick loculicidal capsule, which is coriaceous or woody, globose, ovate, or obovate, often compressed and with imperfect partitions. There are about 70 species, natives of Africa, warmer parts of Asia, Pacific islands, Australia, and New Zealand. They are erect shrubs, generally low, sometimes becoming small trees, often with a resinous bark, generally smooth and evergreen. They bear white or yellowish flowers in crowded terminal clusters, or sometimes solitary or few and lateral. Many species have broad shining dark-green leaves, contrasting well with the white fragrant flowers, and are cultivated under the name *hedge-laurel*. Other species are known as *Brisbane laurel*, *Queensland laurel*, and *haekaro*. From the flowers of *P. undulatum*, the Victorian laurel, a highly fragrant volatile oil is distilled. This species and *P. bicolor*, the Victorian cheesewood or whitewood, yield a wood adapted to turners' use, and sometimes substituted for boxwood. A few sometimes reach the height of 90 feet, as *P. rhombifolium*.

pittypat† (pit′i-pat), *adv.* and *a.* Same as *pita-pat*.

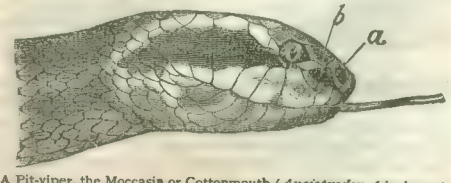
pituita (pit-ū-ī′tä), *n.* [L., mucus, phlegm; prob., with loss of initial *s*, < *spuere*, pp. *sputus*, spit out: see *spew*. Cf. *pip*[1].] Phlegm or mucus; especially, the mucous secretion of the pituitary or Schneiderian membrane. Also, rarely, *pituite*.

> As of the *pituita*, or the bile, or the like disorders to which the body is subject.
> *T. Taylor*, tr. of Five Books of Plotinus (1794), p. 102.

pituital (pit-ū-ī′tal), *a.* [< *pituita* + *-al*.] Same as *pituitary*.

pituitary (pit′ū-i-tā-ri), *a.* [= F. *pituitaire* = Pg. It. *pituitario*, < L. *pituitarius*, in fem. *pituitaria* (sc. *herba*), an herb that removes phlegm, < *pituita*, phlegm: see *pituita*.] Mucous; secreting or containing mucus, or supposed to do so; relating to pituita.—**Pituitary body**, a small ovoid pale-reddish body, occupying the sella turcica, and attached to the under surface of the cerebrum by the infundibulum. It consists of two lobes—an anterior, resembling in structure that of a ductless gland, and a posterior, which in the lower vertebrates is composed of nerve-substance, forming an integral part of the brain, and called the infundibular lobe, but in the higher vertebrates showing only slight indications of nervous elements. Also called *pituitary gland*, *hypophysis cerebri*. See cuts under *brain* (cut 2), *Elasmobranchii*, and *encephalon*.—**Pituitary diverticulum**, a flask-like outgrowth of the middle of the upper posterior part of the buccal cavity in the embryo, which takes part in the formation of the pituitary body.—**Pituitary fossa.** See *fossa*[1], and cuts under *parasphenoid*, *Struthionidæ*, *Gallinæ*, *Crocodilia*, and *skull* (cut 3).—**Pituitary gland.** Same as *pituitary body*.—**Pituitary membrane.** See *membrane*.—**Pituitary space**, in *embryol.*, an open space at the base of the skull, just in advance of the end of the notochord, inclosed by the trabeculæ cranii: it subsequently becomes the seat of the pituitary body, and corresponds to what is known in human anatomy as the sella turcica of the sphenoid bone. See *hypophysis*, and cuts under *chondrocranium* and *periotic* (adult turtle).—**Pituitary stem**, the hollow neck of the pituitary body, by which that body hangs from the brain; the infundibulum of the brain. See cut under *corpus*.

pituite (pit′ū-it), *n.* [< F. *pituite* = Sp. Pg. It. *pituita*, < L. *pituita*, mucus, phlegm: see *pituita*.] Same as *pituita*. [Rare.]



> Phlegm or *pituite* is a sort of semifluid.
> *Arbuthnot*, Aliments, vi., prop. 7, § 7.

pituitous (pit-ū-ī′tus), *a.* [= F. *pituiteux* = Sp. Pg. It. *pituitoso*, < L. *pituitosus*, full of phlegm, < *pituita*, phlegm: see *pituita*.] Same as *pituitary*.

Pituophis (pi-tū′ō-fis), *n.* See *Pityophis*.

pituri (pi-tū′ri), *n.* A plant. See *Duboisia*.

pit-viper (pit′vī″pėr), *n.* A venomous serpent of the family *Crotalidæ*, as a rattlesnake; a

A Pit-viper, the Moccasin or Cottonmouth (*Ancistrodon piscivorus*), three fourths natural size. *a*, nostril; *b*, pit.

pit-wood (pit′wůd), *n.* Timber used for frames, posts, etc., in mines or pits.

Another consequence of the improvement that has set in with the coal trade is the advance in *pitwood*.
The Engineer, LXVI. 40.

pit-work (pit′wėrk), *n.* The pump and gear connected with it in the engine-shaft of a mine.

pity (pit′i), *n.* [Early mod. E. also *pitty, pitie;* < ME. *pitte, pite, pyte, pete,* < OF. *pite, pitie, pitet,* F. *pitié* = Sp. *piedad* = Pg. *piedade* = It. *pietà,* pity, < L. *pieta(t-)s,* piety, affection, pity: see *piety*. Cf. *pittance*.] **1.** Sympathetic sorrow for and suffering with another; a feeling which inspires one to relieve the suffering of another.

And sapheris swete that souȝte all wrongis,
Ypoudride wyth *pete* ther it be ouȝte,
And traylid with trouthe and treste al aboute.
Richard the Redeless, i. 46.

For off the peple haue I gret *pitte*.
Rom. of Partenay (E. E. T. S.), l. 3194.

I am not prone to weeping, as our sex
Commonly are: the want of which vain dew,
Perchance, shall dry your *pities*.
Shak., W. T., ii. 1. 110.

For *pity* melts the mind to love.
Dryden, Alexander's Feast, l. 96.

Careless their merits or their faults to scan,
His *pity* gave ere charity began.
Goldsmith, Des. Vil., l. 162.

Pity, which, being a sympathetic passion, implies a participation in sorrow, is yet confessedly agreeable.
Sir W. Hamilton, Metaph., xliv.

2†. An appeal for pity. [Rare.]

Let 's have no *pity*,
For if you do, here 's that shall cut your whistle.
Beau. and Fl.

3. A cause, matter, or source of regret or grief; a thing to be regretted: as, it is a *pity* you lost it; it is a thousand *pities* that it should be so.

Pendragon was ther deed, and many a-nother gode baron, wher-of was grete *pite* and losse to the cristen partye.
Merlin (E. E. T. S.), i. 56.

That he is old, the more the *pity*, his white hairs do witness it.
Shak., 1 Hen. IV., ii. 4. 514.

They make the King believe they mend whats amisse, and for money they make the thing worse than it is. Theres another thing in too, the more is the *pity*.
Heywood, 1 Edw. IV. (Works, ed. Pearson, I. 46).

He 's a brave fellow; 'tis *pity* he should perish thus.
Fletcher, Humorous Lieutenant, iii. 5.

'Tis a thousand *pities* (as I told my Lord of Arundel his son) that that jewel should be given away.
Evelyn, Diary, Aug. 23, 1678.

To have pity upon, to take pity upon, generally, to show one's pity toward by some benevolent act.

He that *hath pity upon* the poor lendeth unto the Lord.
Prov. xix. 17.

=Syn. 1. *Pity, Compassion, Commiseration, Sympathy, Condolence.* *Pity* is the only one of these words that allows even a tinge of contempt; *pity* and *compassion* come from one who is felt to be so far superior. *Sympathy*, on the other hand, puts the sufferer and the one sympathizing with him upon an equality by their fellow-feeling. *Compassion* does not keep so near its derivation; it is deep tenderness of feeling for one who is suffering. *Sympathy* is equal to *compassion* in its expression of tenderness. *Commiseration* is, by derivation, sharing another's misery; *condolence* is sharing another's grief. *Commiseration* may and *condolence* must stand for the communication to another of one's feelings of sorrow for his case. It is some comfort to receive *commiseration* or *condolence;* it gives one strength to receive *sympathy* from a loving heart; it is irksome to need *compassion;* it galls us to be *pitied*. *Sympathy* does not necessarily imply more than kinship of feeling. See also the quotations under *condolence*.

The Maker saw, took *pity*, and bestowed
Woman.
Pope, January and May, l. 63.

In his face
Divine *compassion* visibly appear'd,
Love without end.
Milton, P. L., iii. 141.

Losses . . .
Enow to press a royal merchant down
And pluck *commiseration* of his state
From brassy bosoms, and rough hearts of flint.
Shak., M. of V., iv. 1. 30.

With that *sympathy* which links our fate with that of all past and future generations.
Story, Salem, Sept. 18, 1828.

To Thebes the neighb'ring princes all repair,
And with *condolence* the misfortune share.
Croxall, tr. of Ovid's Metamorph.

pity (pit′i), *v.*; pret. and pp. *pitied*, ppr. *pitying*. [< *pity*, *n.*] **I.** *trans.* **1†.** To excite pity in; fill with pity or compassion: used impersonally.

Latimer, 5th Sermon bef. Edw. VI., 1549.

It *pitied* me to see this gentle fashion
Of her sincere but unsuccessful Passion.
J. Beaumont, Psyche, ii. 86.

The poor man would stand shaking and shrinking; I dare say it would have *pitied* one's heart to have seen him; nor would he go back again.
Bunyan, Pilgrim's Progress, p. 295.

2. To feel pity or compassion for; compassionate; commiserate: as, to *pity* the blind or their misfortune; to *pity* the oppressed.

Like as a father *pitieth* his children, so the Lord *pitieth* them that fear him.
Ps. ciii. 13.

He *pities* them whose fortunes are embark'd
In his unlucky quarrel.
Fletcher (*and another*), False One, i. 1.

A weak man, put to the test by rough and angry times, as Waller was, may be *pitied*, but meanness is nothing but contemptible under any circumstances.
Lowell, Among my Books, 1st ser., p. 19.

placent†, *n.* [< L. *placenta*, a cake, = Gr. πλακοῦς (πλακουντ-), a flat cake, contr. of πλακόεις (πλακοεντ-), flat, < πλάξ (πλακ-), anything flat.] A cake.

Afterwards make a confection of it [flower-de-luce] with clarified hony, which must be so hard that you may make small *placents* or trocisces of it; dry them in the shadow.
T. Adams, Quoted in N. and Q., 7th ser., VII. 29.

★**placenta** (plā-sen′tä), *n.*; pl. *placentas* or *placentæ* (-täz, -tē). [= F. Sp. Pg. It. *placenta*, < NL. *placenta*, placenta (something having a flattened circular form), lit. 'cake,' a particular use of L. *placenta*, a cake: see *placent.*] **1.** In *zoöl.*, *anat.*, and *med.*: (*a*) The organ of attachment of a vertebrate embryo or fetus to the wall of the uterus or womb of the female. It is a specially modified part of the surface of the chorion or outside one of the fetal envelops, of a flattened circular form, like a plate or saucer, one side of which is closely applied to the wall of the womb, and from the other side of which proceeds the umbilical cord or navel-string. It is highly vascular, and in intimate vital connection with a similarly vascular area of the uterine walls, serving for the interchange of the constituents of the blood between the mother and the fetus, and thus acting during uterine life as the organ of circulation, respiration, and nutrition of the fetus. The human placenta is about as large as a soup-plate, and in connection with the navel-string and membranes is commonly known as the *uterine cake, afterbirth,* or *secundines.* The presence of a true placenta is necessarily restricted to viviparous vertebrates, and does not occur in all of these (for the marsupials, with the exception of *Perameles*, are devoid of a placenta). Several forms of placenta have been distinguished among placental mammals, and made a basis of classification. See also cuts under *embryo* and *uterus.* Hence—(*b*) Some analogous part or organ in other animals, having a similar function. (1) In ascidians, the organ by which a fetal sexless ascidiozoöid is attached for a time to the wall of the atrial cavity of the parent. See cut under *Salpa.* (2) In infusorians, a name given by Stein to the single mass resulting from the coalescence of the segments of the nuclei of different individuals after the process of conjugation.

Human Placenta (unattached surface), with umbilical cord.

2. In echinoderms, a flat discoidal sea-urchin, as a sand-dollar or cake-urchin: used in a generic sense by Klein, 1734.—**3.** [*cap.*] A genus of bivalve mollusks, now called *Placuna.*—**4.** In *bot.*, that part of the ovary of flowering plants which bears the ovules. It is usually the more or less enlarged or modified margins of the carpellary leaves, and is of a soft cellular texture. When the ovary is composed of a single leaf, both margins give rise to ovules, and they are consequently in two rows. In a compound ovary there are various modifications of the placenta. Thus, when the edges of the carpellary leaves all meet in a common axis, the placentas are said to be *axile.* When, by obliteration of the dissepiments, such an ovary becomes one-celled, the axile placentas remain in a column as a *free central placenta.* Or, when the edges of the carpellary leaves barely meet and slightly incurve, the placentas become *parietal,* being borne on the wall. There are all degrees of incurvation, the placentas being located accordingly. In vascular cryptogams the point giving rise to the sporangia is sometimes called the *placenta.* The placenta is sometimes termed the *trophospermium* and *spermophorum.* See also cut under *ovary.*—**Battledore placenta,** a placenta which has the cord attached to the edge.—**Deciduate placenta,** a placenta which comes away entire at parturition, as in woman and many other mammals.—**Discoidal placenta.** See *discoidal.*—**Nondeciduate placenta,** a placenta which is not deciduate.—**Parietal placenta.** See *parietal*, and def. 4, above.—**Placenta adherent,** a placenta which has, through inflammation during pregnancy, formed adhesions to the uterus.—**Placenta cruoris,** blood-clot.—**Placenta prævia,** that condition of the placenta in which it is attached over the internal os, thus necessitating its rupture or detachment, with consequent hemorrhage, before the contents of the uterus can be expelled.—**Placenta sanguinis,** blood-clot.—**Placenta succenturia,** a supernumerary placental mass, produced by the development of an isolated patch of chorion villi.—**Polycotyledonary placenta,** a placenta whose fetal villi are arranged in distinct tufts or cotyledons, as in the cow.

1. Free central placenta, transverse and vertical sections. 2. Axile central placenta. 3. Parietal placenta. *a*, *a*, Placentas.

placental (plā-sen′tal), *a.* and *n.* [< NL. *placentalis*, < *placenta*, placenta: see *placenta.*] **I.** *a.* **1.** Of or pertaining to the placenta.—**2.** Forming or constituted by a placenta: as, *placental* gestation; a *placental* part of the chorion.—**3.** Provided with a placenta; placentate or placentary: as, a *placental* mammal.—**Placental dystocia,** difficult birth of the placenta.—**Placental murmur** or **souffle,** a murmur heard on auscultation of the pregnant uterus, and regarded as due to the placental circulation.

II. *n.* A placental mammal; any member of the *Placentalia.*

Placentalia (plas-en-tā′li-ä), *n. pl.* [NL. (Bonaparte, 1837), neut. pl. of *placentalis:* see *placental.*] Placental mammals; those mammals which are placentate or placentiferous: distinguished from *Implacentalia.* The *Placentalia* were formerly one of two prime divisions of mammals, contrasted with marsupials and monotremes together. The division corresponds to *Monodelphia*, and also to *Eutheria.* Also *Placentaria.*

placentalian (plas-en-tā'li-an), *a.* and *n.* **I.** *a.* Of or pertaining to the *Placentalia;* placental.

H. Oldenburg in Philos. Trans., II. 512.

As though the *placentiferous* lines were detached.
Masters, Henfrey's Bot., p. 300.

placentiform (plä-sen'ti-fôrm), *a.* [= F. *placentiforme,* < NL. *placenta,* placenta, + L. *forma,* form.] 1. In *zoöl.,* having the form, structure, or character of a placenta.—2. In *bot.,* shaped like a placenta; having a thick circular disk, concave in the middle on both upper and lower sides. The root of *Cyclamen* is an example.

placentigerous (plas-en-tij'e-rus), *a.* [< NL. *placenta,* placenta, + L. *gerere,* carry.] Same as *placentiferous.*

placentious† (plä-sen'shus), *a.* [< L. *placen(t-)s,* pleasing (see *pleasant*), + *-ious.*] Pleasant; amiable.

John Walbye, . . . a *placentious* person, gaining the good-will of all with whom he conversed.
Fuller, Worthies, York, III. 467.

placentitis (plas-en-tī'tis), *n.* [NL., < *placenta,* placenta, + *-itis.*] Inflammation of the placenta.

placentoid (plä-sen'toid), *a.* [< NL. *placenta,* placenta, + Gr. *εἶδος,* form.] Like a placenta; placentiform.

place-proud (plās'proud), *a.* Proud of position or rank. *Fletcher,* Wit without Money, iii. 1.

placer[1] (plā'sėr), *n.* [< *place* + *-er*[1].] One who places, locates, or sets.

Lord of creatures all,
Thou *placer* of plants both humble and tall,
Was not I planted of thine owne hand,
To be the primrose of all thy land?
Spenser, Shep. Cal., February.

placer[2] (plā'sėr; Amer. Sp. pron. plä-sär'), *n.* [< Sp. *placer,* a place near a river where gold-dust is found (cf. *placel,* a sand-bank), < *plaza,* a place: see *place.*] In *mining,* a place where the superficial detritus is washed for gold or other valuable minerals. Placer-mining has hardly any other meaning in English than that of gold-washing, but it is not used in speaking of washing for gold by the hydraulic method. Washing for tin—a kind of mining not carried on in the United States—is called *s'reaming.* —**Placer-claim,** a mining claim to a placer deposit; under the United States mining law, a tract of mineral land upon which the owner of the claim is entitled to the ordinary surface rights and all forms of mineral deposits, save known lodes and veins. A placer-claim is limited in depth and does not possess extralateral rights (see *lode*[1], and *mining claim,* under *mining*), except that no location can include more than 20 acres for each individual claimant, and that, where the lands located under such a claim have been previously surveyed by the United States, the exterior limits of the entry must conform to the legal divisions of the public lands and rectangular subdivisions thereof. A patent for a placer-claim includes a vein or lode not at the time known to exist within its limits; but it does not include a known vein or lode, unless so expressed.

placet (plā'set), *n.* [L., it pleases; 3d pers. sing. pres. ind. of *placere:* see *please.*] 1. An expressed sanction; permission given by one in authority; specifically, sanction granted to the promulgation and execution of an ecclesiastical ordinance, and particularly such sanction granted by a sovereign to papal bulls, briefs, and other edicts.

Such therefore is that secondary reason which hath place in divinity, which is grounded upon the *placets* of God. *Bacon,* Advancement of Learning, ii. 364.

2. A vote of assent in a council; a vote of the governing body in an university.

placid (plas'id), *a.* [< F. *placide* = Sp. *plácido* = Pg. It. *placido,* < L. *placidus,* gentle, mild, < *placere,* please: see *please.*] Gentle; quiet; undisturbed; equable; serene; calm; unruffled; peaceful; mild.

It conduceth unto long life and to the more *placid* motion of the spirits, that men's actions be free. *Bacon.*

That *placid* intercourse [with the great minds of former ages] is disturbed by no jealousies or resentments.
Macaulay, Bacon.

That *placid* aspect and meek regard.
Milton, P. R., iii. 217.

=Syn. *Tranquil, Serene,* etc. See *calm*[1].

placidious† (plä-sid'i-us), *a.* [< *placid* + *-ious.*] Gentle; placid.

Most easie, peaceable, and *placidious.*
Topsell, Four-Footed Beasts, p. 158. (*Halliwell.*)

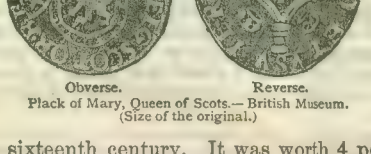
placidity (plä-sid'i-ti), *n.* [= F. *placidité* = It. *placidità,* < L. *placidita(t-)s,* < *placidus,* placid: see *placid.*] The state or character of being placid; tranquillity; peacefulness; quietness; calmness.

That habitual *placidity* of temper which results from the extinction of vicious and perturbing impulses.
Lecky, European Morals, I. 189.

placidly (plas'id-li), *adv.* In a placid manner; calmly; quietly; without disturbance or passion.

placidness (plas'id-nes), *n.* The state or character of being placid.

placit†, *n.* [= Pg. It. *placito,* < L. *placitum,* that which is pleasing, a maxim, an order, < *placitus,* pp. of *placere,* please: see *please.* Cf. *plea, plead.*] Same as *placet.*



Sextus Empiricus was but a diligent collector of the *placits* and opinions of other philosophers.
Evelyn, To Mr. E. Thurland.

placita, *n.* Plural of *placitum.*

placitory (plas'i-tō-ri), *a.* [< ML. *placitum,* plea (see *placit, plea*), + *-ory.*] Of or relating to pleas or pleading in courts of law.

placitum (plas'i-tum), *n.*; pl. *placita* (-tä). [ML.: see *placit, plea.*] In the middle ages, a public assembly of all degrees of men, where the sovereign presided, usually summoned to consult upon great affairs of state; hence, a resolution taken by such an assembly; also, a penalty or fine, or a plea or suit.

plack (plak), *n.* [< OF. *plaque, placque, plecque, plache,* a coin so called (also *plaquette*), F. *plaque,* a plate, slab, patch, veneer, etc., < MD. *placke, plecke* (= Flem. *placke* = MLG. *placke,* in ML. *placa, placca*), a coin so called, D. *plak,* a thin slice, a ferrule; cf. MD. *placke, plecke,* a spot, a place, village, town, also a patch; mixed, in the form *blecke,* etc., with MD. *bleck, blick,* a plate, as of tin or lead, D. *blik,* white iron, tin, = OHG. *blch, pleh, plech, blech,* MHG. *blech,* a plate, thin leaf of metal, etc., = Sw. *bleck* = Dan. *blik,* white iron, sheet-metal. Cf. *placard, plaque.*] A Scotch billon coin current in the fifteenth century (from 1468), and also in

Obverse. Reverse.
Plack of Mary, Queen of Scots.—British Museum.
(Size of the original.)

the sixteenth century. It was worth 4 pence Scotch (about two thirds of the United States cent), and under James VI. 8 pence Scotch. —**Plack and bawbee,** to the last farthing; fully. [Scotch.]

placket (plak'et), *n.* [< OF. *placquette,* a thin plate (a placket being appar. a patch sewed on), dim. of *plaque,* plate: see *plack.* Cf. *plaquette, placard.*] 1†. A pocket, especially a pocket in a woman's dress.

When she comes into a great prease of people, for fear of the cutpurse, on a sudden she'll swap thee into her *plackerd.* *Greene,* Friar Bacon and Friar Bungay, i. 1.

Just like a plow-boy tir'd in a browne jacket,
And breeches round, long leathern point, no *placket.*
Gayton, Notes on Don Quixote, p. 170. (*Nares.*)

2. The opening or slit in a petticoat or skirt; a fent.

That a cod-piece were far fitter here than a pinned *placket.* *Fletcher (and another),* Love's Cure, i. 2.

3. A petticoat; hence, figuratively, a woman.

Was that brave heart made to pant for a *placket?*
Fletcher, Humorous Lieutenant, iv. 4.

If the maides a spinning goe,
Burne the flax, and fire their toe,
Scorch their *plackets.*
Herrick, Saint Distaff's Day.

4. Same as *placcate.*

placket-hole (plak'et-hōl), *n.* Same as *placket,* 2.

plackless (plak'les), *a.* [< *plack* + *-less.*] Penniless; without money.

Poor, *plackless* devils like mysel'! *Burns,* Scotch Drink.

plack-pie (plak'pī), *n.* A pie formerly sold for a plack. *Scott.* [Scotch.]

Placobranchia (plak-ō-brang'ki-ä), *n. pl.* [NL. (J. E. Gray, 1857), < Gr. *πλάξ* (*πλακ-*), something flat, a tablet, plate, + *βράγχια,* gills.] A suborder of nudibranchiate gastropods, established for the family *Elysiidæ,* characterized by having lamellar or venose gills on the upper surface of the mantle.

placoderm (plak'ō-dėrm), *a.* and *n.* [< Gr. *πλάξ* (*πλακ-*), a tablet, plate, + *δέρμα,* skin, < *δέρειν,* flay.] **I.** *a.* Having the skin covered with broad flat plates, as a fish; belonging to the *Placodermi.*

II. *n.* A ganoid fish of the group *Placodermi.*

placodermal (plak-ō-dėr'mal), *a.* [< *placoderm* + *-al.*] Same as *placoderm.*

Placodermata (plak-ō-dėr'ma-tä), *n. pl.* [NL.: see *placoderm.*] Same as *Placodermi.*

placodermatous (plak-ō-dėr'ma-tus), *a.* Same as *placoderm.*

Placodermi (plak-ō-dėr'mī), *n. pl.* [NL.: see *placoderm.*] An order of fishes, constituted for some remarkable Paleozoic forms of doubtful relationships. It has been variously defined. As usually limited, it includes fishes which had a persistent notochord, neural and hemal spines and interspinals connecting with a dorsal and an anal fin, a jointed pectoral appendage inclosed in a bony covering, the head and front of the body inclosed by bony dorsal and ventral shields, no ventrals, and a distinct lower jaw. It is now variously divided and as an ordinal term has passed out of use. Also *Placodermata, Placoganoidei.*

placodont (plak'ō-dont), *n.* [< *Placodus* (*-odont-*).] A member of the group *Placodontia* or family *Placodontidæ.*

Placodontia (plak-ō-don'shi-ä), *n. pl.* [NL., < Gr. *πλάξ* (*πλακ-*), a tablet, plate, + *ὀδούς* (*ὀδοντ-*) = E. *tooth.*] A group of extinct reptiles, which had double nares, a palate with a paired longitudinal series of pavement teeth and similar ones present in a single series on the dentary, and maxillæ with conical or molariform teeth. It has been referred to the fishes, and among the reptiles to the *Sauropterygia;* but late systematists regard it as a suborder of the order *Theromorpha.*

Placodontidæ (plak-ō-don'ti-dē), *n. pl.* [NL., < *Placodus* (*-odont-*) + *-idæ.*] A family of extinct reptiles, represented by the genus *Placodus.* They are the only known members of the group *Placodontia.* The general form is unknown. The skull was broad behind, with an apparently compound temporal arcade and a postorbital bar; the teeth around the palate were like paving-stones. The species lived in the Triassic period.

Placodus (plak'ō-dus), *n.* [NL., < Gr. *πλάξ* (*πλακ-*), a tablet, plate, + *ὀδούς* = E. *tooth.*] A genus of reptiles having pavement-like teeth. *P. gigas* is a species of the Trias.

placoganoid (plak-ō-gan'oid), *a.* and *n.* [< Gr. *πλάξ* (*πλακ-*), a tablet, plate, + E. *ganoid.*] **I.** *a.* Having a placoid exoskeleton, as a ganoid fish; belonging to the *Placoganoidei.*

II. *n.* A member of the *Placoganoidei.*

placoganoidean (plak″ō-ga-noi'dē-an), *a.* and *n.* [< *placoganoid* + *-ean.*] Same as *placoganoid.*

Placoganoidei (plak″ō-ga-noi'dē-ī), *n. pl.* [NL.: see *placoganoid.*] Same as *Placodermi.*

placoid (plak'oid), *a.* and *n.* [< Gr. **πλακοειδής,* contr. *πλακφδης,* flat, < *πλάξ* (*πλακ-*), a tablet, plate, + *εἶδος,* form.] **I.** *a.* 1. Plate-like: noting the dermal investments of sharks, which take the place of true scales and are the ossified papillæ of the cutis. In combination they form the shagreen of the sharks. The name is also extended to the tubercular or thorn-like armature of the skin in rays.

2. Having placoid scales, as a fish; belonging to the *Placoidei.* See cut under *scale.*—**Placoid exoskeleton,** the shagreen, ichthyodorulites, or other forms of the dermal defenses of the elasmobranchiate fishes.

II. *n.* A member of the *Placoidei.*

Placoidea (plā-koi'dē-ạ), *n. pl.* [NL.] Same as *Placoidei*.

placoidean (plā-koi'dē-ạn), *a.* and *n.* [< *placoid* + *-e-an*.] Same as *placoid*.

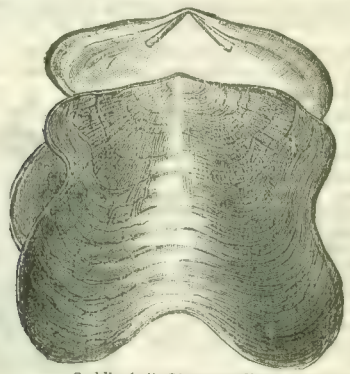
Placoidei (plā-koi'dē-ī), *n. pl.* [NL.: see *placoid*.] In Agassiz's classification, an artificial group of fishes, having placoid scales: correlated with *Ctenoidei*, *Cycloidei*, and *Ganoidei*. It is mainly equivalent to the class *Elasmobranchii*, but also included the naked marsipobranchs.

placoidian (plā-koi'di-ạn), *n.* [< *placoid* + *-ian*.] Same as *placoid*.

Placophora (plā-kof'ō-rā), *n. pl.* [NL., < Gr. *πλάξ* (*πλακ-*), a tablet, plate, + *φέρειν* = E. *bear*[1].] In Gegenbaur's system of classification, one of two primary divisions of the *Mollusca*, consisting of the chitons only. The *Polyplacophora* and *Amphomœa* of Lankester, though of a very different taxonomic grade, are conterminous. See *Polyplacophora*, and cut under *Chitonidæ*.

placophoran (plā-kof'ō-rạn), *a.* and *n.* [< *placophor-ous* + *-an*.] **I.** *a.* Placophorous; belonging to the *Placophora*.

II. *n.* A member of the *Placophora;* a chiton.



placophorous (plā-kof'ō-rus), *a.* [< Gr. *πλάξ* (*πλακ-*), a tablet, plate, + *φέρειν* = E. *bear*[1].] Same as *placophoran*.

placula (plak'ū-lạ), *n.*; pl. *placulæ* (-lē). [NL., dim., < Gr. *πλάξ* (*πλακ-*), a tablet, plate.] A little plate or plaque: specifically applied to certain discoidal embryos consisting of a mass of cleavage-cells disposed as a plate or layer: see *monoplacula* and *diploplacula*. *Hyatt*, Proc. Bost. Soc. Nat. Hist., 1884, p. 97.

placular (plak'ū-lạr), *a.* [< *placula* + *-ar*[3].] Plate-like; flat and broad; having the character of a placula.

placulate (plak'ū-lāt), *a.* [< *placula* + *-ate*[1].] Having the form of a placula; being a placula or in the placular stage of development, as an embryo.

Placuna (plạ-kū'nạ), *n.* [NL. (Bruguière, 1792), < Gr. *πλάξ* (*πλακ-*), a tablet, plate.] The typical genus of *Placunidæ*. They have thin, more

Saddle-shell (*Placuna sella*).

or less translucent shells, which are nearly equivalve, and no byssus. Several species inhabit East Indian seas. *P. placenta* is known as the *window-shell*, *P. sella* as the *saddle-shell*.

Placunidæ (plạ-kū'ni-dē), *n. pl.* [NL., < *Placuna* + *-idæ*.] A family of bivalve mollusks, typified by the genus *Placuna*, whose species are generally associated in the same family with the typical *Anomiidæ*, and are known as *window-shells*, *window-oysters*, and *saddle-shells*.

pladarosis (plad-ạ-rō'sis), *n.* [NL., < Gr. *πλαδαροῦσθαι*, become soft and flabby, < *πλαδαρός*, wet, damp, flaccid, flabby, < *πλαδᾶν*, be flaccid.] A soft tumor or wart on the eyelid. Also *pladarotis* and *pladaroma*.

plafond (pla-fond'), *n.* [= Sp. *plafón;* < F. *plafond*, ceiling, < *plat*, flat (see *plate*), + *fond*, bottom: see *fund*[1], *found*[2].] In *arch.*, the ceiling of a room, whether flat or arched; also, the under side of the projection of the larmier of a cornice, and generally any soffit. Also *platfond*.

plaga (plā'gạ), *n.*; pl. *plagæ* (-jē). [NL., < L. *plaga*, a blow, stroke, wound, stripe: see *plague*.] In *zoöl.*, a stripe or streak of color. —**Plaga scapularis**, in *entom.*, same as *parapsis*[1]. *Haliday*.

plagal (plā'gal), *a.* [= F. *plagal* = It. *plagale*, < ML. *plagius*, < Gr. *πλάγιος*, sidewise, slanting, athwart, oblique, < *πλάγος*, *πλᾶγος*, side.] 1. In *Gregorian music*, noting a mode or melody in which the final is in the middle of the compass instead of at the bottom: opposed to *authentic*. See *mode*[1], 7.—**2.** In *modern music*, noting a cadence in which the chord of the tonic is preceded by that of the subdominant. See *cadence*.

plagard†, *n.* Same as *placard*, 4, for *placcate*.

plagate (plā'gāt), *a.* [< *plaga* + *-ate*[1].] Striped or streaked.

plage[1]†, *n.* A Middle English form of *plague*.

plage[2]† (plāj), *n.* [< ME. *plage*, < OF. *plage* (also *plaie*), F. *plage* = Sp. Pg. It. *plaga*, < L. *plaga*, region, quarter, tract. Cf. Gr. *πλάγος*, the side: see *plagal*.] 1. A region; a district.

> Alle Cristen folk ben fled fro that contree
> Thurgh payens, that conquereden al aboute
> The *plages* of the North by land and see.
> *Chaucer*, Man of Law's Tale, l. 445.
>
> As far as from the frozen *plage* of heaven
> Unto the watery morning's ruddy bower.
> *Marlowe*, Tamburlaine, I., iv. 4.

2. Quarter of the compass.

> Now hastow her the foure quarters of thin astrelabie, devyded after the foure principals *plages* or quarters of the firmament. *Chaucer*, Astrolabe, i. 5.

Plagianthus (plaj-i-an'thus), *n.* [NL. (J. and G. Forster, 1776), < Gr. *πλάγιος*, oblique, + *ἄνθος*, flower.] A genus of polypetalous shrubs of the family *Malvaceæ* and the tribe *Malveæ*, unlike the other genera of its subtribe *Sideæ* in its longitudinally stigmatose style-branches, and characterized by a five-cleft calyx, distant or obsolete bracteoles, many-cleft stamen-column, and one, two, or many carpels, each with one pendulous seed. There are 7 species, all natives of Australia and New Zealand. They bear alternate or clustered, usually entire or angled leaves, and polygamous red, whitish, or yellowish flowers, usually small and densely crowded in the axils or in a terminal spike. Several low shrubby species produce a useful fiber. (See *hemp-bush* and *currajong*.) *P. betulinus*, the ribbon-tree of Otago, New Zealand, also called *cotton-tree*, *lacebark*, and *akaroa-tree*, is an evergreen reaching sometimes 70 feet, though usually a tangled bush, and yields a very fine tough fiber resembling flax, derived from the inner bark of the young branches.

plagiarise, *v.* See *plagiarize*.

plagiarism (plā'ji-ạ-rizm), *n.* [= Pg. *plagiarismo;* as *plagiar-y* + *-ism*.] 1. The purloining or wrongful appropriation of another's ideas, writings, artistic designs, etc., and giving these forth as one's own; specifically, the offense of taking passages from another's compositions, and publishing them, either word for word or in substance, as one's own; literary theft.

> Sir J. Reynolds has been accused of *plagiarism* for having borrowed attitudes from ancient masters. Not only candour but criticism must deny the force of the charge. *Walpole*, Anecdotes of Painting, IV., adv. p. vii., note.

2. A passage or thought thus stolen.

plagiarist (plā'ji-ạ-rist), *n.* [< *plagiar-y* + *-ist*.] One who plagiarizes; one who is guilty of plagiarism.

> You glean from the refuse of obscure volumes, where more judicious *plagiarists* have been before you; so that the body of your work is a composition of dregs and sediments—like a bad tavern's worst wine.
> *Sheridan*, The Critic, i. 1.

plagiarize (plā'ji-ạ-rīz), *v.*; pret. and pp. *plagiarized*, ppr. *plagiarizing*. [< *plagiar-y* + *-ize*.] **I.** *trans.* To steal or purloin from the writings or ideas of another: as, to *plagiarize* a passage.

II. *intrans.* To commit plagiarism.

Also spelled *plagiarise*.

plagiary (plā'ji-ạ-ri), *n.* and *a.* [Formerly *plagiarie;* < F. *plagiaire* = Sp. Pg. It. *plagiario*, a kidnapper, a plagiarist, < L. *plagiarius*, a kidnapper, plagiarist, < (LL.) *plagium*, kidnapping, prob. < *plaga*, a net, snare, trap, prob. orig. **placa*, < *plec-t-ere* = Gr. *πλέκειν*, weave: see *plait*.] **I.** *n.*; pl. *plagiaries* (-riz). 1†. A manstealer; a kidnapper.

> He was a Cyrenean by birth, and . . . in the time of his minoritie or child-hood he was by some *Plagiary* stolne away from his friends, and sold to the Ismaelite Merchants. *Purchas*, Pilgrimage, p. 243.

2. A plagiarist.

> Why, the ditty 's all borrowed; 'tis Horace's; hang him, *plagiary!* *B. Jonson*, Poetaster, iv. 1.

3. The crime of literary theft; plagiarism.

> *Plagiarie* had not its nativitie with printing, but began in times when thefts were difficult, and the paucity of bookes scarce wanted that invention.
> *Sir T. Browne*, Vulg. Err., i. 6.

II. *a.* 1†. Manstealing; kidnapping.

> *Plagiary* and man-stealing Tartars.
> *Brown*, Travels (1685), p. 49. (*Latham.*)

2. Practising literary theft.

> Or a Hos ego from old Petrarch's spright
> Unto a *plagiary* sonnet-wright.
> *Bp. Hall*, Satires, IV. ii. 84.

Plagiaulacidæ (plā"ji-â-las'i-dē), *n. pl.* [NL., < *Plagiaulax* (*-lac-*) + *-idæ*.] A widely distributed family of fossil mammals, typified by the genus *Plagiaulax*. The premolars were obliquely grooved and the last was enlarged, the true molars two on each side and small, and the incisors of the lower jaw inclined forward and two in number. The family was formerly referred to the marsupials, but by recent writers is generally relegated to the *Monotremata*, as a representative of a peculiar order, *Multituberculata*. Remains referred to this family occur in Europe and America, ranging in geologic time from the Triassic to the Eocene.

Plagiaulax (plā-ji-â'laks), *n.* [NL., < Gr. *πλάγιος*, oblique, + *αὐλαξ*, furrow.] A genus of fossil primitive mammals from the Purbeck beds of the Upper Oölite, as *P. becclesi*, *P. minor*, and others. See *diprotodont*, *polyprotodont*.

plagihedral (plā-ji-hē'drạl), *a.* [= F. *plagièdre*, < Gr. *πλάγιος*, oblique, + *ἕδρα*, seat, base.] In *crystal.*, having faces obliquely arranged, as in certain hemihedral forms which are enantiomorphous to their complementary forms—that is, related to them as a right glove is to the left: this is true of the trapezohedral planes on a quartz crystal.

plagiocephalic (plā"ji-ō-se-fal'ik or -sef'ạ-lik), *a.* [< *plagiocephal-ous* + *-ic*.] 1. Having an oblique head due to one-sided premature synosteosis.—2. Having a broad head with flattened forehead. *Jour. Anthrop. Inst.*, III. 90. [Rare.]—**3.** Pertaining to or exhibiting plagiocephaly.

plagiocephalous (plā"ji-ō-sef'ạ-lus), *a.* [< Gr. *πλάγιος*, oblique, + *κεφαλή*, head.] Same as *plagiocephalic*.

plagiocephaly (plā"ji-ō-sef'ạ-li), *n.* [< *plagiocephal-ous* + *-y*.] Oblique deformity of the skull, due to premature synosteosis of sutures.

plagiocitrite (plā"ji-ō-sit'rīt), *n.* [< Gr. *πλάγιος*, oblique, + L. *citrus*, citrus (see *citrus*), + *-ite*[2].] A hydrous sulphate of iron, aluminium, sodium, and potassium, occurring in fibrous crystalline forms of a lemon-yellow color near Bischofsheim vor der Rhön, in Bavaria.

plagioclase (plā'ji-ō-klāz), *n.* [< Gr. *πλάγιος*, oblique, + *κλάσις*, fracture, < *κλᾶν*, break.] The name given by Breithaupt to the group of triclinic feldspars the two prominent cleavage-directions in which are oblique to each other. The plagioclase-feldspar group includes albite, anorthite, and the intermediate species, oligoclase, andesin, labradorite; with these the triclinic potash feldspar microcline is sometimes included. See *feldspar*.

plagioclastic (plā"ji-ō-klas'tik), *a.* [< Gr. *πλάγιος*, oblique, + *κλαστός*, broken; cf. *clastic*.] Breaking obliquely; characterized by two different cleavages in directions oblique to one another, or pertaining to a mineral (as one of the triclinic feldspars) which has this property.

Plagiodon (plā-ji'ō-don), *n.* [NL. (orig. *Plagiodontia*, F. Cuvier, 1836), < *πλάγιος*, oblique, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] 1. A West Indian genus of small hystricomorphic rodents of the family *Octodontidæ* and subfamily *Echinomy-*

Plagiodon ædium.

inæ: so called from the diagonal grooves of the molars. The molars are rootless; the thumb is rudimentary; the tail is short and scaly; the fur is coarse, with silky under-fur; the muzzle is blunt; and the whole form is stout. The genus is closely related to *Capromys*. There is only one species, *P. ædium* of San Domingo.

2. A genus of reptiles. *Duméril.*—**3.** A genus of mollusks. *Isaac Lea*.

plagiodont (plā'ji-ō-dont), *a.* [< Gr. *πλάγιος*, oblique, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] Having the teeth oblique: noting the dentition of serpents whose teeth are like one another, those of the palate being set in two converging series.

Plagiodus (plā-ji-ō'dus), *n.* [NL. (orig. *Plagyodus*, Steller, 1811): see *Plagiodon*.] Same as *Alepidosaurus*. See cut under *handsaw-fish*.

plagionite (plā'ji-ō-nīt), *n.* [< Gr. *πλάγιος*, oblique, + *-n-* + *-ite*[2].] A sulphid of antimony and lead, occurring in oblique monoclinic crystals and in massive forms. It has a dark lead-gray color and metallic luster.

Plagiostoma[1] (plā-ji-os'tō-mạ), *n.* [NL. (Sowerby, 1812), fem. sing.: see *plagiostome*.] A genus of bivalve mollusks of the family *Limidæ*, or a subgenus of *Lima*, containing such species as *P. cardiiformis*. See cut under *Lima*.

Plagiostoma[2] (plā-ji-os'tǫ-mä), *n. pl.* [NL., neut. pl.: see *plagiostome.*] Same as *Plagiostomi.* *Nilsson*, 1832.

Plagiostomata (plā″ji-ǫ-stō'ma-tä), *n. pl.* [NL.; cf. *Plagiostoma*[2].] The *Plagiostomi* as an order of *Chondropterygii.* *Günther.*

plagiostomatous (plā″ji-ǫ-stom'ạ-tus), *a.* [< *Plagiostomata* + *-ous.*] Same as *plagiostomous.*

plagiostome (plā'ji-ǫ-stōm), *a.* and *n.* [< Gr. πλάγιος, oblique, + στόμα, mouth.] **I.** *a.* Plagiostomous.

II. *n.* A plagiostomous fish; any member of the *Plagiostomi*, as a selachian.

Plagiostomi (plā-ji-os'tǫ-mī), *n. pl.* [NL., < Gr. πλάγιος, oblique, + στόμα, mouth.] In the older systems, an order of chondropterygian or elasmobranchiate fishes, including all the sharks and rays. In some recent systems it has been used as a superordinal or subclass name of the same group. Its characteristics are the development of a distinct suspensorium for the mandible (consisting of the undivided palatoquadrate cartilage), five to seven pairs of branchial apertures, and no operculum.

plagiostomous (plā-ji-os'tǫ-mus), *a.* [As *Plagiostomi* + *-ous.*] Of or pertaining to the *Plagiostomi.* Also *plagiostomatous.*

Plagiotoma (plā-ji-ot'ǫ-mä), *n.* [NL. (Dujardin), < Gr. πλάγιος, oblique, + *-τομος*, < τέμνειν, ταμεῖν, cut.] A genus of heterotrichous ciliate infusorians typical of the family *Plagiotomidæ.* *P. lumbrici* is known as the *bean-animalcule* of the intestine of the earthworm.

In 1280 the Bishop of Hebron, vicegerent of the patriarch, sends the thanks of the Franks, and adds that Armenia and Cyprus have been laid waste by a *plague* of locusts.
Stubbs, Medieval and Modern Hist., p. 186.

2. Any epidemic disease of high mortality. The disease known specifically as *the plague* entered Europe from the Levant in the sixth century, and lingered there in scattered localities over a thousand years. It has recently reappeared in epidemic form in India and eastern Asia, whence cases are from time to time brought to various seaports in Europe and America. It occurs under three forms, called respectively *bubonic*, *septicemic*, and *pneumonic plague.* A fourth form, *pestis minor*, is simply a very mild form of bubonic plague, bearing to it the same relation that varioloid does to smallpox. The septicemic form also is possibly a very severe bubonic plague, the patient being overcome with the poison and dying before there has been time for the development of buboes. In the pneumonic form the symptoms resemble those of a severe pneumonia; buboes are commonly absent, and death is the usual termination. Typical cases of bubonic plague, after a period of incubation of from two to seven days, begin suddenly with prostration, headache, dizziness, and sometimes vomiting and diarrhea; after a few hours or one or two days a chill develops, followed by high fever with noisy delirium, passing into coma; on the second to the fourth day buboes, most frequently inguinal, develop; in non-fatal cases they more frequently suppurate than resolve; there may also be carbuncles, boils, and petechiæ; convalescence begins from the sixth to the tenth day. The mortality is extreme, sometimes running as high as 95 per cent. Also called *the pest*, *the pestilence*, *glandular plague* or *pestilence*, *inguinal plague*, *Levant* or *Levantine plague*, *Justinian plague.*

Whether in all the pestilences known by this name [the Black Death] the disease was really the same may admit of doubt, but it is clear that in some at least it was the bubonic *plague.* *Encyc. Brit.*, XIX. 164.

3. As an expletive with the article *the*, used like *the devil*, *the deuce*, etc. Compare *devil*, 7.

How *the plague* shall I be able to pass for a Jew?

Too little wit and too much *plain-dealing* for a statesman. *Sir J. Denham*, The Sophy, iii. 1.

plain-edge (plān'ej), *a.* In *lace-making*, not having a pearl-edge, especially in the case of pillow-lace, which is usually so decorated.

plain-hearted (plān'här'ted), *a.* Having a sincere heart; without guile or duplicity; of a frank disposition.

Free-spoken and *plain-hearted* men, that are the eyes of their country. *Milton*, On Def. of Humb. Remonst., § 1.

plain-heartedness (plān'här'ted-nes), *n.* Frankness of disposition; sincerity.

A religion that owns the greatest simplicity and openness and freedom and *plainheartedness*.
Hallywell, Moral Discourses (1692), p. 40. (*Latham.*)

plaining (plā'ning), *n.* [Verbal n. of *plain*[2], *v.*] Mourning; lamenting.

And in your clefts her *plainings* doe not smother,
But let that echo teach it to another!
W. Browne, Britannia's Pastorals, ii. 1.

plainly (plān'li), *adv.* [< ME. *plainly, pleynly, plainliche*, etc.; < *plain*[1] + *-ly*[2].] In a plain manner. (*a*) Smoothly; evenly. (*b*) Clearly; without obstruction or deception; in a way to be easily perceived or understood; unmistakably. (*c*) Without disguise or

reserve; sincerely; honestly; bluntly; frankly. (*d*) Without ornament or embellishment; simply; soberly: as, a lady *plainly* dressed.

plainness (plān'nes), *n.* The state or quality of being plain. (*a*) Evenness of surface; levelness. (*b*) Absence of ornament; lack of artificial show. (*c*) Openness; candor; blunt or unpolished frankness. (*d*) Clearness; distinctness; intelligibility. (*e*) Lack of beauty; homeliness. =Syn. (*d*) *Clearness, Lucidity*, etc. See *perspicuity*.

plain-pug (plān'pug), *n.* A British geometrid moth, *Eupithecia subnotata*.

plain-singing (plān'sing″ing), *n.* Same as *plain-song*. *W. Mason*, Eng. Church Music, iii. [Rare.]

plainsman (plānz'man), *n.*; pl. *plainsmen* (-men). A dweller on the plains.

These *plainsmen* are far from being so heterogeneous a people as is commonly supposed.
T. Roosevelt, Hunting Trips, p. 6.

plain-song (plān'sông), *n.* 1. The unisonous vocal music which has been used in the Christian church from its earliest centuries. Its origin is unknown, but it contains elements taken from the ancient Greek music, and possibly also from the ancient Temple music of the Hebrews. It is often called *Gregorian*, from its most prominent early systematizer, or, in certain details, *Ambrosian*. It rests upon an elaborate system of octave scales or modes. (See *mode*[1], 7.) According to the principles and rules of these modes, numerous melodies have been composed or compiled, which have become established by tradition or authority as parts of the liturgies of the Western Church in general and of the modern Roman Catholic Church in particular. This body of melodies includes a great variety of material adapted not only to every part of the liturgy, but to the several seasons of the Christian year. Plain-song melodies are distinguished by adherence to the medieval modes, by independence of rhythmical and metrical structure, and by a limited and austere use of harmony. Their effect is strikingly individual, dignified, and devotional. The style as such is obligatory in the services of the Roman Catholic Church, and has been perpetuated there with remarkable purity, in spite of its contrasts with modern music in general. It has exerted a profound influence upon general musical development, dominating that development until nearly 1600, and furnishing innumerable hints and themes to all subsequent styles. The medieval theory of counterpoint was a direct outgrowth of the melodic principle of plain-song. See *Gregorian, tone, mode*[1], *antiphon, introit*, and *prick-song*.

2. A cantus firmus or theme chosen for contrapuntal treatment: so called because often an actual fragment of plain-song.—3. The simple notes of an air, without ornament or variation; hence, a plain, unexaggerated statement.

All the ladies . . . do plainly report
That without mention of them you can make no sport;
They are your *playne song*, to singe descant upon.
R. Edwards, Damon and Pythias.

The humour of it is too hot, that is the very *plain-song* of it. *Shak.*, Hen. V., iii. 2. 6.

Audi. Lingua, thou strikest too much upon one string, Thy tedious *plain-song* grates my tender ears.
Lin. Tis plain, indeed, for truth no discant needs.
Brewer, Lingua, i. 1.

plain-speaking (plān'spē″king), *n.* Plainness or bluntness of speech; candor; frankness. *Roget*.

plain-spoken (plān'spō″kn), *a.* Speaking or spoken with plain, unreserved sincerity; frank.

The reputation of a *plain-spoken*, honest man.
Dryden, All for Love, Pref.

The convention listened civilly to Mr. Curtis, who presented a very *plain-spoken* address from the New York reformers. *G. S. Merriam*, S. Bowles, II. 259.

plainstanes (plān'stānz), *n. pl.* Flagstones; sidewalks; pavements. [Scotch.]

I trow no grass grew beneath his feet on the *plainstanes* of London. *Galt*, The Steam-Boat, p. 262.

plaint (plānt), *n.* [< ME. *plainte, pleinte, pleynt*, < OF. *pleinte*, F. *plainte* = Pr. *planch* = Sp. *llanto*, OSp. *pranto* = Pg. *pranto* = It. *pianto*, < ML. *plancta*, f., plaint, L. *planctus*, a beating of the breast in lamentation, beating, lamentation, < *plangere*, beat the breast, lament: see *plain*[2].] 1. Lamentation; complaint; audible expression of sorrow; a sad or serious song.

Greet was the pite for to here hem pleyne,
Thurgh whiche *pleyntes* gan her wo encresse.
Chaucer, Man of Law's Tale, l. 970.

Thy accent will excell
In Tragick *plaints* and passionate mischance.
Spenser, Colin Clout, l. 427.

Nor Tears can move,
Nor *Plaints* revoke the Will of Jove.
Prior, Turtle and Sparrow.

2†. Representation made of injury or wrong done; complaint.

There are . . . three just grounds of war with Spain: one *plaint*, two upon defence. *Bacon*, War with Spain.

3. In *law*: (*a*) A statement of grievance made to a court for the purpose of asking redress. (*b*) The first process in an inferior court, in the nature of original process. [Rare.]

plain-table, *n.* See *plane-table*.

plaintful (plānt'fûl), *a.* [< *plaint* + *-ful*.] Complaining; expressing sorrow with an audible voice; also, containing a plaint.

Hark, *plaintful* ghosts, infernal furies, hark
Unto my woes the hateful heavens do send.
Sir P. Sidney, Arcadia, iii.

plaintif†, *n.* and *a.* An obsolete form of *plaintiff, plaintive*.

plaintiff (plān'tif), *n.* and *a.* [Formerly also *plaintif, plaintife*; < ME. *plaintif, playntyf*, < OF. *plaintif*, complaining; as a noun, one who complains, a plaintiff: see *plaintive*.] **I.** *n.* In *law*, the person who begins a suit before a tribunal for the recovery of a claim: opposed to *defendant*.

And 'tis well that you
Begin, else I had been the *Plaintiff* now.
J. Beaumont, Psyche, iv. 20.

Calling of the plaintiff. See *calling*.—**Nominal plaintiff**, one who appears by name as plaintiff upon the record, but has no interest in the action. Also *nominal party*.

II.† *a.* Complaining.

His younger Son on the polluted Ground,
First Fruit of Death, lies *Plaintiff* of a wound
Given by a Brother's Hand. *Prior*, Solomon, iii.

plaintive (plān'tiv), *a.* [< F. *plaintif*, lamenting; < *plainte*, lament: see *plaint*. Cf. *plaintiff*.] 1†. Lamenting; complaining; giving utterance to sorrow or grief; repining.

To soothe the sorrows of her *plaintive* son.
Dryden, Iliad, i. 490.

2. Expressive of sorrow or melancholy; mournful; sad: said of things: as, a *plaintive* sound; a *plaintive* air; a *plaintive* song.

Whose *plaintive* strain each love-sick miss admires,
And o'er harmonious fustian half expires.
Byron, Eng. Bards and Scotch Reviewers.

=Syn. *Plaintive, Querulous*, woful, rueful. *Plaintive* and *querulous* agree in expressing weakness. He who is *querulous* is ready to find fault over trivial matters, and in a weak, captious, tired way; there is a tone recognized as *querulous*. *Plaintive* is rarely said of persons; a *plaintive* tone or utterance conveys a subdued regret or lamentation: as, the *plaintive* note of the mourning dove. See *petulant*.

The *plaintive* wave, as it broke on the shore,
Seemed sighing for rest for evermore.
Jones Very, Poems, p. 120.

Quickened the fire and laid the board,
Mid the crone's angry, *querulous* word
Of surly wonder.
William Morris, Earthly Paradise, III. 69.

plaintively (plān'tiv-li), *adv.* In a plaintive manner; mournfully; sadly.

plaintiveness (plān'tiv-nes), *n.* The quality of being plaintive; mournfulness.

plaintless (plānt'les), *a.* [< *plaint* + *-less*.] Without complaint; unrepining.

By woe, the soul to daring action swells;
By woe, in *plaintless* patience it excels.
Savage, The Wanderer, ii.

plain-wanderer (plān'won″dėr-ėr), *n.* A bush-quail of the genus *Pedionomus*: as, the collared *plain-wanderer, P. torquatus*. [A book-name.]

plain-wave (plān'wāv), *n.* A British geometrid moth, *Acidalia inornata*.

plain-work (plān'wėrk), *n.* Plain needlework, as distinguished from embroidery.

plaisance†, *n.* [< F. *plaisance*, pleasance: see *pleasance*.] An obsolete form of *pleasance*.

Plaisance, and joy, and a lively spirit, and a pleasant conversation, and the innocent caresses of a charitable humanity, is not forbidden.
Jer. Taylor, Works (ed. 1835), I. 742.

plaise†, *n.* See *plaice*.

plaister, *n.* and *v.* An obsolete or archaic form of *plaster*.

plait (plāt), *n.* [Also *plat, pleat*, and (obs.) *plight*; early mod. E. also *playt, pleyght*, etc.; < ME. *plaite, playte*, < OF. *pleit, plet, ploit*, F. *pli*, a fold, ply, = Pr. *pleg, plec* = Sp. *pliegue* = Pg. *prega* = It. *piega*, a fold, < ML. as if **plictum*, neut., **plicta*, fem., for *plicatum, plicata*, neut. and fem. of L. *plicatus*, pp. of *plicare*, fold: see *ply*.] 1. A flattened gather or fold; an overlapping fold made by doubling cloth or some similar fabric in narrow strips upon itself.

They vse all one maner of appareyle: as longe coates withowte *pleyghtes* and with narrowe sleaues, after the maner of the Hungaryans.
R. Eden, tr. of Sigismundus Liberus (First Books on [America, ed. Arber, p. 320).

That attire,
E'en as it sits on thee, not a *plait* alter'd.
Middleton, A Mad World, iv. 4.

It is very difficult to trace out the figure of a vest through all the *plaits* and folding of the drapery. *Addison*.

2. A braid, as of hair, straw, etc.

But in and cam the Queen hersel,
Wi' gowd *plait* on her hair.
Mary Hamilton (Child's Ballads, III. 325).

A high crown of shining brown *plaits*, with curls that floated backward. *George Eliot*, Felix Holt, v.

3. Rope-yarn strands braided into sennit.—**Brazilian, Leghorn**, etc., **plait**. See the qualifying words.

plait (plāt), *v.* [Also *plat, pleat*, and (obs.) *plight*; < ME. *plaiten, playtyn, plaitin, pleten*, < *playte, plaite*, etc.: see *plait, n.*] **I.** *trans.* 1. To fold; double in narrow strips: as, to *plait* a gown or a sleeve. See *plaiting* and *box-plaiting*.—2. To braid; interweave the locks or strands of: as, to *plait* the hair.

She has *plaited* her yellow locks
A little abune her bree.
Hynde Etin (Child's Ballads, I. 294).

I'll weave her Garlands, and I'll *pleat* her Hair.
Prior, Henry and Emma.

3. To mat; felt. *E. H. Knight*.

II.† *intrans.* To twist; twine.

The worm lept out, the worm lept down,
She *plaited* round the stone;
And ay as the ship came to the land
She banged it off again.
The Laidley Worm of Spindleston-heugh (Child's Ballads, I. 285).

plaited (plā'ted), *p. a.* 1. Folded; made in or with, or marked by, folds or flattened flutings; pleated: as, a shirt with a *plaited* bosom.

The Romaines, of any other people most seuere censurers of decencie, thought no vpper garment so comely for a ciuill man as a long *playted* gowne.
Puttenham, Arte of Eng. Poesie, p. 237.

2. In *bot.* and *zoöl.*, folded lengthwise like the plaits of a closed fan; fluted.—3. Wrinkled; contracted; knitted.

A conflicting of shame and ruth
Was in his *plaited* brow. *Keats*, Endymion, i.

4. Braided; interwoven: as, *plaited* hair.

Though barks or *plaited* willows make your hive,
A narrow inlet to their cells contrive.
Addison, tr. of Virgil's Georgics, iv.

5†. Tangled; intricate.

Time shall unfold what *plaited* cunning hides.
Shak., Lear, i. 1. 283.

Plaited lace. See *lace*.—**Plaited stitch**, one of the stitches of worsted work or Berlin wool work, in which the threads span a considerable distance at each insertion, the result being a sort of herring-bone pattern.—**Plaited string work**, a kind of fancy work made with small cord, or ordinary string, narrow ribbon, or tape, which is plaited or twisted into simple patterns.—**Plaited worms**, the *Aspidogasteridæ*.

plaiter (plā'tėr), *n.* [< *plait* + *-er*[1].] One who or that which plaits or braids; especially, an implement for producing plaits of regular size, as in cloth.

plaiting (plā'ting), *n.* [Verbal n. of *plait, v.*] 1. The act or process of making plaits or folds, or of interweaving or braiding two or more strands, fibers, etc.

Plaiting appears to have been the process first practised; for short fibers, such as grass, rushes, &c., can be used without the aid of spinning by this means.
A. Barlow, Weaving, p. 404.

2. Plaits, folds, or braids taken collectively.—3. In *hat-making*, the felting or interweaving of the hair to form the body by means of pressure, motion, moisture, and heat. Also called *hardening*.

plaiting-machine (plā'ting-ma-shēn′), *n.* A machine for forming plaits in cloth; a plaiter. In simple forms it is merely a board with a series of needles hinged to one side, the fabric being folded in plaits under the needles in any manner desired, and held in position by the needles till the form has been impressed by a hot iron. Other machines, whether serving as attachments to sewing-machines or working independently, operate by means of reciprocating blades, which tack or push the fabric into plaits, these plaits being fixed by means of hot irons or heated cylinders.

plait-work (plāt'wėrk), *n.* Decoration by means of interlacing or interwoven bands, seeming as if plaited together. Compare *strap-work*.

plakat (plak'at), *n.* [Siamese name.] The fighting-fish.

plan (plan), *n.* [= D. G. Dan. Sw. *plan*, < F. *plan*, a ground-plot of a building (= Sp. *plan, plano* = Pg. *plano* = It. *piano*), < *plan*, flat, a later form than the vernacular *plain*, < L. *planus*, flat, plane: see *plain*[1], *plane*[1].] 1. The representation of anything drawn on a plane, as a map or chart; specifically, the representation of a building or other structure in horizontal section, as it stands or is intended to stand on the ground, showing its extent, and the division and distribution of its area into apartments, rooms, passages, etc., or its method of construction and the relation of its parts. The *raised plan* of a building is the same as an *elevation*. A *geometrical plan* is one drawn to scale, or one in which the solid and vacant parts are represented in their natural proportions. A *perspective plan* is one the lines of which follow the rules

of perspective, thus showing more distant parts smaller than they are in fact in relation to the nearer parts. The term *plan* may be applied to the draft or representation of any projected work on paper or on a plane surface: as, the *plan* of a town or city, or of a harbor or fort. See cuts under *camp* and *canal-lock*.

2. Disposition of parts according to a certain design.

Expatiate free o'er all this scene of man,
A mighty maze! but not without a *plan*.
Pope, Essay on Man, i. 6.

Man only mars kind Nature's *plan*,
And turns the fierce pursuit on man.
Scott, Rokeby, iii. 1.

3. A formulated scheme for the accomplishment of some object or the attainment of an end; the various steps which have been thought out and decided upon for the carrying out of some project or operation.

Where there seemed nothing but confusion, he can now discern the dim outlines of a gigantic *plan*.
H. Spencer, Social Statics, p. 322.

The very fact of a *plan* implies a logical procedure.
W. L. Davidson, Mind, XII. 253.

4. A method or process; a way; a custom.

For why? because the good old rule
Sufficeth them, the simple *plan*,
That they should take who have the power,
And they should keep who can.
Wordsworth, Rob Roy's Grave.

5. A type of structure: as, man is the highest development of the vertebrate *plan;* the *plan* of a mollusk or an insect.—**American plan.** See *American.*—**Common plan,** in *biol.*, an archetype.—**Details of a plan.** See *detail.*—**European plan.** See *European.*—**Half-breadth plan,** in *ship-building*, a plan showing the

Half-breadth Plan.

various lines of one longitudinal half of a ship projected on the horizontal plane.—**Hemal plan,** in mollusks, that modification of the common plan in which, by disproportionate growth of the postabdomen, the intestine acquires a hemal flexure: distinguished from *neural plan.*—**Instalment plan.** See *instalment.*—**Neural plan,** in mollusks, that modification of the common plan in which, by disproportionate growth of the abdomen, the intestine acquires a neural flexure: distinguished from *hemal plan.*—**Plan of campaign.** (*a*) A formulated scheme for carrying on a campaign. (*b*) In Ireland, a system of procedure formed in 1886 and supported by the National League. The officers of the League, acting as trustees, received the rent of tenants on rack-rented estates; this money, less a certain abatement demanded by the tenants, was offered to the landlord; if the latter refused it, it was used for support in cases of eviction.—**Working-plan,** a draft, drawn to a large scale, supplied to artisans or workmen to work from.=**Syn.** 1. Draft, delineation, sketch.—3. *Plan, Scheme, Project, Design,* plot. *Design* may represent the end which a *plan, scheme,* or *project* is intended to promote. They all indicate thought given to the general aim and to the details. *Scheme* is the most likely to represent something speculative or visionary: as, he was full of *schemes; project* stands next to it in this respect, but *project* may also be the most definite or concrete: as, a *project* for building a bridge. *Plan* is the least definite; *design* and *plan* may be very indefinite, or have a concrete sense: as, a *design* or *plan* of going away; a *design* or *plan* of a house. *Scheme* is often used in a bad sense; *design* sometimes.

Lay square the blocks upon the slip,
And follow well this *plan* of mine.
Longfellow, Building of the Ship.

The *scheme* of nature itself is a *scheme* unstrung and mistuned. *Bushnell*, Nature and the Supernat., p. 46.

And in my ear
Vented much policy, and *projects* deep
Of enemies, of aids, battels, and leagues.
Milton, P. R., iii. 391.

O Painter of the fruits and flowers!
We thank thee for thy wise *design*,
Whereby these human hands of ours
In Nature's garden work with thine.
Whittier, Lines for an Agricultural Exhibition.

plan (plan), *v. t.*; pret. and pp. *planned*, ppr. *planning*. [< *plan*, *n.*] 1. To lay down on paper the different parts, divisions, dimensions, and methods of construction of (a machine, ship, building, etc.): as, to *plan* an edifice.—2. To scheme; lay plans for; devise ways and means for: as, to *plan* the conquest of a country; to *plan* one's escape.

Plan with all thy arts the scene of fate. *Pope.*

=**Syn.** 1. To figure, sketch out, delineate.

planæa (plā-nē'ạ), *n.* [NL., < L. *planus*, flat: see *plain*[1], *plane*[1].] A theoretical organism, corresponding to the fourth stage in the development of an ovum; a hypothetical multicellular astomatous animal, whose larval form should be that of a ciliated planula. See *planula*. Also called *blastæa*. *Haeckel*.

Planæadæ (plā-nē'ạ-dē), *n. pl.* [NL., < *planæa* + *-adæ*.] A hypothetical group of animals having the form of a ciliated planula and the morphological valence of a blastula, supposed to have arisen in the primordial geologic period in the direct line of descent of the remote ancestors of the human race. *Haeckel*.

planar (plā'nạr), *a.* [< L. *planar-ius*, flat: see *planary*.] Lying in a plane; planary; flat.—**Planar dyadic.** See *dyadic*.

Planaria (plā-nā'ri-ạ), *n.* [NL. (Müller, 1776), < LL. *planarius*, flat.] The typical genus of *Planariidæ*. *P. torva* is an example.

planarian (plā-nā'ri-ạn), *a.* and *n.* [< LL. *planarius*, flat (see *planary*), + *-an*.] I. *a.* Flat, as a turbellarian; belonging to the *Planarida* or *Dendrocœla*. See cut under *Dendrocœla*.

II. *n.* A member of the suborder *Planarida*.

Planarida (plā-nar'i-dạ), *n. pl.* [NL., < LL. *planarius*, flat, + *-ida*.] A suborder of *Turbellaria*, containing the rhabdocœlous and dendrocœlous turbellarian worms; the planarians. When the so-called rhynchocœlous turbellarians or nemertean worms are excluded, *Planarida* become the same as *Turbellaria*. They are flatworms, mostly oval or elliptical in form, moving by means of vibratile cilia. They are hermaphrodite. In some the intestine is straight and simple or rhabdocœlous, in others branched and complicated or dendrocœlous. They are mostly aquatic, inhabiting both fresh and salt water; but some, the land-planarians, are found in moist earth. See cut under *Dendrocœla*.

planaridan (plā-nar'i-dạn), *a.* and *n.* I. *a.* Planarian in a broad sense; turbellarian.

II. *n.* A planarian.

planariform (plā-nar'i-fôrm), *a.* [< LL. *planarius*, flat, level, + *forma*, form.] Like a planarian in form; planaridan. Also *planarioid*.

Planariidæ (plan-ạ-rī'i-dē), *n. pl.* [NL., < *Planaria* + *-idæ*.] A family of monogonoporous *Dendrocœla* of an oblong form, without a foot differentiated from the body, typified by the genus *Planaria*.

planarioid (plā-nā'ri-oid), *a.* [< LL. *planarius*, flat, + Gr. *εἶδος*, form.] Same as *planariform*.

planary (plā'nā-ri), *a.* [< LL. *planarius*, flat, level, < L. *planus*, level, plane: see *plain*[1], *plane*[1].] Lying in one plane; flat.

planate (plā'nāt), *a.* [< NL. **planatus*, < L. *planus*, flat: see *plane*[1].] In *entom.*, flat; forming a plane; flattened.

planceer†, *n.* Same as *plancher*.

planch (planch), *n.* [< F. *planche*, < L. *planca*, a board, plank: see *plank*.] 1†. A plank. *Fanshaw.*—2. In *enameling*, a slab of fire-brick or baked fire-clay used to support the work while it is baked in the oven.—3. A flat iron shoe for a mule. *E. H. Knight.*

planch† (planch), *v. t.* [< *planch*, *n.*] To plank; make of or cover with planks or boards. Also *plancher*.

And to the vineyard is a *planched* gate.
Shak., M. for M., iv. 1. 30.

Yet with his hoofes doth beat and rent
The *planched* floore.
Gorges, tr. of Lucan. (*Nares.*)

plancha (plan'chä), *n.* [Sp., plate.] In the Mexican silver-mines, a charge of ore ready for smelting, and also the disk or plate of argentiferous lead produced by the operation.

plancher† (plan'chėr), *n.* [Also *planceer;* early mod. E. also *plauncher;* < F. *plancher*, a floor or ceiling of boards, < *planche*, a board, plank: see *planch*, *plank*.] 1. A plank.

Upon the ground doth lie
A hollow *plancher*. *Lyly*, Maid's Metamorph.

Th' anatomized fish, and fowls from *planchers* sprong.
Drayton, Polyolbion, iii. 272

2. A floor of wood.

The holys that ben made forr hand gunnys, they ben scarse kne hey fro the *plawncher*, and of soche holis ben made fyve. *Paston Letters*, I. 83.

Oak, cedar, and chestnut are the best builders: some are best for plough timber, as ash: some for *planchers*, as deal. *Bacon*, Nat. Hist., § 658.

3. In *anat.*, the inferior wall or boundary of a cavity. *Imp. Dict.*

plancher† (plan'chėr), *v.* [Early mod. E. also *plauncher;* < *plancher*, *n.*] I. *intrans.* To make a floor of wood. *Abp. Sancroft*, Letter, 1691, in D'Oyly, II. 16.

II. *trans.* Same as *planch*.

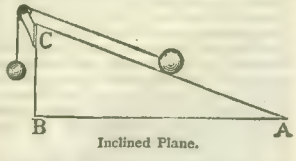
Towers were *plauncherd*, & battlements and portcolyses of timber set vp. *Golding*, tr. of Cæsar, fol. 133.

planchet (plan'chet), *n.* [< F. *planchette*, a small board, a plane table, a circumferentor, formerly also the bottom of a stump, a bush, etc. (= Sp. *plancheta* = Pg. *prancheta*, a circumferentor), dim. of *planche*, a board: see *planch*, *plank*.] A flat piece of metal intended to receive a die-impression for a coin; a coin-blank.

planchette (plan-chet'; as F., plon-shet'), *n.* [< F. *planchette*, a small board, a circumferentor: see *planchet*.] 1. A small heart-shaped or triangular board mounted on three supports, of which two, placed at the angles of the base, are easily moving casters, and the third, placed at the apex, is a pencil-point. If the tips of the fingers of one person, or of two, are placed lightly upon it, the board will often, after a time, move without conscious effort on the part of the operator, and the pencil-point will trace lines, words, and even sentences. It was invented about 1855, and was for a time an object of not a little superstition.

2. A circumferentor.

plane[1] (plān), *a.* and *n.* [I. *a.* < F. *plan* (fem. *plane*) = Sp. *plano* = Pg. *plano* = It. *piano*, < L. *planus*, flat, level, plane, plain: see *plain*[1], *a.* II. *n.* < F. *plan* = Sp. Pg. *plano* = It. *piano*, < NL. *planum*, a geometrical plane; cf. L. *planum*, level ground, a plain, neut. of L. *planus*, level, flat, plane, plain: see *plain*[1], *n.* Cf. *plan*, *n.* *Plane*[1], *plain*[1], *plan*, *piano*, are from the same L. word.] I. *a.* 1. Having the character of a plane; contained within a plane: as, a *plane* mirror; a *plane* curve. In *n*-dimensional geometry, sometimes applied to a linear manifold of any number of dimensions, for which *flat* is generally used.



2. In *bot.*, having a flat surface or surfaces.—3. In *entom.*, flat and not deflexed; flat at the margins: as, *plane* elytra.—**Plane angle.** See *angle*[3], 1.—**Plane ashler.** See *ashler*, 3.—**Plane chart, curve, function, geometry, inflection.** See the nouns.—**Plane cubic parabola.** See *cubic*.—**Plane scale,** in *nav.*, a scale on which are graduated chords, sines, tangents, secants, rhumbs, geographical miles, etc.—**Plane screw,** a disk with a spiral thread upon its side.—**Plane surveying,** the surveying of tracts of moderate extent, without regarding the curvature of the earth.—**Plane trigonometry.** See *trigonometry*.—**Plane wings,** in *entom.*, wings which are extended horizontally in repose.

II. *n.* 1. A geometrical surface such that if any two points in it are joined by a straight line, the line will lie wholly on the surface; a surface such that two of them which have any three points in common must coincide over their whole extent; hence, a real surface having (approximately) this form. It is thus the simplest of all geometrical surfaces. A plane may also be defined as a surface of the form which is the ideal limit toward which parts of the surfaces of three rigid solids, A, B, C, approximate, if these are ground together in successive pairs, AB, BC, CA, AB, and so on indefinitely. In higher geometry a plane is considered as unlimited; but in elementary geometry a part of such a surface has sometimes been also called a *plane*.

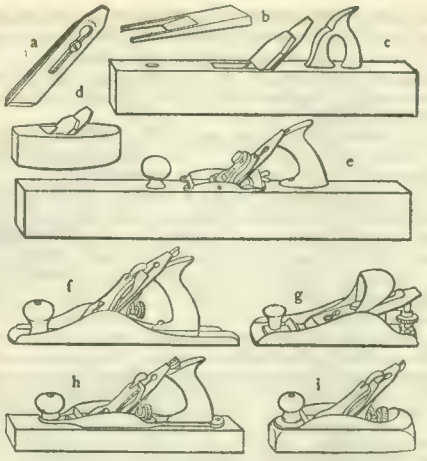
Specifically—2. In *biol.*: (*a*) An ideal surface of extension in any axis of an organism: as, the vertical longitudinal *plane* of the body. (*b*) A surface approximately flat or level; a "horizon": as, the *plane* of the teeth or of the diaphragm.—3. In *coal-mining*, any slope or incline on which coal is raised or lowered, but usually applied to self-acting inclines, or those on which the coal is lowered by gravity. [Pennsylvania anthracite region.] In England any main road, whether level or inclined, may be called a *plane*.—4. In *crystal.*, one of the natural faces of a crystal.—5. Figuratively, a grade of existence or a stage of development: as, to live on a higher *plane*.—**Alveolocondylean plane.** See *craniometry*.—**Aspect of a plane.** See *aspect*.—**Axial, basal, circular plane.** See the adjectives.—**Camper's plane,** the plane passing through the auricular points and the base of the inferior nasal spine. Also called *auriculospinal plane*.—**Cleavage-plane,** in *mineral.*, a surface produced by cleavage.

The flat surfaces obtained by splitting a crystal are called its *cleavage planes*. *Encyc. Brit.*, XVI. 347.

Composition plane. See *composition*.—**Cyclic planes of a cone of the second order.** See *cyclic*.—**Cyclifying, diagonal, diametral, directing plane.** See the adjectives.—**Double-acting inclined plane,** in *rail.*, etc., an inclined plane worked by the gravity of the load conveyed, the loaded wagons which descend being made to pull up the empty ones by means of a rope passing round a pulley or drum at the top of the plane.—**Double-tangent plane.** See *double*.—**Flecnodal, fleflecnodal, focal, frontal, horizontal plane.** See the adjectives.—**Glabello-lambdoidean plane of Hamy,** the plane of the glabella and lambda, perpendicular to the median plane.—**Glabello-occipital plane,** the plane of the glabello-occipital diameter, perpendicular to the median plane.—**Inclined plane,** in *mech.*, a plane inclined to the horizon, or forming with a horizontal plane any angle whatever excepting a right angle. It is one of the two fundamental simple machines, the other being the lever. In the figure, AC is the inclined plane, CB the height of the plane, BA its base, and BAC the angle of inclination or elevation. The power necessary to sustain any weight on an inclined plane is to the weight as the height of the plane to its length, or as CB to CA. This was first proved by Stevinus, as follows. Let the two ends of a chain be joined, and let it be then hung over the inclined plane. Then, the festoon which hangs below AB pulls equally upon the two ends, and consequently the part lying on AC balances the part on BC—that is, weights proportional to the lengths of those two sides of the triangle balance one another. Hence, the

Inclined Plane.

less the height of the plane in proportion to its length, or the less the angle of inclination, the greater the mechanical effect, or the less the height in proportion to the length the less in the same proportion will be the weight on the plane which balances a given weight hanging vertically. The name *inclined plane* is sometimes loosely applied to a short railroad of steep grade, where the cars are drawn up the incline by means of a wire rope moved by a stationary engine at the top of the slope, or where special forms of rail and engine are used to overcome the grade. The inclined plane of Mahanoy, Pennsylvania, is an example of the first, the Mount Washington Railroad, New Hampshire, of the second. Inclined planes have been used to lift canal-boats from one level to another, and more recently, as at Cincinnati and at Hoboken, New Jersey, for lifting street-cars and passengers.—**Index of a plane.** See *index*.—**Meckel's plane,** the plane of the auricular and alveolar points.—**Median, mesial plane.** See the adjectives.—**Merkel's plane,** the plane of the auricular points and the lower border of the orbits.—**Metatatic plane,** a plane which contains two metatatic principal axes.—**Naso-iniac plane,** the plane of the nasion and the inion, perpendicular to the median plane.—**Naso-opisthiac plane,** the plane of the nasion and the opisthion, perpendicular to the median plane.—**Nuchal plane,** the surface of the occipital bone between the superior curved line and the foramen magnum.—**Objective, oblique, original plane.** See the adjectives.—**Occipital plane,** the surface of the occipital bone above the superior curved line.—**Orbital plane,** the orbital surface of the superior maxillary bone.—**Osculating plane.** See *osculate*.—**Palatine plane of Barclay,** the plane of the palate along the middle line behind the canalis incisivus.—**Pencil of planes.** See *pencil*[1].—**Perspective plane.** See *perspective*.—**Pitch of a plane.** See *pitch*[1].—**Plane at infinity.** See *infinity*, 3.—**Plane of Aeby,** the plane of the nasion and the basion, perpendicular to the median plane.—**Plane of Baer,** in *craniom.*, the plane determined by the superior border of the zygomatic arches.—**Plane of Blumenbach,** in *craniom.*, the horizontal plane upon which the skull, without the mandible, rests.—**Plane of Busk,** the plane of the bregma and the auricular points.—**Plane of comparison,** in *fort.*, a datum-plane; a horizontal plane passing through the highest or lowest part of a fortification or its site.—**Plane of Daubenton,** the plane of the opisthion and the inferior border of the orbits.—**Plane of defilade,** in *fort.*, an inclined plane passing six or seven feet above the parade of a fort and about the same distance above the top of an elevation in the vicinity. By building up the parapet to this plane, the parapet will protect the defenders from the view and fire of an assailant who takes possession of the elevation.—**Plane of flotation.** See *flotation*.—**Plane of mastication,** the plane tangent to the masticating surface of the teeth of the upper jaw.—**Plane of Morton,** the plane passing through the most prominent points of the occipital and parietal protuberances.—**Plane of polarization.** See *polarization*.—**Plane of projection.** Same as *perspective plane*.—**Plane of Rolle,** the plane of the auricular and the alveolar points.—**Plane of the ischium,** in *obstet.*, the lateral wall of the true pelvis, extending from the iliopectineal line to the end of the ischial tuberosity, and including small parts of the ilium and pubis.—**Plane of the picture.** Same as *perspective plane*.—**Polar curve of a plane.** See *polar*.—**Polar plane of a point.** See *polar*.—**Popliteal plane,** the popliteal surface of the femur.—**Primitive plane.** See *primitive*.—**Sagittal plane,** the median longitudinal and vertical plane of bilateral animals: so called because the sagittal suture of the skull lies in this plane.—**Temporal plane,** the temporal surface of the cranium.—**To detail on the plane.** See *detail*.—**Twinning-plane.** See *twin*. = **Syn. 1.** See *plain*[1], *n.*



plane[1] (plān), *v. t.*; pret. and pp. *planed*, ppr. *planing*. [< *plane*[1], *a.* Cf. *plain*[1] and *plane*[2], *v.*, ult. the same word.] To make plane or smooth; make clear. *Tennyson*, Princess, iv.

★**plane**[2] (plān), *n.* [< F. *plane*, a carpenters' tool, < ML. *plana*, a carpenters' tool, < LL. *planare*, plane (with a cutting-tool), make level: see *plane*[2], *v.*] 1. A tool for paring, smoothing, truing, and finishing woodwork. The essential parts of a plane are a stock or frame of wood or metal, having a smooth, concave, or convex base or sole, and a throat in which is placed a steel cutter called the *plane-iron* or *bit*. Various devices are used to keep the bit in position in the stock, the most simple and common being a wedge of wood. Planes are made in a great variety of shapes and sizes, and range from 1 to 72 inches in length. Nearly all are distinguished by names having reference to the particular kind of work for which they are designed, as the *edge-plane*, *molding-plane*, and *smoothing-plane*. Planes are also used for truing soft metal surfaces. Plane-irons are inserted in their stocks at various pitches or angles, according to the duty they are to perform. Common pitch, or 45° from the horizontal line, is used in all bench-planes for soft woods. The pitch is increased with the hardness of the material to be worked. See *pitch*[1] and *plane-stock*, and cut in next column.

2. A metallic gage or test for a true surface; a true plane or plane surface; a surface-plate. —3. An instrument, resembling a plasterers' trowel, used by brickmakers for striking off clay projecting above the top of the mold.—**Box-slipped plane,** a plane provided with slips of boxwood to afford a more durable wearing surface.—**Circular plane,** a plane having a steel sole which is flexible and can be adjusted to the required arc. Also called *round plane* and *rounding-plane*.—**Combination plane.** See *combination*.—**Concave plane.** Same as *compass-plane*.—**Coopers' plane,** a long plane set obliquely, with the sole upward, used for jointing staves. Also called *jointer*.—**Dovetail-plane,** a side rabbet-plane having a very narrow sole, so that it can be used to dress the sides of dovetail-tenons or -mortises.—**Fork-staff plane,** a plane used by joiners for working convex or cylindrical surfaces.—**Hollow plane,** a molding-plane with a convex sole.—**Joiners' plane.** See *joiner*.—**Long plane,** a joiners' plane 27 inches long, used when a piece of stuff is to be planed very true. *E. H. Knight*.—**Mouth of a plane.** See *mouth*.—**Round-nosed plane,** in *joinery*, a bench-plane with a rounded sole, used for coarse work.—**Round plane,** a round-soled plane used for making beads, stair-rails, and other rounded work. Also called *rounding-plane*.—**Scale-board plane,** a plane for splitting off from a block the wide, thin chips or sheets of wood for making a usual form of hat-box, etc. It is either pulled or driven over the stuff, the thickness of each shaving or scale-board depending upon the projection of the iron. Sometimes the iron is fixed and the wood is drawn over it, the scale-board dropping down through an opening in the bench. Also called *scabbard-plane*. (See also *bench-plane*, *block-plane*, *fore-plane*, *jack-plane*, *rabbet-plane*, *trying-plane*.)

plane-bit (plān'bit), *n.* The cutter of a plane; a plane-iron. *E. H. Knight*.—**Plane-bit holder,** a device for holding a plane-bit to the stone while it is ground.

plane-guide (plān'gīd), *n.* In *joinery*, an adjustable guide or attachment to a plane-stock, used in beveling the edges of boards.

plane-iron (plān'ī″ėrn), *n.* The cutting-iron of a plane. Plane-irons are made either double or single, and are armed with a steel cutting edge.

planeness (plān'nes), *n.* The condition of being or having a plane surface.

> On pulling the plates apart the bloom was found to be burnished practically all over both surfaces, showing, of course, that the platinating had not sensibly altered the *planeness* of the surfaces.
> *Philosophical Mag.*, 5th ser., XXVIII. 454.

plane-plane (plān'plān), *a.* Having two plane surfaces perfectly parallel to each other.

plane-polarized (plān'pō″lăr-īzd), *a.* See *polarization*.

★**planer** (plā'nėr), *n.* [< *plane*[2], *v.*, + *-er*[1].] 1. A power machine for planing metals; also, a wood-planing machine.—2†. A utensil for smoothing or leveling salt in salt-cellars.

> Than loke your salte be whyte and drye, the *planer* made of Iuory, two inches brode & thre inches longe.
> *Babees Book* (E. E. T. S.), p. 266.

3. In *printing*, a block of wood, about 9 inches long, 3½ wide, and 3 high, on the top of which is a strip of leather, by means of which the projecting types of a form are beaten down to a level by blows of a mallet.—**Compound planer,** a machine-tool which combines two planes in one. *E. H. Knight*.—**Diagonal planer,** a machine for wood-planing in which the planing-cylinder is placed obliquely to the line of motion of the stuff which is to be planed.—**Planer knife-grinder.** See *knife-grinder*.—**Snow-planer,** an implement for removing snow from the surface of ice.

Planera (plan'ē-rā), *n.* [NL. (Gmelin, 1791), named after J. J. *Planer* (1743–89), a German botanist.] A genus of plants of the family *Ulmaceæ* and tribe *Ulmeæ*. It is characterized by the fruit, which is wingless, ovoid, nut-like, keeled, and roughened, thick and coriaceous or somewhat fleshy, and containing one cell and one seed. There is but one species, native of North America. See *planer-tree*.

planer-bar (plā'nėr-bär), *n.* An attachment to a planer to enable it to perform within certain limits the work of a slotting- or shaping-machine. *E. H. Knight*.

planer-center (plā'nėr-sen″tėr), *n.* A device, similar to a lathe-center, used to support small work on a planing-machine. *E. H. Knight*.

planer-chuck (plā'nėr-chuk), *n.* A device bolted or keyed to a planer-table, and serving to dog an object under the action of cutting tools. See *chuck*.

planer-head (plā'nėr-hed), *n.* The slide-rest of a planing-machine.

planerite (plan'ėr-īt), *n.* [After D. J. *Planer*, director of mines in the Ural mountains.] A hydrous phosphate of aluminium, allied to wavellite.

planer-tree (plā'nėr-trē), *n.* A tree of the southern United States, *Planera aquatica*. It is a small tree, with alternate two-ranked toothed leaves, preceded by small axillary clusters of polygamous flowers with bell-shaped calyx and four or five slender projecting stamens. It is most common along the Red River and in southern Arkansas. It resembles the elm, requires wet situations, grows about 30 feet high, and produces a hard compact light-brown wood.

planer-vise (plā'nėr-vīs), *n.* A device to hold work on the bed of a planing-machine by means of a movable jaw.

plane-sailing (plān'sā″ling), *n.* In *nav.*, the art of determining a ship's place on the supposition that she is moving on a plane, or that the surface of the ocean is plane instead of being spherical. This supposition may be adopted for short distances without leading to great errors; and it affords great facilities in calculation, as the place of the ship is found by the solution of a right-angled plane triangle. In plane-sailing the principal terms made use of are the *course*, *distance*, *departure*, and *difference of latitude*, any two of which being given the others can be found. See *sailing*.

plane-stock (plān'stok), *n.* The body of a plane, in which the cutting-iron is fitted. Its under surface, which in use is against the work, is called the *sole* or *face*; the cutting-blade is the *iron*; the device which holds the iron upon the inclined bed is the *wedge*; the opening through which the plane-iron passes is the *mouth*; a projecting portion at the front end is the *horn*; and the pushing-handle which projects above the back end is the *toat*.

★**planet** (plan'et), *n.* [< ME. *planete* = D. *planeet* = MHG. *planēte*, G. Sw. Dan. *planet*, < OF. *planete*, F. *planète* = Sp. Pg. *planeta* = It. *pianeta*, < LL. *planeta*, rarely *planetes*, a planet, < Gr. πλανήτης, a wanderer, a wandering star, a planet, lengthened form of πλάνης, pl. πλάνητες, a wanderer, a planet, cf. πλανᾶν, cause to wander, pass. πλανᾶσθαι, wander, < πλάνη, a wandering, perhaps for *πάλνη, akin to L. *palari*, wander.] 1. A star other than a fixed star; a star revolving in an orbit. The sun was formerly considered as a planet, but is now known to be a fixed star. By *planet* is ordinarily meant a *primary planet* of the solar system, or body revolving round the sun in a nearly circular orbit. Of these eight are *major planets*—being, in their order from the sun, Mercury, Venus, the Earth, Mars, Jupiter, Saturn, Uranus, Neptune. There are besides about 700 *minor planets* known. (See *asteroid*.) The periodic comets are not regarded as planets. *A secondary planet* is a satellite, or small body revolving round a primary planet: thus, the moon is a secondary planet. See *solar system* (under *solar*), *gravitation*, *Kepler's laws* (under *law*), and the names of the major planets.

> The *planet* earth, so steadfast though she seem,
> Insensibly three different motions move.
> *Milton*, P. L., viii. 129.

2. Same as *planeta*, 2.—**Interior planets.** See *interior*.—**Limit of a planet.** See *limit*.—**Osculating elements of a planet.** See *osculate*.—**Perturbations of the planets.** See *perturbation*, 4.—**Superior planets.** See *superior*.

planeta (plā-nē'tą), *n.*; pl. *planetæ* (-tē). [ML.] 1. Originally, an ample mantle, usually of costly material, similar to the pænula, or chasuble in its earlier or circular form. It was worn by the wealthy, and especially by senators, officials, and nobles, in Rome and other parts of the West during the fifth and sixth centuries.

Hence—2. A chasuble. The name *planeta* (apparently unknown to the Greek Church) seems to have been especially used during the seventh and eighth centuries. After this the vestment was usually called a *casula* or *chasuble*; but *planeta* is still the official term in the Roman Catholic Church. At certain penitential seasons (Advent, Lent, etc.) the deacon and subdeacon in cathedrals and some other churches wear a folded planeta (*planeta plicata*), except in reading the epistle and gospel.

> The *planeta* was worn by bishops as well as by presbyters.
> *Encyc. Brit.*, VI. 461.

★**plane-table** (plān'tā″bl), *n.* 1. An important instrument of topographical surveying, consisting of a drawing-board mounted upon a tripod, and capable of being leveled and turned in

azimuth, sometimes also having two horizontal motions of translation. An indispensable accompaniment of the plane-table is the alidade, which is a straight-edge carrying upon a standard a telescope with cross-wires (generally with a telemeter), which telescope is horizontally fixed relatively to the straight-edge, but has a motion in altitude. The alidade generally carries a delicate magnetic needle. A certain number of points having been geodetically determined and marked by signals, the plane-table is set up at any other point, and the paper upon which the map is to be drawn, having the trigonometric points laid down upon it, is placed upon the table. The latter is then brought into proper orientation, and the position of the station determined graphically by the three-point problem. The plane-table presents some slight difficulties when the scale is to be so large that the board itself appears of considerable size on the map, and especially when irregularly laid out towns are to be surveyed with the last degree of accuracy. On the other hand, the plane-table is of little use in mere reconnaissance. But in most cases it is the chief instrument of the topographer, and is used in all topographical surveys except those of Great Britain.

2. In *mining*, an inclined table or surface of boards on which ore is dressed; a frame, or framing-table.

Also *plain-table*.

plane-table (plān'tā″bl), *v. t.* [< *plane-table, n.*] To survey with a plane-table.

plane-tabler (plān'tā″blėr), *n.* A topographic engineer using a plane-table.

plane-tabling (plān'tā″bling), *n.* The employment of a plane-table; the act or process of making a map by means of a plane-table.

planetarium (plan-e-tā'ri-um), *n.*; pl. *planetariums, planetaria* (-umz, -ä). [=F. *planétaire* = Sp. Pg. It. *planetario*, < NL. *planetarium*, prop. neut. of LL. **planetarius*, planetary: see *planetary*.] An astronomical machine which, by the movement of its parts, represents the motions and orbits of the planets. See *orrery*.

planetary (plan'e-tā-ri), *a.* [= F. *planétaire* = Sp. Pg. It. *planetario*, < LL. **planetarius*, planetary (only as a noun, *planetarius*, an astrologer), < *planeta*, a planet: see *planet*.] 1. Of or pertaining to a planet or the planets; consisting of planets: as, *planetary* motions; *planetary* inhabitants; the *planetary* system. —2. Having the character attributed to a planet; erratic or wandering.

I am credibly informed he [Richard Greenham] in some sort repented his removal from his parish, and disliked his own erratical and *planetary* life.
Fuller, Ch. Hist., IX. vii. 68.

3. In *astrol.*, under the dominion or influence of a planet; produced by or under the influence of planets.

Be as a *planetary* plague, when Jove
Will o'er some high-viced city hang his poison
In the sick air. *Shak.*, T. of A., iv. 3. 108.

Born in the *planetary* hour of Saturn.
Addison, Spectator.

Planetary aberration. See *aberration*.—**Planetary days**, the days of the week as shared among the planets known to the ancients, each having its day.—**Planetary nebula.** See *nebula*.—**Planetary years**, the periods of time in which the several planets make their respective revolutions round the sun.

planeted (plan'et-ed), *a.* [< *planet* + *-ed*2.] Belonging to planets. [Rare.]

Tell me, ye stars, ye planets; tell me, all
Ye starr'd and *planeted* inhabitants—what is it?
What are these sons of wonder?
Young, Night Thoughts, ix.

planet-gearing (plan'et-gēr″ing), *n.* Any system of gearing in which planet-wheels are introduced; a mechanical device for converting power into speed. It has been employed for driving the cutter-bars of reapers and mowers, and is an element in other machines.

planetic (plā-net'ik), *a.* [In form < LL. *planeticus*, wandering, < Gr. πλανητικός, wandering, irregular, < πλανητός, wandering, < πλανᾶσθαι, wander: see *planet*.] 1. Wandering: a *planetic* arthritis.—2. Of or pertaining to a planet; resembling a planet in any way.

planetical (plā-net'i-kạl), *a.* [< *planetic* + *-al*.] Same as *planetic*.

According to the *planetical* relations.
Sir T. Browne, Vulg. Err., v. 22.

Some *planetical* exhalation, or a descending star.
J. Spencer, Prodigies, p. 39.

planeting† (plan'et-ing), *n.* [< *planet* + *-ing*1.] The music of the planets or spheres.

Tempering all
The jarring spheres, and giving to the world
Again his first and tuneful *planeting*.
B. Jonson, Sad Shepherd, iii. 2.

planetist† (plan'et-ist), *n.* [= F. *planetiste* = Sp. Olt. *planetista*, < LL. **planetista*, < *planeta*, planet: see *planet*.] An observer of the planets. *Minsheu*.

planetoid (plan'et-oid), *n.* [= F. *planétoïde*, < Gr. πλανήτης, a planet, + εἶδος, form.] One of the group of very small planets revolving round the sun between the orbits of Mars and Jupiter (with one known exception), remarkable for the eccentricity of their orbits and the greatness of their angle of inclination to the ecliptic; a minor planet; an asteroid. The diameter of the largest is supposed not to exceed 450 miles, while most of the others are believed to be very much smaller. Ceres was the first to be detected, being observed for the first time by Piazzi, an Italian astronomer, on January 1st, 1801; since 1847 no year has passed without the discovery of new planetoids. The number now known is about 700. They are more properly called *asteroids*, since they are really planets, but resemble stars in appearance.

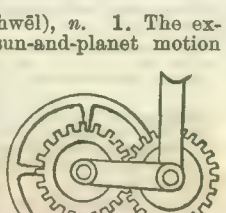
planetoidal (plan-e-toi'dạl), *a.* [< *planetoid* + *-al*.] Of or pertaining to the planetoids; relating to a planetoid.

plane-tree (plān'trē), *n.* [< *plane*3 + *tree*.] 1. A tree of the genus *Platanus*, especially *P. orientalis*, the oriental plane-tree, or its variety *acerifolia*, the maple-leafed plane-tree, often regarded as a species. The oriental plane-tree and its variety are found wild from Persia to Italy, and are common in European parks as ornamental trees. The wood is valued for cabinet-work and turnery. (Also called *chinar-tree*.) The American plane-trees are better known, where native, as *sycamore* or *buttonwood*. The ordinary species is *P. occidentalis*, a large tree of the Atlantic forests, often from 90 to 120 feet high, found chiefly on bottom-lands. It is not seldom planted for shade and ornament, and its reddish-brown wood is used in various ways. Other names are *buttonball* and *water-beech*. The plane-tree of California is *P. racemosa*, a somewhat smaller tree with very white bark. Plane-trees suffer from a disease caused by the attack of a parasitic fungus, *Glœosporium nervisequum*. The entire foliage appears in early summer as if scorched and withered, but later in the season fresh leaves are developed. The trees rarely die from the effects of the fungus. See *Platanus*.

Branch of the American Plane-tree (*Platanus occidentalis*) with Fruit. *a*, a single nutlet, showing the bristles at its base.

2. The sycamore maple, *Acer Pseudo-Platanus*: so called from the similarity of its leaves to those of the plane. Other maples are also sometimes known as *plane-trees*. [Local, Eng. and Scotch.]

planet-stricken (plan'et-strik″n), *a.* Affected by the supposed influence of planets; blasted.



Like *planet-stricken* men of yore,
He trembles, smitten to the core
By strong compunctions and remorse.
Wordsworth, Peter Bell, iii.

planet-struck (plan'et-struk), *a.* Same as *planet-stricken*.

He battens at the maligned's misery; and if such a man riseth, he falls as if he were *planet-struck*.
Rev. T. Adams, Works, I. 479.

planetule (plan'et-ūl), *n.* [< *planet* + *-ule*.] A little planet.

planet-wheel (plan'et-hwēl), *n.* 1. The exterior wheel of the sun-and-planet motion (see *sun*).—2. In the plural, an epicyclic train of mechanism for producing a variable angular motion, such as that of the radius vector of a planet in its orbit. The common contrivance for this purpose consists of two elliptical wheels connected by teeth in gear with each other, and revolving on their foci. While the driving-wheel moves uniformly, the radius vector of the other has the required motion.

Planet-wheels.

The spur-gear to the right, called the planet-gear, is tied to the center of the other, or sun-gear, by an arm which preserves a constant distance between their centers. Each revolution of the planet-gear, which is rigidly attached to the connecting-rod, gives two to the sun-gear, which is keyed to the fly-wheel shaft.

plangency (plan'jen-si), *n.* [< *plangent* + *-cy*.] The state or quality of being plangent; a noisy dashing or beating. [Rare.]

plangent (plan'jent), *a.* [< L. *plangen(t-)s*, ppr. of *plangere*, beat: see *plain*2.] 1. Beating; dashing, as waves. [Rare.]

Nor heeds the weltering of the *plangent* wave.
Sir H. Taylor, Ph. van Artevelde (ed. 1852), I., i. 10.

2. Resounding; clashing; noisy.

The bell on the orthodox church called the members of Mr. Peck's society together for the business meeting with the same *plangent*, lacerant note that summoned them to worship on Sundays. *W. D. Howells*, Annie Kilburn, xxv.

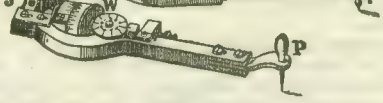
The shadows and the generations, the shrill doctors and the *plangent* wars, go by into ultimate silence and emptiness. *R. L. Stevenson*, An Apology for Idlers.

plangor† (plang'gor), *n.* [< L. *plangor*, a striking, beating, a beating the breast in token of grief, < *plangere*, beat: see *plain*2.] Plaint; lamentation.

The lamentable *plangors* of Thracian Orpheus for his dearest Eurydice.
Meres, Eng. Literature (Arber's Eng. Garner, II. 96).

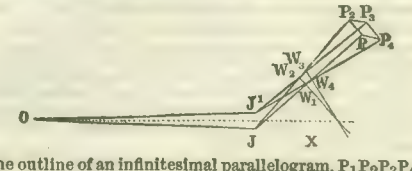
Plani (plā'nī), *n. pl.* [NL., pl. of L. *planus*, flat: see *plane*1.] In Cuvier's classification, the second family of subbrachiate malacopterygian fishes; the flatfishes: same as *Pleuronectidæ* in a wide sense and the suborder *Heterosomata*.

planicaudate (plā-ni-kâ'dāt), *a.* [< L. *planus*, flat, + *cauda*, tail, + *-ate*1 (see *caudate*).] Having a flattened tail: said of reptiles.



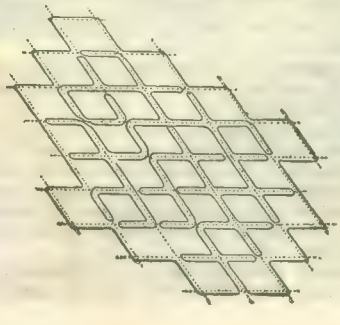
planicipital (plā-ni-sip'i-tạl), *a.* [< L. *planus*, flat, + *caput* (*capit-*, in comp. *-cipit-*), head, + *-al*.] Having a flat head, as an insect.

planidorsate (plā-ni-dôr'sāt), *a.* [< L. *planus*, flat, + *dorsum*, back, + *-ate*1.] Having a flat back.



planiform (plā'ni-fôrm), *a.* [< L. *planus*, flat, + *forma*, form.] In *anat.*, presenting a plane or flat surface: said of the articular surface of bones whose jointing is arthrodial.

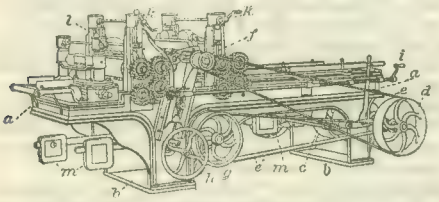
planigraph (plan'i-grâf), *n.* [< NL. *planum*, a plane, + Gr. γράφειν, write.] An instrument for reducing or enlarging drawings. It consists of two scales graduated in a definite ratio to each other, attached end to end, and rotating about a pivot at their common origin. Measurements taken on a copy at one side are marked by the operator at the corresponding gradations on the other arm of the instrument. Interchangeable scales are provided for different degrees of enlargement or reduction.



planimeter (plā-nim'e-tėr), *n.* [= F. *planimètre*; < NL. *planum*, a plane, + Gr. μέτρον, measure.] An instrument for measuring a plane area by carrying a tracer round its periphery, and noting the change of reading of a scale. Planimeters are of various constructions; but the most interesting is the polar planimeter (see the first figure). This

consists of an inner arm OJ, turning about a fixed center O, and an outer arm JP, turning about a joint J, and resting upon a point or tracer P, and upon a wheel W, having its axis coincident with or just below the line JP, and provided with a counting-apparatus, so that the turns and fractions of a turn it makes can be read off. In order to see that the instrument will accurately show the area, consider the second figure, where the tracer is supposed to follow

the outline of an infinitesimal parallelogram, $P_1P_2P_3P_4$, so placed that when the tracer moves from P_2 to P_3 and from P_4 to P_1 the wheel moves from W_2 to W_3 and from W_4 to W_1, both these paths of the wheel being in the direction of its axis, so that it only turns in passing from W_1 to W_2 and from W_3 to W_4, during which motions the in-



ner arm is stationary. The area of the parallelogram described by the tracer is equal to the base $P_1P_2 = W_1W_2$ ($JP_2 \div JW_2$) multiplied by the altitude, which is evidently equal to W_2W_3, so that the area is $W_1W_2 \times W_2W_3 \times (JP_2 \div JW_2)$. The wheel turns one way in passing from W_2 to W_3, and the opposite way in passing from W_4 to W_1. But these two paths are not exactly equal, their difference being plainly $W_1W_2 \times W_2W_3 \div JW_2$. The algebraic sum of the rolling multiplied by the constant length JP_2 gives the area. Now, any finite area may be conceived as formed of such infinitesimal parallelograms, and were the peripheries of all these traced out in the direction of the motion of clock-hands, every boundary between two of them would be traced once forward and again backward, so that the final reading of the wheel would be the same as if only the outer boundary of the area were traced. This is illustrated in the third figure. Also called *platometer*.

planimetric (plan-i-met'rik), *a.* [= F. *planimétrique* = Pg. *planimetrico;* as *planimetr-y* + *-ic.*] Pertaining to planimetry or the mensuration of plane surfaces.—**Planimetric function.** See *function.*

planimetrical (plan-i-met'ri-kal), *a.* [< *planimetric* + *-al.*] Same as *planimetric.*

planimetry (plā-nim'et-ri), *n.* [= F. *planimétrie* = Sp. *planometria, planimetría* = Pg. It. *planimetria;* < NL. *planum*, a plane, + Gr. *-μετρία*, < *μέτρον*, measure.] The mensuration of plane surfaces, or that part of geometry which regards lines and plane figures.

planing-machine (plā'ning-ma-shēn″), *n.* 1. A machine for planing wood, the usual form of which has cutters on a drum rotating on a

Planing-machine, with outside gear.

a a, bed; *b b*, pedestals; *c*, main driving-pulley, keyed to the same main driving-shaft as the pulley *d*, which transmits motion through the belt *e* to the top cutter-cylinder pulley *f*. The feed-mechanism consists of rollers geared together and driven by the pulley *g*, which derives its motion from the feed-belt *e'*, driven by a small pulley on the main driving-shaft; *h*, a hand-wheel operating screw-mechanism for raising or lowering the top cylinder; *i*, crank operating mechanism for adjusting matching-heads; *k k'*, cranks operating adjusting mechanism for raising or lowering feed-rolls to accommodate different thicknesses of stuff; *l*, crank for regulating the pressure-bar; *m m*, weighted levers for holding the feed-rollers with constant pressure.

horizontal axis over the board, which passes beneath. In some machines there is a cutting-cylinder below and upright cutter-heads at the sides: then called *planer and matcher.*

2. A machine-tool for planing metals, in which the metal object to be planed, fixed to a traversing table, is moved against a relatively fixed cutter; properly, a *planer*, which see.

planing-mill (plā'ning-mil), *n.* 1. A shop where planing is done.—2. A planing-machine.

planipennate (plā-ni-pen'āt), *a.* [< L. *planus*, flat, + *penna*, wing, + *-ate*[1] (see *pennate*).] Having flat wings not folded in repose and approximately equal to each other, as a neuropterous insect; specifically, belonging to the *Planipennia.*

Planipennia (plā-ni-pen'i-ạ), *n. pl.* [NL., < L. *planus*, flat, + *penna*, wing.] A suborder of neuropterous insects, with nearly equal naked many-veined wings not folded in repose, well-developed jaws, and elongate many-jointed antennæ. The larvæ are mostly terrestrial, and voracious insect-feeders; the pupæ are incomplete and inactive; the perfect insects are generally herbivorous. The suborder includes such forms as the ant-lions (*Myrmeleontidæ*), scorpion-flies (*Panorpidæ*), and sundry other families, which the genera *Ascalaphus, Hemerobius, Coniopteryx, Mantispa, Rhaphidia,* and *Sialis* respectively represent. See cuts under *ant-lion* and *Panorpa.*

planipennine (plā-ni-pen'in), *a.* and *n.* [< *Planipennia* + *-ine*[1].] I. *a.* Of or pertaining to the *Planipennia.*

II. *n.* One of the *Planipennia.*

planipetalous (plā-ni-pet'ạ-lus), *a.* [= Sp. *planipétalo* = Pg. *planipetalo*, < L. *planus*, flat, + NL. *petalum*, petal.] In *bot.*, having flat petals.

planirostral (plā-ni-ros'tral), *a.* [< L. *planus*, flat, + *rostrum*, beak.] Having a broad flat beak, as a bird.

planish (plan'ish), *v. t.* [< OF. *planiss*, stem of certain parts of *planir*, equiv. to *planer*, plane: see *plane*[2], *v.*] 1. To make smooth or plane, as wood.—2. To condense, smooth, and toughen, as a metallic plate, by light blows of a hammer.—3. To polish: as, to *planish* silver goods or tin-plate.

planisher (plan'ish-ėr), *n.* [< *planish* + *-er*[1].] 1. A thin flat-ended tool used by tinners and braziers for smoothing tin-plate and brasswork.—2. A workman who planishes, smooths, or planes.—3. A device for flattening sections cut by a microtome for microscopic examination.

planishing-hammer (plan'ish-ing-ham″ėr), *n.* A hammer used for planishing, having a head with highly polished convex faces, usually rather broader than the face of a common machinists' hammer; also, less correctly, a similar hammer used for flattening, curving, etc.

planishing-roller (plan'ish-ing-rō″lėr), *n.* A highly polished roller used for smoothing surfaces of metal plate, as copper plated with tin or silver. Specifically, one of the second pair of rolls through which coin-metal is passed in preparing it for minting. They are made of case-hardened iron and highly polished. The strips of metal are passed between them cold, and are brought by them to the required thickness.

planishing-stake (plan'ish-ing-stāk), *n.* A small bench-anvil used to support anything being shaped with a planishing-hammer.

planisphere (plan'i-sfēr), *n.* [= F. *planisphère* = Sp. *planisferio* = Pg. *planispherio* = It. *planisferio*, < L. *planus*, flat, + *sphæra*, sphere: see *sphere.*] 1. A projection of the sphere; especially, a polar projection of the celestial sphere.—2. An apparatus consisting of a polar projection of the heavens, with a card over it turning about the pole, and so cut out as to show the part of the heavens visible at a given latitude at a given local sidereal time.

planispheric (plan-i-sfer'ik), *a.* [= F. *planisphérique;* as *planisphere* + *-ic.*] Of or pertaining to a planisphere; resembling a planisphere.

Planispheric representation of the cerebral convolutions. *Nature*, XXX. 161.

planispiral (plā-ni-spī'ral), *a.* [< L. *planus*, flat, + *spira*, a coil, spire: see *spire.*] Coiled in one plane, like a watch-spring or flat spiral, as the antlia of a butterfly; whorled in discoid form, as a shell of the genus *Planorbis.* Also *planospiral.*

plank (plangk), *n.* [< ME. *planke*, < OF. *planke*, assibilated *planche*, F. *planche*, dial. *planke* = Pr. *planca, plancha, planqua* = Sp. *plancha* = Pg. *prancha* = It. *piana* = OFries. *planke* = D. *plank* = MLG. *planke* = MHG. *planke, blanke*, G. *planke* = Sw. *planka* = Dan. *planke*, < L. *planca*, a plank, a nasalized form of **placa*, = Gr. *πλάξ* (*πλακ-*), a flat surface, a plain, tablet, plate. Cf. *plack.* See *planch*, a doublet of *plank.* The Ir. and W. *planc* is appar. < E.] 1. A piece of timber differing from a board in having greater thickness; also, loosely, a board. See *board.*

Ne nevere man dide, sithe the tyme of Noe, saf a Monk that be the grace of God broughte on of the *Plankes* doun; that zit is in the Mynstre, at the foot of the Montayne. *Mandeville*, Travels, p. 148.

Across the fallen oak the *plank* I laid.
Gay, Shepherd's Week, Monday, l. 107.

2†. A slab (of stone).

Over his [Sir T. Browne's] Grave was soon after erected . . . a Monument of Freestone, with a *Plank* of Marble thereon. *Wood*, Athenæ Oxon., II. 524.

3. In a printing-press, the frame on which the carriage slides.—4. In *ribbon-weaving*, the batten of the Dutch engine-loom or swivel-loom.—5. Figuratively, one of the articles or paragraphs formulating distinct principles which form the program or platform of a political or other party (the word *platform* being taken in a double sense).

In the Chicago platform there is a *plank* on this subject, which should be a general law to the incoming Administration. *Lincoln*, in Raymond, p. 86.

We should get those amendments out of the way before we strike out for the summer campaign. We want two *planks*—non-extension of slavery, and state reform. *S. Bowles*, in Merriam, I. 291.

Walking the plank, a mode of inflicting death formerly practised by pirates by causing their victims to walk along a plank laid across the bulwarks of a ship till they overbalanced it and fell into the sea.

plank (plangk), *v. t.* [= OFries. *plonken* = MD. *planken* = MLG. *planken* = G. *planken* = Sw. *planka* = Dan. *planke*, plank; from the noun. Cf. *planch, v.*] 1. To cover or lay with planks: as, to *plank* a floor.

The streets of their cities and townes instead of pauing are *planked* with fir trees, plained & layd euen close the one to the other. *Hakluyt's Voyages*, I. 480.

2. To lay or place as on a plank or table: as, he *planked* down the money. [Colloq.]—3. In *hat-manuf.*, to harden by felting. See *planking*, 4.—4. To unite, as slivers of wool, to form roving.—5. To split, as fish, and cook upon a board. See the quotation. [U. S.]

The principal dish was *planked* shad. By this process four fish are fastened to a board, and held towards a hot fire. Whilst cooking, the fish are constantly basted with a preparation made of butter, salt, and other ingredients. *Science*, V. 426.

plank-hook (plangk'hůk), *n.* A pole armed with an iron hook, used in moving the runs or wheeling-planks in a quarry, a mine, or the like.

planking (plang'king), *n.* [Verbal n. of *plank*, *v.*] 1. The operation of laying down planks or of covering with planks.—2. Planks considered collectively, as in a floor; a piece of work made up of planks; specifically, in *shipbuilding*, the skin or covering of wooden timbers on the outer and inner surfaces of the ribs, and upon the beams. A *strake* is a line of planking. *Wales* are strakes of thick planking. See cut under *beam.*—3. In *spinning*, the splicing together of slivers of long-stapled wool. See *breaking-frame.*—4. One of the finishing operations in felting hats. The hardened hat-body is passed through a cistern containing a hot acidulated water, and between pressing-rollers, the process compacting the fibers into felt.

5. In a steam-cylinder, the lagging or clothing.—**Anchor-stock planking**, in *ship-building*, planks with one edge straight and the other so cut that the planks taper from the middle in both directions. The middle of one is placed over or under the ends of two others.

planking-clamp (plang'king-klamp), *n.* In *ship-building*, a tool used to bend a strake against the ribs of a vessel, and hold it in position until it can be nailed or bolted.

planking-machine (plang'king-ma-shēn″), *n.* A machine for rubbing, pressing, and steaming formed hat-bodies, to give them strength and thickness.

planking-screw (plang'king-skrö), *n.* Same as *planking-clamp.*

plank-sheer (plangk'shēr), *n.* *Naut.*, the gunwale; a timber carried round the ship which covers and secures the timber-heads. Also called *covering-board.*

plankton (plangk'ton), *n.* [< Gr. *πλαγκτός*, *-όν*, wandering.] In *zoöl.*, pelagic animals collectively.

planky (plang'ki), *a.* [< *plank* + *-y*[1].] Constructed of planks or boards. [Rare.]

planless (plan'les), *a.* [< *plan* + *-less.*] Having no plan. *Coleridge.*

planner (plan'ėr), *n.* One who plans or forms a plan; a projector.

planoblast (plā'nō-blast), *n.* [< Gr. *πλάνος*, wandering, + *βλαστός*, germ.] A wandering bud; the free medusoid of gymnoblastic hydrozoans; the gonophore of such hydroids, detached from the colony, leading an independent locomotory life, and discharging its mature sexual products into the sea: distinguished from the *hedrioblast*, or sedentary bud. With a single known exception (that of *Dicoryne*), planoblasts are craspedote or velum-bearing medusæ, bell-shaped, with the walls of the bell or umbrella mainly of gelatinous consistence; from the bell hangs a tubular body, the manubrium; the opening of the bell-cavity is the codonostoma, partially closed by a membranous velum; and a variable number of filaments, the tentacles, hang from the margin of the umbrella.

To the gonophores belonging to this group [*Gymnoblastea*] the name of *planoblasts* (wandering buds) may be given. *G. J. Allman*, Challenger Reports, Hydroida, XXIII. ii. 26.

planoblastic (plā-nō-blas'tik), *a.* Of the nature of or pertaining to planoblasts; medusoid.

plano-concave (plā″nō-kon'kāv), *a.* [< L. *planus*, plane, + *concavus*, concave: see *concave.*] Plane on one side and concave on the other.

plano-conical (plā″nō-kon'i-kal), *a.* [< L. *planus*, plane, + *conicus*, conic: see *conic, conical.*] Plane on one side and conical on the other.

plano-convex (plā″nō-kon'veks), *a.* [< L. *planus*, plane, + *convexus*, convex: see *convex.*] Plane on one side and convex on the other.

planodia (plā-nō'di-ạ), *n.* [< Gr. *πλάνος*, wandering, + *ὁδός*, a way, road.] A false passage, such as may be made in using a catheter.

planogamete (plan'ō-ga-mēt), *n.* [< Gr. *πλάνη*, a wandering, + *γαμέτης*, < *γαμεῖν*, marry.] In *bot.*, a motile gamete: same as *zoögamete.* See *gamete.*

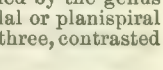
planographist (plā-nog'ra-fist), *n.* [< L. *planus*, plane, + Gr. *γράφειν*, write, + *-ist.*] A surveyor; a plan- or map-maker. [Rare.]

All *planographists* of the Holy City.
W. M. Thomson, Land and Book, p. 421. (*Encyc. Dict.*)

plano-horizontal (plā″nō-hor-i-zon'tal), *a.* [< L. *planus*, plane, + ML. **horizontalis*, horizontal: see *horizontal.*] Having a plane horizontal surface or position.

planometer (plā-nom'e-tėr), *n.* [< L. *planus*, plane, + Gr. *μέτρον*, a measure.] A plane sur-

face used in machine-making as a gage for plane surfaces; a surface-plate.



planometry (plā-nom′et-ri), *n.* [< L. *planus*, plane, + Gr. *-μετρία*, < *μέτρον*, measure.] The measurement or gaging of plane surfaces; the art or act of using a planometer.

plano-orbicular (plā″nō-ôr-bik′ū-lăr), *a.* [< L. *planus*, plane, + NL. *orbicularis*, orbicular: see *orbicular*.] Flat on one side and spherical on the other.

Planorbinæ (plā-nôr-bī′nē), *n. pl.* [NL., < *Planorbis* + *-inæ*.] A subfamily of pond-snails of the family *Limnæidæ*, typified by the genus *Planorbis*, having a flat discoidal or planispiral shell. The subfamily is one of three, contrasted with *Limnæinæ* and *Ancylinæ*.

planorbine (plā-nôr′bin), *a.* [< L. *planus*, flat, plane, + *orbis*, circle, disk, + *-ine*[1].] Whorled in a round flat spiral; planispiral, as a pond-snail; belonging to the *Planorbinæ*.

Planorbis (plā-nôr′bis), *n.* [NL., < L. *planus*, flat, plane, + *orbis*, circle, disk: see *orb*[1].] The typical genus of *Planorbinæ*.

Planorbis corneus.

It is very extensive, including about 350 species, 30 of which are found in the United States. They inhabit ponds and sluggish streams.

planorbite (plā-nôr′bīt), *n.* [< *Planorbis* + *-ite*[2].] A fossil species of *Planorbis*, or some similar planorbine shell.

Planorbulina (plā-nôr-bū-lī′nă), *n.* [NL., < L. *planus*, plane, + NL. *Orbulina*, q. v.] A genus of foraminifers whose tests are of planorbine figure.

planorbuline (plā-nôr′bū-lin), *a.* [< *Planorbulina*.] Of or pertaining to the genus *Planorbulina*.

Two of the most remarkable modifications of the *planorbuline* type, which strikingly illustrate the extremely wide range of variation among Foraminifera, are Polytrema and Orbitolina. *Encyc. Brit.*, IX. 380.

planospiral (plā-nō-spī′ral), *a.* See *planispiral*.

planosubulate (plā″nō-sub′ū-lāt), *a.* [< L. *planus*, plane, + NL. *subulatus*, awl-shaped: see *subulate*.] Smooth and awl-shaped.

plant[1] (plant), *n.* [< ME. *plante*, *plaunte* (partly < OF.), < AS. *plante* = D. *plant* = MLG. *plante* = OHG. *phlanza*, *flanza*, *planza*, MHG. G. *pflanze* = Icel. *planta* = Sw. *planta* = Dan. *plante* = OF. (and F.) *plante* = Pr. Sp. Pg. *planta* = It. *pianta*, a plant, < L. *planta*, a sprout, shoot, twig, sucker, graft, scion, slip, cutting, a young tree that may be transplanted, a set, hence in general a plant; prob. orig. a spreading sucker (cf. *planta*, the sole of the foot: see *plant*[2]); lit. 'something flat or spreading,' < √ *plat* = Gr. *πλατύς*, broad: see *plat*[3], *plate*. In the later senses (defs. 5–10) the noun is from the verb. Cf. *clan*.] **1.** A shoot or slip recently sprouted from seed, or rooted as a cutting or layer; especially, such a slip ready for transplanting, as one of the cabbage-*plants*, tomato-*plants*, etc., of the market.

Thoughe that Men bryngen of the *Plauntes*, for to plante in other Contrees, thei growen wel and fayre, but thei bryngen forthe no fructuous thing; and the Leves of Bawme ne fallen noughte. *Mandeville*, Travels, p. 50.

Transplannte alle hoole the *plannte* [of cabbage], and it is slaye. *Palladius*, Husbondrie (E. E. T. S.), p. 113.

2. A sapling; hence, a stick or staff; a cudgel.

He caught a *plante* of an appell tre, and caste his shelde to grounde, and toke the barre in bothe handes, and seide he wolde make hem to remeve. *Merlin* (E. E. T. S.), iii. 493.

There is a man haunts the forest, that abuses our young *plants* with carving "Rosalind" on their barks. *Shak.*, As you Like it, iii. 2. 378.

Sir Roger's servants, and among the rest my old friend the butler, had, I found, provided themselves with good oaken *plants*, to attend their master upon this occasion. *Addison*, Sir Roger at the Play.

3. An herb or other small vegetable growth, in contrast with trees.—**4.** An individual living being with a material organism, not animal in its nature; a member of the vegetable kingdom; a vegetable, in the widest sense. While the difference between plants and animals in all their higher forms is clearly marked, science has hitherto been unable to fix upon any one absolutely universal criterion between them. Nothing perhaps is so distinctive of the plant as its power to appropriate and assimilate mineral matter directly, whereas most animals live on the products of previous organization. The plant thus mediates in the scheme of nature between the mineral and the animal world, forming an essential condition of most animal existence. But many plants, including the whole group of *Fungi*, and the saprophytic, parasitic, and carnivorous flowering plants, live wholly or in part on organic matter, while not all animals are confined to organic nutriment. See *animal* and *Protista*. For the fundamental classification of plants, see *Cryptogamia* and *Phanerogamia*.

In some places, those *plants* which are entirely poisonous at home, lose their deleterious quality by being carried abroad. *Goldsmith*, Citizen of the World, xci.

5. The fixtures, machinery, tools, apparatus, appliances, etc., necessary to carry on any trade or mechanical business, or any mechanical operation or process.

What with the *plant*, as Mr. Peck technically phrased a great upas-tree of a total, branching out into types, cases, printing-presses, engines, &c., . . . my father's fortune was reduced to a sum of between seven and eight thousand pounds. *Bulwer*, Caxtons, xi. 6. (*Davies.*)

The entire *plant*, and even the fuel, were transported on heavy waggons across the Karroo, at an enormous cost to the young settlement. *Fortnightly Rev.*, N. S., XLIII. 880.

6. Concealed plunder. [Thieves' slang.]—**7.** A trick; dodge; swindle; artifice. [Slang.]

It wasn't a bad *plant*, that of mine, on Fikey, the man accused of forging the Sou'-Western Railway debentures. *Dickens.*

Such-and-such an author says that so-and-so was "burnt alive," followed by a silly smattering of righteous indignation at what never happened, while the dispassionate scholar finds the whole thing a *plant*. *N. and Q.*, 7th ser., IX. 50.

8. In *fish-culture*, a deposit of fry or eggs.—**9.** *pl.* Oysters which have been bedded: in distinction from *natives:* as, Virginia *plants*. [A market-term, applied chiefly to Virginia oysters bedded in Providence River.]—**10.** *pl.* Young oysters suitable for planting or transplantation.—**Ballast-plants.** See *ballast*.—**Blind, herbaceous, luminous,** etc., **plants.** See the adjectives.—**Flowering plant.** See *Phanerogamia*.—**Indicative plants,** species which, in their natural habitat, are reputed to indicate the presence of certain minerals. [U. S.]—**Movement of plants.** See *movement*.—**Parasitic plants.** See *parasitic*.—**Pot-plant, potted plant,** a plant grown in a flower pot, as in conservatories and hothouses.—**Syn.** ★**4.** See *vegetable, n.*

plant[1] (plant), *v.* [< ME. *planten*, *plaunten* (partly < OF.), < AS. *plantian* (*ā-plantian, ge-plantian*) = D. *planten* = MLG. *planten* = OHG. *phlanzōn*, *flanzōn*, MHG. Pg. *plantar* = It. *piantare*, < L. *plantare*, set, plant, transplant, < *planta*, a sprout, shoot, scion, plant: see *plant*[1], *n.*] **I.** *trans.* **1.** To put or set in the ground for growth, as seed, young shoots, cuttings, vegetables with roots, etc.: as, to *plant* potatoes; to *plant* trees.

Nowe onyons sowe, and tasul in his place
Lette *plaunte;* and cunel sowe, eke Armarace [horse-radish]. *Palladius*, Husbondrie (E. E. T. S.), p. 210.

2. To lay out and prepare by putting or setting seed, etc., in the ground; furnish with plants: as, to *plant* a garden or an orchard.

The Lord God *planted* a garden eastward in Eden; and there he put the man whom he had formed. Gen. ii. 8.

3. To implant; sow the seeds or germs of; engender.

It engenders choler, *planteth* anger. *Shak.*, T. of the S., iv. 1. 175.

They *planted* in them a hatred of vices, especially of lying, and in the next place of debt. *Purchas*, Pilgrimage, p. 373.

4. To put; place; set; especially, to post or place firmly in position; fix; set up: as, he *planted* himself in front of me; to *plant* a standard on the enemy's battlements.

Plant yourself there, sir; and observe me. *B. Jonson*, Cynthia's Revels, ii. 1.

The Duke, having *planted* his Ordnance, battered the other side. Quoted in *Capt. John Smith's* True Travels, I. 11.

The Duke of Marlborough *planted* his creatures round his lordship. *Goldsmith*, Bolingbroke.

He *planted* himself with a firm foot in front of the image. *Barham*, Ingoldsby Legends, I. 148.

5. To establish or set up for the first time; introduce and establish: as, to *plant* Christianity among the heathen; to *plant* a colony.

He would entreat your care
To *plant* me in the favour of some man
That 's expert in that knowledge. *Fletcher*, Spanish Curate, ii. 1.

When the Romans sent Legions and *planted* Colonies Abroad, it was for divers political Considerations. *Howell*, Letters, ii. 58.

6. To furnish; provide with something that is set in position or in order.

The port of the said Citie is strongly fortified with two strong Castles, and one other Castle within the citie, being all very well *planted* with munition *Hakluyt's Voyages*, II. 281.

A very goodly strong Castle, well *planted* with Ordinance. *Coryat*, Crudities, I. 93.

Plantaginaceæ (plan″ta-ji-nā′sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Plantago* (*Plantagin-*) + *-aceæ*.] A family of dicotyledonous sympetalous plants, the plantain family, constituting the order *Plantaginales*, and now placed between the *Polemoniales* and the *Rubiales*. It is characterized by the scarious corolla with alternate stamens; sepals, petals, and stamens each usually four; and the small entire two-celled pod, usually circumscissile. It includes 3 genera and over 200 species. Nearly all of

these belong to the typical genus *Plantago*, the other genera, *Bougueria* and *Littorella*, each having one or two species.

Plantago (plan-tā′gō), *n.* [NL. (Tournefort, 1700), < L. *plantago*, plantain: see *plantain*[1].] A genus of plants, type of the *Plantaginaceæ*, distinguished by the peltate seeds, two-celled ovary, and circumscissile capsule. It includes over 200 species, known as *plantain* or *ribwort*, and found everywhere, from arctic to tropical regions, in wet or dry ground, but most common in temperate climates. They are annual or perennial herbs, almost stemless, bearing rosettes of spreading leaves, which are characteristically broad, entire, five- to seven-nerved, with dilated-petiole base. The small flowers are usually crowded in a long spike, cross-fertilized by the earlier maturity of the pistils. Many species are dimorphous, or include perfect seed-bearing plants of two kinds, one form having long stamens and short styles, the other the opposite. Most of the American species are introduced weeds (for which see *plantain*[1], *kemp*[4], *hen-plant*, and *way-bread*, and, for *P. lanceolata*, *ribwort*, *rib-grass*, *jackstraw*, and *cocks*). *P. media*, the hoary plantain, lamb's-tongue, or fireweed of English pastures, is a pest on account of its stifling growing crops by its broad flat leaves, close-pressed to the ground; and the common *P. major* is sometimes similarly injurious in America. *P. Coronopus* is a peculiar plant of the British sea-cliffs, called *star-of-the-earth* from its divided radiating leaves, also *herb-ivy*, *buck's-horn*, and *hartshorn-plantain*. For other species, see *fleawort*, 2, and *ispaghul-seed*.

to the ground, and slender spikes; it is a native of Europe and temperate Asia, but is now found nearly everywhere. (See *hen-plant* and *way-bread*.) The English plantain (so called in the United States) is *P. lanceolata*, the ribwort, rib-grass, or ripple-grass, of the same nativity as the former. It has narrow leaves with prominent ribs, and slender stalks a foot or two high, with short thick spikes. (See *cocks* and *jackstraw*.) The sea-plantain or seaside plantain, *P. maritima*, with linear leaves, occurs on muddy shores in both hemispheres. The leaf is bound upon inflamed surfaces with a soothing effect. See also cut under *amphitropous*.

plantain[2] (plan′tān), *n.* [Formerly also *plantan*; < OF. *plantain*, plane-tree, = Sp. *plántano*, also *plátano*, plantain, plane-tree: see *plane*[3].] A tropical plant, *Musa paradisiaca*, or its fruit. The plantain closely resembles the banana, and is in fact often regarded as a variety of it. It is distinguished to the eye by purple spots on the stem, and by its longer fruit. The plantain-fruit is commonly eaten cooked before fully mature, while the banana is mostly eaten fresh when ripe. The pulp is dried and pulverized to make meal. The fresh fruit is comparable chemically with the potato, the meal with rice. The plantain, together with the banana, supplies the chief food of millions in the tropics. Though less nutritious than wheat or potatoes, it is produced in vastly larger quantities from the same area, and with far less effort. Sometimes called *Adam's apple*, from the fancy that this was the forbidden fruit of the Garden of Eden; the specific name refers to the same fancy. See *Musa* and *banana*.

They would also bring great store of oranges and *plantans*, which is a fruit that groweth upon a tree, and is very like vnto a cucumber, but very pleasant in eating.

3. Any tablet or distinctly flat plate of metal or porcelain, whether plain or ornamented; particularly, an ornamental circular plate intended for a wall-decoration. See cut in next column.

Plaque in Relief of Enameled Pottery, by Bernard Palissy; 16th century.

—**4.** The especial decoration of a high rank in many honorary orders. See *star, insignia, order*, 6 (*b*).—**5.** In *anat.* and *zoöl.*, a small flat object of round figure, as a blood-disk; a little plate. Also *plaquette.*—**6.** A patch.

Warts, epithelioma, herpes, and mucous *plaques.*
Lancet, No. 3468, p. 335.

Plaque of blood. Same as *blood-plate.*—**Plaques jaunes,** patches of yellow softening in cerebral cortex.—**Plaques of Peyer.** Same as *Peyerian glands* (which see, under *gland*).

plaquet (plak'et), *n.* [OF.: see *placket.*] In *medieval armor*, same as *placcate.*

plaquette (pla-ket'), *n.* [F., dim. of *plaque*, a plate: see *plaque.* Cf. *placket.*] **1.** A small plaque or flat decorative object, as a tile of porcelain or a plate of metal, made for application to a piece of furniture as part of its ornamentation: as, a bureau decorated with bronze *plaquettes.*

On the other hand, the finer of the two medallions . . . bears, in its pseudo-classicality, a considerable resemblance to the work of another North Italian worker in bronze, . . . as will appear from an examination of several *plaquettes* from his hand.
The Academy, Dec. 8, 1888, p. 377.

2. Same as *plaque*, 5.

G. Hayem insists that the elements of the blood, to which he gave the name of hematoblasts, are identical with the *plaquettes*, or corpuscules, described by Bizzozero.
Smithsonian Report, 1883, p. 735.

plash[1] (plash), *v.* [< ME. **plashen* (not found except as in the noun), < MD. *plasschen, plassen* = MLG. *plasken* = late MHG. *platsen, bletschen*, G. *platschen* = Dan. *plaske* = Sw. *plaska*, dabble; with orig. formative *-sk*, from the root seen in AS. *plættan, plættian*, strike with the hand, = Sw. *platta*, tap, pat: see *plat*[1], *pat*[1]. The word came to be regarded as imitative, and appears later as *splash.*] **I.** *intrans.* **1.** To dabble in water; also, to fall with a dabbling sound; splash.

Hears, upon turret-roof and wall,
By fits the *plashing* rain-drop fall.
Scott, Rokeby, i. 1.

The bucket *plashing* in the cool, sweet well.
Whittier, Monadnock.

2. To splash water or mud.

His horse is booted
Vp to the flanke in mire; himselfe all spotted
And stain'd with *plashing.*
Heywood, Woman Killed with Kindness (Works, ed. Pearson, 1874, II. 103).

II. *trans.* **1.** To make a splashing noise in.—**2.** To sprinkle with coloring matter so as to produce an imitation of granite: as, to *plash* a wall.

plash[1] (plash), *n.* [Early mod. E. *plasshe, plesh;* < ME. *plasche, plaische*, < MD. *plasch*, D. *plasch, plas*, a pool, puddle; cf. G. *platsch, plätsch* = Dan. *plask*, splash, splashing sound; from the verb. Cf. *flash*[2], in like sense.] **1.** A small collection of standing water; a puddle; a pool.

Be-twyx a *plasche* and a flode, appone a flate lawnde,
Ourefolke fongene theire felde, and fawghte theme agaynes.
Morte Arthure (E. E. T. S.), l. 2799.

Plasche or flasche, where reyne watyr stondythe (or pyt).
Prompt. Parv., p. 403.

Out of the wound the red blood flowed fresh,
That underneath his feet soone made a purple *plesh.*
Spenser, F. Q., II. viii. 36.

The illimitable reed,
And many a glancing *plash* and sallowy isle.
Tennyson, Last Tournament.

2. A sudden downpour of water; a sudden dash or splash: as, a *plash* of rain.—**3.** A flash; a spot (of light).

The tall grove of hemlocks, with moss on their stems, like *plashes* of sunlight.
Lowell, Fable for Critics (2d ed.), Int.

4. A splash or splashing sound.

Tweed's echoes heard the ceaseless *plash*,
While many a broken band,
Disorder'd, through her currents dash,
To gain the Scottish land.
Scott, Marmion, vi. 34.

plash[2] (plash), *v.* [OF. *plassier*, *plaissier*, *plessier*, plash (cf. **plesse* (?) (ML. *plessa*), a thicket of woven boughs), a secondary form, < L. *plectere*, weave: see *plait*, *plat*[4], *pleat*. Cf. *pleach*, a doublet of *plash*[2].] **I.** *trans.* To bend down and interweave the branches or twigs of: as, to *plash* a hedge.

For Nature, loath, so rare a jewels wracke,
Seem'd as she here and there had *plash'd* a tree,
If possible to hinder destiny.
W. Browne, Britannia's Pastorals, ii. 4.

There is a cupola made with pole-work between two elmes at the end of a walk, which, being cover'd by *plashing* the trees to them, is very pretty.
Evelyn, Diary, Oct. 30, 1683.

II. *intrans.* To bend down a branch.

Some of the trees hung over the wall, and my brother did *plash* and did eat. *Bunyan*, Pilgrim's Progress, ii.

plash[2] (plash), *n.* [< *plash*[2], *v.*] A branch of a tree partly cut or lopped, and then bent down and bound to other branches. *Mortimer.*

plashet (plash'et), *n.* [< *plash*[1] + *-et*. Cf. ML. ★*plassetum*.] A small pond or puddle.

plashing[1] (plash'ing), *n.* [Verbal n. of *plash*[1], *v.*] A dabbling in water; a sound of plunging water.

plashing[2] (plash'ing), *n.* [Verbal n. of *plash*[2], *v.*] A mode of repairing or trimming a hedge, by bending down a part of the shoots, cutting them half through near the ground, to render them more pliable, and twisting them among the upright stems, so as to render the whole effective as a fence, and at the same time preserve all the branches alive.

plashing-tool (plash'ing-tōl), *n.* A knife used in plashing hedges; a hedging-knife.

plashoot† (plash'öt), *n.* [For *plash-shoot*, < *plash*[2] + *shoot*.] A shoot from a plashed hedge. *N. E. D.*

Woodcocks arrive first on the north coast, where almost every hedge serveth for a road, and every *plashoote* for springles to take them.
R. Carew, Survey of Cornwall, p. 24.

plash-wheel (plash'hwēl), *n.* Same as *dash-wheel*.

plashy (plash'i), *a.* [< *plash*[1] + *-y*[1].] 1. Watery; abounding with puddles; full of puddles; wet; moist.

They shed their waters into the valley below, making it *plashy* in sundry places. *Sandys*, Travailes, p. 169.

He also, being past Adrians wall [A. D. 209], cut down Woods, made way through Hills, fast'ned and fill'd up unsound and *plashy* Fens. *Milton*, Hist. Eng., ii.

Along the streaming mountain-side, and through
The dripping woods, and o'er the *plashy* fields.
Bryant, Rain-Dream.

One among many *plashy* meadows, enclosed with stone walls. *E. Dowden*, Shelley, I. 17.

2. Speckled as if plashed or splashed with coloring liquid.

In his grasp
A serpent's *plashy* neck; its barbed tongue
Squeezed from the gorge, and all its uncurl'd length
Dead. *Keats*, Hyperion, ii.

plasm (plazm), *n.* [< LL. *plasma*, < Gr. *πλάσμα*, a figure formed or molded from clay or wax, an image, counterfeit, an assumed form or manner, < *πλάσσειν*, form, mold: see *plastic*.] 1. A mold or matrix in which anything is cast or formed to a particular shape. [Rare.]

The shells served as *plasms* or moulds to this sand.
Woodward.

2. In *biol.*, plasma. See *bioplasm*, *deutoplasm*, *protoplasm*, *plasmogen*, *sarcode*.

plasma (plas'mä), *n.* [NL.: see *plasm*.] 1. A variety of translucent quartz, or silica, of a rich grass-green or leek-green color, occurring in large pieces, associated with common chalcedony. Many fine engraved ornaments of this stone have been found among the ruins of Rome.—2. The liquid part of unaltered blood, lymph, or milk, as distinguished from the corpuscles of the blood or lymph, or the oil-globules of the milk; also, the juice expressed from fresh muscle; the muscle-plasma.—3. The aggregation of protein substances which constitutes the basis of all tissues of plants and animals; the "physical basis of life," in its simplest expression: now generally called *protoplasm*. *Plasma* is seldom used in this sense, the more general usage being the rather restricted meaning given in def. 2. See *protoplasm* and *starch*.
4. In *phar.*, same as *glycerite of starch*.

plasmasome (plas'ma-sōm), *n.* [< Gr. *πλάσμα*, a molded figure (see *plasm*), + *σῶμα*, body.] A separate particle of plasm; a protoplasmic corpuscle. See *plasmosome*, in the supplement.

The out-wandering *plasmasomes* form the so-called paranuclei. *Micros. Sci.*, XXX. ii. 168.

plasmatic (plas-mat'ik), *a.* [= F. *plasmatique*, < Gr. *πλασματικός*, imitating, < *πλάσμα*, a molded figure, an image: see *plasm*.] In *biol.*, same as *plasmic*.

plasmatical† (plas-mat'i-kal), *a.* [< *plasmatic* + *-al*.] Giving shape; having the power of giving form; plastic.

Working in this, by her [Psyche's] *plasmatical* spirits or archei, all the whole world into order and shape.
Dr. H. More, Philos. Poems (1647), p. 342, notes.

plasmation† (plas-mā'shon), *n.* [< LL. *plasmatio(n-)*, a forming, creating, < *plasma*, a molded figure, an image: see *plasm*.] Formation.

The *plasmation* or creation of Adam is reckoned among the generations. *Grafton*, Chron. i. 6.

plasmatoparous (plas-ma-top'a-rus), *a.* [< Gr. *πλάσμα* (*πλασματ-*), a molded figure, + L. *parere*, bring forth.] In *mycology*, noting germination in which the whole protoplasm of a gonidium issues as a spherical mass which at once becomes invested with a membrane and puts out a germ-tube. *De Bary.*

plasmator†, *n.* [ME., = F. *plasmateur*, < LL. *plasmator*, a former, fashioner, creator, < *plasmare*, form, mold, fashion, < *plasma*, a molded figure: see *plasm*.] One who forms or creates; a creator.

Hayle! fulgent Phebus and fader eternall,
Parfite *plasmator* and god omnipotent.
York Plays, p. 514.

plasmature†, *n.* [< LL. *plasma(t-)*, a molded figure, + *-ure*.] Form; shape.

That so stately frame and *plasmature* wherein the man at first had been created. *Urquhart*, tr. of Rabelais, ii. 8.

plasmic (plaz'mik), *a.* [< *plasm* + *-ic*.] Of the nature of plasma; pertaining to plasma; plastic or formative; blastemic; protoplasmic: as, *plasmic* substances or processes; *plasmic* origin. Also *plasmatic*.

plasmine (plas'min), *n.* [< Gr. *πλάσμα*, a molded figure, + *-ine*[2].] A proteid precipitated from blood-plasma on the addition of sodium chlorid and other salts. It coagulates, forming fibrin, when redissolved in water.

plasmochyme (plas'mō-kīm), *n.* [< Gr. *πλάσμα*, a molded figure, + *χυμός*, juice, chyle: see *chyme*[1].] The thick fluid albuminous substance of a cell. Also *plasmochym*. *Micros. Sci.*, XXX. ii. 211.

plasmode (plas'mōd), *n.* Same as *plasmodium*.

plasmodia, *n.* Plural of *plasmodium*.

plasmodial (plas-mō'di-al), *a.* [< *plasmodi-um* + *-al*.] Having the character or properties of plasmodium. Also *plasmodic*.

Plasmodiata (plas-mō-di-ā'tä), *n. pl.* [NL.: see *plasmodium*.] Plasmodiate organisms: synonym of *Mycetozoa* when these are regarded as animals. *E. R. Lankester.*

plasmodiate (plas-mō'di-āt), *a.* [< *plasmodi-um* + *-ate*[1].] Provided with or producing plasmodia; consisting of or contained in plasmodium.

plasmodiation (plas-mō-di-ā'shon), *n.* [< *plasmodiate* + *-ion*.] In *bot.*, the disposition of plasmodia. *Jour. of Bot. British and Foreign*, 1883, p. 371.

plasmodic (plas-mod'ik), *a.* [< *plasmodi-um* + *-ic*.] Same as *plasmodial*.

plasmodiocarp (plas-mō'di-ō-kärp), *n.* [< NL. *plasmodium* + Gr. *καρπός*, a fruit.] In *Myxomycetes*, a form of fructification which is more or less irregular in shape. Compare *æthalium*, 2, and *sporangium*. *Cooke*, Myxomycetes of Great Britain, p. 30.

plasmodiocarpous (plas-mō″di-ō-kär'pus), *a.* [< *plasmodiocarp* + *-ous*.] Resembling, characterized by, or producing plasmodiocarps. *Cooke*, Myxomycetes of Great Britain, p. 30.

Plasmodiophora (plas-mō-di-of'ō-rä), *n.* [NL. (Woronin), < *plasmodium* + Gr. *φέρειν* = E. *bear*[1].] A genus of myxomycetous fungi, giving name to the family *Plasmodiophoreæ*. The spores are free, not quaternate, and are disposed in sori; they emit zoöspores in germination.

Plasmodiophoreæ (plas-mō″di-ō-fō'rē-ē), *n. pl.* [NL. (Zopf), < *Plasmodiophora* + *-eæ*.] A family of myxomycetous fungi with the fructification disposed in sori.

plasmodium (plas-mō'di-um), *n.*; pl. *plasmodia* (-ä). [NL., < Gr. *πλάσμα*, a molded figure, + *εἶδος*, form.] 1. Protoplasm of protozoans in sheets, masses, or comparatively large quantities, as formed by the plasmodiate members of the *Protozoa*. True plasmodium is formed by the organic fusion of two or several amœbiform bodies, and distinguished from the *aggregate plasmodium* resulting from mere contact. See cut under *Protomyxa*.
2. A definite quantity of plasmodium, or the plasmodium of given individual organisms.

Large masses of gelatinous consistence characteristic of the so-called animal phase of the Myxomycetan, technically known as the *plasmodium*.
W. S. Kent, Infusoria, p. 42.

3. The naked multinucleated mass of protoplasm, exhibiting amœboid movement, which makes up the entire plant-body of the slime-molds (*Myxomycetes*) during the vegetative period of their existence. See *Myxomycetes*, *slime-mold*, *Fuligo*, 2, and *Olpidium*.—**Plasmodium malariæ**, a term applied to the various forms of protozoan parasites concerned in the production of the malarial fevers. There are believed to be three varieties, causing respectively tertian fever, quartan fever, and summer-autumn or tropical malaria. The organism is parasitic in the red blood-corpuscles, where it goes through one developmental cycle, the other being passed in the body of the anopheles mosquito. See *malaria*.

plasmogen (plas'mō-jen), *n.* [< Gr. *πλάσμα*, a molded figure, + *-γενής*, -producing: see *-gen*.] True protoplasm; bioplasm. See the quotation, and *germ-plasma*.

That highest point in the chemical elaboration of the molecule which is attained within the protoplasm, and up to which some of the chemical bodies present are tending, whilst others are degradation products resulting from a downward metamorphosis of portions of it. This intangible, unstable, all-pervading element of the protoplasm cannot at present be identified with any visibly separate part of the cell-substance. . . . This "critical" substance, sometimes called "true protoplasm," should assuredly be recognized by a distinct name "*plasmogen*."
Encyc. Brit., XXIV. 817.

★**plasmogony** (plas-mog'ō-ni), *n.* [< Gr. *πλάσμα*, a molded figure, + *-γονία*, generation: see *-gony*.] The generation or origination of an organism from plasma. *Rossiter.*

plasmology (plas-mol'ō-ji), *n.* [< Gr. *πλάσμα*, a molded figure, + *-λογία*, < *λέγειν*, speak: see *-ology*.] Minute or microscopic anatomy, as a branch of biology; histology; the study of the ultimate corpuscles of living matter, as regards their structure, development, and properties, with the aid of the microscope.

plasmolysis (plas-mol'i-sis), *n.* [NL., < Gr. *πλάσμα*, a molded figure, + *λύσις*, a loosing.] In *bot.*, the contraction of the protoplasm in active cells under the action of certain reagents. When the solutions employed are more dense than the fluids within the cell, a certain amount of water will be withdrawn from the contents of the cell by exosmotic action, thereby causing a shrinking which can easily be noted under the microscope, and, when the density of the solution is known, will allow the experimenter to ascertain within very narrow limits the density of the contents of the cell and the relative degree of turgidity.

plasmolytic (plas-mō-lit'ik), *a.* [< *plasmolysis* (*-lyt-*) + *-ic*.] In *bot.*, exhibiting or characterized by plasmolysis; employed in plasmolysis.

plasmolyze (plas'mō-līz), *v. t.*; pret. and pp. *plasmolyzed*, ppr. *plasmolyzing*. [< *plasmolysis*.] To effect plasmolysis in or of; subject to plasmolysis. Also spelled *plasmolyse*.

In order to see the primordial utricle better, *plasmolyse* the cell by running in 10 p. c. salt solution.
Huxley and Martin, Elementary Biology, p. 404.

★**plaster** (plas'tėr), *n.* [Formerly also *plaister*, *playster*; < ME. *plaster*, also *plastre*, *playster* (after OF.), < AS. *plaster* = D. *pleister* = MLG. *plāster* = OHG. *phlastar*, *plastar*, MHG. *phlaster*, *pflaster*, *plaster*, G. *pflaster* = Sw. *plåster* = Dan. *plaster* = OF. *plastre*, *plaistre*, plaster, F. *plâtre*, gypsum, = Pr. *plastre*, a plaster, = It. dim. *piastrello*, a plaster (ML. *plastrum*, gypsum); with loss of orig. prefix; ME. *enplastre*, < OF. *emplastre*, F. *emplâtre*, a plaster, < L. *emplastrum*, a plaster for a wound, < Gr. *ἔμπλαστρον* for *ἔμπλαστον*, a plaster: see *emplaster*.] 1. In *phar.*, a solid compound intended for external application, adhesive at the temperature of the human body, and requiring to be softened by heat before being spread.

My myddell woundys they ben derne & depe;
Ther ys no *plaster* that persyth aryght.
Political Poems, etc. (ed. Furnivall), p. 215.

Where any private harm doth grow, we are not to reject instruction as being an unmeet *plaister* to apply unto it.
Hooker, Eccles. Polity, iv. 12.

2. A composition of lime, water, and sand, with or without hair for binding, well mixed so as to form a kind of paste, and used for coating walls and partitions of houses.

A House shou'd be built or with Brick or with Stone;
Why, 'tis *Plaister* and Lath; and I think that's all one.
Prior, Down-Hall, st. 38.

3. Calcined gypsum or calcium sulphate, used, when mixed with water, for finishing walls, for molds, ornaments, casts, luting, cement, etc. Plaster used as a ground for painting in distemper is unburned, and of two kinds, one coarse and one of a finer quality. Both are made from white alabaster, but the latter, which is used also as a ground for gilding, and for working ornaments in relief, is more carefully prepared than the former. The plaster used for taking casts from life or from statues is always burned.

They suppose that this ryuer [Bahuan] hathe made it selfe awaye vnder the grounde by sume passages of *playster* or salte earthe. *Peter Martyr*, tr. in First Books on [America (ed. Arber), p. 172.

Aconite plaster, aconite-root, alcohol, and resin plaster. —**Adhesive plaster.** Same as *resin plaster.*—**Ammoniac plaster,** ammoniac and diluted acetic acid.—**Ammoniac plaster with mercury,** ammoniac, mercury, olive-oil, sublimed sulphur, diluted acetic acid, and lead-plaster.—**Antimonial plaster,** double tartrate of antimony and potassium and Burgundy pitch.—**Arnica plaster,** extract of arnica-root and resin plaster.—**Aromatic plaster.** Same as *spice-plaster.*—**Asafetida plaster,** asafetida, lead-plaster, galbanum, yellow wax, and alcohol.—**Belladonna plaster,** belladonna-root, alcohol, and resin plaster.—**Blistering plaster.** Same as *cantharides plaster.*—**Brown soap plaster.** Same as *soap-cerate plaster.*—**Burgundy-pitch plaster,** Burgundy pitch and yellow wax.—**Calcined plaster.** Same as *plaster of Paris.*—**Canada-pitch plaster,** Canada pitch and yellow wax.—**Cantharides plaster,** cantharides, yellow wax, resin, and lard. Also called *cantharides cerate, blistering plaster, vesicating plaster.*—**Capsicum plaster,** resin plaster and oleoresin of capsicum.—**Carbonate-of-lead plaster,** lead carbonate, olive-oil, yellow wax, lead-plaster, and Florentine orris.—**Chalybeate plaster.** Same as *iron plaster.*—**Court plaster.** See *court-plaster.*—**Diachylon plaster.** Same as *lead-plaster.*—**Fibrous plaster,** plaster of Paris into which fibrous material of some kind is worked to give it coherence: used for patterns in low relief for ceilings, walls, and the like.—**Galbanum plaster,** galbanum, turpentine, Burgundy pitch, and lead-plaster; or galbanum, ammoniac, yellow wax, and lead-plaster.—**Hemlock-pitch plaster.** Same as *Canada-pitch plaster.*—**Iodide-of-lead plaster,** lead iodide, soap plaster, and resin plaster; or lead iodide, lead-plaster, and resin.—**Iron plaster,** oxid of iron, Canada turpentine, Burgundy pitch, and lead-plaster. Also called *chalybeate plaster, strengthening plaster.*—**Isinglass plaster,** isinglass, alcohol, glycerin, and tincture of benzoin. Also called *court-plaster.*—**Lath and plaster.** See *lath*[1].—**Lead plaster.** See *lead-plaster.*—**Litharge plaster.** Same as *lead-plaster.*—**Logan's plaster,** litharge, lead carbonate, Castile soap, butter, olive-oil, and mastic.—**Mahy's plaster.** Same as *carbonate-of-lead plaster.*—**Mercurial plaster,** mercury, olive-oil, resin, and lead-plaster.—**Miraculous plaster,** red oxid of lead, olive-oil, camphor, and alum.—**Opium plaster.** See *opium-plaster.*—**Pitch-plaster,** Burgundy pitch, frankincense, resin, yellow wax, oil of nutmeg, and olive-oil.—**Pitch-plaster with cantharides,** Burgundy pitch and cerate or plaster of cantharides; or cantharides, oil of nutmeg, yellow wax, resin, soap plaster, and resin plaster. Also called *warm plaster.*—**Plaster cast,** a reproduction of an object made by pouring plaster of Paris mixed with water into a mold which has been made from the object to be copied. Many molds are needed for a complicated figure, and the parts separately cast are united, showing raised seams where they are put together.—**Plaster jacket,** a bandage surrounding the trunk, made stiff with gypsum, used in caries of the vertebræ.—**Plaster mull,** a plaster made by coating a thin sheet of gutta-percha, backed with muslin, with the substance that is to be applied to the skin.—**Plaster of Paris.** (*a*) Native gypsum: so called because found in large quantities in the Tertiary of the Paris basin. See *gypsum.* (*b*) Calcined gypsum—that is, gypsum from which the water has been driven off by heat: used in building and in making casts of busts and statues, etc. When diluted with water into a thin paste, plaster of Paris sets rapidly, and at the instant of setting expands or increases in bulk; hence this material becomes valuable for filling cavities, etc., where other earths would shrink.—**Plaster process,** a method of making stereotype plates for printing by the use of plaster. A mold of the type page is made by pouring over it liquid plaster of Paris; this mold, when baked entirely dry, is filled with melted type-metal. *Workshop Receipts,* 4th ser., p. 217.—**Poor man's plaster,** a plaster composed of tar, resin, and yellow wax. *Dunglison.*—**Porous plaster,** a spread plaster having numerous small holes to prevent wrinkling and to render it more pliable.—**Rademacher's plaster,** red lead, olive-oil, amber, camphor, and alum.—**Resin plaster,** resin, lead-plaster, and yellow wax or hard soap. Also called *adhesive plaster, sticking plaster.*—**Soap-cerate plaster,** curd soap, yellow wax, olive-oil, oxid of lead, and vinegar.—**Soap plaster,** soap and lead-plaster, with or without resin.—**Spice plaster,** yellow wax, suet, turpentine, oil of nutmeg, olibanum, benzoin, oil of peppermint, and oil of cloves. Also called *aromatic plaster, stomach-plaster.*—**Sticking plaster.** Same as *resin plaster.*—**Stomach-plaster.** Same as *spice plaster.*—**Stramonium plaster,** extract of stramonium, elemi, and galbanum plaster.—**Strengthening plaster.** Same as *iron plaster.*—**Thapsia plaster,** yellow wax, Burgundy pitch, resin, terebinthina cocta, Venice turpentine, glycerin, and thapsia resin.—**Vesicating plaster.** Same as *cantharides plaster.*—**Vigo plaster,** lead-plaster, yellow wax, resin, olibanum, ammoniac, bdellium, myrrh, saffron, mercury, turpentine, liquid storax, and oil of lavender.—**Warm (or warming) plaster.** Same as *pitch-plaster with cantharides.*—**Zinc plaster,** zinc sulphate and Castile soap.

plaster (plās'tėr), *v. t.* [Formerly also *plaister, playster;* < ME. *plastren, playsteren, playstren* = D. *pleisteren* = MLG. *plāsteren* = G. *pflastern* = Sw. *plåstra* = Dan. *plastre;* from the noun: see *plaster, n.* Cf. *emplaster, v.*] **1.** To apply a medicative plaster to; cover with a plaster: as, to *plaster* a wound.

And be he bathed in that blode baptised, as it were,
And thanne *plastred* with penaunce and passioun of that babi.
He shulde stonde and steppe. *Piers Plowman* (B), xvii. 95.

2. To cover or overlay with plaster, as the walls of a house, partitions, etc.

The east side [of the aqueduct] is *plastered* with a very strong cement, probably to prevent any damage from the sands that might be drove against it.
Pococke, Description of the East, II. i. 59.

The houses [at Rome] are of stone, but *plastered* as at Vienna. *Eustace,* Italy, II. i.

3. To bedaub or besmear: as, to *plaster* the face with powder. [Colloq.]—**4.** To fill or cover over with or as with plaster; hide; gloss: with *up.*

But see here the conueyance of these spirituall gentlemen in *playsteryng vp* their unsauery sorceries.
Bp. Bale, English Votaries, i.

And suck out clammy dews from herbs and flowers,
To smear the chinks, and *plaster up* the pores.
Addison, tr. of Virgil's Georgics, iv.

5. To treat with plaster; add gypsum to: as, to *plaster* vines by dusting them with gypsum in order to prevent rot or mildew of the berries; to *plaster* wines by adding gypsum in order to neutralize acid or produce other fancied benefits.

plasterbill (plās'tėr-bil), *n.* The surf-scoter or surf-duck, *Œdemia* (*Pelionetta*) *perspicillata:* so called from a peculiarity of the bill. *G. Turnbull,* 1888. See cut under *surf-duck.* [Massachusetts.]

plaster-clover† (plās'tėr-klō″vėr), *n.* The sweet clover, *Melilotus officinalis:* so called from its use in ointments.

plasterer (plās'tėr-ėr), *n.* [= D. *pleisteraar* = G. *pflasterer, pflästerer;* as *plaster, v.,* + *-er*[1].] One who plasters walls; also, one who makes plaster ornaments.

plastering (plās'tėr-ing), *n.* [< ME. *plasteryng, playsteryng;* verbal n. of *plaster, v.*] **1.** The act or operation of overlaying with plaster.—**2.** The plaster-work of a building; a covering of plaster.—**3.** The treatment of wines by the addition of gypsum or plaster of Paris. See *plaster, v.,* 5.

plastering-machine (plās'tėr-ing-ma-shēn″), *n.* A machine designed for use in spreading plaster in forming interior walls and ceilings. Attempts to construct a practical machine of this kind, adapted to general use, have not yet succeeded, and the ancient method of plastering with hand-trowels is still universal.

plaster-mill (plās'tėr-mil), *n.* **1.** A machine consisting of a roller or a set of rollers for grinding lime or gypsum to powder.—**2.** A mortar-mill.—**3.** A mill where plaster is made.

plaster-stone (plās'tėr-stōn), *n.* Gypsum, or a species of gypsum.

plastery (plās'tėr-i), *a.* [< *plaster* + *-y*[1].] Resembling plaster; containing plaster.

St. Peter's disappoints me; the stone of which it is made is a poor *plastery* material; and indeed Rome in general might be called a rubbishy place. *A. H. Clough.*

★**plastic** (plas'tik), *a.* [= F. *plastique* = Sp. *plástico* = Pg. It. *plastico* (cf. D. G. *plastisch* = Sw. Dan. *plastisk*), < L. *plasticus,* < Gr. πλαστικός, of or belonging to molding or modeling, < πλαστός, verbal adj. of πλάσσειν, mold or form in clay, wax, etc. Cf. *plaster.*] **1.** Capable of molding or of giving form or fashion to a mass of matter; having power to mold.

Benign Creator, let thy *plastic* Hand
Dispose its own Effect. *Prior,* Solomon, iii.

Plastic Nature working to this end.
Pope, Essay on Man, iii. 9.

The One Spirit's *plastic* stress
Sweeps through the dull dense world.
Shelley, Adonais, xliii.

2. Capable of being modeled or molded into various forms, as plaster, clay, etc.; hence, capable of change or modification; capable of receiving a new bent or direction: as, the mind is *plastic* in youth.

Stuff at hand, *plastic* as they could wish.
Wordsworth, French Revolution.

3. Pertaining to or connected with modeling or molding; produced by or characteristic of modeling or molding: as, the *plastic* art (that is, sculpture in the widest sense, as distinguished from painting and the graphic arts).

Pictorial rather than *plastic* in style, both in action and in the treatment of draperies.
C. C. Perkins, Italian Sculpture, p. 152.

4. In *biol.,* specifically, plasmic.—**Plastic bronchitis,** pseudomembranous bronchitis.—**Plastic clay,** clay suitable for making pottery or bricks; specifically, a division of the Eocene in England, especially in the London basin and on the Isle of Wight, where it is characteristically developed. The Plastic clay series was so named by T. Webster, in imitation of the name given by Cuvier and Brongniart (*Argile plastique*) to a division of the series in the Paris basin. The beds thus named by Webster were later designated by Prestwich as the Woolwich and Reading series. Part of the series is very fossiliferous; among the fossils is a bird as large as the dinornis of New Zealand.—**Plastic crystal.** See *crystal.*—**Plastic force,** the sum total of agencies producing growth and organization in living bodies.—**Plastic gum,** gutta-percha.—**Plastic imagination,** the productive or creative imagination.—**Plastic medium,** something intermediate between soul and body, assumed to account for their action one upon the other.—**Plastic nature.** See *nature.*—**Plastic operations, plastic surgery,** operations which have for their object the restoring of lost parts, as when the skin of the cheeks is used to make a new nose (rhinoplasty).—**Plastic solid.** See *solid.*

plastical† (plas'ti-kal), *a.* [< *plastic* + *-al.*] Same as *plastic. Dr. H. More,* Philosophical Writings, Pref. Gen., p. xvi.

plastically (plas'ti-kal-i), *adv.* In a plastic manner; by molding or modeling, as a plastic substance.

★**plasticity** (plas-tis'i-ti), *n.* [= F. *plasticité* = Sp. *plasticidad* = Pg. *plasticidade;* as *plastic* + *-ity.*] The property of being plastic. (*a*) The property of giving form or shape to matter.

To show further that this protoplasm possesses the necessary properties of a normal protoplasm, it will be necessary to examine . . . what these properties are. They are two in number, the capacity for life and *plasticity.*
H. Drummond, Natural Law in the Spiritual World, p. 299.

(*b*) Capability of being molded, formed, or modeled.

The race must at a certain time have a definite amount of *plasticity*—that is, a definite power of adapting itself to altered circumstances by changing in accordance with them. *W. K. Clifford,* Lectures, I. 102.

Some natures are distinguished by *plasticity* or the power of acquisition, and therefore realise more closely the saying that man is a bundle of habits.
A. Bain, Emotions and Will, p. 473.

★**plastid** (plas'tid), *n.* and *a.* [< NL. *plastidium,* q. v.] **I.** *n.* **1.** A morphological individual or morphon of the first grade of individuality; a cell considered as a structural, as contrasted with a physiological, unit. A unicellular protozoön is both a morphological and a physiological unit, while the individuality of the constituent cells of the body of a metazoön is not physiological but structural.

If we reduce organized beings to their ultimate organisms—cells or *plastids.*
Dawson, Origin of the World, p. 377.

2. In *bot.,* one of the variously shaped protein bodies, such as chlorophyl-granules, leucoplastids, chromoplastids, etc., which may be clearly differentiated in the protoplasm of active cells. They have substantially the same chemical and, with the exception of color, the same physical properties as protoplasm. They are regarded as being the centers of chemical activity in cells.

II. *a.* Having the character or quality of a plastid; plastic or plasmic.

plastidium (plas-tid'i-um), *n.*; pl. *plastidia* (-ä). [NL., < Gr. πλαστός, verbal adj. of πλάσσειν, mold, form (see *plastic*), + dim. *-ιδιον.*] Same as *plastid.*

Plastidozoa (plas″ti-dō-zō'ä), *n. pl.* [NL., < *plastid(ium)* + Gr. ζῷον, animal.] Same as *Protozoa.*

plastidular (plas-tid'ū-lär), *a.* [< *plastidule* + *-ar*[3].] Of or pertaining to plastidules.

plastidule (plas'ti-dūl), *n.* [< *plastid* + *-ule.*] A molecule of protoplasm; chemically, the smallest mass of protoplasm which can exist as such, or the very complex and highly unstable molecule of the chemical substance protein, when invested with vital activities.

plastilina (plas-ti-lī'nä), *n.* [< *plast(ic)* + *-il* + *-ina.*] A modeling-clay so compounded as to remain moist for a considerable time, and thus dispense with frequent wetting during the progress of the work.

★**plastin** (plas'tin), *n.* [< Gr. πλαστός, verbal adj. of πλάσσειν, form, mold, + *-in*[2].] In *biol.,* an element in the chemical composition of the cell-nucleus: according to Swartz, who calls it also *cytoplastin,* a viscous extensible mass which resists pepsin- and trypsin-digestion.

Carnoy . . . believes that the single, greatly coiled chromatin thread present in the nucleus in Arthropoda has a "*plastin* envelope," consisting of nuclein substances. . . . Besides the "nuclein" discovered by Miescher, which forms an essential part of the mass of the nucleus, Reinke and Rodewald have found "*plastin,*" and Kossel "histon" and "adenin."
Quart. Jour. Micros. Sci., XXX. ii. 166, 169.

plastra, *n.* Plural of *plastrum.*

plastral (plas'tral), *a.* [< *plastr-on* + *-al.*] In *herpetology,* of or pertaining to the plastron; entering into the formation of the under shell: as, *plastral* bones; *plastral* scutes or sutures.

Plastral shields subject to great variations.
Brit. Mus. Cat. Chelonians, p. 25.

★**plastron** (plas'trọn), *n.* [< F. *plastron* (= It. *piastrone*), a breastplate, < OF. *plastre*, a plaster: see *plaster*.] 1. A breastplate; a garment or part of a garment covering the breast. Specifically—(*a*) The early breastplate worn under the hauberk or broigne: one of the earliest pieces of plate-armor introduced in the European middle ages. *C. Boutell*, Arms and Armour in England. (*b*) A wadded shield of leather which masters hang before the right breast when giving lessons in fencing. (*c*) A detachable part of a woman's dress, made of some soft material, and suspended in loose folds from the throat to the waist and caught in the belt: as, a *plastron* of lace, crape, or silk. (*d*) An ornamental and often jeweled decorative plaque worn on the breast by Hindu women. (*e*) A man's shirt-bosom, especially one of the form fashionable for evening-dress 1875–90, without plaits, presenting a smooth surface of lawn.

2. In *herpet.*: (*a*) The ventral part of the shell of a chelonian or testudinate; the lower shell, or under side of the shell, of a turtle or tortoise: more or less opposed to *carapace*. The plastron is wholly an exoskeletal or integumentary structure, in which no bones belonging to the endoskeleton or skeleton proper are found. It consists of a number, typically nine, of separate dermal bones, developed in membrane, and covered with horny epidermis, or tortoise-shell. The nine typical pieces are one median and four pairs lateral, called *entoplastron*, *epiplastron*, *hyoplastron*, *hypoplastron*, and *xiphiplastron*. Formerly, when these were supposed to contain or represent sternal elements, they were respectively named *entosternum*, *episternum*, *hyosternum*, *hyposternum*, and *xiphisternum*. The plastron is usually immovable, like the carapace, but may be variously hinged, in some cases so as to shut the animal in completely. See also cuts under *carapace*, *Pleurospondylia*, and *Chelonia*. (*b*) One of the similar exoskeletal plates developed upon the under side of the body of certain *Amphibia*, as the *Labyrinthodonta*.—3. In *mammal.*, the ventral shield or cuirass of the glyptodons or fossil armadillos.—4. In *anat.*, the sternum with the costal cartilages attached, as removed in autopsies.—5. In *ornith.*, a colored area on the breast or belly of a bird, like or likened to a shield. *Coues.*

Plastron of Tortoise (*Emys*), ventral surface (outside), showing twelve horny epidermal scales as indicated by the dark lines, one of which traverses each xiphisternal (*xp*) and each hyposternal (*hp*) bony scute; *ic*, interclavicular scute, or entoplastron; *c*, clavicular scute (clavicularium); *hy*, hyosternal scute.

plastron-de-fer (plas'trọn-dẹ-fer'), *n.* Same as *plastron*, 1 (*a*).

plastrum (plas'trum), *n.*; pl. *plastra* (-trạ). [NL., an accom. form of *plastron*; cf. ML. *plastrum*, plaster (gypsum): see *plaster*, *plastron*.] Same as *plastron*.

The Douglas Tragedy (Child's Ballads, II. 119).

plat[4] (plat), *n.* [< *plat*[4], *v.*] 1. A plaited or braided thing; something produced by plaiting or interweaving: as, straw *plat* for hats; a *plat* of hair.—2. *Naut.*, a braid of foxes. See *fox*[1], 4. *Dana.*

Platacanthomyinæ (plat-a-kan″thọ-mi-ī'nē), *n. pl.* [NL., < *Platacanthomys* + *-inæ*.] A subfamily of *Muridæ*, represented by the genus *Platacanthomys*.

Platacanthomys (plat-a-kan'thọ-mis), *n.* [NL. (E. Blyth, 1859), prop. **Platyacanthomys*, < Gr. πλατύς, flat, + ἄκανθα, a spine, + μῦς, mouse.] The only genus of *Platacanthomyinæ*, having transversely laminate molars and the fur mixed with flattened spines. *P. lasiurus* is a small species like a dormouse, with a densely hairy tail, inhabiting mountainous parts of western India.

Platacidæ (plā-tas'i-dē), *n. pl.* [NL., < *Platax* (*Platac-*) + *-idæ*.] A family of acanthopterygian fishes, typified by the genus *Platax*; the sea-bats. They have a high compressed body, imbricated scales, a long high dorsal with the spines few and crowded in front, a long high anal, well-developed ventrals, setiform teeth in the jaws, and an edentulous palate. About 7 species are known as inhabitants of the Indian and western Pacific oceans.

Platalea (plā-tā'lẹ-ạ), *n.* [NL., < L. *platalea* (also *platea*), the spoonbill, appar. < Gr. πλατύς, flat: see *plat*[3].] The typical genus of *Plataleidæ*, formerly conterminous with the family, now restricted to the Old World spoonbills, such as *P. leucorodia*, in which the intrathoracic parts of the trachea are peculiarly convoluted. Also *Platea*.

Spoonbill (*Platalea leucorodia*).

Plataleidæ (plat-ạ-lẹ'i-dē), *n. pl.* [NL., < *Platalea* + *-idæ*.] A family of large grallatorial birds of the order *Herodiones* and suborder *Ibides*, typified by the genus *Platalea*, having the long flat bill dilated at the end like a spoon; the spoonbills, or spoon-billed ibises. There are 5 or 6 species, of various parts of the world, chiefly in tropical latitudes. They were formerly classed with the storks, but are more closely related to the ibises. See cuts under *Aiaia* and *Platalea*.

plataleiform (plā-tā'lẹ-i-fôrm), *a.* [< L. *platalea*, a spoonbill, + *forma*, form.] Like a spoonbill in form; plataleine in structure and affinity.

plataleine (plā-tā'lẹ-in), *a.* [< L. *platalea*, a spoonbill, + *-ine*[2].] Pertaining to the spoonbills; belonging to the *Plataleidæ*.

platan, *n.* See *platane*.

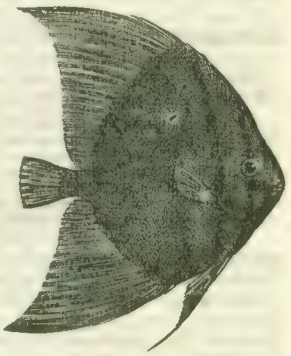
Platanaceæ (plat-ạ-nā'sẹ-ē), *n. pl.* [NL. (Lindley, 1836), < *Platanus* + *-aceæ*.] A family of dicotyledonous trees of the order *Rosales*, consisting of the genus *Platanus*, and characterized by having monœcious flowers in dense globose heads, without calyx, and with but few or minute bracts, by the ovary with one cell and one ovule, and the fruit a ball of numerous long achenes, each narrowed into a slender base surrounded with long hairs. See cut under *plane-tree*.

platane, platan (plat'ạn, plat'ạn), *n.* [= D. *plataan* = G. *platane* = Sw. Dan. *platan*, < F. *platane* = Sp. *plátano* = Pg. It. *platano*, < L. *platanus*, < Gr. πλάτανος, a plane-tree: see *plane*[3] and *Platanus*, and cf. *plantain*[2].] The plane-tree.

I espied thee, fair indeed and tall,
Under a *platane*. *Milton*, P. L., iv. 478.

Often, where clear-stemm'd *platans* guard
The outlet, did I turn away.
Tennyson, Arabian Nights.

Platanista (plat-ạ-nis'tạ), *n.* [NL., < L. *platanista*, < Gr. πλατανιστής, a fish of the Ganges, appar. this dolphin.] The typical genus of the family *Platanistidæ*, containing the Gangetic dolphin, *P. gangetica*. This is an entirely fluviatile species, having about 120 teeth, 50 vertebræ, extremely narrow jaws, no pelvic bone, rudimentary eyes, and obsolete dorsal fin. It attains a length of about 8 feet, and feeds on small fishes and crustaceans.



Gangetic Dolphin (*Platanista gangetica*).

Platanistidæ (plat-ạ-nis'ti-dē), *n. pl.* [NL., < *Platanista* + *-idæ*.] A family of delphinoid odontocete cetaceans, framed to contain the genera *Platanista*, *Inia*, and *Pontoporia*. They

are fluviatile or estuarine dolphins of warm waters, having a small or obsolete dorsal fin, broad truncate flippers, distinct flukes, external indication of a neck, free cervical vertebræ, a long mandibular symphysis, no distinct lacrymal bone, distinct tubercular and capitular articulations of the ribs, and long slender jaws with very numerous functional teeth.

Platanus (plat'a-nus), *n.* [NL. (Tournefort, 1700), < L. *platanus*, < Gr. πλάτανος, the plane-tree: see *platane*, *plane*[3].] A genus of trees constituting the family *Platanaceæ*, and consisting of about 7 species, natives of temperate or subtropical parts of the northern hemisphere; 3 occur in the United States, 1 or 2 in Mexico, and 2 in the old world; the plane-trees. They are large trees, with the light-brown bark often scaling off in broad, thin, and roundish flakes, exposing a whitish inner layer, and giving the trunk a naked or spotted appearance wholly unlike that of any other tree. They bear alternate broadly deltoid leaves, palmately nerved and lobed, the dilated leafstalk covering the leaf-bud of the year following. See *buttonball*, *sycamore*, 3, and *chinar-tree*, and cut under *plane-tree*.

Platax (plā'taks), *n.* [NL. (Cuvier, 1829), < Gr. πλάταξ, a fish like a perch, also called κορακῖνος; prob. < πλατύς, flat: see *platy*[3].] The typical genus of *Plataci-dæ*, remarkable for the height or depth of the body.

Sea-bat (*Platax vespertilio*).

platband (plat'-band), *n.* [< F. *platebande*, *plat-band*, lintel, border, OF. *platte-bande*, a flat band, < *plate*, fem. of *plat*, flat, + *bande*, band: see *band*[1].] 1. A border of flowers in a garden, or along a wall or the side of a parterre.—2. In *arch.*: (*a*) Any flat rectangular molding the projection of which is much less than its width; a fascia. (*b*) A lintel formed with voussoirs in the manner of an arch, but with the intrados horizontal—a common and vicious modern construction, but employed even in some Roman and medieval work in places where a true arch was not convenient, and when monoliths of sufficient size were not available. See cut of *flat arch*, under *arch*[1]. (*c*) The fillets between the flutes of an Ionic or a Corinthian column.

plat-blind† (plat'blīnd), *a.* Entirely blind. *Halliwell.*

★**plate** (plāt), *n.* [< ME. *plate*, a plate, < OF. *plate*, *platte*, *plaite*, *plete*, *plette*, etc., f., a plate of metal, plate-armor, ingot, silver, also *plat*, m., a plate, platter, a flat surface, a low lake, a flat-boat, etc., plate, bullion, silver-plate, silver, F. *plat*, m., a dish, plate, scale (of a balance), lid (of a book), sheet (of glass), flat (of the hand), blade (of an oar), etc.; = Sp. *plata*, f., plate, silver, wrought metal, money, *plato*, m., a dish, plate, = Pg. *prata*, f., plate, silver, *prato*, m., a dish, plate, = It. *piatta*, f., a flatboat, *piatto*, m., a dish, plate (ML. *plata*, f., a dish, plate, *platum*, n., a dish, plate, *plattum*, a flat surface, *platus*, m., a dish, plate, also *platta*, f., the clerical tonsure); cf. Mangled with ghastly wounds through *plate* and mail.
Milton, P. L., vi. 368.

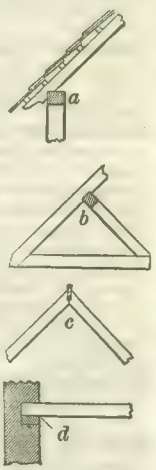
Squadrons and squares of men in brazen *plates*.
Tennyson, Fair Women.

3. A shallow dish of pottery, porcelain, or metal, on which food is served at table, or from which it is eaten; also, a plateful; a course or portion at table: as, a soup-*plate*; a fruit-*plate*; a *plate* of soup or of fish.

Both me and mine he caus'd to dine,
And serv'd us all with one *plate*.
The Kings Disguise (Child's Ballads, V. 381).

The European pilgrims dine and sup in the refectory with the monks; . . . they are well served with three or four *plates*, and have excellent white-wine of their own making. *Pococke*, Description of the East, II. i. 11.

4. Gold or silver dishes and utensils used at table or in the home, including besides dishes other vessels, as cups, flagons, etc., as well as spoons, knives, forks, etc.: as, a sale of the furniture and *plate*.



A piece of antique *plate*, bought of St. Mark,
With which he here presents you.
B. Jonson, Volpone, i. 1.

The *plate* in the hall (all at the Queen's table being gold) was estimated to be worth nearly £400,000.
First Year of a Silken Reign, p. 68.

5. Articles which have been covered with a plating of precious metal not solid gold or silver; plated ware.

Rich *plate*, even to the enamelling on gold, rich stuffs, and curious armour were carried to excess.
Walpole, Anecdotes, I. 2, note.

6. A cup or flagon or other article of gold or silver awarded to the winner in a contest, as to the owner of the winning horse or the crew of the winning boat in a race; a "cup."—7. A beam or piece of timber laid horizontally in a wall to receive the ends of other timbers. The plate for roof-timbers, and also for joists, is called a *wall-plate*. Compare *plat*[3], *n.*, 1.—8. A flat piece of metal, as brass, copper, or steel, on which any representation or inscription is engraved: as, a door-*plate*; a coffin-*plate*; especially, such a piece of metal so engraved for impression on paper, etc.: as, a book-*plate*; a card-*plate*; hence, the printed impression from an engraved plate: as, a book illustrated with *plates*.—9. A duplicate, in one piece of metal, of the face of composed types or woodcuts. Such plates are made by electrotype or stereotype process. Plates of book-pages are about one eighth of an inch thick; plates of newspaper-pages are much thicker.

Carpenters' Plates.
a, rafter-plate; *b*, purlin-plate; *c*, crown-plate; *d*, wall-plate.

10. (*a*) In *dentistry*, a piece of metal or composition fitted to the mouth and holding the teeth of a denture. (*b*) In *horology*, one of the two parallel pieces of metal to which the wheels are pivoted in a watch or clock. (*c*) The flat piece of metal forming the side of the lock of a firearm. (*d*) A flat piece of metal usually forming a part of the bed or bosh of a metallurgical furnace. (*e*) A commonly rectangular piece of glass used in photography to receive the picture. (*f*) In *baseball*, the home base.

From the nature of things, a ball so knocked that it cannot be caught or fielded to the *plate* before the man can make the entire circuit of the bases yields an earned, or, as it is in such instance more generally called, a "home run." *The Century*, XXXVIII. 835.

(*g*) *Naut.*, a bar or band of iron, as in *futtock-plates*, *channel-plate*, etc.; specifically, in iron ships, a sheet of metal which forms part of the structure, such as outside plating, bulkheads, etc.—11. Shale of the coal-measures. In it the finest specimens of the coal-plants are found. Also called *binds*.—12. Plate-glass. The machine in use for polishing the glass is practically that originally designed for the purpose; it is not only used in plate-glass works, but is the machine used for polishing that description of glass which is known as "patent *plate*." *Glass-making*, p. 168.

13. The finest quality of pewter.—14. In *anat.*, *zoöl.*, and *bot.*, a plate-like part, organ, or structure; a lamina or lamella; a layer: not specific, the thing indicated being designated by a qualifying term. See cuts under *carapace*, *Coluber*, and *whalebone*.—15†. A Spanish money of account. Also called *old plate*. Eight reals of old plate made the *peso de plata*, or piaster—that is, the Spanish dollar.

Be likehe has some new trick for a purse;
And if he has, he is worth three hundred *plates*.
Marlowe, Jew of Malta, ii.

Realms and islands were
As *plates* dropp'd from his pocket.
Shak., A. and C., v. 2. 92.

Ambulacral plate. See *ambulacral*.—**A pair of plates**†, armor for the breast and back.

Somme woln have *a peyre plates* large.
Chaucer, Knight's Tale, l. 1262.

Argentine plate, German silver.

The manufacture of German silver, or *Argentine plate*, became an object of commercial importance.
Ure, Dict., III. 414.

Armor of plate. Same as *plate-armor*.—**Auditory plate.** See *auditory crest*, under *auditory*.—**Basilisk plates**, plates of enameled pottery decorated with a basilisk, or similar animal, which are found from time to time in the neighborhood of Quimper, in the department of Finistère in France. They are thought to be specimens of the faïence of Quimper, but have often been classed as Rouen ware. See *Quimper pottery*, under *pottery*.—**Bobstay, branchial, buckled plates.** See the qualifying words.—**British plate.** Same as *albata*.—**Bulb plate**, in *iron-* and *steel-manuf.*, a plate along the edge of whose web is rolled a rib or bulb thicker than the body of the plate. The plate resembles tee-iron, except that the head of the tee, or what corresponds to it, is more massive. Such plates are used in iron ship-building for keelsons, etc., in bridge-building, and in iron architecture.—**Cardiac, circumesophageal, clinoid plate.** See the adjectives.—**Coat of plates, coif of plate.** See *coat*[2], *coif*.—**Compound armor-plate.** See under *armor-plate*.—**Correcting-plate.** Same as *compensator* (*a*).—**Costal, cribriform, dry plate.** See the adjectives.—**Dovetail-plates.** See *dovetail*.—**Dumb-plate**, the part at the bottom near the doors of a furnace where there are no air-openings or spaces; the dead-plate.—**Endochrome, gate-end, genital, gular plates.** See the qualifying words.—**Equatorial plate**, in *biol.*, the collection of chromatin-fibers in the equator of the nuclear spindle during karyokinesis.—**Gold plate**, gold vessels for use or ornament; especially, table utensils of gold.—**Half-tone plates.** See *photo-process*.—**Head-block plate.** See *head-block*.—**Horn plate**, in *embryol.*, the remaining ectoderm of a germ, forming the epidermis of the embryo after the formation from ectoderm of the rudiment of the spinal canal.

From this time the remaining portion of the skin-sensory layer is called the *horn-plate* or horn-layer, because the outer skin (epidermis) with its horny appendages—nails, hair, etc.—develops from it.
Haeckel, Evol. of Man (trans.), I. 306.

Induction-plate, a small insulated metal plate placed opposite one of the quadrants of an electrometer, used for reducing the sensitiveness of the instrument. For this purpose the electrified body is connected with the induction-plate instead of with the quadrant directly.

In order that somewhat larger differences may be measured, the *Induction Plate* is introduced to diminish the sensitiveness. *J. E. H. Gordon*, Elect. and Mag., I. 44.

Jugular, madreporic, medullary plate. See the adjectives.—**Locking-plate.** Same as *count-wheel*.—**Main plate**, the principal plate of a lock.—**Muscular plate.** Same as *muscle-plate*.—**Nasal, negative, occipital, ocular, orbital plate.** See the adjectives.—**Patching up plates.** See *patch*.—**Patent plate**, a name given in England to cylinder-glass.—**Perisomatic plates.** See *perisomatic*.—**Plate diamond.** See *diamond*.—**Plate of a furnace.** See *dead-plate*.—**Plate of wind**, in *organ-building*, the flat sheet or jet of air which is projected through the flue of a flue-pipe against the upper lip of the mouth, and by the fluctuations of which the tone is produced.—**Plate-welding hammer**, a steam-hammer of special form. *E. H. Knight*.—**Pterygostomial plates, radial plates.** See the adjectives.—**Ribbed plate**, sheet-metal with its surface alternately ribbed or corrugated.

Ribbed plate is made by using a roller with grooves on its surface. *Workshop Receipts*, 1st ser., p. 55.

Ship-plate, an inferior quality of wrought-iron plate.

Wrought-iron plates . . . are manufactured of . . . coarse, brittle, and uncertain material, sometimes sold as *ship-plate*. *R. Wilson*, Steam Boilers, p. 32.

Terminal plate, in *biol.*, the end-plate of a nerve-fiber.—**Wheel-guard plate** (*milit.*), the rub-iron of a field-artillery carriage. (See also *armor-plate*, *bottom-plate*, *floating-plate*, *horn-plate*, *sieve-plate*, *spreading-plate*, *tie-plate*.)

★**plate** (plāt), *v. t.*; pret. and pp. *plated*, ppr. *plating*. [< ME. **platen*, < AS. **platian* in comp. *āplatian* and verbal n. *platung*, a plate of metal: see *plate*, *n.*] 1. To arm with plate-armor for defense.

Marshal, ask yonder knight in arms
Both who he is and why he cometh hither
Thus *plated* in habiliments of war.
Shak., Rich. II., i. 3. 28.

2. To overlay or coat with silver, gold, or other metal; specifically, to attach a perma-

nent covering or film of one metal to (the surface of another).—3. To arm or cover (a ship) with armor-plates.—4. To beat into thin flat pieces or laminæ.—5. To implant (micro-organisms) in a thin layer of gelatin spread upon a glass plate. See *plate-culture*.—**Chemical plating** or **dipping**, a process performed in some cases by the mere immersion of one metal in a hot or cold solution of some salt of another metal, as in plating iron with copper by dipping the former in sulphate-of-copper solution, or the coating of brass with tin by boiling the brass in a solution of cream of tartar to which scraps of tin have been added. Tin-plating of this sort is also variously called *washing, tinning, silvering*, or *whitening*. It is much employed in various arts, particularly in the manufacture of brass pins. The words *plate* and *plating* are often coupled with the prefixed name of the metal which forms the outer surface: as, *silver-plate, silver-plating*, to plate with silver, the process of plating with silver; *nickel-plate, nickel-plating*, to plate with nickel, the process of plating with nickel, etc. See also *electroplate, galvanize*, 3, and *galvanoplastic*.—**Dry plating**, a process of coating the surface of iron by rubbing it over with brass (usually a brass-wire brush) till it is covered with adherent brass. The process is used in mending broken cast-iron articles. Surfaces so coated may first be tinned over, and then soldered with ordinary tin solder.—**Fire-plating** (also called *fire-gilding* when the coating is of gold), plating performed either by a process of soldering the film or coating directly to the surface of the object to be plated, or, when the coating will not directly adhere, by first coating the object with a metal which has an affinity for both the metal of the object to be plated and the metal used for the plating. Thus iron, to which silver cannot be made to adhere directly, may be silver-plated by first coating it with copper, the latter having affinity for both iron and silver. In fire-plating the surface to be covered is laid over with a suitable flux, upon which the silver-foil is smoothly placed, and the whole is then heated till the metals unite.—**Rolled plating**, the soldering together of bars of different metals and of considerable thickness, and then rolling the compound bar out into a thin plate. In this way a thin sheet of some base metal, as copper, may be plated on one side or on both with a much thinner layer of fine metal, as silver. The material called *rolled gold*, much used for cheap watch-cases and jewelry, is thus made.—**To plate a port**, in a steam-engine, to close a port by the land or unperforated part of the plate of a slide-valve. *E. H. Knight.*

plate-armor (plāt'är″mor), *n.* Defensive armor consisting of plates of metal.

plateau (pla-tō'), *n.*; pl. *plateaus* (-tōz'), *plateaux* (-tō'). [< F. *plateau*, dim. of *plat*, a plate: see *plate*.] 1. In *phys. geog.*, an elevated region of considerable extent and for the most part of moderate inequality, as in northern Arizona. Plateaus are often interrupted by mountain ranges that rise over them, or by volcanoes that have been built upon them; also by cañons or valleys that have been eroded in them. Much of the so-called Alleghany plateau is so largely broken by valleys that its isolated masses are popularly called mountains: such a region has been called a *dissected plateau*. *Plateau* is nearly synonymous with *table-land* as that word is used by many geographers, but the latter term is appropriate only when the region to which it is applied descends rapidly at its border to lower land.

2. (*a*) A tray for table service. (*b*) A decorative plaque. [French uses.]

plate-basket (plāt'bȧs′ket), *n.* 1. A basket lined with metal, for removing plates and other utensils which have been used at table.—2. A basket, usually divided into compartments, for holding the knives, forks, etc., in daily use.

plate-bender (plāt'ben″dėr), *n.* A pincers with curved bits used for bending dental plates.

plate-black (plāt'blak), *n.* See *black*.

plate-bone (plāt'bōn), *n.* The shoulder-blade.

plate-box (plāt'boks), *n.* 1. A grooved box of appropriate size, for holding photographic plates or finished negatives.—2. A box especially designed to exclude light when closed, for the safe-keeping of photographic dry plates when removed from the manufacturer's package; a safety-box.

plate-brass (plāt'brȧs), *n.* Rolled brass; latten. *E. H. Knight.*

plate-bulb (plāt'bulb), *n.* The swollen part on the edge of beams, having a cross-section of mushroom form.

The *plate bulb* of beams should be bent before the angle-irons are riveted to their upper edges, after which it is necessary to check and adjust the curvature, which alters slightly in the process of riveting.
Thearle, Naval Arch., § 310.

platecote†, *n.* A coat of plate-armor.

An helmette and a Jacke or *platecote* hideth all partes of a manne, sauyng the legges.
Udall, tr. of Apophthegms of Erasmus, p. 308. (*Davies.*)

plate-culture (plāt'kul″tūr), *n.* The culture of micro-organisms, especially bacteria, in a thin, uniform layer of gelatin spread upon a glass plate.

plated (plā'ted), *p. a.* 1. Strengthened with plates of metal and defensive armor.

And over all the brasen scales was armd,
Like *plated* cote of steele, so couched neare
That nought mote perce. *Spenser*, F. Q., I. xi. 9.

2. Covered or overlaid with a different and especially a richer material: as, *plated* silk hose; *plated* forks and spoons.—3. In *zoöl.*, covered or protected with hard dermal plates or scutes; scutate or loricate; shielded.—**Plated ware**, a name especially given to vessels of base metal, etc., coated or plated with gold or silver, as distinguished from *plate*, *n.*, 4.

plate-fleet† (plāt'flēt), *n.* The vessels engaged in transporting masses of precious metal; especially, the vessels which transported to Spain the products of the mines in Spanish America.

The [Spanish] admiral's ship was called the Armadillo of Carthagena, one of the greater galleys of the royal *plate-fleet*. *Milton*, Letters of State.

The *Plate-Fleet* also from Lima comes hither with the King's Treasure. *Dampier*, Voyages, I. 179.

plate-frame (plāt'frām), *n.* In *photog.*, a frame of any kind for holding or receiving a plate; a dark-slide; a plate-holder.

plateful (plāt'fůl), *n.* [< *plate* + *-ful*.] As much as a plate will hold.

plate-gage (plāt'gāj), *n.* A plate with notched edges used to measure the thickness of metal plates. The notches are of graduated standard measures of thickness, and are numbered in accordance with the thicknesses they represent. Different standards are in use. The thickness of a plate is definitely specified only when both the number of the notch it fits and the kind of gage used are named: as, No. 16 Birmingham gage; No. 10 Brown and Sharp's gage; etc. See *wire-gage*.

plate-girder (plāt'gėr″dėr), *n.* A girder formed of a single plate of metal, or of a series of plates joined together.

plate-glass (plāt'glȧs), *n.* A superior kind of thick glass used for mirrors, and also for large panes in windows, shop-fronts, etc. (See *plate*, 12.) The materials for this kind of glass are selected and compounded with much greater care than those of ordinary glass. The fused metal is poured upon a true-faced iron table and there rolled out into a plate having parallel faces and a uniform thickness, by means of an iron roller, running on supporting bars at the sides of the table which gage the thickness. By ingenious mechanism the plate while yet hot is transferred to the annealing-oven. It is carried through this oven, retained on flat supports, and is gradually cooled. Both surfaces are then highly polished. Machinery is now universally employed for polishing. See *polishing-machine*, 2.—**German plate-glass**. Same as *broad glass* (which see, under *broad*).—**Rough plate-glass**, unpolished plate-glass. Before grinding and polishing, the surface of plate-glass is not smooth enough to permit distinct vision through it. In this state plate-glass is largely used for sky-lights in sidewalks and roofs, windows opening into halls, etc., where light is desirable, but where distinct vision would be objectionable. Plates of this kind vary in thickness from about $\frac{1}{8}$ inch to 1 inch or more.

plate-hat (plāt'hat), *n.* A hat made with an outer pile or nap of finer material than the body. Such hats are often made water-proof, and stiffened before the nap is added.

plate-holder (plāt'hōl″dėr), *n.* 1. In *photog.*, a movable frame fitted to a camera, used to contain and transport a sensitized plate, which is exposed to the image projected by the lens by withdrawing a slide or shutter after the holder is in position in the camera; a dark-slide; a plate-frame. The plate-holders for dry plates are usually made double, for economy of space, and, after exposure of the plate in one side, are reversed in the camera in order to expose the plate in the other side.

2. A pneumatic device for holding a photographic plate during development or other manipulation.

plate-iron (plāt'ī″ėrn), *n.* Iron pressed into flat plates by being passed between cylindrical rollers; rolled iron.—**Plate-iron girder.** See *girder*[1].

plate-key (plāt'kē), *n.* A flat key notched at the ends or sides, as the key for a Yale lock.

plate-layer (plāt'lā″ėr), *n.* In *rail.*, a workman employed to lay down rails and fix them to the sleepers. [Eng.]

Sundry new occupations, as those of drivers, stokers, cleaners, *plate-layers*.
H. Spencer, Universal Progress, p. 54.

plate-leather (plāt'leтн″ėr), *n.* Chamois leather used for cleaning gold or silver plate, especially when prepared for the purpose, as with rouge-powder, etc., applied to the surface.

platelet (plāt'let), *n.* [< *plate* + *-let*.] In *anat.*, a little plate; a plaque or plaquette.—**Platelet of blood.** Same as *blood-plate*.

plately†, *adv.* Same as *platly*.

plate-machine (plāt'mą-shēn″), *n.* A machine for shaping, turning, and finishing plastic materials for making stone or china tableware, plates, dishes, etc.: a variation of the potter's wheel.

plate-mail (plāt'māl), *n.* Same as *scale-armor*.

plate-mark (plāt'märk), *n.* 1. A legal mark or symbol made on certain gold and silver articles for the purpose of indicating their degree of purity, etc. These symbols, according to British regulation, are—(1) The maker's mark or initials. (2) The assay-mark. For gold, the assay-mark is a crown and figures indicating the number of carats fine. For silver, in England, it is a lion passant; in Ireland, a harp crowned; in Glasgow, a lion rampant; and in Edinburgh, a thistle. (3) The hall-mark of the district office. These offices are at London, York, Exeter, Chester, Newcastle,

Plate-marks.
El. crowned (maker's name—Eliot); Britannia and lion's head (new standard of silver); castle (mark of the Exeter assay office); M (date-mark—the year 1712).

Birmingham, Sheffield, Edinburgh, Glasgow, and Dublin. The mark is generally the coat of arms of the town. (4) The date-mark, consisting of a letter which is changed every year. A duty-mark, consisting of the head of the sovereign and indicating that the duty had been paid, was also used from 1784 to 1890, when the duty was abolished.

2. In an engraving, the depression in the paper around the edges of an impression taken from an incised plate. It is caused by the force of the press when striking off.

plate-matter (plāt'mat″ėr), *n.* Type cast in a number of stereotype plates for insertion in different newspapers, costing them much less than would have to be paid for setting.

To-day one of these *plate-matter* manufacturing firms has branch offices and foundries in New York, Boston, Cincinnati, Chicago, Minneapolis, and San Francisco, maintaining a corps of editors and employing a large force of compositors and stereotypers at each point. It furnishes matter for almost every department of a newspaper except editorial articles and local news.
Westminster Rev., CXXVIII. 862.

plate-metal (plāt'met″ȧl), *n.* A plate of metal produced in the process of refining pig-iron as preparatory to its being puddled in the reverberatory furnace, according to the method followed in Yorkshire for the production of a high class of iron. Such plates are grooved on the bottom and have been cooled rapidly, so as to be easily broken in pieces. Also called *fine-metal, white metal*, or simply *metal*.

plate-mill (plāt'mil), *n.* A mill for rolling metal plates. It usually has long rolls, necessitated by the width of the plates, and the rolls are made very heavy and strong in order to prevent springing and consequent greater thickness of the plates in the middle than at the sides.

platen (plat'en), *n.* [Also *platin, platine*; < F. *platine*, a plate, lock-plate, pillar-plate, scutcheon, plate of a printing-press, covering-plate, etc., < *plat*, flat: see *plat*[3] and *plate*.] 1. In *printing*, the flat part of a press which comes down upon the form, and by which the impression is made.—2. The feed-roll of a typewriter against which the paper rests while receiving an impression.—3. The table of a machine-tool to which the piece to be cut is fastened.—**Platen press**, any form of printing-press which gives impression from a platen, in distinction from rotary or cylinder presses, which give impression from a cylinder or a curved surface.

plate-paper (plāt'pā″pėr), *n.* 1. Paper to which a high gloss is imparted on both sides by packing each sheet between smooth plates of copper or zinc, and subjecting a pile of the sheets so packed to heavy pressure in a rolling-press. Supercalendering (which see) has entirely superseded this process.—2. A heavy, spongy paper used for taking impressions from engraved plates.—**Hard plate-paper, soft plate-paper.** See *paper*.

plate-piece (plāt'pēs), *n.* The lower or under half of the fore quarter of beef, used for corning. Also called *rattle-ran*.

plate-powder (plāt'pou″dėr), *n.* A polishing-powder for silverware. One kind, called *jewelers' rouge*, is prepared by mixing solutions of soda and sulphate of iron, and washing, drying, and calcining the precipitated oxid of iron in shallow vessels until it assumes a deep reddish-brown color. Compounds of rouge and prepared chalk, or of oxid of tin and rose-pink, are also termed *plate-powders*.

plate-press (plāt'pres), *n.* A press for printing from engraved plates of steel or copper.

plate-printer (plāt'prin″tėr), *n.* A workman who produces impressions from engraved copper or steel plates, as distinguished from one who prints from types or from stone.

plate-printing (plāt'prin″ting), *n.* The act or process of printing from an engraved plate.

plater (plā'tėr), *n.* 1. One engaged in the manufacture of metallic plates, or in their application in the arts and manufactures.

When being bent, the plate is lifted by a number of men, under the direction of the *plater* in charge, who hold the plate in the necessary position for obtaining the required curvature and twist. *Thearle*, Naval Arch., § 296.

2. A machine for calendering paper by means of heavy pressure between smooth plates of metal.—3. One who plates or coats articles

with gold or silver: generally in composition: as, silver-*plater*, gold-*plater*, nickel-*plater*.—4. A horse that competes for a plate. *Lever.*

plate-rack (plāt′rak), *n.* 1. An open frame for holding plates and dishes; specifically, a frame in which dishes can be placed in a vertical position to dry after they have been washed. —2. Any arrangement, other than simple shelves, for holding plates in any number, as the inclosed boxes, etc., in the pantries of a ship.—3. A grooved frame for receiving photographic plates while wet, and holding them diagonally on edge to drain; a negative-rack.

plate-rail (plāt′rāl), *n.* In *railway engin.*, a flat rail. *E. H. Knight.*

plate-railway (plāt′rāl″wā), *n.* A tramway in which the wheel-tracks are flat plates. [Eng.]

plateresco (plat-e-res′kō), *a.* [Sp.] Same as *plateresque*.

plateresque (plat-ę-resk′), *a.* [< Sp. *plateresco*, < *plata*, silver: see *plate*.] Resembling silverwork: noting a certain class of architectural enrichments. *Ford.*

plate-roller (plāt′rō″lėr), *n.* A smooth roller for making plate- or sheet-iron.

plate-shears (plāt′shērz), *n. sing.* and *pl.* A machine for cutting or shearing plate- or sheet-metal, such as boiler-plate.

Platessa (plā-tes′ä), *n.* [NL., < L. *platessa*, the plaice: see *plaice*.] A genus of flatfishes of the family *Pleuronectidæ*, having as its type *Pleuronectes platessa:* same as *Pleuronectes* in a strict sense. See cuts under *plaice* and *asymmetry*.

platessiform (plā-tes′i-fôrm), *a.* [< L. *platessa*, the plaice, + *forma*, form.] In *ichth.*, resembling the plaice in form or structure; related to the plaice or flounder.

plate-tracery (plāt′trā″sėr-i), *n.* In *medieval arch.*, a form of tracery in which the openings are cut or pierced in slabs of stone, as distinguished from ordinary tracery, which is constructed of assembled blocks. This form appeared early in the transition from the round-arched to the pointed style, and was often employed in subsequent periods in places where stone of the necessary formation and toughness was available. It was particularly esteemed in Italy, where the excellent building-marbles, in addition to their mechanical fitness, supplied a medium adapted for delicacy of outline and profile, and lending itself to high decorative quality in such tracery.

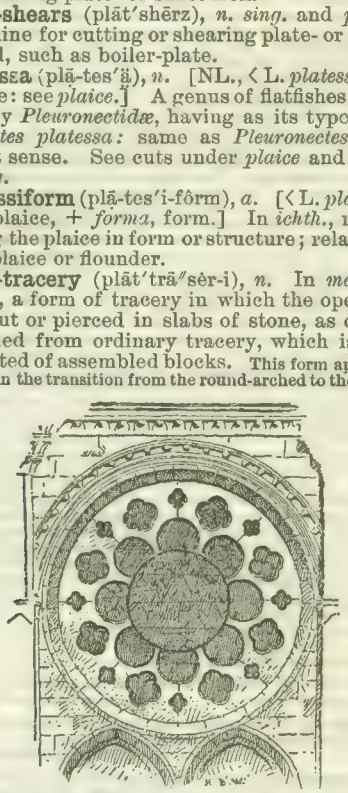


Plate-tracery.—Head of a clearstory window, Cathedral of Chartres, France; 13th century.

platetrope (plat′e-trōp), *n.* [< Gr. *πλατύς*, flat, + *τρέπειν*, turn.] A part symmetrically related to another on the opposite side of the meson; a lateral homologue; a fellow of the opposite side. *Wilder.*

platetropy (plat′e-trō-pi), *n.* [< *platetrope* + *-y*[3].] The state or condition of being laterally homologous; bilaterality; bilateral symmetry; reversed repetition of parts or organs on each side of the meson.

plate-vise (plāt′vīs), *n.* In *photog.*, a frame for holding a plate firmly in certain processes, particularly for cleaning or polishing the glass. It consists essentially of two wooden jaws or sides, grooved to receive the plate, and adjustable by means of a screw.

plate-warmer (plāt′wâr″mėr), *n.* 1. A case with shelves or any other device in which plates are held before a fire, over a hot-air register, etc., to be warmed.—2. A hollow metallic tray, of the size and form of a plate, filled with hot water and placed at table beneath a dinner-plate to keep it warm.

plate-wheel (plāt′hwēl), *n.* A wheel without arms or spokes; a wheel in which the rim and nave are connected by a plate or web.—**Open plate-wheel**, a form of cast-iron wheel having large openings in the web between the arms, hub, and rim. It is used for street-cars, etc.

platey, *a.* See *platy*.

platfond, *n.* Same as *plafond*.

platform (plat′fôrm), *n.* [Formerly also *plotform* (simulating *plat*[2], *plot*[1]); = Sp. Pg. *plataforma* = It. *piattaforma*, < OF. *plateforme*, also *platteforme*, and as two words *plate forme*, *platte fourme*, F. *plateforme*, a platform (terrace), platform (in arch.), prop, mudsill (of a bridge), etc., < *plate*, fem. of *plat*, flat, level, + *forme*, form: see *plat*[3] and *form*.] 1†. A ground-plan, drawing, or sketch; a plan; a map.

> So I have made a *platform* of a princely garden, partly by precept, partly by drawing—not a model, but some general lines of it. *Bacon*, Gardens (ed. 1887).
>
> The young men meeting in places of exercise, and the old men also in Artificers Shops, and in their compassed Chaires, or halfe circles where they sate talking together, were every one occupied about drawing the *Platforme* of Sicilia, telling the nature of the Sicilian Sea, and reckoning up the Havens and places looking towards Africke. *North*, tr. of Plutarch (ed. 1656), p. 456.
>
> Able so well to limn or paint as to take in paper the situation of a castle or a city, or the *platform* of a fortification. *Leigh* (Arber's Eng. Garner, I. 646).

2†. A plot; a design; a scheme; a plan.

> *Alexander.* Apelles, what peece of worke have you now in hand?
> *Apelles.* None in hand, if it like your majestie: but I am devising a *platforme* in my head. *Lyly*, Alexander and Campaspe, v. 4.
>
> And now there rests no other shift but this,
> To gather our soldiers, scatter'd and dispersed,
> And lay new *platforms* to endamage them. *Shak.*, 1 Hen. VI., ii. 1. 77.
>
> A sudden *plotform* comes into my mind,
> And this it is. *Grim*, The Collier of Croydon, ii.

3†. Situation; position.

> With your instrument for trying of distances, observe the *platforme* of the place. *Hakluyt's Voyages*, I. 436.

4. A raised level place; a terrace.

> *Ham.* But where was this?
> *Mar.* My lord, upon the *platform* where we watch'd. *Shak.*, Hamlet, i. 2. 213.
>
> The buildings we now find on the *platform* at Persepolis may have been dedicated to somewhat different purposes than were those of Nineveh. *J. Fergusson*, Hist. Arch., I. 189.

5. A raised frame or structure with a level surface. Specifically—(*a*) A raised structure in a hall or meeting-place for the use of those who are to speak: a rostrum or stage from which a speaker may conveniently address his audience. (*b*) A raised walk along the track at a railway-station for landing passengers and freight. (*c*) The place where guns are mounted on a fortress or battery.

> The Captain commanded them to cast anchor before a certain town called Cris, which had a *platform* or fort with ordnance to defend it. *Eng. Stratagem* (Arber's Eng. Garner, I. 605).

(*d*) *Naut.*, the orlop. (*e*) In a glass-furnace, a bench on which the pots are placed. *E. H. Knight.* (*f*) A projecting floor or landing at the end of a railroad-car or street-car, serving as a means of ingress and egress.

Specifically—6. A systematic scheme or body of principles, especially of religious or political principles, expressly adopted as a policy or basis of action; a syllabus, program, or scheme of principles or doctrines adopted as a basis of action, policy, or belief; specifically, in *U. S. politics*, a statement of political principles and of the course to be adopted with regard to certain important questions of policy, issued by the representatives of a political party assembled in convention to nominate candidates for an election: as, the Genovan *platform;* a political *platform;* the Democratic *platform*.

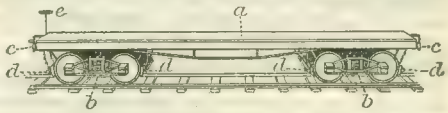
> The wisdom of a lawmaker consisteth not only in a *platform* of justice, but in the application thereof. *Bacon*, Advancement of Learning, ii. 355.
>
> Every little society pretending to that venerable name [the church] did the very thing they had complained of: imposed the *platform* of their doctrine, discipline, and worship as divine; and were for rooting out all that opposed or did not comply with it. *Bp. Atterbury*, Sermons, II. xiii.
>
> The Whigs, whether on the Lexington *platform* or some other non-committal *platform*, will be and must be at once known as the party that opposed their country in her just and generous war. *Resolutions of the Democratic National Convention*, May 30, [1844, quoted in New York Herald, May 6, 1848.
>
> Conversation in society is found to be on a *platform* so low as to exclude science, the saint, and the poet. *Emerson*, Clubs.

7. Figuratively, the function of public speaking, as that of lecturers or political speakers; also, public speeches or public addresses collectively.

> It is perfectly true that a great number of foolish and erroneous, sometimes very mischievous, notions are fostered by the periodical press, but the same might be said of the pulpit and the *platform*. *H. N. Oxenham*, Short Studies, p. 86.

Cambridge platform, Saybrook platform, declarations of principles respecting church government and doctrine adopted by church synods held respectively at Cambridge, Massachusetts, in 1648, and Saybrook, Connecticut, in 1708. They substantially agree with each other and with the principles still maintained by Congregationalists. See *congregationalism*.—**Feeding-platform**, a platform, generally about two feet by four, placed in the middle of a trout-pond, a few inches above the bottom: used by fish-culturists. If the food is thrown over this platform, all not taken before it reaches the bottom will fall upon it, and, as it can more easily be cleaned than the bottom of the pond, there is less liability of fouling the water. The fish will also take food better from a clean than from a muddy bottom. It serves incidentally, too, as a cover for the young fish.

platform (plat′fôrm), *v. t.* [< *platform*, *n.*] 1†. To sketch or lay down the plan of; set forth in plan; outline.



> Some . . . do not think it for the ease of their inconsequent opinions to grant that church-discipline is *platformed* in the Bible, but that it is left to the discretion of men. *Milton*, Church-Government, i. 1.

2. To draw up a platform, or scheme of principles or policy. [Colloq.]—3. To support or rest as on a platform. [Rare.]

> *Platforming* his chin
> On the palm left open. *Mrs. Browning*, To Flush, my Dog.

platform-bridge (plat′fôrm-brij), *n.* A movable gangway over the space between the platforms of two railroad-cars, designed to protect passengers from falling between the cars. [U. S.]

platform-car (plat′fôrm-kär), *n.* An open railroad-car, having no inclosing sides, or surrounded merely by low ledges.

Platform-car.
a, platform; *b*, truck-frames; *c*, buffers; *d*, brake-shoes; *e*, brake-wheel.

platform-carriage (plat′fôrm-kar″āj), *n.* A four-wheeled platform, wagon, or truck used for carrying mortars, guns, or other heavy materials or stores.

platform-crane (plat′fôrm-krān), *n.* 1. A detachable crane on the margin of a railway-car platform or a platform of a truck.—2. A crane permanently mounted on a movable truck, which forms an integral part of the machine.

platformer (plat′fôrm-ėr), *n.* [< *platform* + *-er*[1].] A public speaker; one who draws up or invents a plan of proceedings. [Rare.]

> But one divine Aretine in Italy, and two heavenly Tarletons in England, the sole *platformers* of odd elocution, and only singularities of the plain world. *G. Harvey*, Four Letters, iii.

platformist (plat′fôrm-ist), *n.* [< *platform* + *-ist*.] A public speaker or lecturer. [Colloq.]

platform-scale (plat′fôrm-skāl), *n.* A weighing-machine or balance with a flat scale or platform for the support of the object to be weighed. The designation is applied especially to a weighing-machine in which the flat scale is placed near to or on a level with a table, counter, floor, or the ground, for the convenient reception of heavy bodies and to save lifting, and is connected with the scale-beam by a system of compound levers and links. Either sliding or detachable counterpoising weights, or both, are used on the beam, which, when sliding weights are used, is graduated to indicate weights and fractions of the unit of weight.

platform-spring (plat′fôrm-spring), *n.* In a vehicle, a compound spring consisting of a rectangular arrangement of four arched springs, each made up of long, thin, curved steel plates of regularly diminishing lengths bolted together. The extremities of the four springs are united at the corners of the rectangle by links or stirrups, two of the springs usually bowing upward and two downward. The name has also been applied to a similar mechanism of three springs arranged as on three sides of a rectangle.

platheliminth, Platholmintha, etc. See *platyhelminth*, etc.

platiasmus (plat-i-as′mus), *n.* [< Gr. *πλατειασμός*, a broad manner of speech, a broad Doric accent, < *πλατειάζειν*, speak or pronounce broadly, < *πλατύς*, broad: see *plat*[3].] Imperfect speech, the result of an abnormal condition of the tongue.

platic† (plā′tik), *a.* [< LL. *platicus*, general, compendious, summary, < Gr. *πλατυκός*, diffuse, detailed, < *πλατύς*, broad, wide: see *plat*[3].] In *astrol.*, noting the aspect cast from one planet to another, not exactly, but within the orbit of its own influence: opposed to *partile*.

> There are two kinds of approximation in familiarities: partile and *platic*. *Wilson*, Dict. Astrol., s. v.

Platic conjunction. See *conjunction*.

platicly†, *adv.* With a platic aspect. *N. E. D.*

platilla (plā-til′ä), *n.* A white linen fabric made in Silesia.

platin (plat'in), *n.* See *platen*.

platina (pla-tē'nä), *n.* [= D. G. Sw. Dan. *platina* = F. *platine*, < Sp. *platina* = Pg. *platina* (NL. *platina*), platina, so called from its resemblance to silver, < *plata*, plate, silver: see *plate*.] Same as *platinum*: the older name.

You have often heard of the metal, called *platina*, to be found only in South America.
Jefferson, Writ. (1859), I. 505.

platinate (plat'i-nāt), *v. t.* Same as *platinize*. *Philos. Mag.*, 5th ser., XXVIII. 454.

plating (plā'ting), *n.* [Verbal n. of *plate*, *v.*] 1. The art or operation of covering articles with a thin coating or film of metal, especially of overlaying articles made of the baser metals with a thin coating of gold, silver, or nickel. It is effected in various ways: sometimes the plating-metal is attached to and rolled out with the other metal by pressure; sometimes the one metal is precipitated from its solution upon the other, electrochemical decomposition being now much employed for this purpose. See *electrotype*.

2. A coating of one metal on another.

plating-hammer (plā'ting-ham″ėr), *n.* A steam-hammer of from 500 to 700 pounds weight, used for bending plates and for other operations in armor-plating vessels.

platinic (plā-tin'ik), *a.* [< *platinum* + *-ic*.] In *chem.*, of or pertaining to tetrad platinum.

platiniferous (plat-i-nif'ę-rus), *a.* [< NL. *platinum* + L. *ferre* = E. *bear*[1].] Producing platinum: as, *platiniferous* sand.

platiniridium (plat″in-i-rid'i-um), *n.* [NL., < *platin*(*um*) + *iridium*.] An alloy of platinum and iridium, occurring in isometric crystals and crystalline grains together with native platinum.

platinization (plat″i-ni-zā'shọn), *n.* The process of platinizing, or the condition of being platinized, or coated with platinum.

platinize (plat'i-nīz), *v. t.*; pret. and pp. *platinized*, ppr. *platinizing*. [< *platin*(*um*) + *-ize*.] To coat with platinum in a fine state of division: as, to *platinize* the negative plate (silver) of a Smee's battery. Silver is platinized by dipping it or washing it in a solution of platinum chlorid, and then heating it in a closed vessel till the salt decomposes. The negative plates of Urquhart's potassium-bichromate cell — which consist each of a copper plate having one face and its edges covered with platinum-foil soldered to the copper, and its other face covered with lead — have their platinum sides platinized by a deposit of metallic platinum, obtained by decomposition of platinum chlorid with the aid of a galvanic current, the lead being temporarily covered with an acid-proof varnish or cement. Also spelled *platinise*.—**Platinized glass.** See *glass*.

platinochlorid (plat″i-nō-klō'rid), *n.* [< *platinum* + *chlorid*.] A double chlorid containing platinum: as, potassium *platinochlorid*.—**Ethylene platinochlorid.** See *ethylene*.

platinode (plat'i-nōd), *n.* [< NL. *platinum*, platinum, + Gr. ὁδός, way (see *cathode*).] The negative or non-oxidizable plate of a voltaic cell, which often consists of a sheet of platinum, as in the Grove cell.

platinoid (plat'i-noid), *n.* [< NL. *platinum* + Gr. εἶδος, form.] 1. One of the metals with which platinum is usually found associated. The platinoids are palladium, rhodium, iridium, osmium, and ruthenium.—2. See supplement.

platinotype (plat'i-nō-tīp), *n.* [< *platinum* + *type*.] 1. A process of photographic printing in which the paper is coated with a solution of platinum chlorid and ferric oxalate. When exposed to the light under a negative and subsequently immersed in a hot solution of potassic oxalate, the metal is reduced in proportion to the action of the light. The picture is then finished by simply washing in slightly acidulated water. Some patented platinum processes, as that of Pizzighelli, simplify greatly the operations of development.

2. A print made by any platinotype process.

Excellent specimens of *platinotypes* were shown.
Sci. Amer., N. S., LIV. 65.

platinous (plat'i-nus), *a.* Containing or consisting of dyad platinum.

platinum (plat'i-num), *n.* [= F. *platine* = Sp. Pg. It. *platino*, < NL. *platinum* (with term. *-um* added, in analogy with other names of metals), < *platina*, < Sp. *platina*, platina (the orig. name): see *platina*.] Chemical symbol, Pt; atomic weight, 195.0. An important metal, introduced into Europe about the middle of the eighteenth century from South America. It does not occur as an ore, but alloyed with other metals, especially with rhodium, ruthenium, osmium, iridium, and palladium, all of which, as well as iron and copper, are almost always present in it in small quantity in what is called its native state. Platinum is surpassed in ductility only by gold and silver, and in malleability only by those metals and copper. It is easily rolled into sheets or drawn into wire. Its specific gravity is 21.5, which is higher than that of any other known substance except osmium and iridium. It is not oxidized in the air at any temperature, and is not attacked by any of the simple acids. It is infusible in the strongest heat of a blast-furnace, but can be melted in the flame of the oxyhydrogen blowpipe or by means of the electric current. It is a rare metal, and the regions which supply it are few. Most of the platinum of commerce comes from the Urals, South America, and Borneo. It is used chiefly in chemical manufacture and analysis, where its resistance to heat and acids is of special value, and in electrical work. It was used for coinage in Russia from 1828 to 1845.—**Platinum chlorid.** Same as *chloroplatinic acid* (which see, under *chloroplatinic*).—**Platinum luster.** See *luster*[2].

platinum-black (plat'i-num-blak'), *n.* A black dull powder consisting of very finely divided metallic platinum. It was first obtained by E. Davy, and considered to be a nitrite of platinum; later it was recognized by Liebig as metallic, and prepared by him by warming a solution of platinous chlorid in potash with alcohol. Platinum-black absorbs oxygen gas largely, probably more than 100 volumes. It can be prepared in a variety of ways, and is used in organic chemistry as an oxidizing agent.

platinum-lamp (plat'i-num-lamp), *n.* In *elect.*, an electric lamp in which the incandescent filament is of platinum.

platitude (plat'i-tūd), *n.* [< F. *platitude*, flatness (of taste), vapidness, a flat remark, < *plat*, flat: see *plat*[3].] 1. Flatness; dullness; insipidity of thought; triteness.—2. A trite, dull, or stupid remark; especially, such a remark uttered as if it were a novelty; a truism.

It does not seem so easy for a preacher to trade upon his capacity of reserve, yet even in the clerical profession many have gained the reputation of profound divines and able judges in the spiritual life by a judicious management of solemn *platitudes*.
H. N. Oxenham, Short Studies, p. 76.

platitudinarian (plat-i-tū-di-nā'ri-an), *a.* and *n.* [< *platitude* (*-din-*) + *-arian*.] I. *a.* Of the nature of or characterized by platitude; given to the utterance of platitudes.

II. *n.* One who is addicted to or indulges in platitudes.

You have a respect for a political *platitudinarian* as insensible as an ox to everything he can't turn into political capital. *George Eliot*, Daniel Deronda, xxii.

platitudinize (plat-i-tū'di-nīz), *v. i.*; pret. and pp. *platitudinized*, ppr. *platitudinizing*. [< *platitude* (*-din-*) + *-ize*, as in *attitudinize*.] To utter platitudes; make dull, stale, or insipid remarks.

platitudinous (plat-i-tū'di-nus), *a.* [< *platitude* (*-din-*) + *-ous*.] Relating to or characterized by platitude or platitudes; stale; trite; flat; dull; insipid.

platitudinousness (plat-i-tū'di-nus-nes), *n.* The state or quality of being platitudinous; dullness; flatness; staleness; insipidity; triteness.

platly† (plat'li), *adv.* [< ME. *platly*; < *plat*[3] + *-ly*[2].] Flatly; plainly; certainly; surely.

This synne is *platly* agayns the Hooly Goost.
Chaucer, Parson's Tale.

If ȝou barnes bowe the brede of an hare,
Platly ȝe be putte to perpetuell pyne.
York Plays, p. 328.

platness†, *n.* [< *plat*[3] + *-ness*.] Flatness. ★*Palsgrave*.

platode (plat'ōd), *a.* Same as *platoid*: correlated with *cestode*, *trematode*, and *nematode*.

platoid (plat'oid), *a.* [Irreg. < Gr. πλατύς, broad, flat, + εἶδος, form.] Broad or flat, as a worm.

platometer (plā-tom'e-tėr), *n.* [< Gr. πλατύς, flat, + μέτρον, measure.] A planimeter.

platometry (plā-tom'et-ri), *n.* [< Gr. πλάτος, breadth, + *-μετρία*, < μέτρον, measure.] The art of measuring the breadth of a distant object.

Platonia (plā-tō'ni-ä), *n.* [NL. (Martius, 1829), < *Plato*, < Gr. Πλάτων, the Greek philosopher: see *Platonic*[1].] An untenable name for *Aristoclesia*, a small genus of tropical American trees, belonging to the family *Clusiaceæ* and the tribe *Moronobeæ*. It is chiefly distinguished from the other genera of the tribe by the anthers being borne above the middle of the numerous filaments into which the phalanges of stamens are divided. The genus embraces only two (perhaps only one) species, large trees with coriaceous, delicately penninerved leaves, solitary and showy pink flowers, and five-celled fleshy edible berries. The fruit of *Aristoclesia insignis* (*Platonia insignis* of Martius), the only species, called *pacoury-uva* in Brazil, is said to be highly delicious.

Platonic[1] (plā-ton'ik), *a.* and *n.* [Formerly also *Platonick*, *Platonike*; = F. *Platonique* = Sp. *Platónico* = Pg. It. *Platonico*, < L. *Platonicus*, < Gr. Πλατωνικός, of or pertaining to Plato, < Πλάτων, L. *Plato*, a Greek philosopher, son of Ariston, orig. named Aristocles, and surnamed Πλάτων with ref. to his broad shoulders, < πλατύς, broad: see *plat*[3].] I. *a.* Pertaining to Plato (about 427–347 B. C.), or to his doctrines. Reference to the school of Plato and to his followers is more usually expressed by the adjective *Platonistic*. Plato wrote in dialogues, which are equally admirable from a literary and from a philosophical point of view. He held that the object of philosophy is beauty; that without a deep sense of ignorance no man can philosophize; that judgments of common sense are open to doubt; that the senses may err, and at best can afford only likelihood (εἰκασία); that experience (δόξα), built out of perceptions, though safer, does not know the reasons of phenomena; and that man is the measure of things, not in his experience of particular facts, as Protagoras would have it, but in his knowledge of reasons, which alone is ennobling. Philosophy according to Plato has three branches—dialectic, physics, and ethics. Dialectic, the art of discussion, proceeds by definition and division. Division should be by dichotomy. He holds strongly to the truth of cognition; the process of mind and the process of nature are one. Neither the Eleatic doctrine that all is One, and the Many mere illusion, nor the Heraclitan doctrine that there is only a fluid manifold without unity, is the truth; there is a mixed being (μικτὴ οὐσία): being has an eternal and an evanescent element, and only a compound of these can be an object of science. The One in the Many is the Idea, the active force prescribing regularity (as we should say, the law of nature), which in supercelestial place subsists while individual cases arise and perish. The ideas make up an organism, or living system (ζῷον). They are themselves regulated by an idea of a teleological character, the Good, or ultimate purpose of all things, identical with Reason, the true Being (ὄντως ὄν), the One, King of heaven and earth, which, immutable, draws all things toward itself. This Reason is God, who is related to the ideas as a poet to the ideals he has created and intends to embody. That other element which in the actual condition of things in this world has not yet been eliminated so as to leave pure Reason is extended quantity (μικρὸν καὶ μέγα) or body (σῶμα), nearly Aristotle's matter (ὕλη). This is the secondary principle (συναίτιον) of the universe. God, the father, implants the seed of the Good in space, the mother, and without his further intervention the Cosmos, the only begotten son of God, made in his likeness, grows up. This is a second blessed god, instinct with Reason. Plato was a political philosopher. He abhorred alike the sway of oligarchy and of democracy, and still more the outcome of the latter, the one-man power—tyranny. He believed in aristocracy supported by an iron socialism. The relations of the sexes should be so regulated as to stop all increase in the population, which should be limited to 5,040 households. Private property and family relations should be abolished. Three classes should be recognized—workmen, soldiers, and lawyers. The education of a lawyer should begin with music, gymnastic, and mathematics. In his thirtieth year (up to which age he should be seen and not heard) he is to begin the study of dialectic. His education should be completed at the age of fifty, when he is to take his share in the government. The above is an outline of the general views of Plato; many of his special opinions are celebrated. He strongly maintains the immortality and previous existence of the soul. The tie which holds body and soul together is music. Virtue is not natural, nor can it be commanded by the will, but it is the result of discipline. The cardinal virtues are wisdom (σοφία), courage (ἀνδρία), prudence (σωφροσύνη), and justice (δικαιοσύνη). The unjust alone prosper; the perfect man would suffer on the cross. Reason resides in the head, desire in the abdomen, prophesy in the liver. Time is an image of eternity; it is produced by circular motions. Nature abhors a vacuum. Like attracts like. The constellations and the earth are living divinities. Plato was a mathematician, and is said to have invented the ancient method of analysis. His thoughts constantly show the influence of mathematical studies, and the desire to import mathematically distinct conceptions into philosophy. Aristotle, who was Plato's scholar, declared that the Platonic ideas were numbers. Plato no doubt attributed active virtues to the ideas of One, Two, Three, and Four.

Now the first Christians many of them were *Platonick* Philosophers. *Selden*, Table-Talk, p. 53.

We are apt to ridicule the sublime *Platonic* notions they had, or personated, in love and friendship.
Swift, Conversation.

Platonic bodies, the five regular geometrical solids which inwrap the center only once — namely, the tetrahedron, the hexahedron or cube, the octahedron, the dodecahedron, and the icosahedron.—**Platonic idea.** See *idea*.—**Platonic love**, a pure spiritual affection subsisting between the sexes, unmixed with sensual desire, and regarding the mind only and its excellences.

The Court affords little News at present, but that there is a Love called *Platonic Love*. *Howell*, Letters, I. vi. 15.

Platonic year. See *year*.

II. *n.* 1. A follower of Plato; a Platonist.

Other things which he with great paines hath gathered out of the *Platonikes*, stamped with Zoroasters name, are many of them diuine. *Purchas*, Pilgrimage, p. 367.

2. One who loves with a Platonic affection.

A talking dull *Platonic* I shall turn;
Learn to be civil when I cease to burn.
Prior, Ode, st. 5.

Platonic[2] (plā-ton'ik), *a.* [< Gr. Πλάτων, Plato (see def.).] Pertaining to the Greek comic poet Plato (about 427–388 B. C.).—**Platonic meter**, in *anc. pros.*, a meter or period consisting of an iambic penthemimeres between two dactylic penthemimeres.

Platonical (plā-ton'i-kal), *a.* [< *Platonic*[1] + *-al*.] Same as *Platonic*[1]. *Bp. Atterbury*, Sermons, I. xi., Pref.

Platonically (plā-ton'i-kal-i), *adv.* In a Platonic manner. *Sir H. Wotton*.

Platonise, Platoniser, *n.* See *Platonize*, *Platonizer*.

Platonism (plā'tō-nizm), *n.* [< Gr. Πλάτων, Plato, + *-ism*.] 1. The doctrines, opinions, or philosophy of Plato, or of the Academic school.—2. A Platonic saying or proposition.

The striking *Platonisms* of Coleridge.
R. Choate, Addresses, p. 165.

Platonist (plā′tō-nist), *n.* [< Gr. Πλάτων, Plato, + *-ist.*] One who adheres to the philosophy of Plato; a follower of Plato.

Or, self-conceited, play the humorous *Platonist*,
Which boldly dares affirm that Spirits themselves supply
With bodies, to commix with frail mortality.
Drayton, Polyolbion, v. 180.

Platonistic (plā-tō-nis′tik), *a.* [< *Platonist* + *-ic.*] Of or pertaining to Plato or his followers, or the Platonic doctrines; characteristic of the Platonists.

Platonize (plā′tō-nīz), *v.*; pret. and pp. *Platonized*, ppr. *Platonizing*. [< Gr. Πλάτων, Plato, + *-ize.*] **I.** *intrans.* To follow the opinions or philosophy of Plato; reason like Plato; emulate Plato.

Hitherto Philo; wherein, after his usual wont, he *platonizes;* the same being in effect to be found in Plato's Timæus. *Hakewill*, Apology, II. vi. § 2.

The imagination instinctively *Platonizes*, and it is the essence of poetry that it should be unconventional, that the soul of it should subordinate the outward parts.
Lowell, Study Windows, p. 402.

II. *trans.* To explain on the principles of the Platonic school, or to accommodate to those principles.

Also spelled *Platonise*.

Platonizer (plā′tō-nī-zėr), *n.* One who Platonizes; a Platonist. Also spelled *Platoniser*.

Philo the Jew, who was a great *platonizer*, calls the stars divine images, and incorruptible and immortal souls.
Dr. A. Young, Idolatrous Corruptions in Religion, I. 109.

platoon (pla-tön′), *n.* [< F. *peloton* (pron. plō-tôñ′), a platoon, lit. a 'ball,' i. e. cluster, a particular use of *peloton*, a ball, tennis-ball, dim. of *pelote*, a ball, pellet: see *pellet.*] 1†. A small body of soldiers or musketeers, drawn out of a battalion of foot to form a hollow square to strengthen the angles of some military formation or position; or, a small body acting together, but separate from the main body.—2. A number of soldiers, as large as is convenient for drill, etc., drawn up in two ranks, usually from 15 to 25 in each rank; hence (since a company of infantry is habitually divided into two platoons), half of a company considered as a separate body.—**Platoon firing**, firing by platoons, or subdivisions of companies.

platopic (plā-top′ik), *a.* An erroneous form of *platyopic*.

platte[1]†, *v. t.* A Middle English form of *plat*[1].

platte[2]†, *a.* A Middle English form of *plat*[3].

platte[3] (plat), *n.* [OF.: see *plate.*] Same as *placcate* (*c*).

platté (pla-tā′), *a.* [OF., < *platte*, a plate: see *plate.*] In *her.*, semé with plates—that is, with roundels argent.

platted (plat′ed), *a.* Same as *plaited*.

platten (plat′en), *v. t.* [< *plat*[3] + *-en*[1].] In *glass-manuf.*, to open out and flatten into a plate or sheet: said of a blown cylinder of glass. The hot cylinder is first cracked on one side in a straight line longitudinally by the application of a cold iron rod; then it is laid in the flattening-oven (which has a smooth stone bottom), and kept there in a soft state till it opens out; and lastly it is smoothed out with an implement called a *flattener*. Sometimes the cylinders are cut longitudinally with a diamond, and then placed in the furnace or flattening-arch for opening and smoothing. The flattening of crown-glass is called *flashing*.

plattening (plat′en-ing), *n.* [Verbal n. of *platten*, *v.*] In *glass-manuf.*, the process of forming glass into plates or sheets. See *platten*.

platter[1] (plat′ėr), *n.* [< ME. *plater*, *platere*, appar. orig. **platel*, < OF. *platel*, dim. of *plat*, a plate: see *plate*, and cf. *plateau.*] A plate; a large shallow dish for holding eatables; especially, a flat dish in which a fowl, a joint, or the like is placed to be carved.

In the Lond of Prestre John ben many dyverse thinges, and many precious Stones so grete and so large that men maken of hem Vesselle; as *Plateres*, Dissches, and Cuppes.
Mandeville, Travels, p. 272.

Earthen *Platters* held their homely Food.
Congreve, tr. of Juvenal's Satires, xi.

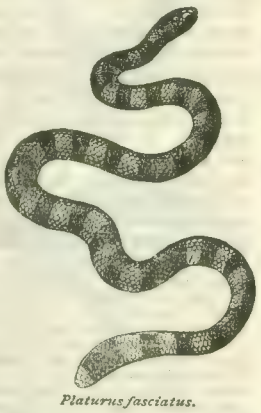
The attendants bustled to and fro, and speedily brought in several large smoking *platters*, filled with huge pieces of beef, boiled and roasted. *Scott*, Monastery, xxiv.

platter[2] (plat′ėr), *n.* [< *plat*[4] + *-er*[1].] One who plats, braids, or interweaves.

platting (plat′ing), *n.* [Verbal n. of *plat*[4], *v.*] 1. The process of making interwoven or platted work.—2. A fabric made of fibers, bundles of fibers, or thin slips of any pliable material, such as cane or straw.

Bermuda hats are worn by our ladies; they are made of a sort of mat or (as they call it) *platting* made of the palmetto leaf.
Bp. Berkeley, Proposals for Better Supplying of Churches.

plattnerite (plat′nėr-īt), *n.* [Named after K. F. *Plattner* (1800–58), a German chemist and mineralogist.] Native lead dioxid (PbO_2), a rare mineral occurring in iron-black massive forms, of high specific gravity. It was originally described as found at Leadhills, Scotland, but was regarded as a doubtful species until recently identified from the lead-mines of northern Idaho.



Plattner's process. See *process*.

platty (plat′i), *a.* [< *plat*[2] + *-y*[1].] Having plats or bare spots, as grain-fields sometimes have. *Halliwell.* [Prov. Eng.]

plature (plā′tūr), *n.* [< NL. *Platurus*, q. v.] A broad-tailed humming-bird of the genus *Platurus*.

platurous (plā-tū′rus), *a.* [Prop. **platyurous*, < Gr. πλατύουρος, broad-tailed, < πλατύς, broad, flat, + οὐρά, tail.] Having a broad tail.

Platurus (plā-tū′rus), *n.* [NL. (Latreille), prop. **Platyurus*, < Gr. πλατύουρος, broad-tailed: see *platurous.*] 1. A genus of venomous marine serpents of the family *Hydrophidæ*, having wide and flat gastrosteges and two pairs of frontal shields. —2. A genus of broad-tailed *Trochilidæ*, named by Lesson in 1829; the platures.

Platurus fasciatus.

★**platy** (plā′ti), *a.* [Also *platey*; < *plate* + *-y*[1].] Like a plate; consisting of plates.

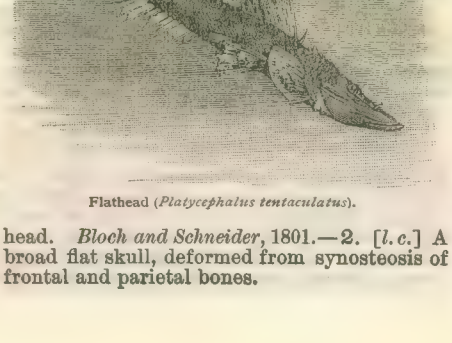
platybasic (plat-i-bā′sik), *a.* [< Gr. πλατύς, broad, flat, + βάσις, foot, base: see *basic.*] Having the occipital bone about the foramen magnum pressed upward; having the negative angle of Daubenton more than 8°. See *craniometry*.

platybrachycephalic (plat-i-brak-i-se-fal′ik or -sef′a-lik), *a.* [< *platy*(*cephalic*) + *brachycephalic.*] Flat and broad; both platycephalic and brachycephalic: said of a skull.

platybregmate, *n.* An error for *platybregmate*. See the supplement.

platycarpous (plat-i-kär′pus), *a.* [< Gr. πλατύς, broad, + καρπός, fruit.] In *bot.*, having broad ★fruit.

platycephalic (plat′i-se-fal′ik or -sef′a-lik), *a.* [< *platycephal-ous* + *-ic.*] Same as *platycephalous*.



Platycephalic, with the vault of the skull flattened, elliptical. *Bartley* (trans.), Topinard's Anthrop., V. 176.

Platycephalidæ (plat′i-se-fal′i-dē), *n. pl.* [NL., < *Platycephalus* + *-idæ.*] A family of acanthopterygian fishes, typified by the genus *Platycephalus;* the flatheads. They have an elongated body depressed in front, a wide depressed head, imbricated scales, two dorsals (the anterior shorter than the posterior), a long anal, and perfect ventrals behind the pectorals. Nearly 50 species are known as inhabitants of the tropical Pacific and Indian oceans.

Platycephalinæ (plat-i-sef-a-lī′nē), *n. pl.* [NL., < *Platycephalus* + *-inæ.*] The *Platycephalidæ* as a subfamily of scorpænoid fishes.

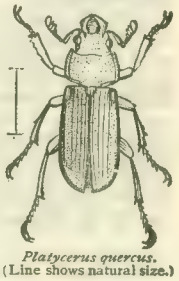
platycephalous (plat-i-sef′a-lus), *a.* [< Gr. πλατυκέφαλος, broad-headed, < πλατύς, broad, flat (see *plat*[3]), + κεφαλή, head.] Having a vertical index of the skull of less than 70. ★*Welcker.*

Platycephalus (plat-i-sef′a-lus), *n.* [NL.: see *platycephalous.*] 1. The typical genus of *Platycephalidæ:* so called from the broad depressed

Flathead (*Platycephalus tentaculatus*).

head. *Bloch and Schneider*, 1801.—2. [*l. c.*] A broad flat skull, deformed from synosteosis of frontal and parietal bones.

platycephaly (plat-i-sef′a-li), *n.* [< *platycephal-ous* + *-y.*] The condition of having a platycephalic skull.



Platycercidæ (plat-i-sėr′si-dē), *n. pl.* [NL., < *Platycercus* + *-idæ.*] The broad-tailed parrakeets as a separate family of parrots.

Platycercinæ (plat′i-sėr-sī′nē), *n. pl.* [NL., < *Platycercus* + *-inæ.*] A subfamily of *Psittacidæ*, typified by the genus *Platycercus*, to which varying limits have been ascribed; the broad-tailed parrakeets. It is properly restricted to those parrots which have no ambiens and no furculum. In a common acceptation, it contains parrakeets with a short beak of greater height than length, a small cere (frequently feathered), and a long tail, usually exceeding the wings in length, and in some cases with broad feathers. All the *Platycercinæ* belong to the Old World, and they are most numerous in species and individuals in the Australian region. About 70 species are described, among them the grass-, ground-, and zebra-parrakeets. See *grass-parrakeet*, *Euphema*, *Melopsittacus*, and *Platycercus*.

platycercine (plat-i-sėr′sin), *a.* Broad-tailed; belonging to the *Platycercinæ*.

Platycercus (plat-i-sėr′kus), *n.* [NL. (Vigors and Horsfield, 1825), < Gr. πλατύκερκος, broad-tailed, < πλατύς, broad, + κέρκος, tail.] The leading genus of *Platycercinæ*, containing more than half the species of this subfamily, having the tail long and ample, with its feathers broad to their ends, and the four middle ones longer than the rest. They are beautifully and variously colored, and range from the Malay archipelago to the islands of the Pacific ocean. Several are favorite cage-birds, as the rosella or rose-parrakeet, *P. eximius*, and the king-parrakeet, *P. scapulatus*. See cut under *rosella*.

Platycerium (plat-i-sē′ri-um), *n.* [NL., < Gr. πλατύς, broad, + κηρίον, a honeycomb, < κηρός, wax: see *cere.*] A name given by Desveaux to *Alcicornium* (Gaudichaud, 1826), a genus of polypodiaceous ferns, of the tribe *Alcicornieæ*. It produces its sori in large amorphous patches, not, as in the true *Acrostichæ*, universal over the fertile portions. There are about 8 species, singular epiphytes of the primeval forests of the old world tropics.

Platycerus quercus. (Line shows natural size.)

Platycerus (plā-tis′ē-rus), *n.* [NL. (Geoffroy, 1762) (cf. L. *platyceros*, < Gr. πλατύκερως, having broad horns), < Gr. πλατύς, broad, + κέρας, horn.] A genus of stag-beetles of rather small size, chiefly characterized by the distinctness of the sixth ventral abdominal segment. The few species known are found in Asia, Europe, and North America. Four inhabit the United States, as *P. quercus*, found in oak-stumps throughout North America, ⅝ inch long and brownish-black.

platycnemia (plat-ik-nē′mi-ạ), *n.* [NL.: see *platycnemic.*] The condition of being platycnemic; platycnemism.

platycnemic (plat-ik-nē′mik), *a.* [< Gr. πλατύς, broad, + κνήμη, the lower leg: see *Cnemis.*] Noting a narrow tibia the posterior border of which is rounded.

platycnemism (plat-ik-nē′mizm), *n.* [< *platycnem-ic* + *-ism.*] The state of being platycnemic.

Platycœlia (plat-i-sē′li-ạ), *n.* [NL. (Dejean, 1833), < Gr. πλατύς, flat, + κοῖλος, hollow.] A genus of lamellicorn beetles of the family *Rutelidæ*, or typical of a family *Platycœlidæ*. They are large and handsome South American insects, with a very convex head of a beautiful green color. Also *Platycœlus*.

platycœlian (plat-i-sē′li-ạn), *a.* [< *platycœl-ous* + *-ian.*] Same as *platycœlous*.

Platycœlidæ (plat-i-sē′li-dē), *n. pl.* [NL., < *Platycœlia* + *-idæ.*] A family of coleopterous insects, named from the genus *Platycœlia*. *Burmeister*, 1844.

platycœlous (plat-i-sē′lus), *a.* [< Gr. πλατύς, flat, + κοῖλος, hollow.] Plano-concave, as a vertebra; plane or flat in front and cupped behind, as the bodies of the vertebræ of the cetiosaurians: now usually called *opisthocœlian*.

platycoria (plat-i-kō′ri-ạ), *n.* [NL., < Gr. πλατύς, broad, + κόρη, the pupil of the eye.] In *med.*, an undue dilatation of the pupil; mydriasis.

Platycrinidæ (plat-i-krin′i-dē), *n. pl.* [NL., < *Platycrinus* + *-idæ.*] A family of Paleozoic crinoids or encrinites, typified by the genus *Platycrinus*.

platycrinite (plat′i-kri-nīt), *n.* An encrinite of the genus *Platycrinus* or *Platycrinites*.

platycrinoid (plat′i-kri-noid), *n.* [< NL. *Platycrinus*, q. v., + Gr. εἶδος, form.] A platycrinite.

Platycrinoidea (plat′i-kri-noi′dē-ạ), *n. pl.* [NL., < *Platycrinus* + *-oidea.*] Same as *Platycrinidæ*.

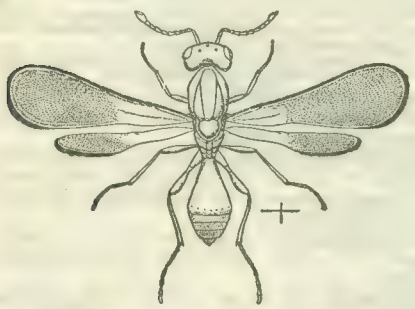
Platycrinus (plā-tik'ri-nus), *n.* [NL., < Gr. *πλατύς*, broad, flat, + *κρίνον*, lily (see *crinoid*).] The typical genus of *Platycrinidæ*, from the Devonian and Carboniferous rocks: so named from the flatness and breadth of the radial plates on the calyx. Originally *Platycrinites*.

platydactyl, platydactyle (plat-i-dak'til), *a.* and *n.* [< NL. *platydactylus*, < Gr. *πλατύς*, broad, + *δάκτυλος*, finger.] **I.** *a.* Having broad or thick digits; specifically, in *herpet.*, having toes dilated at the ends; discodactyl; belonging to the *Discodactyla*: distinguished from *oxydactyl*.

II. *n.* A platydactyl batrachian.

Platydactyla (plat-i-dak'ti-lą), *n. pl.* [NL., neut. pl. of *platydactylus*: see *platydactyl*.] In Günther's classification, a group of opisthoglossate batrachians, having the toes dilated: distinguished from *Oxydactyla*. Also called *Discodactyla*.

Platydactylus (plat-i-dak'ti-lus), *n.* [NL. (Cuvier, 1817): see *platydactylous*.] 1. A genus of gecko lizards. *P. fascicularis* or *muralis* is the wall-gecko. *P. mauritanicus*, of the countries bordering the Mediterranean, is known as the *tarente*.



Platydactylus mauritanicus.

2. In *entom.*, a genus of orthopterous insects. *Brullé*, 1835.

platydolichocephalic (plat-i-dol″i-kō-se-fal'-ik or -sef'a-lik), *a.* [< *platy(cephalic)* + *dolichocephalic*.] Flat and narrow; both platycephalic and dolichocephalic: said of a skull.

Platyelmia (plat-i-el'mi-ą), *n. pl.* [NL., < Gr. *πλατύς*, flat, + *ἕλμινς* (*ἕλμινθ-*), worm.] Same as *Platyhelmintha*.

Platygaster (plat-i-gas'tėr), *n.* [NL. (Latreille, 1809) (cf. Gr. *πλατυγάστωρ*, flat-bellied), < Gr. *πλατύς*, broad, flat, + *γαστήρ*, stomach: see *gaster*[2].] 1. A genus of parasitic hymenopterous

Platygaster herricki. (Cross shows natural size.)

insects of the family *Proctotrypidæ*, typical of the subfamily *Platygasterinæ*. It is separated from other genera by negative characters, and contains a large number of species, more than 100 being known in Europe alone. *P. herricki* is a common parasite of the Hessian fly in North America.

2. A genus of true bugs of the family *Lygæidæ*, erected by Schilling in 1829.—3. A genus of fishes erected by Swainson in 1839.—4. A genus of flies of the family *Acroceridæ*, erected by Zetterstedt in 1840: same as *Sphærogaster*.

Platygasterinæ (plat-i-gas-te-rī'nē), *n. pl.* [< *Platygaster* + *-inæ*.] An important subfamily of the parasitic hymenopterous family *Proctotrypidæ*, consisting of minute black insects having the fore tibiæ one-spurred, the mandibles toothed, and the anterior wings without marginal and stigmal veins. Over 20 genera have been founded, though the group has been little studied. The species seem to be mainly parasitic on dipterous larvæ.

platygastric (plat-i-gas'trik), *a.* [< Gr. *πλατύς*, broad, + *γαστήρ*, stomach: see *gastric*.] Having broad or wide gastric cavities: belonging to the *Platygasterinæ*.

platyglossal (plat-i-glos'al), *a.* [< Gr. *πλατύγλωσσος*, broad-tongued, < *πλατύς*, broad, + *γλῶσσα*, tongue.] Having a broad or wide tongue.

Platyglossus (plat-i-glos'us), *n.* [NL. (Bleeker, 1861, after Klein), < Gr. *πλατύγλωσσος*, broad-tongued: see *platyglossal*.] A genus of labroid fishes of the wrasse family. They have the teeth of the jaws distinct, the pharyngeal teeth not confluent, the posterior canines well developed, 3 anal spines, 9 dorsal spines, and the cheeks and opercles naked. They are found in the South Seas and East Indies.

platygonidium (plat″i-gō-nid'i-um), *n.*; pl. *platygonidia* (-ą). [NL., < Gr. *πλατύς*, broad, flat, + NL. *gonidium*.] See *gonidium*, 3.

Platygonus (plą-tig'ō-nus), *n.* [NL., < Gr. *πλατύς*, broad, flat, + *γόνυ*, knee.] A genus of fossil peccaries of the family *Dicotylidæ*, founded by Le Conte in 1848 upon remains from the Pliocene Tertiary of America. Also called *Hyops*, *Protochœrus*, and *Euchœrus*.

platyhelminth (plat-i-hel'minth), *n.* [< NL. *Platyhelmintha*.] A member of the *Platyhelmintha*, in any sense; a flatworm, as a cestoid, trematoid, turbellarian, or nemertean.

Platyhelmintha, Platyhelminthes (plat″i-hel-min'thą, -thēz), *n. pl.* [NL., < Gr. *πλατύς*, broad, flat, + *ἕλμινς* (*ἕλμινθ-*), a worm: see *helminth*.] A phylum or other high group of worms, variously named and rated, including forms more or less flattened, usually ovate, and indistinctly segmented; the flatworms, or cestoids, trematoids, and turbellarians, together contrasted with the roundworms or nemathelminths. In some of the older arrangements under the name *Platyelmia*, they were divided into the non-parasitic order *Turbellaria* and the two parasitic orders *Tæniada* and *Trematoda*. In another classification the platyhelminths are a prime division of *Vermes*, divided into *Turbellaria* (rhabdocœlous and dendrocœlous turbellarians), *Nemertina* (rhynchocœlous turbellarians), *Trematoda*, and *Cestoda*. In Lankester's latest arrangement they are called *Platyhelmia*, and are divided into four classes, *Turbellaria*, *Temnocephaloidea*, *Trematoda*, and *Cestoidea*. The first is here divided into three orders, *Rhabdocœlida*, *Tricladida*, and *Polycladida*. The *Mesozoa* of Van Beneden (see *Dicyemida*) are regarded as degenerate platyhelminths. The members of this phylum are vermiform animals, usually flattened dorsoventrally, with the central nervous system placed anteriorly and with an excretory system of branched canals containing flame-cells; enteron, when present, aproctous. They are generally hermaphroditic. Also *Plathelmintha*, *Plathelminthes*.

Platylobium (plat-i-lō'bi-um), *n.* [NL. (Smith, 1793), < Gr. *πλατύς*, broad, + *λόβιον*, dim. of *λοβός*, pod.] A genus of leguminous shrubs of the tribe *Genisteæ* and subtribe *Bossiæinæ*, characterized by the two-lipped calyx, orbicular banner-petal, monadelphous stamens, uniform versatile anthers, and broad, flat, two-valved pod, opening elastically along the lower suture, broadly winged upon the other. The 3 species are Australian shrubs, with slender branches, opposite undivided leaves, and handsome orange-yellow flowers solitary in the axils, occasionally red, resembling the sweet-pea. They are pendent-branching evergreens, cultivated under the name *flat pea*.

Platylophus (plą-til'ō-fus), *n.* [NL., < Gr. *πλατύς*, flat, broad, + *λόφος*, a crest.] 1. A genus of birds of the family *Corvidæ* and subfamily *Garrulinæ*, containing several species of crested jays from Java, Sumatra, Borneo, etc., such as *P. galericulatus*, *P. coronatus*, and others. *Swainson*, 1831.—2. A genus of arachnidans. *Koch*, 1839.—3. A name given by D. Don in 1830 to *Trimerisma*, a genus of choripetalous plants of the family *Cunoniaceæ*, characterized by the two-celled, two-seeded, and two-valved capsules, the two awl-shaped recurved styles, four or five calyx-lobes, as many smaller petals, and eight or ten stamens, of the length of the petals, and inserted with them on the base of an urn-shaped disk. One of the 2 species, *Trimerisma trifoliatum*, is the white alder or white ash of Cape Colony, a very smooth and handsome tree, casting abundant shade, and bearing multitudes of small white flowers in long-stalked axillary panicles, followed by small white capsules. The coriaceous opposite and stalked leaves are each composed of three toothed and veiny lanceolate leaflets. See *alder*[1], 2.

platymesaticephalic (plat-i-mes″a-ti-se-fal'ik or -sef'a-lik), *a.* [< *platy(cephalic)* + *mesaticephalic*.] Both platycephalic and mesaticephalic: said of a skull. Also *platymesocephalic*.

platymeter (plą-tim'e-tėr), *n.* [< Gr. *πλατύς*, flat, + *μέτρον*, measure.] An apparatus for measuring the inductive capacity of dielectrics. It consists essentially of two cylindrically shaped condensers of equal size, having their inner coatings connected.

Platymiscium (plat-i-mis'i-um), *n.* [NL. (Vogel, 1837), so called with ref. to the compressed stalk of the pod; < Gr. *πλατύς*, flat, + **μίσκος* for *μίσχος*, a stalk, also, in form *μίσκος*, husk or shell.] A genus of leguminous trees and shrubs, of the tribe *Dalbergieæ* and the subtribe *Lonchocarpeæ*, characterized by the free wing-petals, the opposite leaves and leaflets, and the indehiscent one-seeded long-stalked pod, which is thin, flat, and oblong. In its opposite or whorled leaves it is almost alone in this large order. The 15 species are natives of tropical America. They bear yellow flowers in racemes on the branches. *P. polystachyum* is called *roble* in the West Indies.

Platynota (plat-i-nō'tą), *n. pl.* [NL.: see *platynote*.] A group of existing *Lacertilia*, with a columella and an orbital septum, procœlous vertebræ, not more than nine cervical vertebræ, and the nasal bone single. It embraces the monitors or varanoids of the Old World, with the American genus *Heloderma*. See *monitor*, *Heloderma*.

platynotal (plat-i-nō'tal), *a.* [< *platynote* + *-al*.] Broad-backed, as a lizard; specifically, of or pertaining to the *Platynota*.

platynote (plat'i-nōt), *a.* and *n.* [< Gr. *πλατίνωτος*, broad-backed, < *πλατύς*, broad, flat, + *νῶτος*, back.] **I.** *a.* Broad-backed, as a lizard: applied to the varans or monitors.

II. *n.* A monitor or varanoid lizard.

Platynotus (plat-i-nō'tus), *n.* [NL.: see *platynote*.] In *zoöl.*, a generic name variously used. (*a*) By Fabricius, 1801, for a genus of coleopterous insects. (*b*) By Schilling, 1829, for a genus of hemipterous insects. (*c*) By Wagler, 1830, for a genus of reptiles, whence the name *Platynota*. (*d*) By Haan, 1835, for a genus of crustaceans.

Platynus maculicollis, enlarged.

Platynus (plat'i-nus), *n.* [NL., irreg. < Gr. *πλατύνειν*, widen, make wide, < *πλατύς*, wide, broad: see *plat*[3].] A genus of caraboid beetles. *P. maculicollis* is at times so abundant in California as to be a nuisance. It is popularly called the *overflow-bug*.

platyodont (plat'i-ō-dont), *a.* and *n.* [< Gr. *πλατύς*, broad, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] **I.** *a.* Having broad teeth.

II. *n.* A broad-toothed animal.

Platyonychus (plat-i-on'i-kus), *n.* [NL., < Gr. *πλατυώνυχος*, with broad nails or hoofs, < *πλατύς*, broad, flat, + *ὄνυξ* (*ὀνυχ-*), claw.] A genus of

Lady-crab (*Platyonychus ocellatus*).

crabs of the family *Portunidæ*. *P. ocellatus* is a beautiful species known as the *lady-crab*. Incorrectly written *Platyonichus*.

platyope (plat'i-ōp), *n.* [< Gr. *πλατύς*, broad, + *ὤψ* (*ὀπ-*), face.] A broad-faced animal, person, or skull.

platyopic (plat-i-op'ik), *a.* [< *platyope* + *-ic*.] Broad-faced; wide across the eyes: applied to skulls or persons whose nasomalar index is below 107.5, as in the Mongolian races generally. *O. Thomas*, Jour. Anthrop. Inst., XIV. 334.

platypetalous (plat-i-pet'a-lus), *a.* [< Gr. *πλατύς*, broad, + *πέταλον*, a leaf (in mod. bot. a petal).] In *bot.*, having very broad petals. [Rare.]

Platypeza (plat-i-pē'zą), *n.* [NL. (Meigen, 1804), < Gr. *πλατύς*, broad, flat, + *πέζα*, foot.] The typical genus of *Platypezidæ*, having the four basal joints of the posterior tarsi broad and flattened, whence the name. They are small velvety-black or gray flies, whose larvæ live in fungi. Fifteen European and five North American species are known. *P. cingulatus* of the District of Columbia is an example.

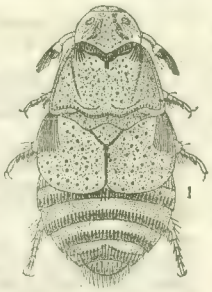
Platypezidæ (plat-i-pez'i-dē), *n. pl.* [NL. (Fallen, 1817), < *Platypeza* + *-idæ*.] A family of dichætous brachycerous dipterous insects, typified by the genus *Platypeza*. They are of minute size, and resemble the *Dolichopodidæ*, but the body is depressed and the head hemispherical, almost entirely occupied by the eyes; the legs are short and spineless, and the hind tarsi are often dilated. The antennæ are porrect and three-jointed; the bare eyes are contiguous in the male; the abdomen is short, and pulvilli are present. The genera are not numerous.

platyphylline (plat-i-fil'in), *a.* [< *platyphyll-ous* + *-ine*[1].] In *bot.*, broad-leaved; flat.

Thallus sub-membranaceous, stellate, appressed, *platyphylline*. *E. Tuckerman*, N. A. Lichens, i. 74.

platyphyllous (plat-i-fil'us), *a.* [< Gr. *πλατύφυλλος*, broad-leafed, < *πλατύς*, flat, + *φύλλον*, leaf.] In *bot.*, having broad leaves.

platypod (plat'i-pod), *a.* and *n.* [< NL. *platypus* (*-pod-*), < Gr. *πλατύπους*, broad-footed, < *πλατύς*, broad, + *πούς* (*ποδ-*) = E. *foot*.] **I.** *a.* 1. Having broad feet, in any sense; belonging to the *Platypoda*.—2. In *ornith.*, having the toes extensively coherent, forming a broad sole; syndactyl.



II. *n.* A broad-footed animal.

Platypoda (plā-tip'ō-dă), *n. pl.* [NL.: see *platypod*.] 1. In *mammal.*, a group of monotremes, named from the genus *Platypus*. See *Ornithorhynchidæ*, and cut under *duckbill*.—2. In *conch.*, a group of rostriferous gastropods with broad flat foot fitted for crawling. It includes most of the rostriferous gastropods, among the best-known of them being the *Cypræidæ*, *Littorinidæ*, *Melaniidæ*, *Cerithiidæ*, and *Viviparidæ*. *J. E. Gray*. See cuts under *Cerithium*, *Cypræa*, *Littorinidæ*, and *Viviparidæ*.

platypode (plat'i-pōd), *a.* and *n.* Same as *platypod*.

Platypsyllidæ (plat-ip-sil'i-dē), *n. pl.* [NL. (Le Conte, 1872), < *Platypsyllus* + *-idæ*.] A family of clavicorn *Coleoptera*, typified by the genus *Platypsyllus*. They have the dorsal segments of the abdomen partly membranous, ventral segments free; the tarsi five-jointed (at least one pair of tarsi); the mentum large, and prolonged in three obtuse lobes behind; and the palpi distant at base. The family is certainly coleopterous, and its true position seems to be between the *Hydrophilidæ* and the *Silphidæ*; but the form is degraded by parasitism to the semblance of a mallophagous insect.

Platypsyllus (plat-ip-sil'us), *n.* [NL. (Ritsema, 1869), < Gr. *πλατύς*, broad, flat, + *ψύλλα*, a flea.] A remarkable genus of insects, type of the family *Platypsyllidæ*, referred by some to the order *Aphaniptera*, by others to the *Diptera*, by Westwood made type of an order *Achreioptera*, by Le Conte placed in the order *Coleoptera* among the clavicorns. *P. castoris*, a parasite of the beaver, is a small eyeless and wingless beetle with short elytra leaving five abdominal segments exposed. Also called *Platypsylla*.

Parasite of the Beaver (*Platypsyllus castoris*). (Line shows natural size.)

Platyptera (plā-tip'te-rä), *n.* [NL., < Gr. *πλατύς*, broad, + *πτερόν*, wing, = E. *feather*.] A genus of fishes, typical of the family *Platypteridæ*. The only known species, *P. aspro*, is an inhabitant of fresh water in islands of the Sunda-Moluccan archipelago.

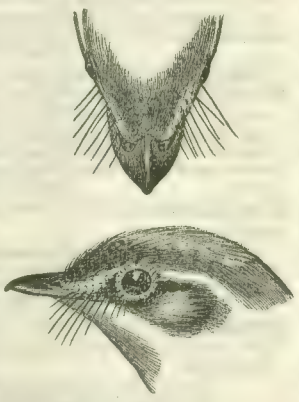
Platypteridæ (plat-ip-ter'i-dē), *n. pl.* [NL., < *Platyptera* + *-idæ*.] A family of acanthopterygian fishes, represented by the genus *Platyptera*. They are related to the *Gobridæ*, and by many referred to that family, but differ from it by having the ventrals widely separate from each other, and from the *Callionymidæ* by the scaly body, unarmed preoperculum, and moderately wide gill-openings.

Platypterna (plat-ip-tėr'nä), *n.* [NL. (Hitchcock, 1848), < Gr. *πλατύς*, broad, flat, + *πτέρνα*, the heel.] A genus of gigantic animals, formerly supposed to be birds, now believed to be dinosaurian reptiles, known by their footprints in the Triassic formation of the Connecticut valley.

Platypterygidæ (plā-tip-te-rij'i-dē), *n. pl.* [NL., < *Platypteryx* (*-pteryg-*) + *-idæ*.] A family of bombycid moths, typified by the genus *Platypteryx*. The antennæ of the male are pectinate, those of the female generally filiform; the abdomen is slender, and the wings are small but comparatively broad, and sometimes hooked at the tip; the larvæ have 14 legs.

Platypteryx (plā-tip'te-riks), *n.* [NL., < Gr. *πλατύς*, broad, flat, + *πτέρυξ*, wing.] In *entom.*, the typical genus of *Platypterygidæ*. The species are known as *hook-tip moths*.

Platypus (plat'i-pus), *n.* [NL., < Gr. *πλατύπους*, broad-footed, < *πλατύς*, broad, + *πούς* (*ποδ-*), = E. *foot*.] 1. In *entom.*, a genus of xylophagous beetles of the family *Scolytidæ*: synonymous in part with *Bostrychus*. *Herbst*, 1793.—2. In *mammal.*: (*a*) A genus of monotremes, now called *Ornithorhynchus*. *Shaw*, 1799. (*b*) [*l. c.*] The species of this genus; the duck-billed platypus. See cut under *duckbill*.—3. In *ornith.*, a genus of sea-ducks of the family *Anatidæ* and the subfamily *Fuligulinæ*: synonymous with *Fulix*. *Brehm*, 1831.



platypygous (plat-i-pī'gus), *a.* [< Gr. *πλατύπυγος*, broad-bottomed, < *πλατύς*, broad, + *πυγή*, rump, buttocks.] Having broad buttocks.

platyrhine, Platyrhini, etc. See *platyrrhine*, etc.

Platyrhynchi (plat-i-ring'kī), *n. pl.* [NL., pl. of *Platyrhynchus*, q. v.] In Merrem's classification of birds (1813), a group equivalent to the *Steganopodes* or *Totipalmati* of authors, containing such genera as *Pelecanus*, *Phaëton*, and *Plotus*, or the pelicans, gannets, cormorants, anhingas, tropic-birds, etc.

platyrhynchine (plat-i-ring'kin), *a.* [< *Platyrhynchus* + *-ine*[1].] Broad-billed, as a bird.

Platyrhynchus (plat-i-ring'kus), *n.* [NL. (Desmarest, 1805), prop. **Platyrrhynchus*, < Gr. *πλατύρρυγχος*, broad-snouted, broad-beaked, < *πλατύς*, broad, + *ῥύγχος*, snout, beak.] 1. In *ornith.*: (*a*) A genus of American tyrant-flycatchers, belonging to the family *Tyrannidæ*, and typical of the subfamily *Platyrhynchinæ*, having a very broad flat bill with long vibrissæ, whence the name. There are several species, of South and Central America, as *P. mystaceus*. *Megarhynchus* is a synonym. (*b*) Same as *Eurylæmus*. *Vieillot*, 1825.—2. Court of Common Pleas. See *court.*—**Declinatory, dilatory, equitable plea.** See the adjectives.—**Double plea,** in *law*, a plea in which the defendant alleges two different matters in bar of the action.—**Foreign plea.** (*a*) In *old Eng. law*, a plea in either a civil or a criminal case that the matter arose or the prisoner was taken in another county than that where it is sought to try him, and therefore that the court or judge of the latter place has no jurisdiction of the case. It was one kind of plea to the jurisdiction, but distinguished from other kinds by the fact that it resulted in removing the cause. (*b*) Another litigation elsewhere, on the same subject, and between the same parties, or between the creditor and a third party sought to be held for the same debt. When used in this sense it is commonly in reference to the question whether arrest in one action is a satisfaction or bar to the other.—**Issuable, non-issuable,** etc., **plea.** See the adjectives.—**Plea in abatement, plea in avoidance, plea in bar,** etc. See *abatement,* etc.—**Plea of autrefois acquit, of autrefois attaint, of autrefois convict,** pleas in criminal cases, that the accused has been already acquitted, attainted, or convicted, as the case may be, on a former trial for the same offense, the object of which is to invoke the protection of the rule in law that a man cannot be twice put in jeopardy for the same cause.—**Plea of non-claim.** See *non-claim.*—**Plea of panel,** in Scotland, the plea of guilty or of not guilty.—**Plea of parole demurrer.** Same as *age-prayer.*—**Plea of pregnancy.** See *pregnancy.*—**Pleas of the crown,** public prosecution in criminal cases; hence, the body of English criminal law.—**Plea to the jurisdiction.** See *jurisdiction.*—**Special plea,** a plea which admits the truth of the declaration, but alleges special or new matter in avoidance.=**Syn. 1.** *Argument, Plea.* See *argument.*—**2.** *Excuse,* etc. See *apology.*

pleach (plēch), *v. t.* [< ME. *plechen*, < OF. *plescier, plessier, plesser,* also *plaissier, plassier,* plash, plait: see *plash*[2], of which *pleach* is a doublet.] **1.** To unite (the branches of shrubs, vines, etc.) by plaiting, weaving, or braiding together; plash; mingle.

Bende as a bowe, or vynes that men *plechе*,
And cleme it, mose it, bynde it softe aboute.

Holinshed, Descrip. of England, ii. 15.

Pleadable briefs†, in *Scots law*, precepts directed to the sheriffs, who thereupon cite parties, and hear and determine.

pleader (plē'dėr), *n.* [< ME. *pledere, pletere, pletour, plaidur,* < OF. *plaideur,* a pleader, < *plaidier,* plead: see *plead.*] **1.** One who pleads; one who presents pleas for or against a claim, allegation, etc.; technically, a lawyer who pleads a cause or argues in a court of justice (the original meaning of the term), or who drafts, prepares, or devises pleadings.

The thridde buffet signifieth these false *pletours*, men of lawe, that sellen and a-peire theire neyghbours be-hinde here bakke for couetise and envye.
Merlin (E. E. T. S.), iii. 434.

So fair a *pleader* any cause may gain.
Dryden, Aurengzebe, iii. 1.

2. The party whose pleading is under consideration.—**Special pleader,** one of a class of the English bar, whose business consists in giving opinions, and especially in drawing special and difficult pleadings and other documents. In the days of technical common-law procedure, when the statement of the cause of action was presented in different counts varying as to details so as to cover every anticipated variation of circumstances, the function of the special pleader was important to the English practitioner, whether in preparing documents or in detecting defects in those of the adversary.

pleading (plē'ding), *n.* [< ME. *pledyng, pletyng;* verbal n. of *plead, v.*] **1.** The act of advocating any cause; specifically, the act or practice of advocating clients' causes in courts of law.

The lawyer is judged by the virtue of his *pleading*, and not by issue of the cause.
Bacon, Advancement of Learning, ii. 189.

I fling my heart into your lap
Without a word of *pleading*.
Whittier, Among the Hills.

2. In *law:* (*a*) The document (or in some inferior courts an oral statement) formally setting forth the cause of action or the defense of a party. The objects of pleading are to inform the adverse party what questions he must be prepared to meet at the trial; to inform the court what questions are to be determined; and to preserve a record which, with the verdict or judgment, shall show what matters are not afterward to be drawn in question. The term *pleadings* is applied to the documents on either side, whether a declaration, complaint, or bill with demurrer, or a declaration with plea, etc., or a bill or complaint with plea or answer, etc., which form the issue on which it is proposed to try the cause. See *issue,* 10. (*b*) The formal allegation on the record of that which is to be relied on as the support of the party's case in evidence. (*c*) The rules and usages of framing such documents, and of the sufficiency of their contents; the art of drawing pleadings. (*d*) *pl.* (1) The written allegations made in alternate series by the plaintiff and the defendant of their respective grounds of action and defense, terminating in propositions distinctly affirmed on one side and denied on the other, called the *issue. Heard.* (2) In a more limited sense, only those allegations or altercations which are subsequent to the count or declaration. *Gould.*—**Code pleading, color in pleading†, oral pleading.** See *code, color, oral.*—**Pleading over** going on to respond by pleading, after a previous pleading has been adjudged insufficient, or has been withdrawn.—**Special pleading.** (*a*) The allegation of special or new matter, as distinguished from a direct denial of matter previously alleged on the other side. (*b*) The science of pleading, which, until the English Common-law Procedure Act, in 1852, constituted a distinct branch of the law, having the merit of developing the points in controversy with great precision. Its strictness and subtlety were frequently a subject of complaint, and one of the objects of the act was to relax and simplify its rules. (*c*) In popular use, the specious but unsound or unfair argumentation of one whose aim is victory rather than truth.

Not one of these [medieval wars] was simply a war of aggression, . . . except perhaps the Norman Conquest; and we all know what an amount of *special pleading* was thought necessary to justify that.
Stubbs, Medieval and Modern Hist., p. 217.

Lamb, New-Year's Eve.

=Syn. 1. *Pleasant, Pleasing, Agreeable, Congenial*, gratifying, acceptable, welcome. *Pleasing* is the strongest, and *agreeable* the weakest of the first four words. *Pleasant* may be, and generally is, applied to things in the concrete: as, *pleasant* weather. *Pleasing* applies generally to things not physical: as, a *pleasant* face; a *pleasing* aspect, variety. *Pleasant* suggests the effect produced, *pleasing* the power of producing it; hence we may say a *pleasant* or a *pleasing* variety. *Pleasing* must be objective, *pleasant* may be subjective: as, he was in a *pleasant* mood. *Agreeable* and *congenial* are used of social qualities and relations, but the latter goes deeper, expressing a natural suitableness, on the part of a person or thing, to the tastes, habits, temperament, or passing mood of the person concerned.

It was worth while to hear the croaking and hollow tones of the old lady, and the *pleasant* voice of Phœbe, mingling in one twisted thread of talk.

That mode of feeling or affective experience which gratifies the sentient being that experiences it, so that there is an impulse to its continuance or renewal. As being a definite mental process, a feeling, *pleasure* is distinguished from *happiness*, which is a general state of consciousness arising from such an adaptation of circumstances to desires as produces a prevalent mood of satisfaction. According to hedonistic writers, happiness consists in an excess of pleasure over pain. Pleasure is measured by its intensity, its duration, the freedom from consequent pain, the number of persons whom it affects, etc.

And Salomon saithe, "The harte full of enuie
Of him selfe hath no *pleasure* nor commoditie."
Babees Book (E. E. T. S.), p. 349.

There is a *pleasure*, sure,
In being mad which none but madmen know.
Dryden, Spanish Friar, ii.

About three quarters of the way up the hill we came to a level spot where there is a fountain, and every thing made very convenient for those who come here for their *pleasure*. *Pococke*, Description of the East, II. i. 146.

How shall we define *pleasure?* It seems obvious to define it as the kind of feeling which pleases us, which we like or prefer. *H. Sidgwick*, Methods of Ethics, p. 114.

2. Sensual gratification; indulgence of the appetites.—3. That which pleases or gratifies the senses or the mind; that which is delightful or beautiful.

Same as *plebiscitum.*—2. An expression of the will or pleasure of the whole people in regard to some measure already decided upon; a vote of the whole people for the ratification or disapproval of some matter: chiefly a French usage.

If people by a *plebiscite* elect a man despot over them, do they remain free because the despotism was of their own making? *H. Spencer*, Man vs. State, p. 14.

Plebiscite we have lately taken, in popular use, from the French. The word previously belonged, however, to the language of the civil law. *F. Hall*, Mod. Eng., p. 310.

plebiscitum (pleb-i-sī'tum), *n.*; pl. *plebiscita* (-tä). [L.: see *plebiscite.*] A law enacted in ancient Rome by the lower rank of citizens meeting in the assembly called the *comitia tributa*, under the presidency of a tribune or some other plebeian magistrate; a decree of the plebs. At first these decrees bound only the plebs, but by a law generally assigned to 449 B. C., and confirmed by later legislation (339 and 286 B. C.), their effect was extended to the patricians.

plebity† (pleb'i-ti), *n.* [< L. *plebita(t-)s*, the rank of a common citizen, < *plebs*, the common people: see *plebs.*] The common people; the plebs. *Wharton.*

plebs (plebz), *n.* [L., also less commonly *plebes*, in OL. *pleps*, also *plebis*, the common people; akin to *plenus*, full, *plerique*, many, etc.: see *plenty.*] The lower order of citizens in ancient Rome; the plebeians; hence, in general, the populace. The members of this order were originally of pure Latin blood, but were not among the founders of Rome; they were recruited from the ranks of the clients and of the Latin peoples who had been annexed by Rome; while citizens, they did not figure in the three tribes or in the curiæ and gentes of the patricians, and were thus excluded from the comitia, the senate, and all public, civil, and religious offices. They had all the duties and burdens of citizens with greatly restricted privileges. After the establishment of the republic there took place a long struggle between the two orders. The plebeians secured the institution of the tribunate, various reforms, and an increased share in the government; their efforts culminated when, by the Licinian laws (about 367 B. C.), they secured one of the two consulships. The offices of dictator, censor, and pretor were soon opened to them, and finally, by the Ogulnian law (300 B. C.), the sacred colleges. The strife practically ended by the final confirmation of the extended plebiscitum, about 286 B. C. (See *plebiscitum.*) Under the kings and the republic a plebeian could be raised to patrician rank only by a lex curiata: Julius Cæsar and the emperors conferred the distinction by personal decree. Patrician families or individuals sometimes went over to the plebeian order, for various reasons.

Cæsar, as I stated in another Lecture, divides all the Continental Celtic tribes into the Equites and the *Plebs.* *Maine*, Early Hist. of Institutions, p. 132.

Bethink you that you have to deal with *plebs*,
The commonalty. *Browning*, Ring and Book, I. 153.

pleck (plek), *n.* [< ME. *pleck*, *plek*; a var. of *plack.*] A plot of ground. [Prov. Eng.]

Plectocomia (plek-tō-kō'mi-ä), *n.* [NL. (Martius and Blume, 1830), so called in allusion to the slender filaments; < Gr. *πλεκτός*, plaited, twisted (verbal adj. of *πλέκειν*, plait, twist), + *κόμη*, hair.] A genus of ratan-palms of the tribe *Metroxyleæ* and subtribe *Calameæ.* It is characterized by an axillary dœcious inflorescence, with numerous persistent spathes, and the spadix divided into many very long tail-like branches, every branch sheathed with numerous two-ranked closely imbricated shell-shaped secondary spathes, each inclosing a short spike 3 inches or less long, bearing coriaceous perianths. The 6 species are natives of mountains in eastern India and the Malayan archipelago. They are climbing palms, with slender or robust, very much prolonged stems. The one-seeded fleshy fruits are densely covered with overlapping rough-fringed, almost prickly scales. The large leaves are pinnate, with narrowly elliptical segments, and the midrib extended into long whip-like tails, covered beneath with exceedingly strong compound claw-like spines, which take firm hold of branches of trees, and support the climbing stem, which in *P. elongata*, the rotang-dahown of Indian jungles, is said to extend to a length of 500 feet.

plectognath (plek'tog-nath), *a.* and *n.* **I.** *a.* Pertaining to the *Plectognathi*, or having their characters. Also *plectognathic*, *plectognathous.*

II. *n.* A member of the *Plectognathi.*

Plectognathi (plek-tog'nā-thī), *n. pl.* [NL., < Gr. *πλεκτός*, plaited, twisted, + *γνάθος*, jaw.] An order of physoclistous fishes, with the cranium normal, the premaxillaries usually coössified behind with the maxillaries, the dentary coössified with the articular and angular bones, and the lower pharyngeals distinct: so called from the extensive ankyloses of the jaws. The order includes the porcupine-fishes, swell-fishes, box-fishes, globe-fishes, egg-fishes, file-fishes, and related forms, as of the families *Triacanthidæ*, *Balistidæ*, *Triodontidæ*, *Ostraciontidæ*, *Tetrodontidæ*, *Diodontidæ*, and *Molidæ.*

plectognathic (plek-tog-nath'ik), *a.* [< *plectognath* + *-ic.*] Same as *plectognath.*

plectognathous (plek-tog'nā-thus), *a.* [< *plectognath* + *-ous.*] Same as *plectognath.*

Plectoptera (plek-top'tę-rä), *n. pl.* [NL., < Gr. *πλεκτός*, plaited, twisted, + *πτερόν*, wing, = E. *feather.*] In Packard's classification (1888), one of 15 orders of insects, corresponding to the order *Ephemerida* of Brauer. The latter name is in more general use. See *May-fly.*

plectospondyl (plek-tō-spon'dil), *a.* and *n.* [< Gr. *πλεκτός*, plaited, twisted, + *σπόνδυλος*, *σφόνδυλος*, a vertebra: see *spondyl.*] **I.** *a.* Having some joints of the back-bone coössified or ankylosed together, as a fish; having the characters of the *Plectospondyli.* Also *plectospondylous.*

II. *n.* Any fish of the order *Plectospondyli.*

Plectospondyli (plek-tō-spon'di-lī), *n. pl.* [NL.: see *plectospondyl.*] An order of fishes having a precoracoid arch, a symplectic but no coronoid bones, and the anterior vertebræ coössified and connected with the auditory apparatus by a chain of little bones. It contains the cyprinids, characinids, and gymnonotous fishes—all of fresh water.

plectospondylous (plek-tō-spon'di-lus), *a.* [< *plectospondyl* + *-ous.*] Same as *plectospondyl.*

plectra, *n.* Plural of *plectrum.*

Plectranthus (plek-tran'thus), *n.* [NL. (L'Héritier, 1784), so called in allusion to the spurred corolla of many species; < Gr. *πλῆκτρον*, spur (see *plectrum*), + *ἄνθος*, flower.] A genus of dicotyledonous sympetalous plants of the family *Menthaceæ*, tribe *Ocimeæ*, type of the subtribe *Plectranthinæ*, characterized by the longer and concave anterior corolla-lobe, four perfect stamens, calyx with five equal or unequal teeth, the posterior tooth sometimes larger, and this or the corolla often prolonged below into a spur or sac. There are about 150 species, natives of the tropics, especially in Africa, Asia, and the Pacific. They are usually herbs, rarely tall shrubs, bearing two-lipped flowers with a long tube, in large or small cymes, which are variously racemed or panicled, and are commonly blue or purple. The name *cockspur-flower* is sometimes used for the cultivated species, which are either tender annuals or herbs and shrubs grown under glass. *P. ternatus* is the omime-root of Madagascar.

plectre (plek'tėr), *n.* [< F. *plectre*, < L. *plectrum*, plectrum: see *plectrum.*] A plectrum. [Rare.]

He 'd strike that lyre adroitly — speech,

Plectrophanes (plek-trof'a-nēz), *n.* [NL. (Temminck, 1820), < Gr. *πλῆκτρον*, a cock's spur (see *plectrum*), + *φαίνειν*, show.] A genus of *Fringillidæ*, so named from the long straightened hind claw or plectrum characteristic of some of its members; the snow-buntings or longspurs. The bill is small and conic, with a nasal ruff or tuft of plumules; the wings are long and pointed; and the tail is short, and square or emarginate. The common snow-bunting is usually called *P. nivalis*, but has been placed in a different genus (*Plectrophenax*). The Lapland longspur is *P. lapponicus.* The collared and the painted longspurs are *P. ornatus* and *P. pictus.* Excluding the snow-bunting, the members of this genus are now usually called *Centrophanes* or *Calcarius.* See cut under *Centrophanes.*

Plectrophenax (plek-trof'e-naks), *n.* [NL., < Gr. *πλῆκτρον*, a cock's spur (see *plectrum*), + *φέναξ*, a cheat.] A genus of *Fringillidæ* dismembered from *Plectrophanes*, having *P. nivalis* as its type; the snow-buntings.

Plectropteridæ (plek-trop-ter'i-dē), *n. pl.* [NL., < *Plectropterus* + *-idæ.*] The spur-winged geese regarded as a family apart from *Anatidæ.* See cut under *Plectropterus.*

Plectropterinæ (plek-trop-tę-rī'nē), *n. pl.* [NL., < *Plectropterus* + *-inæ.*] A subfamily of *Anatidæ*, represented by the genus *Plectropterus*; the spur-winged geese.

plectropterine (plek-trop'tę-rin), *a.* Belonging to the *Plectropterinæ.*

Plectropterus (plek-trop'tę-rus), *n.* [NL. (W. E. Leach, 1824), < Gr. *πλῆκτρον*, a cock's spur (see *plectrum*), + *πτερόν*, wing, = E. *feather.*]

Spur-winged Goose (*Plectropterus gambensis*).

An African genus of geese having a spur on the wing, as *P. gambensis.*

plectrum (plek'trum), *n.*; pl. *plectra* (-trä). [NL., < L. *plectrum*, < Gr. *πλῆκτρον*, a thing to strike with, as an instrument for striking the lyre, a spear-point, a cock's spur, a punting-pole, < *πλήσσειν* (*πληκ-*), strike: see *plague.*] **1.** A small instrument of ivory, horn, or metal used for plucking or twanging the strings of a lyre, cithara, or other similar instrument.

I heard the forlorn but melodious note of a hooting owl indefinitely far: such a sound as the frozen earth would yield if struck with a suitable *plectrum.* *Thoreau*, Walden, p. 292.

2. Something like or likened to a plectrum. (a†) In *anat.*: (1) The stylohyal bone, or styloid process

of the temporal bone. (2) The uvula. (3) The tongue. *Encyc. Dict.* (*b*) In *ornith.*, a spur or claw on the wing or foot. (*c*) In *entom.*, a small bristle or point on the costal margin of the wing, and standing out from it.

pled (pled). An occasional (less correct) preterit and past participle of *plead*.

pledge (plej), *n.* [< ME. *plegge*, < OF. *plege*, *pleige*, *plaige*, *ploige*, *ploge*, *plage*, m., = Pr. *plieu*, *pleya* = OIt. *pieggio*, a pledge, surety, bail (person or thing), prob. < LL. **præbium*, found only in ML. forms reflecting the Rom., *plivium*, *pluvium*, *plegium*, neut., a pledge, surety, *plivius*, *plegius*, m., one who gives a pledge, surety (cf. L. *præbrum*, in pl. *præbra*, an amulet), < L. *præbere*, proffer, offer, give, grant, afford (*præbere fidem*, give promise or security): see *prebend*, and cf. *plevin*, from the same source. Hence *pledge*, *v.*] **1.** In *law*: (*a*†) A person who goes surety or gives bail for another; especially, a surety whom early English law required of a plaintiff on bringing an action. After a time "John Doe" and "Richard Roe" did duty as such pledges. (*b*) A bailment of personal property as a security for some debt or engagement. *Story*, J. It differs from a *chattel mortgage* in three essential characteristics: (1) it may be constituted without any contract in writing, merely by delivery of the thing pledged; (2) it requires a delivery of the thing pledged, and is continued only so long as the possession remains with the creditor; (3) it does not generally pass the title to the thing pledged, but gives only a lien to the creditor, and the debtor retains the general property. But, as regards choses in action, the distinction that a *mortgage* is a transfer of the title, while a *pledge* is a mere lien without a transfer of title, does not always hold good; for in most cases a pledge of choses in action can be made effectual only by a transfer of the legal title. (See *mortgage*.) A pledge of a chose in action is now more commonly termed *collateral security*, or *collateral*. (*c*) The thing pawned or delivered as security; a pawn. —**2.** Anything given or considered as security for the performance of an act; a guaranty. Thus, a man gives his word or makes a promise to another, which is received as a *pledge* for fulfilment; a candidate for parliamentary honors gives promises or *pledges* to support certain measures; the mutual affection of husband and wife is a *pledge* for the faithful performance of the marriage covenant; mutual interest is the best *pledge* for the performance of treaties.

> Him litle answerd th' angry Elfin knight, . . .
> But threw his gauntlet, as a sacred *pledge*,
> His cause in combat the next day to try.
> *Spenser*, F. Q., I. iv. 43.

> I had been insulted by the boy that belonged to the gate, who demanded money of me, and snatched my handkerchief from me as a *pledge*.
> *Pococke*, Description of the East, II. i. 7.

(*a*) Figuratively, a child; offspring.

> 'Tis the curse
> Of great estates to want those *pledges* which
> The poor are happy in: they, in a cottage,
> With joy behold the models of their youth.
> *Fletcher*, Spanish Curate, i. 3.

(*b*) A surety; a hostage.

> Command my eldest son, nay, all my sons,
> As *pledges* of my fealty and love.
> *Shak.*, 2 Hen. VI., v. 1. 50.

> Samuel, their other consort, Powhatan kept for their *pledge*. Quoted in *Capt. John Smith's* Works, I. 213.

(*c*) A formal obligation whereby one voluntarily binds himself to abstain from the use of intoxicating drink.

3. A token or sign of favor, agreement, etc.

> Let it therefore suffice us to receive Sacraments as sure *pledges* of God's favour, signs infallible that the hand of his saving mercy doth thereby reach forth itself towards us. *Hooker*, Eccles. Polity, v., App. 1.

> Here, boldly take
> My hand in *pledge*, this hand, that never yet
> Was given away to any.
> *Fletcher*, Faithful Shepherdess, i. 3.

4. An expression of good will, or a promise of friendship and support, conveyed by drinking together; hence, in a more general sense, the act of drinking together; the drinking of a health.

> Suppose that you winked at our friends drinking those *pledges*. *Scott.*

To hold in pledge, to keep as security.—**To put in pledge**, to pawn.—**To take the pledge**, to bind one's self to observe principles of temperance or of total abstinence from intoxicating drink.=**Syn. 2.** *Covenant*, etc. See *promise*, *n.*, and *earnest*.

pledge (plej), *v. t.*; pret. and pp. *pledged*, ppr. *pledging*. [< ME. *pleggen*, < OF. *pleiger*, ML. reflex *plegiare*, *plegire* (beside *plevire*, *plivire*, etc., after the OF. *plevir*, pledge: see *plevin*); from the noun: see *pledge*, *n.*] **1.** To give as a pledge or pawn; deposit in pawn; deposit or leave in possession of a person as security. See *pledge*, *n.*—**2.** To give or formally and solemnly offer as a guaranty or security.

> And so her father *pledg'd* his word,
> And so his promise plight.
> *The Gay Goss-Hawk* (Child's Ballads, III. 281).

> *Abs.* But my vows are *pledged* to her.
> *Sir A.* Let her foreclose, Jack; let her foreclose; they are not worth redeeming. *Sheridan*, The Rivals, ii. 1.

> We mutually *pledge* to each other our lives, our fortunes, and our sacred honour. *Declaration of Independence.*

3. To bind to something by a pledge, promise, or engagement; engage solemnly: as, to *pledge* one's self.

> Here [shall] Patriot Truth her glorious precepts draw,
> *Pledged* to Religion, Liberty, and Law.
> *Story*, Life and Letters, I. 127.

4†. To guarantee the performance of by or as by a pledge.

> Yes, I accept her, for she well deserves it;
> And here, to *pledge* my vow, I give my hand.
> *Shak.*, 3 Hen. VI., iii. 3. 250.

5. To give assurance of friendship to, or promise friendship to, by or in the act of drinking; hence, to drink a health to or with. [The use of the word in this sense is said to have arisen from the fact that, in the rude and lawless society of former times, the person who called upon another to drink virtually pledged himself that the other would not be attacked while drinking or poisoned by the liquor.]

> *Pledge* me, my Friend, and drink till thou be'st Wise.
> *Cowley*, Ode.

> I'll *pledge* you, Sir: so, there's for your ale, and farewell.
> *Cotton*, in Walton's Angler, ii. 228.

> Sipping beverage divine,
> And *pledging* with contented smack
> The Mermaid in the Zodiac.
> *Keats*, Lines on the Mermaid Tavern.

> Reach me my golden cup that stands by thee,
> And *pledge* me in it first for courtesy.
> *M. Arnold*, Tristram and Iseult.

6. To assure solemnly or in a binding manner; guarantee.

> Ye have *plegged* me vpon youre lyves that I shall have no drede of deth. *Merlin* (E. E. T. S.), i. 35.

=**Syn. 1–3.** To pawn, hypothecate. See *plight*[1], *v.*

pledge-cup (plej'kup), *n.* A cup for drinking healths or pledges; especially, a large cup designed to pass from hand to hand.

pledger (plej'ėr), *n.* **1.** One who pledges or offers a pledge.

> If a pawnbroker receives plate or jewels as a pledge or security for the repayment of money lent thereon at a day certain, he has them upon an express contract or condition to restore them if the *pledger* performs his part by redeeming them in due time. *Blackstone*, Com., II. xxx.

2. One who accepts an invitation to drink after another, or who pledges himself, his honor, word, etc., to another by drinking with him.

> If the *pledger* be inwardlye sicke, or have some infirmitie, whereby too much drinke doe empayre his health.
> *Gascoigne*, Delicate Diet for Droonkardes.

pledge-ring (plej'ring), *n.* A ring capable of being divided into three parts, each of which could be worn separately, one part for each of the parties to an agreement and one for the witness.

pledgery† (plej'ėr-i), *n.* [< OF. *plegerie*, *pleigerie*, etc., < *pleger*, pledge: see *pledge*, *v.*] Suretyship. *Phillips*, 1706.

pledget (plej'et), *n.* [Perhaps for **pludget*, assibilated dim. of *plug*: see *plug*.] A small plug; in *surg.*, a small flat mass of lint, absorbent cotton, etc., used, for example, to lay over a wound to absorb the matter discharged.

> Get my rollers, bolsters, and *pledgets* armed.
> *Middleton*, Anything for a Quiet Life, ii. 4.

pleet†, *n.* An early modern English and Middle English spelling of *plea*.

Plegadis (pleg'a-dis), *n.* [NL. (Kaup, 1829).] A genus of *Ibididæ*, having the plumage more or less metallic and iridescent; the glossy ibises. The type is the common bay ibis, *P. falcinellus*. *P. guaranna* is the white-faced ibis of America.

Glossy Ibis (*Plegadis falcinellus*).

plegaphonia (pleg-a-fō'ni-ạ), *n.* [NL., < Gr. πληγή, a blow, stroke, + *-φωνία*, < φωνεῖν, produce a sound or tone.] The sound yielded in auscultation of the chest when the larynx is percussed.

pleghan (pleg'an), *n.* [Cf. Gael. *ploicean*, a plump-cheeked boy.] A stripling; a lad; a haflin. [Scotch.]

> The ordinary farmer's household consisted of a big man, a little man, and a *pleghan*, i. e. a lad of fifteen to drive the plough. *Quarterly Rev.*, CXLVI. 39.

plegometer (ple-gom'e-tėr), *n.* [< Gr. πληγή, a stroke, + μέτρον, measure.] Same as *pleximeter*.

Pleiad (plī'ad), *n.*; pl. *Pleiads*, *Pleiades* (*-adz*, *-ạ-dēz*). [< L. *Pleïas*, *Pleias* (*-ad-*), < Gr. Πληϊάς, Πλειάς (*-ad-*), pl. Πλειάδες, one of the Pleiads or Seven Stars, traditionally so called as indicating by their rising the time of safe navigation; < πλεῖν, sail.] One of a close group of small stars in the constellation Taurus, very conspicuous on winter evenings, about twenty-four degrees north of the equator, and coming to the meridian at midnight in the middle of November. For some unknown reason, there were anciently said to be seven Pleiads, although only six were conspicuous then as now; hence the suggestion of a lost Pleiad. In mythology the Pleiads were said to be the daughters of Atlas and Pleione, and were named Alcyone, Merope, Celæno, Electra, Sterope or Asterope, Taygeta, and Maia. These names, with those of the parents, have been applied by modern astronomers since Riccioli (A. D. 1665) to the principal stars of the group. Four of the brightest stars are at the corners of a trapezoid, with one in the base near the star at the northern angle, and one outside the trapezoid, like a handle to a dipper. Alcyone, the brightest of the group, is a greenish star, of magnitude 3.0, at the east end of the base of the trapezoid; it is η Tauri. Electra is a very white star, of magnitude 3.8, at the westernmost corner of the trapezoid, on the short side opposite the base. Taygeta is a yellowish star, of magnitude 4.4, at the northern corner on the base. Merope is a yellowish star, of magnitude 4.2, at the southernmost corner, not on the base. It is surrounded by a faint nebula, discovered by Tempel many years ago, and visible with a telescope of moderate dimensions. But photographs show that the cluster is also full of invisible wisps and filaments of nebulosity, which are for the most part attached to the larger stars. Maia is a yellowish star, of magnitude 4.0, on the base of the trapezoid, close to the northern angle, but not in it. Asterope is a double star, of magnitude 5.7, not very conspicuous, forming an equilateral triangle with Taygeta and Maia, and lying outside of the trapezoid. Celæno is a star of magnitude 5.2, half-way between Electra and Taygeta, just a little outside the western slanting side of the trapezoid. Atlas is a yellowish star, of magnitude 3.8, the second or third brightest in the group, which lies out of the trapezoid, considerably to the east, as in the handle of the dipper. Pleione is a star of magnitude 5.1, a little north of Atlas. Photographic plates have revealed a great number of stars within the cluster.

> Canst thou bind the sweet influences of *Pleiades*, or loose the bands of Orion? Job xxxviii. 31.

> Many a night I saw the *Pleiads*, rising thro' the mellow shade.
> *Tennyson*, Locksley Hall.

> Where life and rapture flow in *plenitude* sublime.
> *Wordsworth*, Desultory Stanzas.

2†. Repletion; animal fullness; plethora. *Arbuthnot.*—**The moon in her plenitude**, in *her.*, the full moon.

plenitudinarian† (plen-i-tū-di-nā′ri-an), *n.* [< L. *plenitudo* (*-din-*), plenitude, + *-arian*.] A plenist. *Shaftesbury.*

plenitudinary (plen-i-tū′di-nā-ri), *a.* [< L. *plenitudo* (*-din-*), plenitude, + *-ary*.] Characterized by plenitude, fullness, or completeness.

plentet, *n.* A Middle English form of *plenty*.

plenteous (plen′tē-us), *a.* [< ME. *plenteus*, *plentevous*, *plentivous*, *plentefous*, *plentuos*, < OF. *plentious*, *plentivos*, *plentivous*, *plentevous*, *plentuous*, etc., < *plentif*, plenty, < *plente*, plenty: see *plenty*.] 1. Abundant; copious; full; plentiful; wholly sufficient for every purpose or need: as, a *plenteous* supply of provisions.

> I shall think it a most *plenteous* crop
> To glean the broken ears after the man
> That the main harvest reaps.
> *Shak.*, As you Like it, iii. 5. 101.

2. Yielding abundance; fruitful; productive.

> Toward that land he toke the waye full right,
> Whiche was callid a *plentevous* contre.
> *Generydes* (E. E. T. S.), l. 1031.

> The seven *plenteous* years. Gen. xli. 34.

3. Bountifully or abundantly supplied; well provided for; rich; characterized by plenty: formerly sometimes followed by *of* before the thing that abounds or is plentiful: as, *plenteous* in grace; *plenteous of* good fish.

> It is a fair Cytee, and *plenteevous of* alle Godes.
> *Mandeville*, Travels, p. 211.

> Thys Ile ys a grett Ile and a *Plenteows of* all maner of thyngs. *Torkington*, Diarie of Eng. Travell, p. 20.

> The Lord shall make thee *plenteous* in goods.
> Deut. xxviii. 11.

> The *plenteous* horn
> Of autumn, filled and running o'er
> With fruit, and flower, and golden corn!
> *Whittier*, Autumn Festival.

4†. Bounteous or bountiful in giving; generous; open-handed.

> Ne beth *plentyuous* to the pore as pure charite wolde.
> *Piers Plowman* (B), x. 80.

> Be a man neuer so valiaunt, so wise, so liberall or *plentuous*, . . . if he be sene to exercise iniustyce, . . . it is often remembred. *Sir T. Elyot*, The Governour, iii. 4.

=**Syn.** 1. *Copious*, etc. See *ample*.

plenteously (plen′tē-us-li), *adv.* In a plenteous manner; copiously; plentifully; bountifully; generously.

> Al myhten tho same thinges betere and more *plentevously* ben couth in the mowth of the poeple.
> *Chaucer*, Boëthius, i. prose 5.

plenteousness (plen′tē-us-nes), *n.* The state of being plenteous; abundance; copious supply; plenty.

plentiful (plen′ti-fûl), *a.* [< *plenty* + *-ful*.] 1. Existing in great plenty; copious; abundant; ample.

> The satirical rogue says here that old men have grey beards, . . . and that they have a *plentiful* lack of wit.
> *Shak.*, Hamlet, ii. 2. 202.

> Alcibiades . . . a young man of noble birth, excellent education, and a *plentiful* fortune.
> *Swift*, Contests and Dissensions, ii.

> Can anybody remember when sensible men, and the right sort of men, and the right sort of women were *plentiful?* *Emerson*, Works and Days.

2. Yielding abundance; affording ample supply; fruitful.

If it be a long winter, it is commonly a more *plentiful* year. *Bacon*, Nat. Hist.

For as *plentiful* springs are fittest, and best become large aquaducts, so doth much virtue such a steward and officer as a Christian. *Donne*, Letters, lxxxix.

3†. Lavish.

He that is *plentiful* in expenses of all kinds will hardly be preserved from decay. *Bacon*, Expense (ed. 1887).

=Syn. 1 and 2. Profuse, luxuriant. *Plentiful* is essentially the same as *plenteous*. See comparison under *ample*.

plentifully (plen'ti-fûl-i), *adv.* In a plentiful manner; copiously; abundantly; with ample supply.

Berne is *plentifully* furnished with water, there being a great multitude of handsome fountains planted at set distances. *Addison*, Remarks on Italy.

Sometimes the Cashif sent for me to dine with him, when the drams went round very *plentifully* whilst we were eating. *Pococke*, Description of the East, I. 59.

plentifulness (plen'ti-fûl-nes), *n.* The state of being plentiful; abundance.

plentify† (plen'ti-fī), *v. t.* [< *plenty* + *-fy*.] To make plenteous; enrich.

For alms (like levain) make our goods to rise,
And God His owne with blessings *plentifies*.
Sylvester, tr. of Du Bartas's Weeks, ii., The Vocation.

plentivous†, *adv.* A Middle English form of *plenteous*.

plenty (plen'ti), *n.* and *a.* [< ME. *plentee, plente*, < OF. *plente, plentet*, < L. *plenita(t-)s*, fullness, repletion, abundance, < *plenus*, full; cf. Gr. *πλέως*, full; akin to E. *full*: see *full*[1].] **I.** *n.* **1.** Fullness; abundance; copiousness; a full or adequate supply; sufficiency.

There ben Hilles where men geten gret *plentee* of Manna, in gretter habundance than in ony other Contree. *Mandeville*, Travels, p. 152.

The fyer towards the element flew,
Out of his mouth, where was great *plentie*.
Ballad of King Arthur (Child's Ballads, I. 239).

God give thee . . . *plenty* of corn and wine. Gen. xxvii. 28.

They have great *plenty* of very large carp in this river. *Pococke*, Description of the East, II. ii. 86.

2. Abundance of things necessary for man; the state in which enough is had and enjoyed.

It ne may han togidere al the *plente* of the lyf. *Chaucer*, Boëthius, v. prose 6.

Ye shall eat in *plenty* and be satisfied, and praise the name of the Lord. Joel ii. 26.

Thy lopp'd branches point
Thy two sons forth; . . . whose issue
Promises Britain peace and *plenty*.
Shak., Cymbeline, v. 5. 458.

3. A time of abundance; an era of plenty.

Peace,
Dear nurse of arts, *plenties*, and joyful births.
Shak., Hen. V., v. 2. 35.

If a man will goe at Christmas to gather Cherries in Kent, though there be plenty in Summer, he may be deceiued; so here these *plenties* haue each their seasons. *Capt. John Smith's* Works, II. 196.

Horn of plenty. See *horn*.=Syn. *Plenty, Abundance, Exuberance, Profusion*. These words are in the order of strength. *Plenty* is a full supply, all that can possibly be needed. *Abundance* is a great plenty, as much as can be wanted or more. *Exuberance* is an overflowing plenty, an abundance that bursts out with fullness: as, the *exuberance* of the harvest. *Profusion* is a plenty that is poured or scattered abroad; *profusion* naturally applies to a large number of units: as, a *plenty* of food; a *profusion* of things to eat. *Exuberance* and *profusion* may mean an amount that needs to be restrained or reduced. See *ample*.

Enough is a *plenty*. *Old proverb*.

All they did cast in of their *abundance;* but she of her want. Mark xii. 44.

With an *exuberance* of thought and a splendour of diction which more than satisfied the highly raised expectation of the audience, he [Burke] described the character and institutions of the natives of India. *Macaulay*, Warren Hastings.

One boundless blush, one white-empurpled shower
Of mingled blossoms, where the raptur'd eye
Hurries from joy to joy, and, hid beneath
The fair *profusion*, yellow Autumn spies.
Thomson, Spring, l. 112.

II. *a.* Being in abundance; plentiful: an elliptical use of the noun, now chiefly colloquial.

Thei ordeyned hir a litier vpon two palfrayes, and leide ther-ynne fresch gras and erbes *plente* and clothes, and than leide her ther-ynne softely. *Merlin* (E. E. T. S.), ii. 301.

For he maye not lese at the moost but a lyne or an hoke: of whyche he maye haue store *plentee* of his owne makynge, as this symple treatyse shall teche hym. *Juliana Berners*, Treatyse of Fysshynge, fol. 2.

They seem formed for those countries where shrubs are *plenty* and water scarce. *Goldsmith*.

When labourers are *plenty*, their wages will be low. *Franklin*.

plenum (plē'num), *n.* [< L. *plenum*, neut. of *plenus*, full: see *plenty*.] **1.** The fullness of matter in space: the opposite of *vacuum:* also used to denote fullness in general.—**2.** A quantity of a gaseous body in an inclosed space greater than would remain there under normal atmospheric pressure.—**Plenum method** (or **system**) **of ventilation**, a system in which the air is forced by artificial means into the space to be ventilated, while vitiated or heated air is forced out by displacement.

plenytide†, *n.* [Irreg. (appar. after *plenitude*) < L. *plenus*, full, + E. *tide*.] A full tide; floodtide.

Let rowling teares in *pleny-tides* oreflow,
For losse of England's second Cicero.
Greene, Groats-worth of Wit.

pleochroic (plē-ō-krō'ik), *a.* [< Gr. *πλέων, πλείων*, more, + *χρόα*, color, + *-ic*.] Exhibiting pleochroism. The epithet includes *dichroic* and *trichroic*. Also *pleochromatic, pleochroöus, polychroic*.—**Pleochroic halo** or **aureole**, a spot within a mineral (for example, biotite) characterized by strong pleochroism. Such spots are frequently observed in sections when examined under the microscope, and are usually immediately associated with microscopic inclusions.

pleochroism (plē-ok'rō-izm), *n.* [< *pleochro-ic* + *-ism*.] In *crystal.*, the variation in color observed in some crystals when viewed in different directions, due to the fact that the rays having vibrations in different planes suffer absorption in different degrees. In general, a uniaxial crystal may be *dichroic*, or have two axial colors, corresponding respectively to the ordinary ray, whose vibrations are transverse to the axis, and the extraordinary ray, with vibrations parallel to this axis; biaxial crystals may be *trichroic*, and the axial colors are generally taken as those determined by the absorption of the rays which are propagated by vibrations parallel to the three axes of elasticity. Tourmalin is a striking example of a dichroic species, epidote and hornblende of trichroic species. A more general epithet for both is *pleochroic*.

pleochromatic (plē″ō-krō-mat'ik), *a.* [< Gr. *πλέων, πλείων*, more, + *χρῶμα(τ-)*, color, + *-ic*.] Same as *pleochroic*.

pleochromatism (plē-ō-krō'mą-tizm), *n.* [< *pleochromatic* + *-ism*.] Same as *pleochroism*.

pleochroöus (plē-ok'rō-us), *a.* [< *pleochro-ic* + *-ous*.] Same as *pleochroic*.

pleodont (plē'ō-dont), *a.* [< Gr. *πλέως*, full, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] Solid-toothed: opposed to *cœlodont*.

pleomastia (plē-ō-mas'ti-ą), *n.* [NL., < Gr. *πλέων*, more, + *μαστός*, one of the breasts.] The presence of more than one nipple to one mammary gland.

pleomazia (plē-ō-mā'zi-ą), *n.* [NL., < Gr. *πλέων, πλείων*, more, + *μαζός*, Ionic and epic for *μαστός*, one of the breasts.] The presence of a greater number of mammary glands than is normal.

pleomorphic (plē-ō-môr'fik), *a.* [< *pleomorph-y* + *-ic*.] Same as *pleomorphous*. *E. R. Lankester*, Nature, XXXIII. 413.

pleomorphism (plē-ō-môr'fizm), *n.* [< *pleomorph-y* + *-ism*.] **1.** Same as *polymorphism*. *Nature*, XXX. 433.—**2.** Same as *pleiomorphism*.

pleomorphous (plē-ō-môr'fus), *a.* [< *pleomorph-y* + *-ous*.] Having the property of pleomorphism; polymorphic.

pleomorphy (plē'ō-môr-fi), *n.* [< Gr. *πλέων, πλείων*, more, + *μορφή*, form.] **1.** Same as *polymorphism*.—**2.** Same as *pleiomorphy*.

pleon[1] (plē'on), *n.* [NL., < Gr. *πλέων, πλείων*, more: see *plus*.] In *bot.*, a term proposed by Nägeli for those aggregates of molecules which cannot be increased or diminished in size without changing their chemical nature, as distinguished from *micellæ*, or aggregates that can be so increased or diminished. See *micella*.

pleon[2] (plē'on), *n.* [NL., < Gr. *πλέων*, ppr. of *πλέειν, πλεῖν*, sail, swim.] **1.** In *Crustacea*, the abdomen: distinguished from *cephalon* (head) and *pereion* (thorax). *C. Spence Bate*, Encyc. Brit., VI. 634.—**2.** The tail-spine or telson of some crustaceans, as the king-crab: so named by Owen, on the supposition that it represents the abdomen: correlated with *thoracetron* and *cephaletron*.

pleonal (plē'ō-nąl), *a.* [< *pleon*[2] + *-al*.] Of or pertaining to the pleon or abdomen of a crustacean. [Rare.]

pleonasm (plē'ō-nazm), *n.* [= F. *pléonasme* = Sp. Pg. It. *pleonasmo*, < L. *pleonasmus*, < Gr. *πλεονασμός*, abundance, exaggeration, in gram. pleonasm, < *πλεονάζειν*, be or have too much, abound, < *πλέων, πλείων*, more, compar. of *πολύς*, much: see *plus*.] **1.** Redundancy of language; the use of more words than are necessary to express an idea. Pleonasm may be justifiable when the intention is to present thoughts with particular perspicuity or force.

The first surplusage the Greekes call *Pleonasmus* (I call him too full speech), and is no great fault: as if one should say, I heard it with mine eares, and saw it with mine eyes, as if a man could heare with his heeles, or see with his nose. *Puttenham*, Arte of Eng. Poesie, p. 264.

2. A redundant phrase or expression; an instance of redundancy of language.

Harsh compositions, *pleonasms* of words, tautological repetitions. *Burton*, Anat. of Mel., p. 25.

3. In *med.*, excess in number or size.=Syn. 1. *Pleonasm, Verbosity, Tautology, Circumlocution, Periphrasis, Verbiage, Redundancy*. "By *pleonasm* is meant the employment of more words than usual, or of redundant words. When properly employed, it is productive of a high degree of emphasis. . . . By *Verbosity* is meant an excessive use of words; it arises from a natural gift of fluent expression, which has not been sufficiently chastened and corrected. . . . *Tautology* arises from verbosity, and may be defined as the repetition of the same idea in different words. . . . *Circumlocution* is another characteristic of verbosity; it means a roundabout mode of speech, where, instead of a direct statement of meaning, the words are multiplied to an unnecessary extent. When properly employed, this is a recognized figure of speech, *periphrasis*. . . . *Periphrasis* is also known as *circumlocution*, but the term *periphrasis* generally refers to those cases where the figure is used with effect, while *circumlocution* refers to its faulty use. *Periphrasis* may be defined as naming a thing indirectly by means of some well-known attribute, or characteristic, or attendant circumstance." *J. De Mille*, Rhetoric, §§ 27, 28, 29, 132, 218. *Verbiage* and *verbosity* are contemptuous words, *verbiage* being more often applied to the things said or written that are verbose: as, his speech was mere *verbiage*. *Pleonasm* and *periphrasis* are terms of rhetoric, with some general use; the others are in common use. *Redundancy* expresses without contempt the fact that more words are used than are necessary.

A work on style might fitly take, from these documents which our Government annually lays before all the world, warning instances of confusions, and illogicalities, and *pleonasms*. *H. Spencer*, Study of Sociol., p. 268.

A relentless clock that has curbed the exuberant *verbosity* of many a lecturer before me. *Nature*, XXX. 135.

"In fine," added he, with his usual *tautology*, "it is right that a man should do his duty." *Motley*, Dutch Republic, I. 279.

The *circumlocutions* which are substituted for technical phrases are clear, neat, and exact. *Macaulay*, Dryden.

As the master [Pope] had made it an axiom to avoid what was mean and low, so the disciples endeavored to escape from what was common. This they contrived by the ready expedient of the *periphrasis*. They called everything something else. *Lowell*, Study Windows, p. 392.

Verbiage may indicate observation, but not thinking. *Irving*.

He [Wordsworth] . . . lacked the critical sagacity or the hardy courage to condemn and strip away his own *redundancies*. *D. G. Mitchell*, Bound Together, p. 194.

pleonast (plē'ō-nast), *n.* [< LGr. *πλεόναστος*, abundant, < Gr. *πλεονάζειν*, abound: see *pleonasm*.] One who uses more words than are needed; one given to redundancy in speech or writing.

Ere the mellifluous *pleonast* had done oiling his paradox with fresh polysyllables . . . he met with a curious interruption. *C. Reade*, Hard Cash, xxv. (*Davies*.)

pleonaste (plē'ō-nast), *n.* [So called in allusion to the four facets sometimes found on each solid angle of the octahedron; < LGr. *πλεόναστος*, abundant, rich, < Gr. *πλεονάζειν*, abound: see *pleonasm*.] In *mineral.*, same as *ceylonite*. See *spinel*.

pleonastic (plē-ō-nas'tik), *a.* [= Sp. *pleonástico* = Pg. *pleonastico*, < Gr. **πλεοναστικός*, redundant, < *πλεόναστος*, verbal adj. of *πλεονάζειν*, abound: see *pleonasm*.] Characterized by pleonasm or redundancy; of the nature of pleonasm; redundant.

pleonastical (plē-ō-nas'ti-kąl), *a.* [< *pleonastic* + *-al*.] Same as *pleonastic*.

pleonastically (plē-ō-nas'ti-kąl-i), *adv.* In a pleonastic manner; with redundancy.

pleonexia (plē-ō-nek'si-ą), *n.* [NL., < Gr. *πλεονέξια*, greediness, < *πλεονέκτης*, greedy, grasping, having or claiming more than one's due, < *πλέων, πλείων*, more, + *ἔχειν*, hold, have.] Morbid greediness or selfishness.

pleopod (plē'ō-pod), *n.* [< Gr. *πλέειν*, swim, + *πούς* (*ποδ-*) = E. *foot*.] One of the abdominal limbs of a crustacean; a swimmeret. The pleopods are the typical natatory limbs, or swimming-feet, succeeding the pereiopods or walking-feet.

pleopodite (plē-op'ō-dīt), *n.* [< *pleopod* + *-ite*[2].] A pleopod.

pleroma (plē-rō'mą), *n.* [NL., < Gr. *πλήρωμα*, a filling up, < *πληροῦν*, fill up, < *πλήρης*, full: see *plenty*.] **1.** Fullness; abundance; plenitude: in *gnosticism*, the spiritual world, or world of light, including the body of eons.

In his system he [Heracleon] appears to have regarded the divine nature as a vast abyss in whose *pleroma* were æons of different orders and degrees—emanations from the source of being. *Encyc. Brit.*, XI. 681.

2. In *bot.*, same as *plerome*.

pleromatic (plē-rō-mat'ik), *a.* [< *pleroma(t-)* + *-ic*.] Pertaining to the pleroma or fullness of divine being.

plerome (plē'rōm), *n.* [NL. (Hanstein, 1868), < Gr. *πλήρωμα*, a filling up: see *pleroma*.] **1.** In *gnosticism*, same as *pleroma*.—**2.** In *bot.*, the cylinder or shaft of nascent fibrovascular ele-

ments at the growing-points of the axis of plants.

Enclosed by this [the periblem] is a central cellular mass, out of which the fibro-vascular bundles and the structures of the central part of the shoot or root are formed; this has been termed *plerome*. *Encyc. Brit.*, IV. 92.

plerome-sheath (plē'rōm-shēth), *n.* In *bot.*, a limiting layer of surrounding parenchymatous cells inclosing ordinarily a group of fibro-vascular bundles: it may be developed as an endodermis or as a starch-ring.

pleromorph (plē'rō-môrf), *n.* [< Gr. *πλήρωμα*, a filling up, + *μορφή*, form.] A kind of pseudomorph formed by the filling of a cavity left by the removal of a crystal of some species with another mineral or mineral substance.

plerophoria (plē-rō-fō'ri-ạ), *n.* [NL.] Same as *plerophory*.

plerophory (plē-rof'ọ-ri), *n.* [< NL. *plerophoria*, < Gr. *πληροφορία*, full conviction, certainty, < *πληροφορεῖν*, give full satisfaction or certainty, in pass. be fully convinced, < *πλήρης*, full, + *φέρειν* = E. *bear*[1].] Full persuasion or confidence; perfect conviction or certitude. [Rare.]

Young men apprehend not the necessities of knowledge, old men presume of a *plerophory* and abundance.
Rev. T. Adams, Works, I. 317.

Abraham had a *plerophory* that what was promised God was able to perform. *Barrow*, Sermons, II. iv. (*Latham.*)

The *plerophory* or full assurance of faith.
Schaff, Christ and Christianity, p. 8.

plesance†, plesaunce†, *n.* Obsolete forms of *pleasance*.

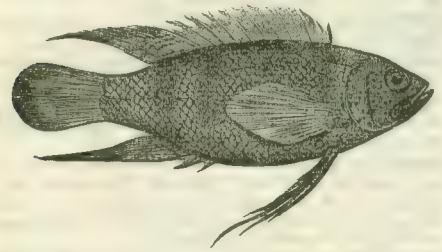
plesant†, plesaunt†, *a.* Obsolete forms of *pleasant*.

plesh†, *n.* An obsolete variant of *plash*[1].

Plesiarctomys (plē-si-ärk'tọ-mis), *n.* [NL., < Gr. *πλησίος*, near, + NL. *Arctomys*, q. v.] A Miocene genus of sciuromorphic rodents, somewhat resembling marmots.

Plesiochelyidæ (plē″si-ọ-ke-lī'i-dē), *n. pl.* [NL., < *Plesiochelys* + *-idæ*.] A family of pleurodirous turtles, typified by the genus *Plesiochelys*. They were distinguished by the total absence of the mesoplastral element in the plastron and the union of the pubis above with the epiplastral. They were of Mesozoic age.

Plesiochelys (plē-si-ok'e-lis), *n.* [NL., < Gr. *πλησίος*, near, + *χέλυς*, a tortoise.] An extinct genus of turtles, typical of the family *Plesiochelyidæ*.



plesiomorphic (plē″si-ọ-môr'fik), *a.* [< *plesiomorph-ous* + *-ic*.] Same as *plesiomorphous*.

plesiomorphism (plē″si-ọ-môr'fizm), *n.* [< *plesiomorph-ous* + *-ism*.] In *crystal.*, the relation of crystallized substances the forms of which closely resemble each other, but are not absolutely identical.

plesiomorphous (plē″si-ọ-môr'fus), *a.* [< Gr. *πλησίος*, near, + *μορφή*, form, + *-ous*.] Nearly alike in form; exhibiting plesiomorphism.

Plesiopidæ (plē-si-op'i-dē), *n. pl.* [NL., < *Plesiops* + *-idæ*.] A family of acanthopterygian fishes, typified by the genus *Plesiops*, generally embraced in the family *Serranidæ*.

Plesiops (plē'si-ops), *n.* [NL., < Gr. *πλησίος*, near, + *ὤψ*, eye, face.] A genus of pseudo-

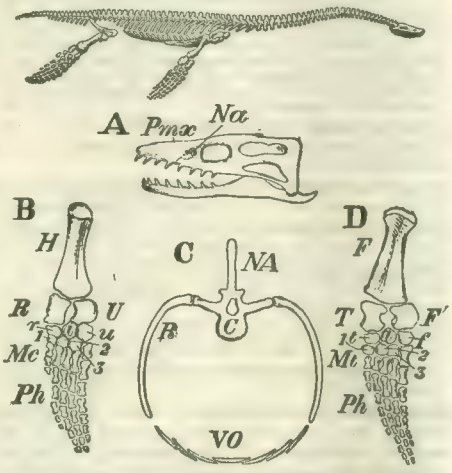
Paraplesiops bleekeri.

chromidoid fishes, regarded by some as the type of a family *Plesiopidæ*. It contains fishes of the Indian and Pacific oceans.

plesiosaur (plē'si-ọ-sâr), *n.* An animal of the order *Plesiosauria*.

Plesiosauri (plē″si-ọ-sâ'rī), *n. pl.* [NL., pl. of *Plesiosaurus*.] Same as *Plesiosauria*.

Plesiosauria (plē″si-ọ-sâ'ri-ạ), *n. pl.* [NL.: see *Plesiosaurus*.] An order of extinct marine *Reptilia*, having the limbs fitted for swimming, the body fish-like, the neck long, and the head quite small. The fore and hind limbs both constitute flippers or paddles like those of cetacean mammals, having numerous phalanges inclosed in a common integument like a fin. The pectoral arch is complete, with triradiate scapular and large coracoid and clavicular elements, and the pelvis is large, with separate ilium, ischium, and pubis. There is no sternum, nor are there any sternal ribs, but floating abdominal ribs are present. The skull has a fixed quadrate bone, one postorbital bar, and no free paroccipital; the vertebræ are amphicœlous, with neurocentral sutures, and only two of them compose a sacrum. The ribs are one-headed. The eyeball has no sclerotic ring of bones, and the teeth are socketed in a single row in both jaws. The order contains many genera of gigantic fish-like saurians from the Trias, Lias, and Chalk, whose affinities are with the chelonians, notwithstanding the wide difference in form. The order is also called *Sauropterygia*, but *Plesiosauria* is its prior and proper name. See cut under *Plesiosaurus*.



plesiosaurian (plē″si-ọ-sâ'ri-ạn), *a.* and *n.* [< *Plesiosauria* + *-an*.] **I.** *a.* Of or pertaining to the *Plesiosauria*; plesiosauroid; sauropterygian.

II. *n.* A member of the *Plesiosauria*; a plesiosaur.

Plesiosauridæ (plē″si-ọ-sâ'ri-dē), *n. pl.* [NL., < *Plesiosaurus* + *-idæ*.] A family of gigantic animals represented by the genus *Plesiosaurus* and related forms, having both fore and hind limbs perfectly natatory. The pterygoids diverge backward, and do not overlie the basisphenoid, and there are small infra-orbital vacuities in the palate. They lived from the uppermost Triassic to the Cretaceous epoch. Some of the species were of huge dimensions.

plesiosauroid (plē″si-ọ-sâ'roid), *a.* [< *plesiosaur* + *-oid*.] Resembling a plesiosaur; plesiosaurian. *Owen*.

Plesiosaurus (plē″si-ọ-sâ'rus), *n.* [NL. (Conybeare), < Gr. *πλησίος*, near, + *σαῦρος*, lizard.] A

Skeleton of *Plesiosaurus*, with diagrams of the more important parts.

A, skull: *Na*, nasal aperture; *Pmx*, premaxilla. B, left fore limb: *H*, humerus; *R*, *U*, radius and ulna; *r*, *i*, *u*, radiale, intermedium, and ulnare of carpus; 1, 2, 3, distal carpalia; *Mc*, metacarpus; *Ph*, phalanges. C, dorsal vertebra, with *R*, ribs, and *VO*, ventral ossifications; *C*, centrum; *NA*, neural arch. D, left hind limb: *F*, femur; *T*, tibia; *F′*, fibula; *t*, *i*, *f*, tibiale, intermedium, and fibulare of tarsus; 1, 2, 3, distal tarsalia; *Mt*, metatarsus; *Ph*, phalanges.

genus of *Reptilia*, typical of the order *Plesiosauria*, and formerly conterminous with it, now restricted to forms from the Upper Triassic (Rhætic) and the Liassic, as *P. dolichodirus*, with extremely long neck.

plesiret†, *n.* A Middle English variant of *pleasure*.

plessimeter (ple-sim'e-tėr), *n.* Same as *pleximeter*.

plet (plet), *n.* [Also *plete*, *plitt*; < Russ. *pletŭ*, a whip.] A whip, especially one of the form used by the Russian penal administration for the chastisement of refractory prisoners.

There is another flagellator, however, called the *plete*, a whip of twisted hide, which is still retained at a few of the most distant Siberian prisons, and only for the most incorrigible, on whom irons, the birch, and other punishments have had no effect. *Encyc. Bri.*, XIX. 762.

plete[1]†, *v.* A Middle English form of *plead*.

plete[2], *n.* See *plet*.

pleteret†, *n.* A Middle English form of *pleader*.

plethora (pleth'ọ-rạ), *n.* [Formerly also *plethory*; = F. *pléthore* = Sp. *plétora* = Pg. *plethora* = It. *pletora*, < NL. *plethōra*, < Gr. *πληθώρη*, fullness, in med. plethora, < *πλῆθος*, fullness, < *πλήθειν*, be or become full, < √ *πλη* in *πιμπλάναι*, fill, *πλήρης*, L. *plenus*, full: see *full*[1], *plenty*.] 1. In *pathol.*, overfullness of blood; a redundant fullness of the blood-vessels.

At the same time he is full and empty, bursting with a *plethory*, and consumed with hunger.
Jer. Taylor, Works (ed. 1835), I. 910.

Your character at present is like a person in a *plethora*, absolutely dying from too much health.
Sheridan, School for Scandal, iv. 3.

2. Overfullness in any respect; superabundance.

A *plethora* of dull fact is . . . especially the characteristic of . . . [this] volume on ancient history.
Athenæum, Jan. 7, 1888, p. 11.

plethoretic (pleth-ọ-ret'ik), *a.* [< *plethora* + *-etic*, as in *diuretic*, etc.] Same as *plethoric*.

plethoretical (pleth-ọ-ret'i-kạl), *a.* [< *plethoretic* + *-al*.] Same as *plethoric*.

plethoric (plē-thor'ik or pleth'ọ-rik), *a.* [< Gr. *πληθωρικός*, < *πληθώρη*, plethora: see *plethora*.] Having a full habit of body, or the vessels overcharged with fluids; characterized by plethora, in any sense.

And late the nation found, with fruitless skill,
Its former strength was but *plethoric* ill.
Goldsmith, Traveller, l. 144.

At length he broke out into a *plethoric* fit of laughter that had well nigh choked him, by reason of his excessive corpulency. *Irving*, Sketch-Book, p. 169.

The pockets, *plethoric* with marbles round,
That still a space for ball and pegtop found.
Lowell, Biglow Papers, 1st ser., Int.

plethorical (plē-thor'i-kạl), *a.* [< *plethoric* + *-al*.] Same as *plethoric*.

plethorically (plē-thor'i-kạl-i), *adv.* In a plethoric manner; with plethora.

plethory† (pleth'ọ-ri), *n.* An obsolete form of *plethora*.

Plethospongiæ (plē-thō-spon'ji-ē), *n. pl.* [NL., < Gr. *πλῆθος*, fullness, + *σπόγγος*, sponge.] In Sollas's classification of sponges, same as *Micromastictora*.

plethron, plethrum (pleth'rọn, -rum), *n.*; pl. *plethra* (-rạ). [< Gr. *πλέθρον* (see def.).] In ancient Greece, a fundamental land-measure, being the square of 100 feet, or 10,000 square feet. As a measure of length, the plethron was the side of this square, the sixth part of a stadium, or about 101 English feet.

plethysmograph (plē-this'mọ-gràf), *n.* [< Gr. *πληθυσμός*, increasing, enlargement (< *πληθύνειν*, be or become full, *πληθύνειν*, make full, < *πλῆθος*, *πληθύς*, fullness), + *γράφειν*, write.] An instrument for obtaining tracings indicating the changes in the volume of a part of the body, especially as dependent on the circulation of blood in it. The part, as the arm, is inclosed in a tight vessel and surrounded by water, which is forced up or allowed to recede in a tube as the volume increases or diminishes.

plethysmographic (plē-this-mọ-graf'ik), *a.* [< *plethysmograph* + *-ic*.] Of or pertaining to the plethysmograph, or its use. *Medical News*, XLIX. 276.

pleting†, *n.* A Middle English form of *pleading*.

pletour†, *n.* A pleader; a lawyer.

pleugh, pleuch (plūch), *n.* and *v.* Scotch forms of *plow*.

pleugh-paidle (plūch 'pā″dl), *n.* A plow-staff. *Scott*, Old Mortality, xxxv. [Scotch.]

pleura[1] (plö'rạ), *n.*; pl. *pleuræ* (-rē). [NL., < Gr. *πλευρά*, a rib, in pl. (also in sing.) the side, side of a triangle, a page of a book; cf. neut. *πλευρόν*, a rib, pl. *πλευρά*, the ribs, the side.] 1. The principal serous membrane of the thorax; the shut sac, having a serous surface, which lines the walls of the chest, and is reflected over the surface of each lung. There are two pleuræ, right and left, completely shut off from each other. Each is divided into a parietal or costal layer and a visceral or pulmonary layer. (See the phrases below.) Like the other serous membranes, the pleuræ are moistened with a serous secretion, which serves to facilitate the movements of the lungs in the chest. See cuts under *peritoneum* and *thorax*.

2. In *conch.*, one of the lateral tracts on each side of the rachis of the lingual ribbon of the odontophore: generally used in the plural.

The teeth of the *pleuræ* are termed uncini; they are extremely numerous in the plant-eating gastropods.
Woodward.

3. In *compar. anat.*, the lateral portion of one of the rings composing the integument of an arthropod or articulate animal, lying between the tergum and sternum, and in insects and crustaceans consisting of two pieces, the epimeron and episternum. In descriptive entomology the term is generally restricted to the side of the thorax, as in *Diptera*.—**Cavity of the pleura**, the space between the parietal and pulmonary layers of the pleura. In the normal state these layers are in contact. See cut under *thorax*.—**Parietal pleura**. (*a*) Same as *pleura costalis*. (*b*) All the parts of the pleura except the pulmonary portion.—**Pericardial pleura**. See *pericardial*.—**Pleura costalis**, the costal part of the pleura, lining the walls of the thorax.—**Pleura mediastinalis**, that part of the pleura which enters into the formation of the mediastinum.—**Pleura pericardiaca**. Same as *pericardial pleura*.—**Pleura phrenica**, that part of the pleura which invests the upper surface of the diaphragm; the diaphragmatic pleura.—**Pleura pulmonalis**, the pulmonary or visceral part of the pleura, investing the lungs.—**Visceral pleura**, the pleura pulmonalis.

pleura[2], *n.* Plural of *pleuron*.

pleuracanth (plö'ra-kanth), *a.* and *n.* [< NL. *Pleuracanthus*.] Same as *pleuracanthoid*.

Pleuracanthidæ (plö-ra-kan′thi-dē), *n. pl.* [NL., ⟨ *Pleuracanthus* + *-idæ.*] A family of fishes of the order *Ichthyotomi*, typified by the genus *Pleuracanthus*. The body was moderately long; the head roundish; the mouth terminal and well slit; the dorsal double, the first short, armed with an anterior spine, and mostly above the head, the second extending from the first to the caudal fin; the anals were double, and the caudal was long and diphycercal; the pectorals had a biserial arrangement of cartilaginous rays, and the ventrals were shark-like; the teeth had two divergent cones and an intermediate denticle. The species lived during the Carboniferous and Permian periods.

Pleuracanthini (plö″ra-kan-thī′nī), *n. pl.* [NL., ⟨ *Pleuracanthus* + *-ini.*] An order of fishes otherwise called *Xenacanthini* and *Ichthyotomi*. See *Xenacanthini*.

pleuracanthoid (plö-ra-kan′thoid), *a.* and *n.* **I.** *a.* Of or resembling the *Pleuracanthidæ*.

II. *n.* A member of the family *Pleuracanthidæ*.

Also *pleuracanth*.

Pleuracanthus (plö-ra-kan′thus), *n.* [NL. (Agassiz, 1837), ⟨ Gr. *πλευρόν*, a rib, + *ἄκανθα*, spine.] A remarkable extinct genus of fishes, typical of the family *Pleuracanthidæ*.

pleural[1] (plö′ral), *a.* [⟨ *pleura*[1] + *-al.*] Of or pertaining to a pleura or the pleuræ: as, the *pleural* investment of the lungs; the *pleural* cavity; *pleural* effusion or adhesions. Also *pleuric*.

pleural[2] (plö′ral), *a.* [⟨ *pleuron* + *-al.*] 1. Pertaining to a rib or a pleuron, or to the ribs or the pleura collectively; costal; situated on the side of the thorax or chest.—2. Lateral, in general; situated on the side of the body: correlated with *dorsal*, *ventral*, etc.—3. In arthropods, pertaining to an arthropleura or pleurite: applied to the lateral limb-bearing section of an arthromere, between the sternite and the tergite. See cuts under *Brachyura* and *Trilobita*.—4. Especially, in *entom.*, lateral and thoracic: as, a *pleural* sclerite; a *pleural* segment of a thoracic somite.—**Pleural facet** of the movable pleura of a crustacean, the anterior part of a pleuron which is overlapped by the preceding pleuron in flexion of the body.—**Pleural spine**, a spine connected with a pleuroid. *G. Baur.*

pleuralgia (plö-ral′ji-ą), *n.* [NL., ⟨ Gr. *πλευρά*, the side, + *ἄλγος*, pain.] Pain in the pleura or side; pleurodynia.

pleuralgic (plö-ral′jik), *a.* [⟨ *pleuralgia* + *-ic.*] Pertaining to or affected with pleuralgia.

pleuralia (plö-rā′li-ą), *n. pl.* [NL., neut. pl. of **pleuralis*, ⟨ Gr. *πλευρά*, the side: see *pleural*[1], *pleura*[1].] In sponges, spicules forming a fur. *F. E. Shulze.*

pleurapophysial (plö-rap-ō-fiz′i-al), *a.* [⟨ *pleurapophysis* + *-al.*] Having the morphological character of a pleurapophysis; of the nature of a rib; costal; costiferous.

pleurapophysis (plö-ra-pof′i-sis), *n.*; pl. *pleurapophyses* (-sēz). [NL., ⟨ Gr. *πλευρόν*, a rib, + *ἀπόφυσις*, a process: see *apophysis*.] A lateral process of a vertebra, having the morphological character of a rib, or forming a true rib. Such processes in the thoracic region of the spine are commonly highly developed, and movably articulated both with the centra and with the diapophyses of the thoracic vertebræ, and they are then ribs in an ordinary sense. They are mostly rudimentary in other parts of the spinal column, but sometimes are very evident, as in the cervical ribs of various vertebrates, including man. In man, in the neck, they bound the vertebrarterial foramen in front, and produce the tubercles known as *anterior* on the transverse process. Pleurapophyses are also by some considered to be represented in the lateral mass of the human sacrum. Developed and movably articulated pleurapophyses, forming true ribs, often extend into the sacral as well as cervical region, as in various birds; and in all of this class more or fewer of them bear accessory processes called *uncinate*. (See cut under *epipleura*.) In serpents they run in unbroken series from head to tail, and assist in locomotion. (See *gastrostege*.) In some reptiles they support a patagium (see cut under *dragon*); in the cobra they spread the hood. In Owen's nomenclature the term *pleurapophysis* is restricted to the true bony part of a rib, the gristly part or costal cartilage being called *hemapophysis*. See cuts under *vertebra* and *endoskeleton*.

pleurarthron (plö-rär′thron), *n.*; pl. *pleurarthra* (-thrą). [NL., ⟨ Gr. *πλευρά*, a rib, + *ἄρθρον*, a joint.] The articulation of a rib. *Thomas*, Med. Dict.

pleurecbolic (plö-rek-bol′ik), *a.* [⟨ Gr. *πλευρά*, the side, + *ἐκβολή*, a throwing out: see *ecbolic*.] Eversible or capable of protrusion by a forward movement of the sides of the containing tube, as an invert: correlated with *acrembolic*, and distinguished from *pleurembolic*. [Rare.]

It is clear that, if we start from the condition of full eversion of the tube and watch the process of introversion, we shall find that the *pleurecbolic* variety is introverted by the apex of the tube sinking inwards.

Lankester, Encyc. Brit., XVI. 652.

pleurembolic (plö-rem-bol′ik), *a.* [⟨ Gr. *πλευρά*, the side, + *ἐμβολή*, a putting into: see *embolic*.] Introversible or capable of being withdrawn by a backward movement of the parts into which it sinks, as an evert: correlated with *acrecbolic*, and distinguished from *pleurecbolic*. [Rare.]

It [the pleurecbolic variety of eversion] may be called acrembolic, whilst conversely the acrecbolic tubes are *pleurembolic*. *Lankester*, Encyc. Brit., XVI. 652.

pleurenchyma (plö-reng′ki-mą), *n.* [NL., ⟨ Gr. *πλευρά*, the side, + *ἔγχυμα*, what is poured in: see *enchymatous*, *parenchyma*.] In *bot.*, a tissue composed of woody fibers. [Obsolete.]

pleurenchymatous (plö-reng-kim′ą-tus), *a.* [⟨ *pleurenchyma*(*t-*) + *-ous.*] Of, pertaining to, or of the nature of pleurenchyma.

pleuric (plö′rik), *a.* [⟨ *pleura*[1] + *-ic.*] Same as *pleural*[1].

pleurisy (plö′ri-si), *n.* [Formerly also *plurisy*, partly associated (as in the equiv. ML. *plurior*, *pluritas*, plethora) with L. *plus* (gen. *pluris*), more, as if implying a plethora of blood; ⟨ F. *pleurésie* = Pr. *pleurezia* = Sp. *pleuresía* = Pg. *pleuriz* = It. *pleurisia*, ⟨ LL. *pleurisis*, a later form of the reg. L. *pleuritis*: see *pleuritis*.] Inflammation of the pleura. It may be acute or chronic, and may or may not be accompanied by effusion. The effusion may be serous, seropurulent, purulent, or hemorrhagic. The form without effusion, called *dry pleurisy*, is usually attended with a fibrinous exudation on the surface of the pleura. It is an almost constant complication of pneumonia, and chronic pleurisy is frequently of tuberculous origin. Also called *pleuritis*.

The *Pleurisie* stabs him with desperate foyl
Beneath the ribs, where scalding blood doth boyl.
Sylvester, tr. of Du Bartas's Weeks, ii., The Furies.

pleurisy-root (plö′ri-si-röt), *n.* A plant of the milkweed family, *Asclepias tuberosa*: so named

1. Part of the Inflorescence of Pleurisy-root (*Asclepias tuberosa*). 2. The root and the lower part of the stem. *a*, a flower; *b*, the anthers and the stigma; *c*, the fruit; *d*, a seed.

from its medicinal use. Also called *butterfly-weed*.

pleurite (plö′rīt), *n.* [⟨ Gr. *πλευρά*, the side, + *-ite*[2].] 1. In arthropods, a pleural sclerite; a lateral piece or segment of a somitic ring or somite, between the tergite and the sternite.—2. In a restricted sense, the lateral or pleural part of an abdominal segment of an insect.

pleuritic[1] (plö-rit′ik), *a.* [⟨ L. *pleuriticus*, ⟨ Gr. *πλευριτικός*, suffering from pleurisy, ⟨ *πλευρῖτις*, pleurisy: see *pleuritis*.] 1. Pertaining to or suffering from pleurisy: as, *pleuritic* symptoms or affections; a *pleuritic* patient.—2. Causing or bringing pleurisy.

For while the effluence of the skin maintains
Its native measure, the *pleuritic* Spring
Glides harmless by.
Armstrong, Art of Preserving Health, iii.

pleuritic[2] (plö-rit′ik), *a.* [⟨ *pleurite* + *-ic.*] 1. In arthropods, of or pertaining to a pleurite; pleural, as a segment of a somite.—2. In *entom.*, specifically, lateral or pleural and abdominal; of or pertaining to a pleurite.

pleuritical (plö-rit′i-kal), *a.* [⟨ *pleuritic*[1] + *-al.*] Same as *pleuritic*[1].

pleuritis (plö-rī′tis), *n.* [NL., ⟨ L. *pleuritis*, ⟨ Gr. *πλευρῖτις*, pleuritis (cf. *πλευρίτης*, on or at the side), ⟨ *πλευρά*, the side: see *pleura*[1].] Same as *pleurisy*.

pleuroblastic (plö-rō-blas′tik), *a.* [⟨ Gr. *πλευρά*, the side, + *βλαστός*, a germ.] In *bot.*, in the *Peronosporaceæ*, producing vesicular lateral outgrowths which serve as haustoria.

Pleurobrachia (plö-rō-brā′ki-ą), *n.* [NL., ⟨ Gr. *πλευρά*, the side, + *βραχίων*, the arm.] A genus of ctenophorans: same as *Cydippe*, 1.

pleurobranchia[1] (plö-rō-brang′ki-ą), *n.*; pl. *pleurobranchiæ* (-ē). [NL., ⟨ Gr. *πλευρά*, the side, + *βράγχια* (NL. *branchiæ*, sing. *branchia*), gills.] A pleural gill; a branchial organ borne upon an epimeron of any thoracic segment of a crustacean. Some of the thoracic segments, as in the crawfish, may bear on each side four branchiæ, a coxopoditic podobranchia, anterior and posterior arthrobranchiæ, and epimeral pleurobranchiæ.

Pleurobranchia[2] (plö-rō-brang′ki-ą), *n. pl.* [NL., ⟨ Gr. *πλευρά*, the side, + *βράγχια*, gills.] Same as *Pleurobranchiata*. *J. E. Gray*, 1821.

pleurobranchial (plö-rō-brang′ki-al), *a.* [⟨ *pleurobranchia*[1] + *-al.*] Of or pertaining to a pleurobranchia: as, a *pleurobranchial* process.

Pleurobranchiata (plö-rō-brang-ki-ā′tą), *n. pl.* [NL., neut. pl. of *pleurobranchiatus*: see *pleurobranchiate*.] An order of opisthobranchiate gastropods, whose gills are tufts on the sides under a fold of the mantle, and which have generally a spiral shell in the adult as well as the young. Also *Pleurobranchia*, *Tectibranchiata*.

pleurobranchiate (plö-rō-brang′ki-āt), *a.* [⟨ NL. *pleurobranchiatus*, ⟨ Gr. *πλευρά*, the side, + *βράγχια*, gills.] 1. Having pleurobranchiæ, as a crustacean.—2. Having gills along the sides; specifically, pertaining to the *Pleurobranchiata*, or having their characters.

Pleurobranchidæ (plö-rō-brang′ki-dē), *n. pl.* [NL., ⟨ *Pleurobranchus* + *-idæ.*] A family of notaspidean tectibranchiate gastropods, typified by the genus *Pleurobranchus*. They have distinct buccal tentacles forming a veil, branchiæ on the right side of the body under the border of the mantle, a proboscidiform mouth, and numerous falciform marginal teeth on the radula.

Pleurobranchus membranaceus.

Pleurobranchus (plö-rō-brang′kus), *n.* [NL., ⟨ Gr. *πλευρά*, the side, + *βράγχια*, gills.] A genus of tectibranchiates, typical of the family *Pleurobranchidæ*.

Pleurocarpi (plö-rō-kär′pī), *n. pl.* [NL., ⟨ Gr. *πλευρά*, the side, + *καρπός*, fruit.] A division of bryaceous mosses in which the fructification is lateral on the stems, having proceeded from the axils of the leaves. The *Cladocarpi* are now included in this group.

pleurocarpous (plö-rō-kär′pus), *a.* [⟨ Gr. *πλευρά*, the side, + *καρπός*, fruit.] In *bot.*, having the fructification proceeding laterally from the axils of the leaves, as in some mosses; belonging to the *Pleurocarpi*.

pleurocele (plö′rō-sēl), *n.* [⟨ Gr. *πλευρά*, the side, + *κήλη*, tumor.] Same as *pneumocele*.

pleurocentral (plö-rō-sen′tral), *a.* [⟨ *pleurocentrum* + *-al.*] Of or pertaining to a pleurocentrum; hemicentral.

pleurocentrum (plö-rō-sen′trum), *n.*; pl. *pleurocentra* (-trą). [NL., ⟨ Gr. *πλευρά*, the side, + *κέντρον*, the center.] One of the lateral elements of the centrum of a vertebra; a hemicentrum.

Pleurocera (plö-ros′e-rą), *n.* [NL., ⟨ Gr. *πλευρά*, the side, + *κέρας*, horn.] A genus of American fresh-water univalves, typical of the family *Pleuroceridæ*. Also called *Trypanostoma*.

pleurocerebral (plö-rō-ser′ē-bral), *a.* [⟨ Gr. *πλευρά*, the side, + L. *cerebrum*, the brain: see *cerebral*.] Connecting the side of the body with the head: specifically, in mollusks and some other invertebrates, noting a nervous cord connecting a cerebral with a pleural ganglion.

Pleuroceridæ (plö-rō-ser′i-dē), *n. pl.* [NL., ⟨ *Pleurocera* + *-idæ.*] A family of tænioglossate gastropods, typified by the genus *Pleurocera*. It comprises a great number of species, mostly occurring in the fresh waters of the United States, referred by the old writers to the melanians. They are distinguished, however, by their unfringed mantle, want of a distinct male organ, and oviparity. Also called *Ceriphasiidæ* and *Strepomatidæ*.

pleurocœle (plö′rō-sēl), *n.* [⟨ Gr. *πλευρά*, the side, + *κοῖλον*, a hollow, neut. of *κοῖλος*, hollow.] One of two lateral spaces of the posterior part of the splanchnocœle of a brachiopod.

I propose to give the name *pleurocœles* to these spaces, simply from their position as side chambers.

Davidson, Trans. Linn. Soc., XIV. iii. 210.

pleurocolic (plö-rō-kol′ik), *a.* [⟨ Gr. *πλευρόν*, a rib, + L. *colon*, colon: see *colon*[2].] Same as *costocolic*.—**Pleurocolic ligament.** Same as *costocolic ligament* (which see, under *costocolic*).

pleurocollesis (plö″rō-ko-lē′sis), *n.* [NL., ⟨ Gr. *πλευρά*, the side, + *κόλλησις*, a gluing, ⟨ *κολλᾶν*, glue, ⟨ *κόλλα*, glue.] Adhesion of the pleura.

Pleuroconchæ† (plö-rō-kong′kē), *n. pl.* [NL., ⟨ Gr. *πλευρά*, the side, + *κόγχη*, a mussel, shell.] A suborder of inequivalve *Conchifera*, comprising the families *Aviculidæ*, *Pectinidæ*, *Spondylidæ*, *Ostreidæ*, and *Chamidæ*.

Pleurodeles (plö-rod'e-lēz), *n.* [NL.] A genus of tailed amphibians, typical of the family *Pleurodelidæ*.

Pleurodelidæ (plö-rō-del'i-dē), *n. pl.* [NL., < *Pleurodeles* + *-idæ*.] A family of gradient or tailed amphibians, typified by the genus *Pleurodeles*. They have palatine teeth in two longitudinal series diverging behind, inserted on the inner margin of two palatine processes, which are much prolonged posteriorly; the parasphenoid toothless; and a postfrontal arch, sometimes ligamentous.

Pleurodira (plö-rō-dī'rä), *n. pl.* [NL.: see *Pleurodires*.] A superfamily of tortoises with the neck bending in a horizontal plane, and pelvis ankylosed to carapace and plastron. It includes the recent families *Sternothæridæ*, *Podocnemididæ*, *Chelydidæ*, and several extinct ones. *Chelodines* is a synonym.

pleurodiran (plö-rō-dī'ran), *a.* Same as *pleurodirous*. *Amer. Nat.*, XXII. 36.

Pleurodires (plö-rō-dī'rēz), *n. pl.* [NL., < Gr. πλευρά, the side, + δειρή, the neck.] In Gray's classification, a suborder of tortoises whose necks bend sidewise; the pleurodirous tortoises: same as *Pleurodira*. See cut under *Chelydidæ*.

pleurodirous (plö-rō-dī'rus), *a.* [< Gr. πλευρά, the side, + δειρή, the neck.] In *Chelonia*, bending the neck sidewise: noting those tortoises, as the matamata, which thus fold the head and neck in the shell: opposed to *cryptodirous*. See cut under *Chelydidæ*.

pleurodiscous (plö-rō-dis'kus), *a.* [< Gr. πλευρά, the side, + δίσκος, a disk.] In *bot.*, attached to the sides of a disk.

pleurodont (plö'rō-dont), *a.* and *n.* [< NL. **pleurodus* (*pleurodont-*), < Gr. πλευρά, the side, + ὀδούς (ὀδοντ-) = E. *tooth*.] **I.** *a.* 1. Ankylosed to the side of the socket, as teeth; laterally fixed

Anterior Part of Right Ramus of Lower Jaw of an Iguana, showing Pleurodont Dentition.

in the jaw: distinguished from *acrodont*.—2. Having or characterized by pleurodont teeth or dentition, as a lizard; belonging to the *Pleurodontes;* not acrodont: as, a *pleurodont* reptile.

II. *n.* A pleurodont lizard; a member of the *Pleurodontes*.

Pleurodontes (plö-rō-don'tēz), *n. pl.* [NL., pl. of **pleurodus* (*pleurodont-*): see *pleurodont*.] A group of pleurodont lizards, comprising such as the American iguanoids. *J. Wagler*, 1830.

pleurodynia (plö-rō-din'i-ä), *n.* [NL., < Gr. πλευρά, the side, + ὀδύνη, pain.] In *pathol.*, pain in the muscles of the chest.

pleuro-esophageus (plö-rō-ē-sō-fā'jē-us), *n.* [NL., < Gr. πλευρά, the side, + οἰσόφαγος, esophagus.] A band of smooth muscle-fibers connecting the left pleura behind with the esophagus.

pleurogenic (plö-rō-jen'ik), *a.* [< Gr. πλευρά, the side, + *-γενής*, produced: see *-genous*.] Originating from the pleura: as, *pleurogenic* phthisis.

pleurogynous (plö-roj'i-nus), *a.* [< Gr. πλευρά, the side, + γυνή, female (in mod. bot. pistil).] In *bot.*, having a glandular or tubercular elevation rising close to and parallel with the ovary.

pleurogyrate (plö-rō-jī'rāt), *a.* [< Gr. πλευρά, the side, + L. *gyratus*, pp. of *gyrare*, turn: see *gyrate*.] In *bot.*, having the annulus of the sporangium (of ferns) placed laterally.

pleurogyratous (plö-rō-jī'rā-tus), *a.* [< *pleurogyrate* + *-ous*.] Same as *pleurogyrate*.

pleurohepatitis (plö-rō-hep-a-tī'tis), *n.* [NL., < Gr. πλευρά, the side, + ἧπαρ (ἥπατ-), liver, + *-itis*. Cf. *hepatitis*.] Inflammation of the liver and adjacent pleura.

pleuroid (plö'roid), *n.* [< Gr. πλευρόν, a rib, + εἶδος, form. Cf. Gr. πλευροειδῶς, adv., after the manner of ribs.] One of the pair of distinct pleural elements which compose the pleural arch of a vertebra; a pleurapophysis: correlated with *neuroid*. *G. Baur*, Amer. Nat., XXI. 945.

pleurolepidal (plö-rō-lep'i-dal), *a.* [< NL. *Pleurolepis* (*-lepid-*) + *-al*.] Of or pertaining to the *Pleurolepididæ;* having oblique rows of ribbed rhomboid scales interlocking. Each scale has upon its inner anterior margin a thick, solid, bony rib extending upward, and sliced off obliquely below, thus forming splices with the inverse parts of the upper and lower scales.

Pleurolepididæ (plö″rō-le-pid'i-dē), *n. pl.* [NL., < *Pleurolepis* (*-lepid-*) + *-idæ*.] A family of fossil pycnodont fishes, typified by the genus *Pleurolepis*. By some they are united with the *Dapedidæ*. The vertebral column was homocercal, the fins had fulcra, and the body was not very high. They flourished in the Liassic. Also *Pleurolepidæ*.

Pleurolepis (plö-rol'e-pis), *n.* [NL., < Gr. πλευρά, the side, + λεπίς, a scale.] The typical genus of the *Pleurolepididæ*, having rib-like rows of scales, whence the name. *Agassiz*.

Pleuroleura (plö-rō-lū'rä), *n.* [NL., < Gr. πλευρά, the side, + λευρός, smooth, level.] A genus of nudibranchiates, typical of the family *Pleuroleuridæ*. Also called *Dermatobranchus*.

Pleuroleuridæ (plö-rō-lū'ri-dē), *n. pl.* [NL., < *Pleuroleura* + *-idæ*.] A family of inferobranchiate nudibranchiate gastropods, typified by the genus *Pleuroleura* (or *Dermatobranchus*). They are destitute of specialized branchiæ, and respiration is effected by the skin. Also called *Dermatobranchidæ*.

pleuromelus (plö-rom'e-lus), *n.*; pl. *pleuromeli* (-lī). [NL., < Gr. πλευρά, the side, + μέλος, a limb.] In *teratol.*, a monster with supernumerary limbs attached to the lateral regions of the trunk.

Pleuromonadidæ (plö″rō-mō-nad'i-dē), *n. pl.* [NL., < *Pleuromonas* (*-monad-*) + *-idæ*.] A family of pantostomatous flagellate *Protozoa*, typified by the genus *Pleuromonas*. These animalcules are free-swimming, and naked or illoricate, and have a single lateral or ventral flagellum and no distinct oral aperture.

Pleuromonas (plö-rom'ō-nas), *n.* [NL., < Gr. πλευρά, the side, + NL. *Monas*, < Gr. μονάς (μοναδ-), a unit: see *monad*.] The typical genus of *Pleuromonadidæ*. *P. jaculans* is an example.

pleuron (plö'ron), *n.*; pl. *pleura* (-rä). [NL., < Gr. πλευρόν, a rib: see *pleura*[1].] A lateral piece, part, or aspect of the body; especially, the side of the thorax: chiefly used of invertebrates. Specifically—(*a*) In *Crustacea*, a lateral piece or part of any somite below the tergum and above the insertion of the legs; an epimeron. (*b*) In *Trilobita*, one of the flattened lateral sections of a thoracic or pygidial somite, lying on each side of the axis or tergum. See cut under *Trilobita*. (*c*) In *entom.*, the lateral section of the thorax; the pleural part of any one of the three thoracic somites. There are consequently three pleura on each side, called from their position the *propleuron*, *mesopleuron*, and *metapleuron*, according to their respective seats on the prothorax, mesothorax, and metathorax.

Pleuronectæ (plö-rō-nek'tē), *n. pl.* [NL., pl. of *Pleuronectes*.] The flatfishes. See *Pleuronectidæ*.

Pleuronectes (plö-rō-nek'tēz), *n.* [NL. (Artedi, Linnæus), < Gr. πλευρά, the side, + νήκτης, a swimmer.] A genus of flatfishes, giving name to the family *Pleuronectidæ*, formerly conterminous with the family, later variously restricted. By most recent writers the name has been limited to the group typified by the common plaice, *P. platessa*, sometimes to the few species much like this type, sometimes extended to a larger assemblage. By others it has been used for the turbots, otherwise called *Bothus* and *Psetta*. By others still it has been employed for the genus otherwise called *Arnoglossus*. In a common European acceptation it includes flounders of northern seas, having the eyes and the color on the right side, the colored side of each jaw usually toothless, the blind side with close-set teeth in one (rarely two) series, the body ovate or elliptical, the small scales ctenoid or cycloid, the lateral line nearly straight or more or less arched anteriorly, and the small gill-rakers widely set. About 12 species of *Pleuronectes* in this sense are found in North America, a majority of them on the Pacific coast, as *P. (Platichthys) stellatus*, the California flounder, one of the largest and most important. *P. (Limanda) ferrugineus* is the sand-dab of the Atlantic coast. *P. (Pseudopleuronectes) americanus* is the mud-dab or winter flounder, common on this coast from New York northward.

pleuronectid (plö-rō-nek'tid), *n.* and *a.* **I.** *n.* A flatfish; any member of the *Pleuronectidæ;* a pleuronectoid.

II. *a.* Of or pertaining to the *Pleuronectidæ*.

Pleuronectidæ (plö-rō-nek'ti-dē), *n. pl.* [NL., < *Pleuronectes* + *-idæ*.] A family of teleocephalous fishes, of the suborder *Heterosomata*, or flatfishes, or the *Anacanthini pleuronectoidei* of Günther, comprising the flatfishes or flounders.

Lepidopsetta bilineata, of California, one of the *Pleuronectidæ*.

In the widest sense, it includes all the representatives of the suborder. The head is unsymmetrical, with both eyes on one side; one surface is colored, the other colorless; and the dorsal and anal fins are long and soft. The genera are about 40 in number, with 400 species, mostly carnivorous, inhabiting sandy bottoms of all seas, sometimes ascending rivers, and including such important food-fishes as the halibut, turbot, plaice, and sole. With more restricted limits, it embraces those which have the general physiognomy of the plaice or halibut, distinctly outlined preopercle and other bones, little twisted mouth, generally subacute snout, and nostrils little dissimilar on two sides. It thus excludes the true soles and like fishes (see *Soleidæ*). See also cuts under *halibut*, *plaice*, *flounder*, *Paralichthys*, *sole*, and *turbot*. Also *Pleuronectoidei*.

pleuronectoid (plö-rō-nek'toid), *a.* and *n.* [< *Pleuronectes* + *-oid*.] **I.** *a.* Resembling a fish of the genus *Pleuronectes;* belonging to the *Pleuronectidæ* or *Pleuronectoidei*.

II. *n.* A member of the *Pleuronectoidei;* a pleuronectid.

Pleuronectoidei (plö″rō-nek-toi'dē-ī), *n. pl.* [NL.: see *pleuronectoid*.] Same as *Pleuronectidæ*.

pleuropathia (plö-rō-path'i-ä), *n.* [NL., < Gr. πλευρά, the side, + πάθος, suffering.] Disease of the pleura.

pleuropedal (plö-rō-ped'al), *a.* [< Gr. πλευρά, the side, + L. *pes* (*ped-*) = E. *foot*.] Connecting the side of the body with the foot: specifically said of a nervous cord which connects a pleural with a pedal ganglion, as in mollusks. Also *pedopleural*.

pleuropericarditis (plö-rō-per″i-kär-dī'tis), *n.* [NL., < Gr. πλευρά, the side, + NL. *pericardium*, q. v., + *-itis*.] Inflammation of the pleura and the pericardium.

pleuroperipneumony (plö-rō-per-ip-nū'mō-ni), *n.* Same as *pleuropneumonia*.

pleuroperitoneal, pleuroperitonæal (plö-rō-per″i-tō-nē'al), *a.* [< *pleuroperitoneum* + *-al*.] In *zoöl.* and *anat.*, of or relating to the pleura and the peritoneum, or the general body-cavity or perivisceral cavity of a vertebrate animal when it is not divided by a partition (diaphragm) into a pleural or thoracic and a peritoneal or abdominal cavity. It is formed in the early embryo by the splitting of the laminæ ventrales into inner or splanchnopleural and outer or somatopleural layers, and the union of the latter layers of right and left sides in the ventral midline of the body.

pleuroperitoneum, pleuroperitonæum (plö-rō-per″i-tō-nē'um), *n.* [NL., < Gr. πλευρά, the side, + περιτόναιον, peritoneum: see *peritoneum*.] A serous membrane, representing both pleura and peritoneum, which lines a pleuroperitoneal cavity, as in vertebrates below mammals.

Pleurophthalma (plö-rof-thal'mä), *n. pl.* [NL., < Gr. πλευρά, the side, + ὀφθαλμός, the eye.] A group of toxoglossate gastropods with the eyes at the external borders of the tentacles, comprising the families *Conidæ*, *Pleurotomidæ*, and *Cancellariidæ*.

pleuroplegia (plö-rō-plē'ji-ä), *n.* [NL., < Gr. πλευρά, the side, + πληγή, a stroke. Cf. *hemiplegia*.] Absence of the power of conjugate movement of the eyes to the right or left, though convergence may be preserved.

pleuropneumonia (plö″rō-nū-mō'ni-ä), *n.* [NL., < Gr. πλεύρα, the side, + πνεύμων, lung: see *pleura*[1] and *pneumonia*.] 1. A specific contagious disease, peculiar to cattle, affecting the lungs and the pleura, caused by an exceedingly minute micro-organism. It was recognized as far back as the eighteenth century, and now occurs in all the countries of western Europe, in the United States, in southern Africa, and in Australia. The losses which it causes are frequently enormous. The disease first appears in the interlobular tissue of the lungs, whence it invades the pleura and the lung-tissue proper. The latter becomes solidified, and dark-red in color, which varies in later stages. The interlobular tissue becomes thickened into broad yellowish or grayish bands, which give the cut surface of the lungs a peculiar marbled appearance. The disease may be limited to a single lobe or involve one entire lung. A lung becomes very heavy, weighing in some cases over fifty pounds. The disease appears after a period of incubation of from three to six weeks with a feeble cough, which grows more troublesome from week to week. There is slight fever, associated with partial cessation of rumination and milk-secretion. The back is arched and the head is stretched out horizontally during fits of coughing. After a period of from two to six weeks the animal may recover, or the disease may enter a second or acute stage, in which all the symptoms mentioned become greatly aggravated.

2. In *medicine*, pleurisy combined with pneumonia.

pleuropous (plö'rō-pus), *a.* [< Gr. πλευρά, the side, + πούς = E. *foot*.] In *bot.*, having side supports: noting in the genera *Polyporus*, *Hydnum*, etc., those species which have the stipe or stem lateral instead of central.

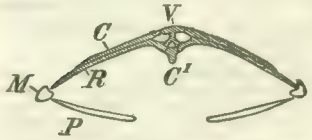
Pleuroptera (plö-rop'te-rä), *n. pl.* [NL., < Gr. πλευρά, the side, + πτερόν, wing.] A group of mammals, containing such as the *Galeopithecidæ*, or so-called flying-lemurs (of the order *Insectivora*): so named from the lateral extension

of the skin, which forms a kind of parachute. See cut under *Galeopithecus*.

Pleuropygia (plö-rō-pij'i-ą), *n. pl.* [NL., < Gr. πλευρά, the side, + πυγή, the rump, buttocks.] A division of *Brachiopoda*, containing the inarticulate or lyopomatous members of that class: contrasted with *Apygia*: same as *Lyopomata*.

pleuropygial (plö-rō-pij'i-ąl), *a.* [< *Pleuropygia* + *-al*.] Of or pertaining to the *Pleuropygia*.

pleurorhizal (plö-rō-rī'ząl), *a.* [< Gr. πλευρά, the side, + ῥίζα, root, + *-al*.] In *bot.*, having the embryo with the radicle against one edge of the cotyledons—that is, with the cotyledons accumbent. *Gray*.



pleurorrhea, pleurorrhœa (plö-rō-rē'ą), *n.* [NL., < Gr. πλευρά, the pleura, + ῥοία, a flow, flux.] Effusion into the pleural cavity.

Pleurosauridæ (plö-rō-sâ'ri-dē), *n. pl.* [NL., < *Pleurosaurus* + *-idæ*.] A family of extinct reptiles referred by some to the order *Rhynchocephalia*, and represented by the genus *Pleurosaurus*. They had an extremely elongated body with many presacral vertebræ, and a long narrow skull with slit-like nares. Their remains have been found in the Upper Jurassic rocks of Bavaria.

Pleurosaurus (plö-rō-sâ'rus), *n.* [NL., < Gr. πλευρόν, a rib, + σαῦρος, lizard.] An extinct genus of lizard-like reptiles, typical of the family *Pleurosauridæ*.

Pleurosigma (plö-rō-sig'mą), *n.* [NL., < Gr. πλευρά, the side, + σίγμα, the letter Σ, σ, ς.] A genus of *Bacillarieæ*, containing species in which the valves show, with a good microscope, a series of lines, capable, under high powers and a favorable light, of resolution into dots, and therefore furnishing excellent tests for the power of a microscope.

Pleurospondylia (plö″rō-spon-dil'i-ą), *n. pl.* [NL., < Gr. πλευρόν, a rib, + σπόνδυλος, a vertebra.]

Trans-section of the Skeleton of *Chelone midas* in the dorsal region, showing the disposition of vertebra and ribs, forming the carapace, and characteristic of *Pleurospondylia*. *C*, centrum of a vertebra; *V*, expanded neural plate; *R*, a rib; *C*, expanded costal plate; *M*, marginal plate; *P*, a lateral element of the plastron.

One of the primary groups into which *Reptilia* are divisible. It is characterized by the immobility of the dorsal vertebræ upon one another, and of the ribs upon these vertebræ (and by the absence of transverse processes from all the vertebræ), this fixity being secured by the union of superficial bony plates into which the ribs and vertebræ pass, forming a carapace, and further carried out by the development, in the ventral walls of the thorax and abdomen, of dermal bones, usually nine in number, of which one is median and asymmetrical, the others lateral and paired, the whole forming a plastron. The group contains the single order *Chelonia* or *Testudinata*, and is alone contrasted with *Herpetospondylia*, *Perospondylia*, and *Suchospondylia* collectively, which together include all other *Reptilia*. See these words; also cuts under *Chelonia*, *Chelonidæ*, *carapace*, and *plastron*.

pleurospondylian (plö″rō-spon-dil'i-ąn), *a.* and *n.* [< *Pleurospondylia* + *-an*.] **I.** *a.* Having the ribs fixed immovably upon the vertebræ; belonging to the *Pleurospondylia*, as a turtle or tortoise; chelonian; testudinate.

II. *n.* A member of the *Pleurospondylia*, as a turtle or tortoise.

pleurosteal (plö-ros'tē-ąl), *a.* [< *pleuroste-on* + *-al*.] Lateral and costiferous, as a part of a bird's sternum; pertaining to the pleurosteon.

pleurosteon (plö-ros'tē-on), *n.*; pl. *pleurostea* (-ą). [NL., < Gr. πλευρά, the side, + ὀστέον, a bone.] In *ornith.*, the anterior lateral piece of the breast-bone; that element of the sternum which forms the costal process and with which ribs articulate: distinguished from *lophosteon*, *coracosteon*, and *metosteon*. See cuts under *carinate* and *epipleura*.

Pleurosternidæ (plö-rō-stėr'ni-dē), *n. pl.* [NL., < *Pleurosternum* + *-idæ*.] A family of pleurodirous turtles, represented by the genus *Pleurosternum*. The plastron had a mesoplastral bone and an intergular shield, and the entoplastron was rhomboidal. The species lived during the Jurassic and Cretaceous periods.

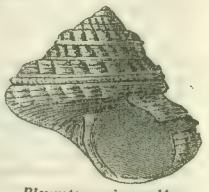
Pleurosternum (plö-rō-stėr'num), *n.* [NL., < Gr. πλευρόν, rib, + στέρνον, the chest.] A genus of extinct turtles, typical of the family *Pleurosternidæ*.

pleurosthotonos (plö-ros-thot'ọ-nos), *n.* Same as *pleurothotonos*.

pleurostict (plö'rō-stikt), *a.* [< NL. *pleurostictus*, < Gr. πλευρά, the side, + στικτός, verbal adj. of στίζειν, prick, stab: see *stigma*.] In *entom.*, having the abdominal spiracles pleural, or situated on the dorsal part of the ventral segments; specifically, of or pertaining to the *Pleurosticta*: opposed to *laparostict*.

Dr. Horn exhibited seven species of Pleocoma from California, of which three were new, and supported the views of the late Dr. Le Conte of the position of this genus, which he insisted was a Laparostict, and not a *Pleurostict* Lamellicorn. *Amer. Naturalist*, XXII. 951.

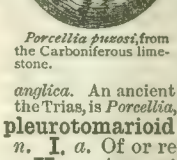
Pleurosticta (plö-rō-stik'tą), *n. pl.* [NL., pl. of *pleurostictus*: see *pleurostict*.] In *entom.*, one of the two main divisions of the family *Scarabæidæ*, including those forms which have the abdominal spiracles (except the anterior ones) situated in the dorsal part of the abdominal segments, forming rows which diverge strongly, and with the last spiracle usually visible behind the elytra. The ligula is always connate with the mentum, and the larvæ have the lobes of the maxillæ connate. The other main division is *Laparosticta*. Also *Pleurostictica*.



Pleurotoma babylonica.

pleurothotonic (plö″rō-thō-ton'ik), *a.* [< *pleurothoton-os* + *-ic*.] Pertaining to, of the nature of, or affected with pleurothotonos.

pleurothotonos (plö-rō-thot'ọ-nos), *n.* [NL., < Gr. πλευρόθεν, from the side (< πλευρά, the side, + *-θεν*, from, an adverbial suffix), + τόνος, tension: see *tone*.] Tonic spasm in which the body is bent sidewise: correlated with *emprosthotonos* and *opisthotonos*.



Pleurotoma (plö-rot'ọ-mą), *n.* [NL. (Lamarck, 1801), < Gr. πλευρά, the side, + *-τομος*, < τέμνειν, ταμεῖν, cut.] In *conch.*, the typical genus of *Pleurotomidæ*: so called from the notch or slit in the outer lip of the aperture. Formerly the name was used for all the members of the family, but it is now restricted to forms more or less like *P. babylonica*.

Pleurotomaria (plö″rō-tọ-mā'ri-ą), *n.* [NL. (Defrance, 1826), < Gr. πλευρά, the side, + τομάριον, prop. dim. of τόμος, a cut, slice, < τέμνειν, ταμεῖν, cut.] The typical genus of *Pleurotomariidæ*.

Pleurotomaria anglica, from the Lias.

Pleurotomariidæ (plö-rō-tom-a-rī'i-dē), *n. pl.* [NL., < *Pleurotomaria* + *-idæ*.] A family of prosobranchiate gastropods, typified by the genus *Pleurotomaria*. The animal has the muzzle simple; there is no frontal veil, the tentacles are simple, and the eyes on pedicels exterior to their bases; two nearly symmetrical gills are developed, and lateral fringes, but no cirri, project from the sides; the shell is trochiform, and has a deep slit in the outer lip, leaving a fasciole on the completed whorls; the operculum is horny and multispiral or subspiral. Five living species, inhabiting deep tropical seas, are known, and many extinct species, ranging from the Silurian epoch upward, as the Liassic *Pleurotomaria anglica*. An ancient genus, ranging from the Devonian to the Trias, is *Porcellia*, of which a typical species is *P. puzosi*.

Porcellia puzosi, from the Carboniferous limestone.

pleurotomarioid (plö″rō-tọ-mā'ri-oid), *a.* and *n.* **I.** *a.* Of or relating to the *Pleurotomariidæ*.

II. *n.* A species of the family *Pleurotomariidæ*.

Pleurotomidæ (plö-rō-tom'i-dē), *n. pl.* [NL., < *Pleurotoma* + *-idæ*.] A family of toxoglossate gastropods, typified by the genus *Pleurotoma*. Most of them have the shell spindle-shaped, with a prolonged canaliculate aperture notched near the suture. It contains about 500 species, sometimes known as *fissure-shells*. See cuts under *Lachesis* and *Pleurotoma*.

pleurotomine (plö-rot'ọ-min), *a.* [< *Pleurotoma* + *-ine*[1].] Of or related to shells of the genus *Pleurotoma*.

pleurotomoid (plö-rot'ọ-moid), *a.* and *n.* [< *Pleurotoma* + *-oid*.] **I.** *a.* Of or relating to the *Pleurotomidæ*.

II. *n.* A shell of the family *Pleurotomidæ*.

pleurotransversalis (plö-rō-trans-vėr-sā'lis), *n.*; pl. *pleurotransversales* (-lēz). [NL., < Gr. πλευρά, the pleura, + NL. *transversalis*, q. v.] An anomalous muscular slip arising from the transverse process of the seventh cervical vertebra, and inserted into the top of the pleural sac.

pleurotribe (plö'rō-trīb), *a.* [< Gr. πλευρά, the side, + τρίβειν, rub.] In *bot.*, touching the side: said of certain zygomorphic flowers, especially adapted for cross-fertilization by external aid, in which the stamens and styles are so arranged or turned as to strike the visiting insect on the side. Such flowers are especially adapted to bees. *Phaseolus*, *Lathyrus sylvestris*, and *Polygala myrtifolia* are examples. Compare *nototribe* and *sternotribe*.

pleurotropous (plö-rot'rō-pus), *a.* [< Gr. πλευρά, the side, + τρέπειν, turn.] In *bot.*, having the faces flat: noting the stems of certain species of *Selaginella*. Compare *goniotropous*.

pleurovisceral (plö-rō-vis'e-ral), *a.* [< Gr. πλευρά, the side, + L. *viscera*, the internal organs: see *visceral*.] Pertaining to the side of the body and to viscera: specifically said of the connecting cord or loop between a pleural and a visceral nervous ganglion of an invertebrate, as a mollusk. Also *visceropleural*.

plevin† (plev'in), *n.* [Also *plevine*, < ME. **plevine*, < OF. *plevine*, *plevigne*, *pleuvine*, *plevene* (ML. *plevina*, *pleuvina*, *pluvina*), a pledge, warrant, assurance, < *plevir*, *pleivir*, *pleuvir*, *pluvir*, also *plever*, *pluver* = Pr. *plevir* (ML. reflex *plevire*, *plivire*), promise, engage, pledge, give in pledge, warrant, < L. *præbere*, proffer, offer, give (*præbere fidem*, give a pledge): see *prebend*. Cf. *pledge* and *replevin*, *replevy*.] In *law*, a warrant or an assurance.

plex (pleks), *v. i.* [< *plexus*.] To form a plexus.

plexal (plek'sąl), *a.* [< *plex-us* + *-al*.] Of or pertaining to a plexus.

plexed (plekst), *a.* [< L. *plexus*, plaited (see *plexus*), + *-ed*[2].] Plaited, netted, or made plexiform; plexiform.

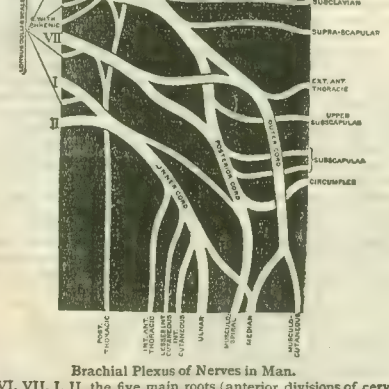
plexiform (plek'si-fôrm), *a.* [< L. *plexus*, a twining, plaiting (see *plexus*), + *forma*, form.] **1.** In the form of network; complicated. *Quincy*.—**2.** In *anat.*, specifically, formed into a plexus, as nerves; plaited: plexed.

pleximeter, plexometer (plek-sim'e-tėr, plek-som'e-tėr), *n.* [< Gr. πλῆξις, percussion (< πλήσσειν, strike: see *plague*), + μέτρον, measure.] In *med.*, an elongated plate, composed of ivory, india-rubber, or some similar substance, from 1½ to 2 inches in length, placed in contact with the body, commonly on the chest or abdomen, and struck with the percussion-hammer, in diagnosis of disease by mediate percussion. Also *plessimeter*, *plegometer*.

pleximetric (plek-si-met'rik), *a.* [< *pleximeter* + *-ic*.] Of or pertaining to the pleximeter or its use.

plexometer, *n.* See *pleximeter*.

plexor (plek'sọr), *n.* [NL., irreg. < Gr. πλῆξις, percussion, < πλήσσειν, strike: see *plague*.] That which strikes in percussion; a percussion-hammer.



plexure (plek'shūr), *n.* [< L. as if **plexura* (ML. ?), < *plectere*, pp. *plexus*, interweave: see *plexus*.] An interweaving; a texture; that which is woven together.

plexus (plek'sus), *n.* [< L. *plexus*, an interweaving, twining, plaiting, < *plectere*, pp. *plexus*, interweave, twine, plait: see *plait*.] **1.** A network; any collection of intimately coherent parts, as of an argument.

Antecedent and consequent relations are therefore not merely linear, but constitute a *plexus;* and this *plexus* pervades nature. *Amer. Jour. Sci.*, 3d ser., XXXI. 286.

A perfect *plexus* of ideas that mutually support and interpret one another. *Encyc. Brit.*, II. 55.

2. In *anat.*, an interlacing of nerves, vessels, or fibers; a net-like arrangement of parts, or the parts so disposed: especially said of certain delicate vascular membranes chiefly composed

Brachial Plexus of Nerves in Man.

V, VI, VII, I, II, the five main roots (anterior divisions of cervical and dorsal spinal nerves) of the plexus; other cords and continuations of the plexus are named in the figure.

of minute anastomosing blood-vessels, as the choroid plexus, and of similar arrangements of nerves of the spinal and sympathetic systems. —3. In *math.*, a system of one-fold relations. —**Aortic plexus,** the network of sympathetic nerves on the side and front of the abdominal aorta, between the origins of the superior and inferior mesenteric arteries. Also called *intermesenteric plexus.* —**Auerbach's plexus,** an extensive gangliated plexus of nerves lying between the longitudinal and the circular layer of the small intestine. Also called *myenteric plexus.* —**Axillary plexus,** Same as *brachial plexus.* —**Basilar plexus,** Same as *transverse sinus* (which see, under *sinus*). —**Brachial plexus,** See *brachial.* —**Cardiac plexus,** one of the three great prevertebral plexuses of the sympathetic, situated in the upper thoracic region in front, and between the aorta and the pulmonary artery, where these vessels are in contact. It receives the cardiac branches from the cervical ganglia and those of the vagus nerves, and gives off the nerves which supply the heart, together with some smaller branches which contribute to the nervous supply of the lungs. That division (the smaller) which lies in the concavity of the arch of the aorta is called the *superficial cardiac plexus,* while the *deep cardiac plexus* is placed behind the arch of the aorta, between it and the end of the trachea. —**Carotid plexus.** See *carotid.* —**Caudal plexus,** Same as *coccygeal plexus.* —**Cavernous plexus.** (*a*) The continuation of the carotid plexus in the cavernous sinus. (*b*) The continuation of the prostatic plexus, supplying the erectile tissue of the penis. Also called *cavernous nerves.* —**Cervical plexus,** the network of nerves formed by the anterior divisions of the four upper cervical nerves, giving off numerous nerves to the head, neck, and chest, and the phrenic nerve to the diaphragm. A similar plexing of posterior divisions of the three upper cervical nerves is known as the *posterior cervical plexus.* —**Choroid plexuses.** See *choroid.* —**Ciliary plexus,** a fine gangliated network formed from the ciliary nerves, spread over the choroid, and within the ciliary muscle, from which the nerves of the cornea, of the ciliary muscle, and of the iris are derived. —**Coccygeal plexus,** the connection formed between the anterior divisions of the fourth and fifth sacral and first coccygeal nerves. —**Cœliac plexus,** the sympathetic plexus of the cœliac artery, continued from the solar plexus, and dividing into the gastric, hepatic, and splenic plexuses. —**Colic plexuses,** divisions of the superior and inferior mesenteric plexuses accompanying the colic arteries. —**Coronary plexus.** (*a*) One of two plexuses, right and left, derived from the cardiac plexus, and accompanying the respective coronary arteries. (*b*) Same as *gastric plexus* (*b*). —**Cystic plexus,** a secondary plexus of the hepatic, to the gall-bladder. —**Deep jugular plexus,** a plexus of lymphatic vessels extending along the internal jugular vein to the base of the cranium. —**Deferential plexus,** the continuation of the vesical plexus upon the vasa deferentia and the seminal vesicles. —**Diaphragmatic plexus,** the phrenic plexus. —**Dorsispinal plexus,** a network of veins investing the arches of the vertebræ, and receiving branches from the contiguous muscles and skin of the back. —**Epigastric plexus,** the solar plexus, or solariplex. —**Esophageal plexus,** plexiform branches of the pneumogastric nerve on the esophagus. Also called *plexus gulæ.* —**Gastric plexus.** (*a*) One of two plexuses, anterior and posterior, formed by the left and right vagus nerves respectively. (*b*) A secondary plexus of the cœliac, accompanying the gastric artery. Also called *coronary plexus.* —**Gastro-epiploic plexuses,** secondary plexuses of the hepatic and splenic, accompanying the gastro-epiploic arteries. —**Hemorrhoidal plexus.** (*a*) A plexus of fine nerves derived from the pelvic, vesical, and inferior hemorrhoidal plexuses, penetrating the coats of the rectum. (*b*) A large and copiously anastomosing network of veins in the lower wall of the rectum, beneath the mucous coat, from which the hemorrhoidal veins proceed. —**Hepatic plexus,** the largest division of the cœliac plexus, accompanying the hepatic artery in the substance of the liver. —**Hypogastric plexus,** an intricate sympathetic plexus, formed by the prolongation of the aortic plexus on each side, lying in the interval of the common iliac arteries, invested by a sheath of areolar tissue. It divides into two parts below, one on each side of the pelvic viscera, forming the pelvic plexuses. Also called *superior hypogastric plexus.* —**Ileocolic plexus,** the division of the superior mesenteric plexus accompanying the ileocolic artery. —**Inferior dental plexus,** a plexus formed by the communications of the branches of the inferior dental nerve within the lower jaw. —**Inferior hypogastric plexus.** Same as *pelvic plexus.* —**Inferior mesenteric plexus,** a sympathetic plexus derived from the left lateral part of the aortic plexus, and surrounding the artery of the same name. —**Infra-orbital plexus,** a plexus formed by the union of the labial branches of the superior maxillary nerve with branches of the facial nerve. —**Interepithelial plexus,** the fine network of nerves among the cells of the epithelium of the cornea. —**Intermesenteric plexus.** Same as *aortic plexus.* —**Intermuscular plexuses,** gangliated nerve-plexuses in the substance of organs having unstriated muscle-fibers. —**Intraspinal plexus,** an irregular network of veins investing the spinal canal, emptying into the intercostal, lumbar, vertebral, and lateral sacral veins. —**Ischiatic plexus,** the upper part of the sacral plexus. —**Lumbar plexus.** See *lumbar*[1]. —**Meissner's plexus,** the gangliated plexus of the submucous layer of the small intestine, formed by branches derived from Auerbach's plexus. —**Meningeal plexus,** the continuation of the carotid plexus upon the middle meningeal artery. —**Mesenteric plexus,** the sympathetic plexus accompanying a mesenteric artery. The superior is derived from the great solar plexus; the inferior chiefly from the aortic plexus. —**Myenteric plexus.** Same as *Auerbach's plexus.* —**Obturator plexus,** the plexus of veins surrounding the obturator foramen. —**Ophthalmic plexus,** the continuation of the cavernous plexus on the ophthalmic artery. —**Ovarian plexus.** See *pampiniform plexus.* —**Pampiniform, pancreatic, patellar, pelvic plexus.** See the adjectives. —**Pancreaticoduodenal plexus,** a secondary plexus of the hepatic, accompanying the superior pancreaticoduodenal artery. —**Parotid plexus,** the anastomoses formed by loops of the seventh nerve on the side of the face. Also called *plexus* or *pes anserinus.* —**Pharyngeal plexus.** See *pharyngeal.* —**Phrenic plexus,** the sympathetic plexus which accompanies the phrenic artery to the diaphragm, arising from the semilunar ganglion. —**Plexus anserinus.** Same as *parotid plexus.* —**Plexus anserinus nervi mediani,** the bundles from the eighth cervical nerve that go to form the median nerve. —**Plexus brachialis,** the brachial plexus. —**Plexus cervicalis,** the cervical plexus. —**Plexus choroideus,** the choroid plexus of a lateral ventricle. —**Plexus choroideus inferior,** the choroid plexus of the fourth ventricle. —**Plexus choroideus medius,** the choroid plexus of the third ventricle. —**Plexus choroideus ventriculi lateralis,** the choroid plexus of a lateral ventricle. —**Plexus choroideus ventriculi quarti,** the choroid plexus of the fourth ventricle. —**Plexus choroideus ventriculi tertii,** the choroid plexus of the third ventricle. —**Plexus ganglioformis,** the lower ganglion, or ganglion of the trunk, of the vagus nerve. —**Plexus gulæ.** Same as *esophageal plexus.* —**Plexus lumbalis,** the lumbar plexus. —**Plexus nodosus,** the ganglion of the trunk of the vagus. —**Plexus patellæ,** the plexiform network of the kneepan, formed by cutaneous nerves, especially the long saphenous. —**Plexus sacralis,** the sacral plexus. —**Plexus submucosus.** Same as *Meissner's plexus.* —**Posterior cervical plexus,** a plexus often formed by the internal branches of the posterior divisions of the first three cervical nerves. —**Prevertebral plexuses,** the three large median plexuses formed by the two sympathetic nerves, situated in front of the spine, in the cavity of the thorax, abdomen, and pelvis, and respectively known as the *cardiac, solar,* and *hypogastric plexuses.* —**Prostatic plexus.** (*a*) The continuation of the vesical plexus supplying the prostate body. (*b*) A plexus of veins surrounding the base of the prostate, formed mainly from the dorsal veins of the penis. —**Pterygoid plexus,** a close network of veins covering both surfaces of the external pterygoid muscle, receiving tributaries mostly corresponding to the branches of the internal maxillary artery, and emptying into the internal maxillary vein. —**Pudendal plexus.** (*a*) A close net of large veins occupying the upper part of the pubic arch, between the layers of the triangular ligament, and mainly derived from the dorsal veins of the penis or clitoris. (*b*) The lower section of the sacral plexus (*a*). —**Pulmonary plexuses,** the two plexuses, the anterior and posterior, formed by branches of the vagus and sympathetic on the front and back side respectively of each lung at its root. —**Pyloric plexus,** a secondary plexus of the hepatic, accompanying the pyloric artery. —**Renal plexus,** a plexus formed of nerves from the semilunar ganglion, the solar and aortic plexuses, and the smallest splanchnic nerve, accompanying the renal artery and terminating in the substance of the kidney. —**Sacral plexus.** (*a*) A plexus formed by the union of the lumbosacral cord and anterior divisions of the three upper sacral nerves, together with a portion of that of the fourth. Its branches of distribution are the superior and inferior gluteal, great and small sciatic, pudic, and muscular. (*b*) A plexus of veins in the back of the pelvis, tributary to the middle sacral vein. —**Sacrococcygeal plexus,** the series of loops formed by the anastomoses of the external branches of the posterior divisions of the first three sacral nerves, the fourth and fifth posterior sacrals, and the posterior coccygeal. —**Santorinian plexus,** the pudendal plexus of veins. —**Solar plexus,** the largest of the three great sympathetic plexuses, situated at the upper part of the abdomen, behind the stomach, and in front of the aorta. It consists of an intricate network of nerves, associated with ganglia, receiving the upper splanchnic nerves and some branches of the vagus, and giving off numerous branches which accompany the arteries to the principal viscera of the abdomen, constituting secondary plexuses. Its two principal masses, right and left, are known, from their form, as the *semilunar ganglia.* Also called *epigastric plexus, solar ganglion.* —**Spermatic plexus.** (*a*) A small plexus, derived from the renal and aortic plexuses, accompanying the artery to the testis in the male, to the ovary and uterus in the female. (*b*) Same as *pampiniform plexus.* —**Spiral plexus,** the plexiform arrangement assumed in the spiral lamina by the nerve-filaments given off from the spiral ganglion of the cochlea. —**Splenic plexus,** one of the divisions of the cœliac plexus, accompanying the splenic artery into the substance of the spleen. —**Subepithelial plexus,** the delicate network, formed by the terminal filaments of the ciliary nerves, ramifying on the basement membrane of the ectocornea, or surface of the cornea proper, beneath the epithelium. —**Superficial jugular plexus,** lymphatic tributaries to the jugular trunk from the occipital, ear, and temporal regions. —**Superior dental plexus,** the series of loops formed by branches of the dental nerves of the upper jaw, from which the filaments given to the teeth are derived. —**Suprarenal plexus,** a secondary plexus derived from the solar plexus, terminating in the suprarenal body, and receiving branches from one of the splanchnic nerves. —**Tonsilar plexus,** a plexus formed around the tonsil by the tonsilar branches of the glossopharyngeal nerve. —**Triangular plexus,** the plexiform arrangement assumed by the bundles of fibers of the sensory root of the fifth nerve before ending in the Gasserian ganglion. —**Tympanic plexus,** a plexus formed by the branches of the tympanic nerve, in union with others from the facial and sympathetic, in the mucous lining of the middle ear. —**Uterine plexus.** (*a*) A plexus derived from the pelvic plexus, passing through the broad ligament with the uterine artery to be distributed to the uterus. (*b*) Venous channels at the sides of the uterus, and in the broad ligaments, emptying into the ovarian veins. —**Vaginal plexus,** a network of veins surrounding the vagina, especially in its lower part. —**Venous plexus,** an anastomosing set of veins, forming a network. There are several such, as the ovarian, pampiniform, pharyngeal, prostatic, pterygoid, spermatic, uterine, and vaginal. —**Vertebral plexus,** the sympathetic plexus on the vertebral artery, joined by filaments from the lower cervical nerves. —**Vesical plexus.** (*a*) A plexus of veins surrounding the muscular coat of the bladder. (*b*) A plexus derived from the pelvic plexus, distributed to the lower part and side of the bladder, the prostate, and the seminal vesicle. —**Vesicovaginal plexus,** a plexus derived from the pelvic plexus, distributed to the vagina and bladder. —**Vidian plexus,** the plexus formed by the Vidian nerve about the Vidian artery.

pleyt, *v.* and *n.* A Middle English form of *play*[1].

pleynt, pleynet. Obsolete forms of *plain*[1], *plain*[2], *plain*[3].

pliability (plī-a-bil'i-ti), *n.* [< *pliable* + *-ity* (see *-bility*).] The quality of being pliable; flexibility; pliableness.

Sweet *pliability* of man's spirit, that can at once surrender itself to illusions which cheat expectation and sorrow of their weary moments!

Sterne, Sentimental Journey, p. 84.

Pliability in politics, if accompanied by honesty, is a virtue. *H. Adams,* Gallatin, p. 577.

pliable (plī'a-bl), *a.* [< F. *pliable* = Pr. *plicable,* flexible, pliant, pliable, < L. as if **plicabilis,* that can be bent, < *plicare,* fold, bend: see *ply.*] 1. Easy to be bent; readily yielding to force or pressure without rupture; flexible: as, willow is a *pliable* plant.

The younger they are when they begin with that art [music], the more *pliable* and nimble their fingers are touching the instrument. *Sharp,* Works, VI. viii.

2. Flexible in disposition; easy to be bent, inclined, or persuaded; readily yielding to influence, arguments, persuasion, or discipline.

At the last, having found the citys *plyable* to theyr desyer, they bounde the one to another by othe, and wrought sure wyth hostages and money. *Golding,* tr. of Cæsar, fol. 146.

So is the heart of some men: when smitten by God it seems soft and *pliable.* *Jer. Taylor,* Works, II. xii.

Since I was of understanding to know we knew nothing, my reason hath been more *pliable* to the will of faith. *Sir T. Browne,* Religio Medici, i. 10.

=Syn. 1. Pliant, supple. —2. Compliant, yielding, tractable.

pliableness (plī'a-bl-nes), *n.* The quality of being pliable; flexibility; the quality of yielding readily to force or to moral influence; pliability: as, the *pliableness* of a plant; *pliableness* of disposition.

The chosen vessel hath by his example taught me this charitable and holy *pliablenesse.* *Bp. Hall,* Satan's Fiery Darts, iii. 5.

Compare . . . the ingenuous *pliableness* to virtuous counsels in youth, as it comes fresh and untainted out of the hands of nature, with the confirmed obstinacy in most sorts of sin that is to be found in an aged sinner. *South,* Sermons.

pliably (plī'a-bli), *adv.* In a pliable manner; yieldingly; compliantly.

This worthy Doctor [George Morley] . . . was . . . not of the number of those lukewarm irreligious Temporizers who had learn'd *pliably* to tack about, as still to be ready to receive whatever revolution and turn of affairs should happen. *Wood,* Athenæ Oxon., II. 771.

pliancy (plī'an-si), *n.* [< *plian*(*t*) + *-cy.*] The quality of being pliant, or easily bent or inclined in any desired direction; readiness to be persuaded or influenced: as, the *pliancy* of a rod; *pliancy* of disposition.

To be overlooked for want of political *pliancy* is a circumstance I need not blush to own.

Anecdotes of Bp. Watson, I. 305.

Avaunt all specious *pliancy* of mind
In men of low degree, all smooth pretence!
I better like a blunt indifference.
Wordsworth, A High-Minded Spaniard.

Jane, you please me, and you master me — you seem to submit, and I like the sense of *pliancy* you impart.
Charlotte Brontë, Jane Eyre, xxiv.

Insolence had taken the place of *pliancy,* and the former slave now applied the chain and whip to his master.
Motley, Dutch Republic, III. 158.

There was in Bacon an invariable *pliancy* in the presence of great persons which disqualified him for the task of giving wise and effectual counsel.
E. A. Abbott, Bacon, p. 21.

pliant (plī'ant), *a.* [< ME. *plyaunt,* < OF. *pliant, pleiant, ploiant,* F. *pliant,* flexible, supple, pliant, folding, < L. *plican*(*t-*)*s,* ppr. of *plicare* (> F. *plier*), fold: see *ply.*] 1. Capable of being easily bent; flexible; supple; limber; lithe: as, a *pliant* twig.

So *pliant* were
His goodly timber'd Limbs, and yet so stout,
That wax and steel seem'd kindly marry'd there.
J. Beaumont, Psyche, i. 61.

Me of a *pliant* metall you shall finde;
See then you cast and shape me to your minde.
Heywood, Dialogues.

Who foremost now delight to cleave
With *pliant* arm thy glassy wave?
Gray, Prospect of Eton College.

A well organized and very *pliant* hand may determine to occupations requiring manual dexterity.
Beddoes, Mathematical Evidence, note.

Pliant as a wand of willow. *Longfellow,* Hiawatha, vi.

Paint that figure's *pliant* grace.
M. Arnold, Switzerland, i.

2. Easily bent or inclined to any particular course; readily influenced for good or evil; easy to be persuaded; yielding.

I . . .
Took once a *pliant* hour, and found good means
To draw from her a prayer of earnest heart.
Shak., Othello, i. 3. 151.

No man has his servant more obsequious and *pliant.*
B. Jonson, Every Man out of his Humour, i. 1.

Whatsoever creates fear . . . is apt to entender the spirit, and make it devout and *pliant* to any part of duty.
Jer. Taylor, Holy Living, iv. 7.

His *pliant* soul gave way to all things base,
He knew no shame, he dreaded no disgrace.
Crabbe, Works, I. 63.

pliantly (plī'ant-li), *adv.* In a pliant manner; flexibly; yieldingly.

pliantness (plī'ant-nes), *n.* The quality of being pliant; flexibility.

plica (plī'kă), *n.*; pl. *plicæ* (-sē). [NL., < L. *plicare*, fold: see *ply*.] 1. In *pathol.*, a matted, filthy condition of the hair, from disease. Also called *plica polonica*, *helosis*, and *trichosis*.—2. In *bot.*, a diseased state in plants in which the buds, instead of developing true branches, become short twigs, and these in their turn produce others of the same sort, the whole forming an entangled mass.—3. In *zoöl.* and *anat.*, a fold or folding of a part.—4. In *entom.*, a prominent ridge or carina, often turned over or inclined to one side, so that it appears like a fold; specifically, a longitudinal ridge on the internal surface of each elytron, near the outer edge; an elytral ridge, found in certain *Coleoptera*.—5. In *herpet.*: (*a*) [*cap.*] A genus of American iguanoid lizards: named from the folds of skin on the sides. *J. E. Gray.* (*b*) A lizard of this genus: as, the dotted *plica*, *P. punctata*.—6. In *mensural music:* (*a*) A kind of grace-note. (*b*) A kind of ligature. (*c*) The stem or tail of a note.—**Elytral plica.** See def. 4, and *elytral*.—**Plica alaris**, in *ornith.*: (*a*) The feathered fold of skin on the fore border of the wing which occupies the reëntrant angle made by the bones of the upper arm and forearm, stretching from the shoulder to the wrist. (*b*) The bend or flexure of the wing at the carpal joint. [Rare.]—**Plicæ adiposæ.** Same as *alar ligaments* (which see, under *alar*).—**Plicæ rectovesicales.** Same as *plicæ semilunares Douglasii*.—**Plicæ semilunares Douglasii**, two folds of the peritoneum between the rectum and the bladder. See cut under *peritoneum*.—**Plica gubernatrix**, that peritoneal fold which is in relation with the gubernaculum testis.—**Plica interdigitalis**, in *ornith.*, the webbing or palmation of the toes; the palama.—**Plica primitiva**, in *embryol.*, the primitive fold; either lip of the primitive furrow of the early embryo of a vertebrate.—**Plica semilunaris**, in *human anat.*, a fold of conjunctival mucous membrane at the inner corner of the eye: the rudiment of a nictitating membrane or third eyelid. See cut under *eye*1.

Plicacea (plī-kā'sē-ă), *n. pl.* [NL., < *plica*, a fold, + *-acea*.] In *conch.*, a family of trachelipod gastropods, having the columella plaited, and containing the genera *Tornatella* and *Pyramidella*. *Latreille*, 1825.

plical (plī'kal), *a.* [< *plica* + *-al*.] In *bot.*, of or pertaining to plica.

Plicaria (plī-kā'ri-ă), *n.* [NL., < *plica*, a fold, + *-aria*.] In *conch.*, same as *Cancellaria*. *Fabricius*, 1823.

plicata (plī-kā'tă), *n.*; pl. *plicatæ* (-tē). [ML., fem. of L. *plicatus*, pp. of *plicare*, fold: see *plicate*.] In the *Rom. Cath. Ch.*, the folded chasuble worn at certain penitential seasons by the deacon and subdeacon, or by a priest when officiating as deacon. *McClintock and Strong.*

plicate (plī'kāt), *a.* [< L. *plicatus*, pp. of *plicare*, fold, bend, lay or wind together, double up. see *ply*.] 1. In *bot.*, folded like a fan; plaited: as, a *plicate* leaf.—2. In *zoöl.* and *anat.*, plaited, plexed, or folded; formed into a plication.—3. In *entom.*, having parallel raised lines which are sharply cut on one side, but on the other descend gradually to the next line, as a surface; plaited or folded. Also *plicative*, *plicated*.

Plicate Leaf of *Alchemilla vulgaris*.

Plicate elytra, elytra having two or three conspicuous longitudinal folds or furrows, as in the coleopterous family *Pselaphidæ*.—**Plicate wings**, in *entom.*, same as *folded wings* (which see, under *fold*1).

plicated (plī'kā-ted), *a.* [< *plicate* + *-ed*2.] Same as *plicate*.

plicately (plī'kāt-li), *adv.* In a plicate or folded manner; so as to be or make a plication.

plicatile (plik'a-til), *a.* [< L. *plicatilis*, that may be folded together, < *plicare*, fold: see *plicate*.] 1†. Capable of being folded or interwoven; pliable.

Motion of the *plicatile* fibers or subtil threds of which the brain consists.
Dr. H. More, Antidote against Atheism, App., x.

2. In *entom.*, folding lengthwise in repose, as the wings of a wasp.

plication (plī-kā'shon), *n.* [< ML. **plicatio(n-)*, a folding, < L. *plicare*, fold: see *ply*.] 1. The act or process of folding, or the state of being put in folds; a folding or putting in folds, as duplication or triplication. Also *plicature*.

The peculiar surface-marking . . . consists in a strongly marked ridge-and-furrow *plication* of the shelly wall.
W. B. Carpenter, Micros., § 487.

2. That which is plicated; a plica or fold. Also *plicature*.

Why the deuce should you not be sitting precisely opposite to me at this moment, . . . thy juridical brow expanding its *plications*, as a pun rose in your fancy?
Scott, Redgauntlet, letter i.

3. In *geol.*, a bending of the strata; a fold or folding.

In Western Europe the prevalent lines along which terrestrial *plications* took place during Palæozoic time were certainly from S. W. or S.S.W. to N.E. or N.N.E.
Geikie, Text-Book of Geol. (2d ed.), p. 270.

plicative (plik'a-tiv), *a.* [< *plicate* + *-ive*.] Same as *plicate*.

plicatopapillose (plī-kā-tō-pap'i-lōs), *a.* [< L. *plicatus*, plicate, + NL. *papillosus*, papillose.] In *entom.*, plicate and papillose; forming a series of elevations and depressions resembling folds, as the papillose surfaces of certain larvæ.

plicator (plī-kā'tor), *n.* [< L. as if **plicator* (cf. L. fem. *plicatrix*), a folder (ML. *plicator*, a collector of taxes), < L. *plicare*, fold: see *ply*.] A device for forming a fold or plait: an attachment to some forms of sewing-machine, etc.

Plicatula (plī-kat'ū-lă), *n.* [NL. (Lamarck, 1801), < L. *plicatus*, pp. of *plicare*, fold: see *plicate*, *ply*.] In *conch.*, a genus of bivalve mollusks of the family *Spondylidæ*, having the shell irregular, attached by the umbo of the right valve, which is plicate, the cartilage internal, and the hinge-teeth two in each valve.

Plicatula cristata.

plicatulate (plī-kat'ū-lāt), *a.* [< NL. **plicatulus*, dim. of L. *plicatus*, folded: see *plicate*.] In *bot.*, minutely plicate.

plicature (plik'a-tūr), *n.* [< L. *plicatura*, a folding, < *plicare*, pp. *plicatus*, fold: see *plicate*.] Same as *plication*, 1, 2.

The many *plicatures* so closely prest.
Dr. H. More, Psychozoia, i. 18.

plicidentine (plis-i-den'tin), *n.* [< NL. *plica*, a fold, + E. *dentine*.] Plicated or folded dentine; a kind of dentine which is folded on a series of vertical plates, causing the surface of the tooth to be fluted. *Brande and Cox.*

pliciferous (plī-sif'e-rus), *a.* [< NL. *plica*, a fold, + L. *ferre* = E. *bear*1.] Provided with folds or plicæ: specifically, in entomology, said of those elytra which have an internal plica or ridge.—**Pliciferous Coleoptera**, those *Coleoptera* which have pliciferous elytra.

pliciform (plis'i-fôrm), *a.* [< NL. *plica*, a fold, + L. *forma*, form.] In *bot.* and *zoöl.*, plait-like; having the form of a plait or fold.

Plicipennes (plis-i-pen'ēz), *n. pl.* [NL., < *plica*, a fold, + L. *penna*, a feather.] In Latreille's classification, the third family of neuropterous insects; the caddis-flies. It corresponds to the *Phryganeidæ* in a broad sense, or the *Trichoptera* of Leach. Also *Plicipennia*.

plicipennine (plis-i-pen'in), *a.* Belonging to the *Plicipennes*.

Plictolophinæ (plik-tol-ō-fī'nē), *n. pl.* [NL., < *Plictolophus* + *-inæ*.] Cockatoos as a subfamily of *Psittacidæ:* same as *Cacatuinæ*.

Plictolophus (plik-tol'ō-fus), *n.* [NL., orig. *Plyctolophus* (Vieillot, 1816), later *Plectolophus* (Bourjot St. Hilaire, 1837–8), *Pluctolophus* (Nitzsch, 1840), *Plissolophus* (C. W. L. Gloger, 1842), and *Plictolophus* (Otto Finsch, 1867), < Gr. **πλικτός*, assumed verbal adj. of *πλίσσειν*, cross one's leg in walking, stride, + *λόφος*, a crest.] A genus of cockatoos: same as *Cacatua*.

pliet, *v.* An obsolete spelling of *ply*.

plié (plē-ā'), *a.* [F. *plié*, bent, pp. of *plier*, bend: see *ply*, *plicate*.] In *her.*, same as *close*2: said of a bird.

plier (plī'ėr), *n.* [Also, less prop., *plyer* (cf. *crier*, *flier*, *trier*); < *ply* + *-er*1.] 1. One who or that which plies.—2. *pl.* In *fort.*, a kind of balance used in raising and letting down a drawbridge, consisting of timbers joined in the form of a St. Andrew's cross.—3. *pl.* Small pincers with long jaws, adapted for handling small articles, and also for bending and shaping wire. See cut under *nipper*.—**Saw-set pliers**, a form of adjustable pliers sometimes used in place of the saw-set for bending the teeth of saws.

plif (plif), *n.* A dialectal form of *plow*. *Halliwell.* [Yorkshire, Eng.]

pliform† (plī'fôrm), *a.* [Prop. **plyform*; < *ply* + *form*.] In the form of a fold or doubling. *Pennant*.

plight1 (plīt), *n.* [< ME. *plight*, *plyght*, *pligt*, *pliht*, danger, pledge, < AS. *pliht*, danger, damage, = OFries. *plicht*, danger; cf. OFries. *plicht*, care, concern, = MD. *plicht*, *plecht*, duty, debt, D. *pligt*, duty, = MLG. LG. *plicht* = OHG. *phliht*, *flíht*, MHG. *pflíht*, *phliht*, friendly care, concern, service, duty, G. *pflicht*, duty, = Sw. Dan. *pligt* (< LG. ?), duty; with abstract formative *-t*, from the verb found in the rare AS. **pléon*, *plión* (a strong verb, pret. *pleah*, *plēh*), expose to danger, risk (whence also *pleoh*, *plioh*, contr. *pleó*, *plió* = OFries. *plē*, *plī*, danger), or in the related weak verb, OS. *plegan*, promise, pledge, = OFries. *plegia*, *pligia*, be wont, = MD. *pleghen*, be wont, practise, take care of, D. *plegen*, pledge, be wont, = MLG. *plegen* = OHG. *pflegan*, *phlegan*, *phlekan*, *plegan*, MHG. *phlegen*, *pflegen*, G. *pflegen*, promise or engage to do, take care of, keep, be accustomed (etc.), = Sw. *pläga* = Dan. *pleje*, be wont, = AS. *plegan*, *plegian*, play, orig. be in active motion: see *play*1. The OF. *plevir*, pledge, cannot be from the Teut. (OS. *plegan*, etc.), but is to be referred, with the OF. *pleige*, ML. *plegium*, etc. (whence E. *pledge*), to the L. *præbere*, proffer, give: see *plevin*, *pledge*. The word *plight*1 has been confused with *plight*2, state, condition: see *plight*2.] 1†. Peril; danger; harm; damage.

He [hath] mi lond with mikel onrith,
With michel wrong, with mikel *plith*,
For I ne misdede him nevere nouth,
And havede me to sorwe brouth.
Havelok (1370). (*Halliwell.*)

2. A solemn promise or engagement concerning a matter of serious personal moment; solemn assurance or pledge.

That lord whose hand must take my *plight* shall carry
Half my love with him. *Shak.*, Lear, i. 1. 108.

So these young hearts, not knowing that they loved,
Not she at least, nor conscious of a bar
Between them, nor by *plight* or broken ring
Bound . . . *Tennyson*, Aylmer's Field.

In plight†, under promise or pledge.

Thus they justtyd tylle hyt was nyght,
Then they departyd *in plyght*,
They had nede to reste.
MS. Cantab. Ff. ii. 38, f. 76. (*Halliwell.*)

plight1 (plīt), *v. t.* [< ME. *plighten*, *plyghten*, *pligten*, *plygten*, *plihten*, pledge, < AS. *plihtan*, imperil, bring danger upon; = D. *ver-pligten*, *ver-plichten* = MLG. *plichten* = MHG. *pflihten*, *phlihten*, G. *bei-pflichten*, *ver-pflichten* = Sw. *bepligta*, *för-pligta* = Dan. *for-pligte*, *til-pligte*, pledge, engage, bind; from the noun.] To engage by solemn promise; pledge; engage or bind one's self by pledging: as, to *plight* one's hand, word, honor, faith, truth, vows, etc.

Ye woot right wel what ye bihighten me,
And in myn hand your trouthe *plighten* ye
To love me best. *Chaucer*, Franklin's Tale, l. 600.

Pylgrimis and palmers *plyghten* hem to-gederes,
To seche seint Iame and seyntys of rome.
Piers Plowman (C), i. 47.

And for to put hir out of fere,
He swore, and hath his trouth *plight*
To be for ever his owne knight.
Gower, Conf. Amant., iv.

Dearer is love then life, and fame then gold;
But dearer then them both your faith once *plighted* hold.
Spenser, F. Q., V. xi. 63.

By this fair fount hath many a shepherd sworn,
And given away his freedom, many a troth
Been *plight*. *Fletcher*, Faithful Shepherdess, i. 2.

Have we not *plighted* each our holy oath,
That one should be the common good of both?
Dryden, Pal. and Arc., i. 291.

=Syn. *Pledge*, *Plight*. *Pledge* is applied to property as well as to word, faith, truth, honor, etc. *Plight* is now chiefly poetic or rhetorical; to *plight* honor is, as it were, to deposit it in *pledge* for the performance of an act—not often for the truth of a statement—to be forfeited if the act is not performed.

They have a very long, slim, sinuous neck; long, slender, straight, and acute bill; broad fan-shaped tail, with stiff rectrices, of which the middle pair are crinkled or fluted; naked lores; and rudimentary gular sac. There is only one genus, *Plotus* or *Anhinga*, with several species, inhabiting swamps and marshes of warm countries in both hemispheres. See *anhinga*, *darter*, *Plotus*.

Plotinian (plō-tin'i-an), *a.* [< *Plotinus* (see *Plotinism*) + *-ian*.] Of or pertaining to Plotinus or the Plotinists, or their doctrines.

Plotinism (plō-tī'nizm), *n.* [< LL. *Plotinus*, < Gr. Πλωτῖνος, Plotinus, a Greek philosopher of the 3d century, + *-ism*.] The doctrine of Plotinus or of the Plotinists.

Plotinist (plō-tī'nist), *n.* [< *Plotin-us* + *-ist*.] A disciple of Plotinus. See *Neoplatonism*.

plot-proof (plot'prōf), *a.* Proof against plots; not to be hurt by a plot or plots. [Rare.]

The harlot-king
Is quite beyond mine arm, out of the blank
And level of my brain, *plot-proof*.
Shak., W. T., ii. 3. 6.

plotter[1] (plot'ėr), *n.* [< *plot*[1], *v.*, + *-er*[1].] One who plots, in any sense; especially, one who contrives; a contriver; a conspirator.

plotter[2] (plot'ėr), *v. i.* Same as *plouter*.

Miss's pony has trodden dahn two rigs o' corn, and *plottered* through, raight o'er into t' meadow.
E. Brontë, Wuthering Heights, ix.

plottie (plot'i), *n.* [< *plot*[2].] A sort of mulled wine. [Scotch.]

Get us a jug of mulled wine—*plottie*, as you call it.
Scott, St. Ronan's Well, xxviii.

plotting[1] (plot'ing), *n.* [Verbal n. of *plot*[1], *v.*] The act of making a plot. Specifically—(*a*) The act of making a plan or map. (*b*) The act of forming or attempting a stratagem or conspiracy.

plotting[2] (plot'ing), *n.* [Verbal n. of **plot*, *v.*, < F. *peloter* (pron. plo-tā'), form into a ball, < *pelote*, a ball: see *pellet*. Cf. *platoon*.] In *soap-making*, the operation of forming the paste into cakes by means of heavy pressure.

The soap is ready for the final operation, known as *plotting* (from the French pelotage), in which the paste is subjected to enormous pressure, sometimes 3000–4000 lb. a sq. in., to form it into cakes, or into continuous bars from which cakes may be cut.
W. L. Carpenter, Soap and Candles, p. 200.

plottingly (plot'ing-li), *adv.* In a plotting manner; as a plotter.

The walls were covered with curious old Dutch prints . . . There was Frederick the Great, with head drooped *plottingly*, and keen sidelong glance from under the three-cornered hat. *Lowell*, Cambridge Thirty Years Ago.

plotting-machine (plot'ing-ma-shēn'), *n.* A form of press for shaping soap-paste into bars or cakes. See *plotting*[2].

plotting-scale (plot'ing-skāl), *n.* A scale used for setting off the lengths of lines in surveying. It consists of two graduated scales, made of ivory, silver, brass, or boxwood. One of these scales is pierced along nearly its whole length by a dovetail-shaped groove, for the reception of a sliding-piece. The second scale is attached to this sliding-piece, and moves along with it, the edge of the second scale being always at right angles to the edge of the first. By this means the rectangular coördinates of a point are measured at once on the scales, or the position of the point is laid down on the plan.

Plotus (plō'tus), *n.* [NL. (Linnæus, 1766), < Gr. πλωτός, sailing, floating, < πλώειν, var. of πλέειν, πλεῖν, sail: see *flow*[1].] The only genus of the family *Plotidæ*. *P. anhinga* is the common darter, anhinga, snake-bird, or water-turkey of America; *P. levaillanti* is African; *P. melanogaster*, Indian; *P. novæhollandiæ*, Australian. Also called *Ptynx* and *Plottus*. See cut under *anhinga*.

plounce† (plouns), *v. i.*; pret. and pp. *plounced*, ppr. *plouncing*. [Appar. a var. of *plunge* (ME.

plongen, ploungen, etc.), accom. to *flounce*[1].] To plunge.

Our observation must not now launch into the whirlpool, or rather *plounce* into the mudd and quagmire, of the people's power and right pretended, That the sovereignty is theirs, and originally in them.
Bp. Hacket, Abp. Williams, II. 200. (*Davies.*)

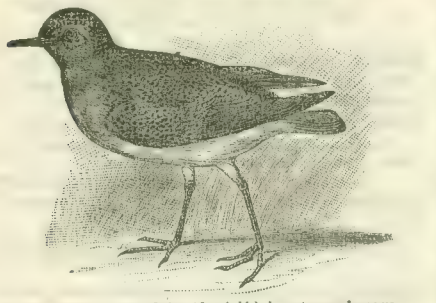
plounget, *v.* A Middle English form of *plunge*.

plousiocracy, *n.* See *plusiocracy*.

plout[1] (plout), *v. i.* [Cf. *plod*[2]. Hence freq. *plouter, plotter*[2], etc.] To wade or flounder through water or mire. [North. Eng. and Scotch.]

plout[2] (plout), *v. t.* Same as *plot*[2]. [Scotch.]

plouter (plou'tėr), *v. i.* [Also *plotter, plowder;* freq. of *plout*[1].] To dabble or paddle in water or mire. [North. Eng. and Scotch.]



plouter (plou'tėr), *n.* [< *plouter, v.*] A dabbling or playing in water; a splashing bath. [Scotch.]

Shepherd. Faith, I think I shall tak a *plouter*. (Shepherd retires into the marble bath. . . . The hot water is let on with a mighty noise.)
Wilson, Noctes Ambrosianæ, III. 226.

plout-net (plout'net), *n.* [Appar. var. of *pout-net* (perhaps affected by *plait*).] A small stocking-shaped river-net attached to two poles. [Eng.]

ploutocracy, ploutocrat, etc. See *plutocracy*, etc.

plover (pluv'ėr), *n.* [< ME. *plover, plovere*, < OF. *plovier*, F. *pluvier*, a plover, < ML. **pluvi-arius, pluvarius*, a plover, so called because it appears during the rainy season; prop. adj., equiv. to L. *pluvialis*, of the rain (cf. NL. *Pluvi-ales*, pl., the plovers), < *pluvia*, rain: see *pluvious*.] 1. A bird of the family *Charadriidæ* and genus *Charadrius, C. pluvialis*. This bird, more fully called the *golden, yellow*, or *green plover*, is very widely distributed in the Old World, breeding in high latitudes, and performing extensive migrations during the spring and fall. It is about 10½ inches long and 22½ in extent of wings, the wing 7 inches, the bill $\frac{9}{10}$ inch, the tarsus $1\frac{3}{4}$ inches. The upper parts are black, and profusely spotted with yellow and white; the under parts are black in the breeding-dress, whitish in winter, variously mottled or speckled during the changes of plumage. The bill and feet are black; the feet are three-toed. The plover lays four eggs, $1\frac{9}{10}$ inches long by $1\frac{1}{3}$ broad, of a piriform shape, drab color, with heavy brownish or blackish blotches.

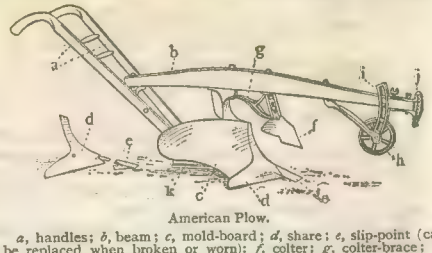
Golden Plover (*Charadrius pluvialis*), in autumn plumage.

Crook-billed Plover (*Anarhynchus frontalis*).

Hence — 2. Some or any bird of the family *Charadriidæ;* a charadriomorphic grallatorial bird. The American golden plover, or field-plover, is *Charadrius dominicus*, very closely resembling *C. pluvialis*, but having ashy-gray instead of white axillars. The Swiss bullhead, or black-bellied plover, is *Squatarola helvetica*, inhabiting most parts of the world, and having four toes. (See cut under *Squatarola*.) Many small plovers with white under parts, and rings or bands of black on the head, neck, or breast, are known as *ring-plovers* or *ring-necks*, and mostly belong to the genus *Ægialites*. (See also *killdee*.) The most singular of these is the crook-billed plover, *Anarhynchus frontalis*, having the bill bent sidewise. It inhabits New Zealand. The mountain-plover of the western United States is *Ægialitis montanus*. Some plovers are known as *dotterels*. (See *dotterel* and *Eudromias*.) The thickknees, stone-plovers, or stone-curlews are birds of the family *Œdicnemidæ*. (See cut under *Œdicnemus*.) Stilt-plovers are the stilts, *Himantopinæ*. (See cut under *stilt*.) The crab-plover is *Dromas ardeola*. "Plovers' eggs," so called in England, are laid by the lapwing, *Vanellus cristatus*.

So-called Plover's Egg (that of *Vanellus cristatus*).

3. In various parts of the United States, the Bartramian sandpiper, *Bartramia longicauda*, more fully called *upland, highland, pasture, field, corn-field, prairie, grass*, and *plain plover*. See cut under *Bartramia*. — 4. The greater or lesser yellowshanks, *Totanus melanoleucus* or *T. flavipes*, commonly called *yellow-legged plovers*. [Local, U. S.] — 5†. A loose woman: otherwise called a *quail*.



Here will be Zekiel Edgworth, and three or four gallants with him at night, and I have neither *plover* nor quail for them; persuade this . . . to become a bird o' the game.
B. Jonson, Bartholomew Fair, iv. 3.

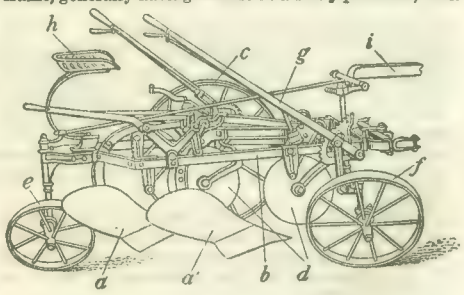
(*b*) *Squatarola helvetica*. (*c*) The Norfolk plover. [Various localities.] — **Wry-billed plover,** the crook-billed plover. See second cut above. — **Yellow plover,** the golden plover. [East Lothian.] (See also *lark-plover, marsh-plover, piping-plover, stone-plover*.)

plover-quail (pluv'ėr-kwāl), *n.* Any bird of the genus *Pedionomus*.

plover-snipe (pluv'ėr-snīp), *n.* Any bird of the group *Pressirostres*.

★**plow, plough** (plou), *n.* [Also dial. (Sc.) *pleugh, pleuch;* < ME. *plow, plowe, plough, ploughe, plowghe, plouz, plouh, ploghe, plughe, ploh*, a plow, plowland, < AS. *plōh* (rare), a plowland (not found in AS. in the sense of 'plow,' for which the reg. word was *sulh*, > E. dial. *sull, sullow*), = OFries. *plōch* = D. *ploeg* = MLG. *plōch, plūch* = OHG. *pfluog, pfluoh, phluog, fluog, fluoc, plōh, pluag*, MHG. *phluoc, pfluoc*, G. *pflug* = Icel. *plōgr* = Sw. *plog* = Dan. *plov*, a plow; perhaps from the root of *play*[1] (AS. *plegan*) and *plight*[1] (AS. *pliht*), with ref. to the activity or labor involved: cf. MHG. *phluoc, pfluoc*, business, occupation, maintenance. Like *play* and *plight*, the word *plow* belongs only to Teut. (the Slav., etc., forms, OBulg. *plugŭ* = Russ. *plugŭ*, etc., = Lith. *pliugas*, are from OHG.). It is not found in Goth., where *hōha*, plow. Cf. Icel. *ardhr*, Norw. *ar, al*, plow, related to L. *aratrum*, a plow (see *aratrum terræ*), MHG. *arl*, a plowshare, from the same ult. root (see *ear*[3]). The explanations which connect *plow* with the Gr. *πλοῖον* = Skt. *plava*, a ship, or with the Gael. *ploc*, a block of wood, stump of a tree (and hence, as Skeat supposes, a primitive plow), are untenable.] 1. An agricultural implement, drawn by animals or moved by steam-power, used to cut the ground and turn it up so as to prepare it for the reception of seeds. The soil is cut to a depth of several inches, raised up, and turned over by the progress of the plow, the object being to expose a new surface to the air and, by pulverizing and loosening the soil, to fit it for the reception of seed and the vigorous growth of crops. The plow, in various forms, is also much used for other purposes. In its modern form, the common agricultural plow essentially consists of a *plow-beam* provided with a *clevis* for attachment of draft-animals; *handles*, connected with each other and cross-braced by the *rounds;* a *mold-board*, usually of cast-iron; a *plowshare*, usually of steel, or steel-pointed, and bolted to the mold-board; a *land-side*, usually of cast-iron, attached to the mold-board near the front edge of the latter and in line with the beam; a *colter*, of wrought-iron with a tempered-steel edge, attached to the beam in line with the front edge of the mold-board; and a *standard* or *sheath*, projecting upward from and usually integral with the mold-board, and connecting it with the beam. The rear end of the beam is attached to the land-side handle, one handle being attached to the rear part of the land-side and the other to the rear part of the mold-board. Often a wheel is adjustably attached to the beam near the clevis, for gaging the depth of the furrow.

American Plow.



a, handles; *b*, beam; *c*, mold-board; *d*, share; *e*, slip-point (can be replaced when broken or worn); *f*, colter; *g*, colter-brace; *h*, wheel (gages depth of furrow); *i*, arc by which the wheel is set to regulate depth of furrow; *j*, clevis; *k*, land-side.

2. Figuratively, tillage; culture of the earth; agriculture. *Johnson.* — 3. A tool that furrows, grooves, planes, cuts, or otherwise acts by pushing or shoving, like a plow. (*a*) In *woodworking*, a kind of plane used for grooving door-stiles and similar work. It has an adjustable fence, and is usually adapted to carry eight different widths of plane-irons, for different widths of grooves. (*b*) In *cloth-manuf.*, an instrument for cutting the flushing parts of the pile or nap of fustian. (*c*) The cutting-knife of a plow-press. (*d*) In *bookbinding*, a hand-implement for cutting or trimming the edges of books. Machines for the same purpose have rendered the bookbinders' plow almost obsolete. (*e*) A narrow shovel used in malting to bring the grains underneath to the surface. (*f*) A rimmer or fatting-knife: as, a mackerel-*plow*. See *rimmer*. (*g*) A hanging connection extending from a car propelled by electricity through the slot of the underground conduit, by means of which the current is conveyed to the motor on the car.

4†. A plowland.

And I'll gie him to his dowry
Full fifty *ploughs* of land.
Childe Vyet (Child's Ballads, II. 76).

Black-land plow, a plow specially adapted to plowing rich soil free from stones, as the black lands of prairies. — **Double mold-board plow,** a plow which, instead of a land-side, has a second mold-board with curvature the reverse of the ordinary mold-board, so that it turns a double furrow, throwing the earth in opposite directions. It is used for making surface-drains, ridging up, etc. — **Double plow.** (*a*) A plow by which two furrows can be turned at the same time; a gang-plow consisting of two single plows. (*b*) A plow which can be adjusted to turn a furrow either to the right or to the left. Also called *drill-plow, reversible plow*, and *turning mold-board plow*. — **Gang-plow,** two or more plows attached to a single stock or frame, generally having wheels as a sulky-plow has, with adjustable devices for regulating the depth of furrows, and also a seat for the plowman, except when moved by steam. Compare *steam-plow*. — **Hand-plow,** a light small plow sometimes used in gardening, drawn or pushed by hand. — **Hoe-plow.** Same as *horse-hoe*. — **Mole-plow,** a plow with a long standard or sheth, to the lower part of which is attached an iron shoe or burrowing-tool which makes a burrow under the surface without turning a furrow. It is used for under-draining. The shoe is sometimes so attached to the lower part of the sheth as to permit its free motion around stones, etc. — **Paring-plow.** Same as *sod-plow* (which see). — **Pillow of a plow.** See *pillow*. — **Reversible plow.** Same as *double plow* (*b*). — **Seeding-plow,** a plow with a box for holding and scattering seed in the path of the furrow. — **Skim-colter plow,** a plow having in advance of the mold-board of the principal plow a small inclined share or scraper, which cuts off weeds and scrapes them, and sometimes spreads manure, into the furrow previously plowed, where the main plow covers them. — **Skim-plow,** a plow cutting off a shallow slice from the surface of land, for killing out weeds. Also called *skim*. — **Side-hill plow,** a plow with a reversible mold-board, which can be turned to throw the furrow downhill in plowing in opposite directions along the side or slope of a hill. Also called *hillside-plow* and *turn-wrest plow*. — **Shovel-plow,** a plow with a triangular share, but having no mold-board. It is used for cultivating growing crops. The double shovel-plow has a very broad triangular share attached to two standards. — **Skeleton-plow,** a plow in which the parts bearing against the soil are made in skeleton form, to lessen friction. *E. H. Knight.* — **Steam-plow,** a heavy plow or gang of plows driven

Gang-plow.

a, rear plow; *a'*, front plow; *b*, frame-bar; *c*, land-wheel; *d*, coulter-wheel; *e*, caster-wheel; *f*, furrow-wheel; *g*, furrow-lever; *h*, seat; *i*, pole.

by steam-power. Steam-plows, operating on various principles, are in use in farming on a large scale. Some are driven by a single stationary engine, which winds an endless rope (generally of wire) passing over pulleys attached to an apparatus called the *anchor*, fixed at the opposite headland, and round a drum connected with the engine itself. Others are driven by two engines, one at each headland, thus superseding the anchor. As steam-plowing apparatus are usually beyond both the means and the requirements of any but the largest farmers, companies have been formed at various places for hiring them out. Locomotive engines drawing gangs of plows have been tried, but compact the soil so injuriously that their use has been practically abandoned.—**Straddle-plow**, a plow with two triangular parallel shares set a little apart, used for running on each side of a row of dropped corn for covering the seed. *E. H. Knight.*—**Subsoil-plow**, a plow with a long standard and a share, but having no mold-board. Following the ordinary plow, it loosens the earth in the bottom of the ordinary furrow, while itself turning no furrow.—**Sulky-plow**, a plow attached to an axle with two wheels, the axle carrying a seat for the plowman and mechanism for adjusting and guiding the plow. *E. H. Knight.*—**The Plow**, the prominent seven stars in the constellation of the Great Bear, Charles's Wain.—**To hold the plow.** See *hold*[1].—**To put one's hand to the plow**, figuratively, to begin a task; commence an undertaking.—**Turn-wrest plow.** Same as *side-hill plow*.—**Wheel-plow.** (*a*) A plow in which the depths of furrows are gaged by a wheel or wheels attached to the plow and running upon the surface of the land. (*b*) A plow having a wheel in the space between the land-side and the mold-board, reducing the friction of the plow by bearing the weight. *E. H. Knight.* (See also *balance-plow*, *ice-plow*, *prairie-plow*, *snow-plow*, *sod-plow*.)

plow, plough (plou), *v.* [< ME. *plowen* (?), *plowghen* = D. *ploegen* = MLG. *plogen* = MHG. *phluogen*, *pfluogen*, G. *pflügen* = Icel. *plægja* = Sw. *plöja* = Dan. *pløje*, plow; from the noun. The older verb for 'plow' is *ear:* see *ear*[3].]

I. *trans.* 1. To turn up with a plow; till.

I should be vnwilling to go thither, . . . much lesse to carry an Oxe or an Horse with me to *plough* the ground. *Coryat*, Crudities, I. 83.

It 's I hae fifty acres of land;
It 's a *plow'd* and sawn already.
Glasgow Peggy (Child's Ballads, IV. 78).

2. To make furrows, grooves, or ridges in, as with a plow; furrow; figuratively, to move through like a plow; make one's way through.

Let
Patient Octavia *plough* thy visage up
With her prepared nails.
Shak., A. and C., iv. 12. 38.

Here 's a health to the mariners
That *plough* the raging main.
Mary Hamilton (Child's Ballads, III. 125).

3. To effect as with a plow; traverse like a plow.

A Fleet for Gaul addrest
Ploughs her bold course across the wondering seas.
Wordsworth, Eccles. Sonnets, ii. 15.

4. To trim or square, as the edges of paper, with a plow. See *plow*, *n.*, 3 (*d*).

Cutting or *ploughing* the edges [of a book] with a knife-edged instrument called the plough. *Encyc. Brit.*, IV. 43.

5. To cut or gash (a fish) with the plow or rimmer. [American fisheries.]—6. To reject, as a candidate in an examination; pluck. [British university slang.]

"I have been cramming for smalls; and now I am in two races at Henley, and that rather puts the snaffle on reading and gooseberry pie, . . . and adds to my chance of being *ploughed* for smalls." "What does it all mean?" inquired mamma, "'gooseberry pie' and 'the snaffle' and '*ploughed?*'" "Well, the gooseberry pie is really too deep for me; but '*ploughed*' is the new Oxfordish for 'plucked.'"
C. Reade, Hard Cash, Prol.

To plow in, to cover by plowing: as, to *plow in* wheat.—**To plow up or out**, to turn out of the ground by plowing.

All Egypt shall be *plough'd up* with dishonour.
Fletcher (and another), False One, iv. 1.

The Arctic glaciers reach the sea, enter it, often *ploughing up* its bottom into submarine moraines.
Tyndall, Forms of Water, p. 134.

II. *intrans.* To turn up the soil with a plow; till the soil with a plow.

He that *plougheth* shall *plough* in hope. 1 Cor. ix. 10.

plowable, ploughable (plou'a-bl), *a.* [< *plow*, *plough*, + *-able*.] Capable of being plowed; arable.

plow-almst (plou'ämz), *n.* A small coin paid to the church in England, in the early Anglo-Saxon period, for every plowland, or for every use of a plow between certain fixed dates.

plow-beam (plou'bēm), *n.* [< ME. *plow-beem*, *ploghe-beme*; < *plow* + *beam*.] The solid horizontally projecting part of the frame of a plow, by which it is drawn. See cuts under *plow*.

He was a little annoyed when Magill, getting down from the *plow-beam*, stopped him.
E. Eggleston, The Graysons, xvi.

plow-bolt (plou'bōlt), *n.* A bolt for securing the share, land-side, or mold-board of a plow to the stock. The head is chamfered or countersunk, and in the former case generally has a square or fin, to prevent it from turning when the nut is screwed on. *E. H. Knight.*

plow-bote (plou'bōt), *n.* In *old Eng. law*: (*a*) Wood or timber allowed to a tenant for the repair of instruments of husbandry. (*b*) A strip of land set apart in the open-field system of cultivation in the ancient village community for the carpenter on a manor for the repair of the plows and other farm implements.

plowboy, ploughboy (plou'boi), *n.* A boy who drives or guides a team in plowing; hence, a rustic boy; an ignorant country fellow.

plow-clevis (plou'klev″is), *n.* A clevis of special form used on a plow at the end of the plow-beam. It is a stirrup-shaped piece with three loops, one over another, in any one of which the open ring of the doubletree may be placed, according to the depth of furrow desired. *E. H. Knight.*

plower, plougher (plou'ėr), *n.* [< ME. *plougher* = D. *ploeger* = G. *pflüger* = Icel. *plōgari*; as *plow* + *-er*[1].] One who plows land; a cultivator.

The countrey people themselves are great *plowers*, and small spenders of corne. *Spenser*, State of Ireland.

plow-foott, *n.* [ME. *plouhfot*; < *plow* + *foot*.] In old plows, the bar connecting the butt of the beam with the sole, usually a continuation of the left stilt.

My *plouh-fot* shal be my pyk-staf and picche a-two the rotes. *Piers Plowman* (C), ix. 64.

plow-gang (plou'gang), *n.* [*plow*, *n.*, + *gang*[2].] A measure of arable land of uncertain size.

plow-gate (plou'gāt), *n.* [*plow* + *gate*.] Perhaps the same as *plow-gang*.

plow-handle (plou'han″dl), *n.* A plow-tail.

plow-head (plou'hed), *n.* [< ME. *ploghe-hede*.] 1. Same as *bridle*, 5.—2. Same as *sheath*, 2 (*d*).

plowing-machine (plou'ing-ma-shēn″), *n.* A steam-plow.

plow-iron (plou'ī″ėrn), *n.* The colter of a plow. *Shak.*, 2 Hen. IV., v. 1. 20.

plowk, *n.* [Also (dial.) *plook*, *pluke*; < late ME. *plowke*, a pimple; cf. *plowked*, pimply.] A pimple. *Cath. Ang.*, p. 284. [Obsolete or Scotch.]

plowkedt, *a.* [ME. *plowked*, *pluccid*; < *plowk* + *-ed*[2].] Covered with pimples; pimply.

Polidarius was *pluccid* as a pork fat.
Destruction of Troy (E. E. T. S.), l. 3837.

plow-knife (plou'nīf), *n.* In *bookbinding*, a flat knife (about 6 inches long, 1¼ inches wide, and ¼ inch thick) with a rounded and pointed cutting-face, sharpened on one side only, which follows the groove of the bookbinders' plow in cutting books or paper.

plowky, *a.* [Also *plooky*; < ME. *plowkky*; < *plowk* + *-y*[1].] Pimply. [Obsolete or Scotch.]

For hyme that is smetyne of his awenne blode, and spredis alle over his lymmes, and waxes *plowkky* and brekes owte. Quoted in *Cath. Ang.*, p. 284.

Plooky, *plooky* are your cheeks,
And *plooky* is your chin.
Sir Hugh le Blond (Child's Ballads, III. 256).

His face was as *plooky* as a curran' bun, and his nose as red as a partan's tae. *Galt*, Provost, xxxii. (*Davies.*)

plowland, ploughland (plou'land), *n.* [< ME. *plowlond*, *plowe-lond*, *plouz-lond* (= D. *ploeg-land* = MLG. *plochlant* = G. *pflugland* = Icel. *plōgsland* = Sw. *plogland* = Dan. *plöjeland*); < *plow* + *land*[1].] 1. Land that is plowed or that is suitable for tillage.—2. In early English tenures, as much land as could be tilled with the use of one plow-team; a hide of land. It was a descriptive term by which land might be granted with the buildings thereon. The difference in early authorities as to the area is probably to be explained by differences in local customs of husbandry and in the arableness of the soil, and especially by the fact that in some districts, and perhaps most generally, the plow was drawn by eight oxen, while in others it may have been drawn by four. It seems generally to have contained about 100 acres more or less. It was divided into 8 oxgangs.

The pris of a *plouz-lond* of penyes so rounde.
Piers Plowman's Crede (E. E. T. S.), l. 169.

Jugum terræ, or half a *plow land*, is as much as two oxen can till. *Sheppard*, Touchstone.

Others say that one oxgange of land containeth 15 acres, and 8 oxganges make a *plow land*. *Coke upon Littleton.*

plowman, ploughman (plou'man), *n.*; pl. *plowmen*, *ploughmen* (-men). [< ME. *plowman*, *plougman* (= G. *pflugmann*); < *plow* + *man*.] One who plows or guides a plow; a farm laborer who is or may be engaged in plowing.

Wille . . . wrouȝte that here is wryten, and other werkes bothe
Of Peres the *Plowman*, and mechel puple al-so.
Piers Plowman (A), xii. 102.

The merchant gains by peace, and the soldiers by war, the shepherd by wet seasons, and the *ploughmen* by dry.
Sir W. Temple.

Like any *Ploughman* toil'd the little God,
His Tune he whistled, and his Wheat he sow'd.
Prior, Cupid turned Ploughman (trans.).

ployment (ploi′ment), *n.* [< *ploy*[2] + *-ment.*] *Milit.*, the formation of column from line.

Pluchea (plō′kē-ä), *n.* [NL. (Cassini, 1817), named after N. A. *Pluche*, a French abbé who wrote upon natural history in 1732.] A genus of composite plants of the tribe *Inuleæ*, type of the subtribe *Plucheineæ*, characterized by the corymbose heads of flowers with dry broad bracts, each head containing numerous truncate thread-shaped pistillate flowers in many outer rows, and a few perfect but sterile five-cleft flowers in the center. There are about 20 species, natives of warmer parts of America, Africa, Asia, and Australia, a few herbaceous and extending into the central or northern United States on the coast, the others shrubs or undershrubs. They are woolly or glutinous, with a strong or camphoric odor, bearing alternate toothed leaves, and white, yellow, or purplish flowers. *P. camphorata* is the salt-marsh fleabane of the Atlantic coast, sometimes called *camphor-plant*. *P. odorata* is the river-side tobacco of the West Indies.

★**pluck**[1] (pluk), *v. t.* [< ME. *plukken, plokken, plockien* (pret. *pluckede, plukkede*, pp. *plukked*, irreg. pret. *plyghte*, pp. *plyght*), < AS. *pluccian, pluccigean, ploccan* (pret. *pluccede*, pp. *plucced*) = D. *plukken* = MLG. *plucken*, LG. *plukken* = OHG. **pflucchen* (not found), MHG. *phlücken, pflücken*, G. *pflücken* = Icel. *plukka, plokka* = Sw. *plocka* = Dan. *plukke*, pick, pluck; hardly a Teut. word, the Scand. forms being appar. borrowed from AS. or LG., and these prob. derived, through OHG. or Goth. (where, however, the word is not recorded), from an early Rom. (LL.) verb **pilicare*, **pilucare*, found in Olt. *pelucare, peluccare, piluccare*, It. *piluccare*, pluck (grapes), pick off (grapes) one by one, = Pr. *pelucar*, pick out, = OF. *plocquer*, in secondary form **plucquier, plusquier, pelukier, peluchier*, F. dial. (Picard) *pluquer, pluskier, ploki, plucher*, F. in comp. *éplucher*, pick, gather (the F. forms prob. in part reflections of the LG.); the ref. to plucking grapes (which suggests the means of its early introduction into Teut. use) being a particular application or transfer of the orig. sense (Olt. *pelucare*, etc.) 'pick out hairs one by one,' as explained under the derivative *peruke*, the verb (LL. **pilicare*, **pilucare*) being derived, with freq. formative (L. *-ic-are*, LL. **-uc-are*, It. *-ucare, -ucc-are*, etc., the same occurring in *plunge*, ult. < ML. **plumbicare*), from L. *pilus*, hair, a hair: see *pile*[4], *peruke* (and *periwig* and *wig*), and also *plush*, from the same source. No evidence of the existence of the Rom. (LL.) verb at a period early enough to produce the earliest Teut. forms is found; analogous verbs in *-icare* are, however, found, and the explanation here given meets all the other conditions. It will be observed that *pluck* still refers in most instances to pulling hair or feathers or berries or flowers, and that L. *pilus*, hair, has had in other respects a remarkable development.] 1. To pull off, as feathers from a fowl, or fruit or flowers from a plant; pick off; gather; pick or cull, as berries or flowers.

Hise disciplis *pluckiden* eeris of corn, and thei frotynge with her hondis eeten. *Wyclif*, Luke vi. 1.

If a man is *plucked*—that is, does not get marks enough to pass—his chance of a Fellowship is done for.
C. A. Bristed, English University, p. 258.

I trust that I have never *plucked* a candidate in the Schools without giving him every opportunity of setting himself right. *Stubbs*, Medieval and Modern Hist., p. 386.

Plucked instrument, in *music*. See *instrument*, 3 (*c*).—**To pluck a crow with one**, to pick a quarrel with one.

O, these courtiers, neighbours, are pestilent knaves; but, ere I'll suffer it, I'll *pluck a crow with some* of 'em.
Dekker and Ford, Sun's Darling, iv. 1.

To pluck a pigeon. See *pigeon*.—**To pluck down a side.** See the quotation.

Other that never learned to shoot, nor yet knoweth good shaft nor bow, will be as busy as the best, but such one commonly *plucketh down a side* [to *pluck down a side*, I believe, is to shoot on one side into the ground], and crafty archers which be against him will be both glad of him, and also ever ready to lay and bet with him: it were better for such one to sit down than shoot.
Ascham, Toxophilus (ed. 1864), p. 8.

To pluck off†, to descend in regard to rank or title; descend lower.

Pluck off a little;
I would not be a young count in your way.
Shak., Hen. VIII., iii. 3. 40.

To pluck up. (*a*) To pull or haul up suddenly; remove entirely or by the roots; eradicate; hence, to exterminate; destroy: as, to *pluck up* weeds.

They *pluckt up* anchor, and away did sayle.
The Noble Fisherman (Child's Ballads, V. 331).

But if they will not obey, I will utterly *pluck up* and destroy that nation, saith the Lord. Jer. xii. 17.

I observed that the corn here was *plucked up* by the roots, according to the antient usage, which is retained also in the upper Ægypt.
Pococke, Description of the East, II. i. 131.

(*b*) To summon or muster up: as, to *pluck up* courage, spirit, etc.

Pluk up thi hert, my dere mayster.
Robin Hood and the Monk (Child's Ballads, V. 2).

Pluck up thy spirits; look cheerfully upon me.
Shak., T. of the S., iv. 3. 38.

Why did not Little-faith *pluck up* a greater heart?
Bunyan, Pilgrim's Progress, p. 188.

Pluck up a little resolution, and we shall soon be out of the reach of her malignity.
Goldsmith, She Stoops to Conquer, v.

(*c*) *Intrans.*, to collect one's self; gather spirit or courage.

There were lower depths yet: there were the purl houses, where "Tradesmen flock in their Morning gowns, by Seven, to cool their *Plucks*."
J. Ashton, Social Life in Reign of Queen Anne, I. 234.

Hence—5. Heart; courage; spirit; determined energy; resolution in the face of difficulties.

Decay of English spirit, decay of manly *pluck*.
Thackeray.

Be firm! one constant element in luck
Is genuine, solid, old Teutonic *pluck*.
O. W. Holmes, A Rhymed Lesson.

Attracted by the fame of Botta's discoveries, he [Layard] set to work digging at Nineveh with that *pluck*, that energy, and at the same time that discriminating judgment, which he has since shown on other occasions.
Max Müller, Biograph. Essays, p. 289.

pluck[2] (pluk), *n.* [Origin obscure; cf. Ir. Gael. *pluc*, a lump, knot, bunch, *ploc*, a club, plug, block: see *plug* and *block*[1].] The pogge, *Agonus cataphractus*. [Scotch.]

plucked[1] (plukt), *p. a.* Having the long stiff hairs removed: said of the pelt of a fur-seal.

plucked[2] (plukt), *a.* [< *pluck*[1], *n.*, 5, spirit, courage, + *-ed*[2].] Endowed with pluck or courage: with a qualifying adjective. [Colloq.]

"What, going?" said he, "and going for good? I wish I was such a good-*plucked* one as you, Miss Anville."
Thackeray, Roundabout Papers, On a Peal of Bells, note.

A very sensible man, and has seen a deal of life, and kept his eyes open, but a terrible hard-*plucked* one. Talked like a book to me all the way, but be hanged if I don't think he has a thirty-two-pound shot under his ribs instead of a heart. *Kingsley*, Two Years Ago, iv. (*Davies.*)

plucker (pluk′ėr), *n.* 1. One who or that which plucks.

Thou setter up and *plucker* down of kings.
Shak., 3 Hen. VI., ii. 3. 37.

2. A machine for straightening and cleaning long wool to render it fit for combing. It has a traveling apron which feeds the ends of the tufts to a pair of spiked rollers, by which tufts and locks are opened, and whence they proceed to a fanning apparatus for cleaning. It is usually managed by a boy.

Plückerian (plü-kē′ri-an), *a.* [< *Plücker* (see def.) + *-ian.*] Pertaining to the geometrician Julius Plücker (1801–68).—**Plückerian characteristic**, one of the quantities entering into the Plückerian equations.—**Plückerian equations**, equations published in 1834, substantially as follows: Let m be the order of a plane curve, n its class, δ its nodes, κ its cusps, τ its bitangents, and ι its inflections. Then

$$3m - \kappa = 3n - \iota;$$
$$2\delta = m^2 - m - n - 3\kappa;$$
$$2\tau = n^2 - n - m - 3\iota.$$

Plücker's formulæ. See *formula*.

pluckily (pluk′i-li), *adv.* In a plucky manner; with courage or spirit. [Colloq.]

"No," said Frank, *pluckily*, as he put his horse into a faster trot. *Trollope*, Dr. Thorne, xxix.

A good-looking fellow—a thought too *pluffy*, perhaps, and more than a thought too swaggering.
Lever, One of Them.

★**plug** (plug), *n.* [< MD. *plugge*, D. *plug*, a bung, peg, plug, = MLG. *plugge*, LG. *plugge, plügge*, a plug, = MHG. *pfloc* (*pfloc-*), *pflocke*, G. *pflock*, a peg, plug, = Sw. *plugg, pligg* = Norw. *plugg* = Dan. *plög, plök* (prob. < LG.), plug, peg; cf. W.

ploc, a plug, block, = Ir. *ploc*, a plug, block, club: see *block*[1].] 1. A piece of wood or other substance, usually in the form of a peg or cork, used to stop a hole in a vessel; a stopple; a bung or stopper of any kind.—2. A peg, wedge, or other appliance driven in, or used to stop a hole or fill a gap. (*a*) A piece of wood driven horizontally into a wall, its end being then sawed away flush with the wall, to afford a hold for nails. (*b*) In *civil engin.*, a heavy peg or stake driven in flush with the surface of the ground as a permanent reference-point, as distinguished from a *stake*, one projecting above the ground. (*c*) A piece of boxwood cut to cylindrical form, used by wood-engravers. If any part of an engraved block has been injured, a circular hole is drilled through the block, large enough to remove the damaged part. A plug is then driven into the hole, and a new surface thus obtained which can be reëngraved.

This mode of repairing a block was practised by the German wood engravers of the time of Albert Durer. The *plug* which they inserted was usually square, and not circular as at present. *Chatto*, Wood Engraving, p. 369.

(*d*) A wedge-pin forced between a rail and its chair on a railway. (*e*) A spigot driven into place, as in a barrel, in contradistinction to one screwed in. (*f*) A wooden stopper fitted in the opening of the pump on a ship's deck during a storm, to protect the water-tanks against lightning; a pump-stopper.

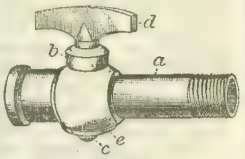
3. A small piece of some substance, as metallic foil, used by a dentist to fill the cavity of a decayed tooth.—4. A branch pipe from a water-main, leading to a point where a hose can be conveniently attached, and closed by a cap or plug; a fire-plug.—5. In *die-sinking*, a cylindrical piece of soft steel the end of which is fitted to a matrix. When matrix and plug are forced together under heavy pressure, the intaglio design of the matrix is impressed in relief upon the plug. The plug is then hardened, and becomes a punch, which can be used to make impressions on die-faces, as for coining, etc.

6. A flat oblong cake of pressed tobacco.

Tom brought out a corncob pipe for the preacher, and shaved him tobacco from a *plug*.
The Century, XXXVIII. 89.

7. A man's silk or dress hat; a plug-hat. [Slang.]—8. A worn, damaged, unfashionable, or otherwise injured article, which, by reason of its defects, has become undesirable, unsalable, or in a condition rendering it difficult to sell without a large reduction of its price, as a shelf-worn book, or an old horse worn down by hard work. Also *old plug*. [Colloq.]—9. A short, thick-set person. [Slang.]—10. A workman who has served no regular apprenticeship. [Slang.]—11. A sort of fishing-boat. [Cape Ann.]—12. Same as *plug-rod*, 1.—**Cutting plug**, in a chronographic apparatus for registering velocities of projectiles from one position in the bore of a gun to another, one of a series of plugs inserted into holes drilled radially in the gun-barrel from its exterior into the bore. The plug is connected with a looped electric conducting-wire of a primary circuit, and at its inner end is a small knife pivoted to the body of the plug in such manner that it slightly projects into the bore of the gun, and so arranged that, when forced radially outward by the passage of the projectile over it, it cuts the loop of the wire, and breaks the primary circuit. This induces a brief current in the secondary coil, which has one of its terminals arranged at the edge of one of a series of rapidly, uniformly, and synchronously rotating thin disks of equal diameter attached to a common shaft. The edges of the disks are coated with lampblack. The induced current of the secondary coil produces a spark at the terminal, which burns off a small dot in the peripheral coating. A number of the cutting plugs are inserted at uniform intervals in the gun. Each is serially related to one of the disks, in the order of succession from breech to muzzle of the gun; and when the gun is fired it records the instant the shot passes it on the edge of its related disk. From the angular distance between these records, the known diameter and rotating speed of the disks, the time occupied by the shot in moving from plug to plug is readily calculated; and it is asserted that intervals of time as small as one millionth of a second can be measured. The data thus obtained are of great value in the investigation of the action of explosives.—**Fusible plug**. See *fusible*.—**Plug-and-collar gage**. See *gage*[2].—**Plug and feathers**, a flat iron wedge (the *plug*) used in connection with two semi-cylindrical pieces of iron (the *feathers*), placed in a hole bored in a rock, with their flat surfaces toward each other, between which the wedge is driven with a sledge-hammer, the object being to split the rock. See *feather*, 2 (d).—**Plug center-bit**. See *center-bit*.

plug (plug), *v. t.*; pret. and pp. *plugged*, ppr. *plugging*. [= MLG. *pluggen* = Sw. *pligga* = Dan. *plökke*, plug; from the noun.] 1. To stop with a plug; make tight by stopping a hole: as, to *plug* a decayed tooth; to *plug* a wound with lint.—2. To hit with a ball or bullet: as, to *plug* a buck with a rifle. [Slang, western U. S.]—3. To cut out a plug from: said of watermelons when a tapering plug is cut out to see if the fruit is ripe, and then replaced. [Eastern U. S.]



plug-arbor (plug′är″bor), *n.* A lathe attachment for mounting drill-chucks. *E. H. Knight.*

plug-basin (plug′bā″sn), *n.* A standing wash-basin with a plug-hole at the bottom for emptying. *E. H. Knight.*

plug-bayonet (plug′bā″o̤-net), *n.* A bayonet of the early type, which the soldier fixed into the muzzle of his piece. The haft or plug was often of horn, more commonly of wood, and the steel was secured to this by brass or iron mounting.

plugboard (plug′bōrd), *n.* A switchboard in which the connections are made by means of brass or other conducting plugs.

plug-cock (plug′kok), *n.* A cock in which a plug with a transverse hole in it is fitted into a transverse hole in a hollow barrel or cylinder, the diameter of the plug being greater than the interior diameter of the cylinder, and therefore permitting liquid to flow through the latter only when the transverse hole in the plug is so turned as to form a continuous passage with the hollow in the cylinder. The plugs are sometimes covered or packed with a yielding material, and are usually tapered, so that pressing them into their seats keeps them tight.

Plug-cock.
a, body or barrel; *b*, tapered plug; *c*, tightening-screw fitted to the bottom of *b*, and bearing upon a washer, *e*; *d*, thumb-piece, in large cocks replaced by a hand-lever or wrench

plug-ugly (plug′ug′li), *n.* A city ruffian; one of a band of rowdies who indulged in wanton assaults upon persons and property in streets and public places: first used in Baltimore. [Slang.]

plug-valve (plug′valv), *n.* A valve closed by a tapering plug at right angles to the flow of the liquid.

plum[1] (plum), *n.* [Formerly also, erroneously, *plumb* (as in *limb* for *lim*, *numb* for *num*, etc.); < ME. *plumme*, with vowel shortened, earlier *ploume*, < AS. *plūme*, *plȳme* = D. *pruim* = MLG. *plume*, LG. *plumme* = OHG. *pfrūma*, *pflūmo*, MHG. *pflūme*, *phlūme*, *phrūme*, *prūme*, *prūne*, G. *pflaume* = Icel. *plōma* = Sw. *plommon* = Dan. *blomme*, plum, = F. *prune* (> E. *prune*) = Pr. *pruna* = Sp. dial. *pruna* = It. *pruna*, *prugna*, f., a plum, < ML. *prūna*, f., a plum, L. *prūnum* (pl. *prūna*), neut., a plum, *prūnus*, f., a plum-tree, < Gr. *προύνον*, neut., *προύνος*, f., earlier *προύμνον*, neut., a plum, *προύμνη*, f., a plum-tree. Cf. Ir. *pluma* = Corn. *pluman* = Gael. *plumbas*, *plumbais*, plum (< E. ?). For the change of L. *r* to *l* and of *n* to *m*, cf. *pilgrim*, ult. < L. *peregrinus*. For the introduction of a Latin and Greek fruit-name into Teut., cf. *peach*[1] and *pear*[1], also *quine*, *quince*.] 1. A fruit of any of the trees called *plums* (see defs. 2 and 3); specifically, the fruit of a tree of the genus *Prunus*, distinguished from the peach and apricot by its smooth surface, smaller size, and unwrinkled stone, and from the cherry by the bloom on its surface and commonly larger size. Plums are of use chiefly as a dessert fruit (the green gage being esteemed the best of all varieties), and as a dried fruit in the form of prunes. (See *prune*[1].) Locally a liquor is manufactured from them, and sometimes an oil is expressed from the kernels.

2. One of several small trees of the genus *Prunus*, forming the section *Prunus* proper. The European varieties of the common garden plum are collectively spoken of as belonging to the 'domestic' class in distinction from the 'Japan plums,' *P. triflora*, and the 'native plums,' of which there are several species represented by the cultivated varieties, important among which are *P. Americana*, *P. angustifolia*, and *P. hortulana*, the wild-goose plum, and its botanical varieties. Plum-wood is useful in cabinet-work and turnery. The plum is chiefly cultivated in France (in the valley of the Loire), in Germany, and in Bosnia, Servia, and Croatia. In America the plum suffers greatly from the ravages of the curculio. (See *plum-curculio*.) The Japanese plum, *P. triflora*, though not insect-proof, is valued in California and the southern United States. See *beach-plum*, *cherry-plum*, *wild plum*.

In Almaunt, in himself, in male, in peche,
Ys graffed *plumme*.
Palladius, Husbondrie (E. E. T. S.), p. 216.

The harvest white *plum* is a base *plum*.
Bacon, Nat. Hist., § 509.

It is as if the rose should pluck herself,
Or the ripe *plum* finger its misty bloom.
Keats, Posthumous Sonnets, xiv.

3. One of numerous trees of other genera bearing plum-like fruit. See phrases below.—4. A grape dried in the sun; a raisin.

So when you've swallow'd the Potion, you sweeten your Mouth with a *Plumb*. *Congreve*, Double-Dealer, iii. 4.

The dried grapes which the French term raisins secs, or raisins pass s, we term simply raisins when used for eating uncooked, and *plums* when they form an ingredient in the famous English plum pudding.
S. Dowell, Taxes in England, IV. 37.

5. A good thing; the best or choicest part; a sugar-plum: in allusion to the use of plums or raisins in cakes, plum-pudding, etc.

The reviewer who picks all the *plums* out of a book is a person who is regarded with reasonable terror and resentment by both authors and publishers.
The Academy, Nov. 2, 1889, p. 280.

Often, indeed, the foot-note contains the very *plum* of the page. *The Writer*, III. 120.

6. The sum of £100,000 sterling; hence, any handsome sum or fortune generally; sometimes, also, a person possessing such a sum. [Colloq., Eng.]

The Miser must make up his *Plumb*,
And dares not touch the hoarded Sum.
Prior, The Ladle, Moral.

Several who were *plums*, or very near it, became men of moderate fortunes. *Addison*, Vision of Justice.

An honest gentleman who sat next to me, and was worth half a *plumb*, stared at him. *Steele*, Tatler, No. 244.

My brother Heidelberg was a warm man, a very warm man, and died worth a *plumb* at least: a *plumb!* ay, I warrant you, he died worth a *plumb* and a half.
Colman, Clandestine Marriage, iii.

Plumbaginaceæ (plum-baj-i-nā′sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Plumbago* (*-gin-*) + *-aceæ.*] A family of dicotyledonous sympetalous plants, the leadwort family, of the order *Primulales*, characterized by a tubular or funnel-shaped calyx with five, ten, or fifteen ribs, five stamens opposite the five equal corolla-lobes, five styles, and a free one-celled ovary with one ovule pendulous from a long central stalk (funiculus) which rises from the bottom of the cell. Both in its ovary and its farinaceous albumen it is unlike all other gamopetalous orders. It includes 10 genera, of which *Plumbago* is the type, and about 350 species, most of which are contained in the large genera *Statice*, *Armeriastrum*, and *Limonium.* They are maritime herbs, natives especially of the Mediterranean region, with a few widely diffused. They are commonly smooth stemless plants, with densely tufted or rosulate leaves.

Plumbagineæ (plum-ba-jin′ē-ē), *n. pl.* [NL. (Ventenat, 1799), < *Plumbago* (*Plumbagin-*) + *-eæ.*] A tribe of plants of the family *Plumbaginaceæ*, of which *Plumbago* is the type, and containing three other genera.

plumbaginous (plum-baj′i-nus), *a.* [< L. *plumbago* (*-gin-*), plumbago, + *-ous.*] Resembling plumbago; consisting of or containing plumbago, or partaking of its properties.

plumbago (plum-bā′gō), *n.* [< L. *plumbago*, black-lead, molybdena, also a plant, leadwort, < *plumbum*, lead: see *plumb*[2].] 1. Black-lead; graphite. See *graphite*[1].—2. [*cap.*] [NL. (Tournefort, 1700).] A genus of plants, the leadworts, type of the family *Plumbaginaceæ* and tribe *Plumbagineæ*, having a glandular calyx with five short erect teeth, a salver-shaped corolla with slender tube, free stamens, and five styles united into one nearly to the top. The 10 species are natives of warm climates, extending to southern Europe and central Asia. They are usually perennial herbs, with long branches, or partly climbing, bearing alternate clasping leaves, and spikes of blue flowers (or of other colors) at the end of the branches. Several species, bearing the name *leadwort*, are in common cultivation; another, *P. scandens*, a trailing white-flowered species, is native to the south of Florida, extending thence to Brazil, and known, like *P. Europæa*, as *toothwort*, from the use to which its caustic leaves and roots are put. *P. rosea* is used in India to produce blisters.

Plumb-bobs.
a, plumb-bob in common use, made of brass, with cap to attach cord, and steel point at bottom; *b*, plumb-bob with reel inclosed; *c*, common cast-iron plumb-bob; *d*, common lead plumb-bob with wire core.

plumb-bob (plum′bob), *n.* A conoid-shaped metal bob or weight attached to the end of a plumb-line. See also cut under *plumb-rule.*

plumbean (plum′bē-an), *a.* [< *plumbeous* + *-an.*] Of, pertaining to, or resembling lead; leaden; hence, dull; heavy.

There will be a *plumbean* flexible rule.
Ellis, Knowledge of Divine Things, p. 411.

plumbeous (plum′bē-us), *a.* [< L. *plumbeus*, of or belonging to lead, < *plumbum*, lead: see *plumb*[2].] 1. Leaden; heavy.

Attend and throw your ears to mee . . . till I have endoctrinated your *plumbeous* cerebrosities.
Sir P. Sidney, Wanstead Play, p. 622. (*Davies.*)

3. A reckless better; a dashing or venturesome gambler or speculator. [Sporting slang.] —**4.** A part of a machine or piece of mechanism that plunges. (*a*) The piston of a Cornish pump. It is a cylindrical mass of iron which plays through a stuffing-box up and down in the plunger-case, and forces the water into the lift or tube, in which it rises to the surface, adit-level, or other desired point. (*b*) Any solid piston. See *plunger-piston*. (*c*) The dasher of a churn. (*d*) The firing-pin or striker used in some breech-loading firearms. (*e*) A metallic cylinder, hollow or solid, sometimes surrounding and sometimes within the coil of wire of a small inductorium, by the movement of which the intensity of the induced current may be regulated. (*f*) Any compression-machine in which the force is applied by means of a plunger. See cuts under *hydraulic*, *percussion-fuse*, and *pump*. (*g*) A cylindrical graduated rod used in blasting to ascertain whether the cartridge has reached the bottom of the drilled hole, when charging the hole for a blast.

5. In *pottery*, a vessel in which clay is beaten by a wheel to the required consistency. *E. H. Knight.*

plup. An abbreviation of *pluperfect*.

pluperfect (plō'pėr″fekt), *a.* and *n.* [Abbr. of ★L. (NL.) *plusquam-perfectum* (sc. *tempus*), the pluperfect tense, lit. 'more than perfect': L. *plus*, more (see *plus*); *quam*, than; *perfectum*, neut. of *perfectus*, perfect: see *perfect*.] **I.** *a.* Noting the time, or the expression of time, of an action occurring prior to another specified time: as, the *pluperfect* tense.

II. *n.* In *gram.*, the pluperfect tense of a verb, or an equivalent verb-phrase: for example, Latin *amaveram*, English 'I had loved.'

plural (plō'ral), *a.* and *n.* [< ME. *plurelle*, < OF. *plurel*, F. *pluriel* = Sp. Pg. *plural* = It. *plurale* = G. *plural*, < L. *pluralis*, of or belonging to more than one, or to many; in gram. *pluralis*, sc. *numerus*, the plural number; < *plus* (*plur-*), more: see *plus*.] **I.** *a.* **1.** Containing more than one; consisting of two or more, or designating two or more.

Better have none
Than *plural* faith, which is too much by one.
Shak., T. G. of V., v. 4. 52.

Specifically—**2.** In *gram.*, noting the form of a word (primarily of a noun or pronoun, then of an adjective qualifying it, and finally of a verb of which it is subject) which marks it as signifying or relating to more than one, as distinguished from *singular*, signifying only one; in some languages, which have a dual form for two, signifying more than two: thus, *boys* is the plural number of *boy*, *men* of *man*, *we* of *I*, *these* of *this*, *are* of *is*, and *were* of *was*.—**Plural marriage.** See *marriage*.

II. *n.* **1.** The state of being manifold or more than one.

If respect be had to the severall arts there professed, Sigebert founded schools in the *plurall*. But if regard be taken of the cyclopædy of the learning resulting from those several sciences, he erected but one grand school.
Fuller, Ch. Hist., II. ii. 56.

2. That form of a word which expresses plurality, or the plural number. Abbreviated *pl.*

pluralisation, pluralise, etc. See ★*pluralization*, etc.

pluralism (plō'ral-izm), *n.* [< *plural* + *-ism*.] **1.** The character of being plural.—**2.** The holding by one person of two or more offices at the same time; specifically, the holding of two or more livings or benefices at the same time, or the ecclesiastical system under which this is possible.

pluralist (plō'ral-ist), *n.* [< *plural* + *-ist*.] A clergyman who holds at the same time two or more ecclesiastical benefices.

Who, being a *pluralist*, may under one Surplice, which is also linnen, hide foure benefices besides the metropolitan toe. *Milton*, Apology for Smectymnuus.

Many ecclesiastics, some even of those who affected to be evangelical, were *pluralists*, and left their numerous parishes to the care of those who would serve at the lowest price. *Bancroft*, Hist. U. S., I. 215.

pluralistic (plō-ra-lis'tik), *a.* [< *pluralist* + *-ic*.] Holding to the existence of many reals.

plurality (plọ̄-ral'i-ti), *n.*; pl. *pluralities* (-tiz). [< ME. *pluralite*, < OF. *pluralite*, F. *pluralité* = Sp. *pluralidad* = Pg. *pluralidade* = It. *pluralità*, < LL. *pluralita(t-)s*, the plural number, < L. *pluralis*, plural: see *plural*.] **1.** The character of being plural; the fact of expressing or of consisting of more than one; also, a number greater than unity: as, a *plurality* of gods; a *plurality* of worlds.

And bigge gow benefices *pluralite* to haue.
Piers Plowman (C), iv. 33.

The wantonnesse
Of their insatiat appetite, that feeds
On such *plurality* of viands, breeds
Offensive humors.
Times' Whistle (E. E. T. S.), p. 57.

We are now led to recognise the doctrine of the "*plurality* of causes" in our explanations of things; and the instances of this *plurality* are both numerous and familiar.
A. Bain, Emotions and Will, p. 213.

2. The greater number; the majority.

Take the *plurality* of the world, and they are neither wise nor good. *Sir R. L'Estrange.*

The two avoyers are elected by the *plurality* of suffrages of all the citizens. *J. Adams*, Works, IV. 332.

3. In *U. S. politics*, the number by which the votes cast for the candidate who receives the greatest number exceed the votes cast for the candidate who receives the next greatest number, when there are more than two candidates and no one candidate receives a majority of the votes. If A receives 5,000 votes, B 4,000, and C 3,000, no one has a majority, but A has a plurality of 1,000 over B. In most of the States a plurality elects a candidate; in others, as Connecticut and Vermont, if no candidate (as for governor) receives a popular majority, the election goes to the legislature. Compare *majority*.

4. *Eccles.*: (*a*) The holding of two or more benefices by the same person at the same time; pluralism.

The most part of them were such as had preach'd and cri'd down, with great show of zeale, the avarice and *pluralities* of Bishops and Prelats. *Milton*, Hist. Eng., iii.

(*b*) One of two or more livings held by the same incumbent. See *living*, 4 (*a*).

Who engross many *pluralities* under a non-resident and slubbring dispatch of souls.
Milton, Apology for Smectymnuus.

pluralization (plō″ral-i-zā'shọn), *n.* [< *pluralize* + *-ation*.] The act of pluralizing; the attribution of plurality to a person or thing. Also spelled *pluralisation*.

"Inferiors invariably use the third person plural in addressing their superiors:" a form which, while dignifying the superior by *pluralization*, increases the distance of the inferior by its relative indirectness.
H. Spencer, Pop. Sci. Mo., XIII. 300.

pluralize (plō'ral-īz), *v.*; pret. and pp. *pluralized*, ppr. *pluralizing*. [< *plural* + *-ize*.] **I.** *trans.* To make plural by using the termination of the plural number; attribute plurality to; express in the plural form.

Toplady. Does not their invocation of saints suppose omnipresence in the saints?
Johnson. No, Sir; it supposes only *pluri-presence*.
Boswell, Johnson, an. 1773.

pluriseptate (plō-ri-sep'tāt), *a.* [< L. *plus* (*plur-*), more, + NL. *septum*, a partition: see *septate*.] In *bot.*, having several septa, partitions, or dissepiments.

pluriserial (plō-ri-sē'ri-ạl), *a.* [< L. *plus* (*plur-*), more, + *series*, a row: see *serial*.] Consisting of several series. *Encyc. Brit.*, XXII. 190.

pluriseriate (plö-ri-sē′ri-āt), *a.* [< L. *plus* (*plur-*), more, + *series*, a row: see *seriate*.] In *bot.*, disposed in many rows.

plurisetose (plö-ri-sē′tōs), *a.* [< L. *plus* (*plur-*), more, + *seta*, a bristle: see *setose*.] Having several or many setæ.

plurispiral (plö-ri-spī′ral), *a.* [< L. *plus* (*plur-*), more, + *spira*, a coil, fold: see *spiral*.] Having several or many spiral turns; multispiral: specifically said of the opercula of some shells.

plurisporous (plö-ri-spō′rus), *a.* [< L. *plus* (*plur-*), more, + Gr. σπορά, seed: see *spore*.] In *bot.*, having two or more spores.

plurisubinvariant (plö-ri-sub-in-vā′ri-ant), *n.* A function, ϕ, of a, b, c, etc., of a', b', c', etc., of a'', b'', c'', etc., such that $(aD_b + 2bD_c + 3cD_d + \text{etc.} + a'D_{b'} + \text{etc.} + a''D_{b''} + \text{etc.})\,\phi = 0$.

plurisy† (plö′ri-si), *n.* [An altered spelling of *pleurisy*, simulating L. *plus* (gen. *pluris*), more, and taking sense accordingly.] **1.** Superabundance.

> Oh, great corrector of enormous times,
> . . . that heal'st with blood
> The earth when it is sick, and cur'st the world
> O' the *plurisy* of people.
> *Fletcher (and another)*, Two Noble Kinsmen, v. 1.
>
> Thy *plurisy* of goodness is thy ill.
> *Massinger*, Unnatural Combat, iv. 1.

2. Superabundance of blood; a plethora.

> You are too insolent;
> And those too many excellencies, that feed
> Your pride, turn to a *plurisy*, and kill
> That which should nourish virtue.
> *Beau. and Fl.*, Custom of the Country, ii. 1.

plurivalve (plö′ri-valv), *a.* [< L. *plus* (*plur-*), more, + *valva*, a folding door: see *valve*.] **1.** In *entom.*, having several valves or sheathing-plates.—**2.** In *bot.*, having many valves: said especially of capsules.—**3.** In *conch.*, same as *multivalve*.

Plurivalvia (plö-ri-val′vi-ä), *n. pl.* [NL.: see ★*plurivalve*.] In *conch.*, same as *Multivalvia*.

plus (plus), *a.* [< L. *plus* (*plur-*), more, pl. *plures*, OL. *pleores*, more, several, the majority (compar. of *multus*, much), = Gr. πλείων, πλέων, pl. πλείονες, more, compar. of πολύς, many (= E. *feel*[2]); cf. πλέως, full, L. *plenus*, full: see *plenty*.] **1.** More (by a certain amount); increased (by a specified addition): followed by a noun as an apparent object (a preposition, *by*, to be supplied): as, the interest *plus* the disbursements amounts to so much; 6 *plus* 9 is 15: in this and the next two uses correlative to *minus*. In algebra and arithmetic this sense is indicated by the sign +, called the plus sign or sign of addition: as, $a + b = x$, which is read "*a* plus *b* equals *x*." [A sign like this was formerly sometimes used as a contraction of Latin *et*, and.]

> His prose, then, is that of a wise man *plus* a poet.
> *E. C. Stedman*, Poets of America, p. 134.

2. More than nothing; belonging to the positive side, as of an account; above zero, or above the lowest point of positive reckoning: as, a *plus* quantity in an equation (that is, one having the plus sign, or when initial having no sign, before it).—**3.** Marking more than zero; positive: as, the *plus* sign.

> Success goes invariably with a certain *plus* or positive power. *Emerson*, Complete Prose Works, II. 352.

4. In *etym.*, in composition with; with the addition of (the word or element following): expressed, as in mathematics, by the sign + (see the etymologies in this work). The same sign is occasionally used to indicate cognate or related forms.—**Logarithmic plus and minus.** See *logarithmic*.

★**plush** (plush), *n.* [Formerly also *pelluce*; = D. *pluis*, a tuft or lock of wool or hair, plush, = G. *plusch* = Sw. *plys*, *plysch* = Dan. *plyds*, < F. *pluche*, *peluche*, shag, plush, = Sp. *peluzza*, *pelusa*, *pelusa* = Pg. *pellucia*, plush, nap, = It. *peluzzo*, *pelucio*, dial. *plusia*, plush, nap, down; < ML. as if **pilucius*, hairy, shaggy, < L. *pilus*, hair: see *pile*[4], and cf. *peruke* and *pluck*[1].] A cloth of silk or cotton, and sometimes of wool (especially of camel's and goat's hair), having a softer and longer nap than that of velvet. Plush is used especially for upholstery, women's cloaks, expensive liveries, and men's silk hats, and since 1870 as a ground for embroidery in house-decoration, for curtains, and the like.

> The rich Tartars sometimes fur their gowns with *pelluce* or silke shag, which is exceeding soft, light, and warme.
> *Hakluyt's Voyages*, I. 98.
>
> My tailor brings me home my fine, new, coloured-cloth suit, my cloak lined with *plush*—as good a suit as ever I wore in my life. *Pepys*, Diary, Oct. 28, 1664.

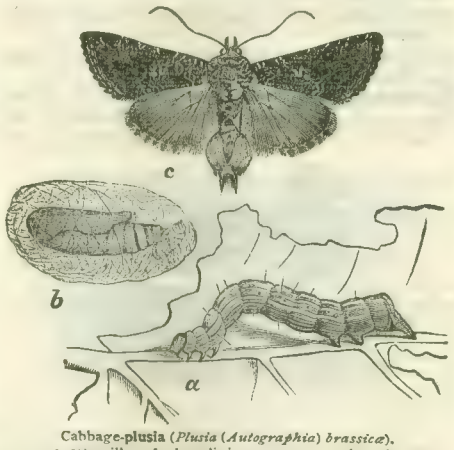
Banbury plush, woolen plush used for upholstery and the like, first made in the town of Banbury, England. (See also *furniture-plush*.)

plush-copper (plush′kop″ėr), *n.* A capillary variety of cuprite, or red oxid of copper: same as *chalcotrichite*.

plusher† (plush′ėr), *n.* [Origin obscure.] A kind of dogfish.

> The Pilcherd are pursued and devoured by a bigger kinde of fish, called a *Plusher*, being somewhat like the Dog-fish.
> *R. Carew*, Survey of Cornwall, p. 34.

plush-stitch (plush′stich), *n.* In worsted- or wool-work, a stitch that forms freely hanging loops which can be cut, thus producing a long soft nap similar to that of plush, or can be left uncut, as a kind of fringe.



plush-velvet (plush′vel′vet), *n.* Plush having a shorter nap than is common, and thus resembling velvet.

plush-velveteen (plush′vel-ve-tēn″), *n.* Cotton plush closely imitating plush made of silk.

plushy (plush′i), *a.* [< *plush* + *-y*[1].] Consisting of or resembling plush; shaggy and soft.

> Then followed a long gaze out of the window, across the damp gravel and *plushy* lawn.
> *H. Kingsley*, Geoffry Hamlyn, iv.

Plusia (plö′si-ä), *n.* [NL. (Ochsenheimer, 1816), with ref. to the silver or gold markings; < Gr. πλοῦσιος, rich, < πλοῦτος, riches: see *Plutus*.] **1.** A notable genus of noctuid moths, having the body stout, the proboscis rather long, the abdomen crested, and the fore wings as a rule partly gilded or silvery. More than 100 species are known, and the genus is represented in all parts of the

Cabbage-plusia (*Plusia* (*Autographa*) *brassicæ*). *a*, caterpillar; *b*, chrysalis in cocoon; *c*, moth, male. (All natural size.)

world. Many of the species are wide-spread, several being common to Europe and North America, and one to Europe and South Africa. The larvæ of many are injurious to growing crops, and *P. brassicæ* of the United States is one of the worst enemies of the cabbage and other cruciferous plants. In Europe the gamma-moth or silver-Y, *P. gamma*, is equally destructive to the same vegetables. *P. chrysitis* is the burnished-brass moth.

2. [*l. c.*] A member of this genus; especially, in the United States, *P. brassicæ*, known as the *cabbage-plusia*.

Plusidæ (plö′si-dē), *n. pl.* [NL.] Same as *Plusiidæ*.

Plusiidæ (plö-sī′i-dē), *n. pl.* [NL. (Guenée, 1852), < *Plusia* + *-idæ*.] A family of noctuid moths, typified by the genus *Plusia*, having the palpi slender and ascending, and the wings often golden or silvered. It contains 8 genera.

plusiocracy, plousiocracy (plö-si-ok′rā-si), *n.* [< Gr. πλούσιος, rich, wealthy, + *-κρατία*, < κρατεῖν, rule.] Same as *plutocracy*. [Rare.]

> To say a word against . . . the cruel punishments of the Game-laws, or against any abuse which a rich man inflicted and a poor man suffered, was treason against the *plousiocracy*. *Sydney Smith*, in Lady Holland, ii.

Plusiotis (plö-sī′ō-tis), *n.* [NL. (Burmeister), < Gr. πλοῦσιος, rich; cf. πλουσιότης, wealth.] A genus of lamellicorn beetles of the family *Scarabæidæ*, containing American species of large size and burnished silvery or golden color. Three species are known in the United States; the others are Mexican.

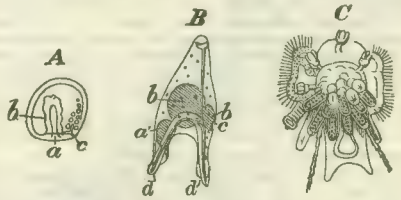
plutarchy (plö′tär-ki), *n.* [< Gr. πλοῦτος, wealth, + *-αρχία*, < ἀρχειν, rule.] Same as *plutocracy*.

> *Southey*, The Doctor, cii.

plutei, *n.* Plural of *pluteus*.

pluteiform (plö′tē-i-fôrm), *a.* [< NL. *pluteus* (see *pluteus*, 3) + L. *forma*, form.] **1.** Having the morphological value of a pluteus: as, the *pluteiform* larva of an echinoderm. See cut under *echinopædium*.—**2.** Less exactly, like or likened to a pluteus in any way; echinopædic.

Plutella (plö-tel′ä), *n.* [NL. (Schrank, 1802), < Gr. πλοῦτος, wealth, + dim. *-ella*.] **1.** A genus of tineid moths, typical of the family *Plutellidæ*.



Plutella maculipennis. (Cross shows natural size.)

They are small, with antennæ not thickened at the base, erect palpi, and the sixth and seventh veins of the hind wings separate. The larva skeletonizes leaves, and pupates in a gauzy cocoon. *P. maculipennis* is a turnip- and cabbage-pest of cosmopolitan distribution.

2. [*l. c.*] A member of this genus; especially, in the United States, *P. maculipennis*, known as the *cabbage-plutella*. In England and the British colonies it is known as the *diamond-back*.

Plutellidæ (plö-tel′i-dē), *n. pl.* [NL., < *Plutella* + *-idæ*.] A family of tineid moths, typified by the genus *Plutella*. The head is woolly, and the palpi are provided with a strong bunch of scales on the middle joint below; they have the peculiar habit of holding the antennæ straight forward when at rest (most other tineids holding the antennæ back on the wings). The family contains about 6 genera, of which *Cerostoma* is the most extensive.

pluteus (plö′tē-us), *n.*; pl. *plutei* (-ī). [L., also *pluteum*, a shed or mantlet to protect besiegers, a breastwork, parapet, a headboard of a couch or bed, a partition, etc.] **1.** In *anc. Rom. arch.*, a barrier, as any construction of boards, osiers, grating, or other light work, placed between the columns of a portico; a light wall occupying the lower part of an intercolumniation; a balustrade or parapet crowning a building or a part of a building; also, a shelf fixed to the wall; the headboard of a bed.—**2.** In *anc. Rom. milit. engin.*: (*a*) Boards or planks placed on the fortifications of a camp, or on movable towers or other military engines, to form a kind of roof or shed for the protection of the soldiers. (*b*) A movable gallery on wheels, shaped like an arch-covered wagon, in which a besieging party made their approaches.—**3.** In *zoöl.*, a larval stage of the echinopædia of certain echinoderms, as a holothurian, ophiurian, or echinid. It is known as the

A, Echinopædium of *Echinus pulchellus*, gastrula stage: *a*, mouth; *b*, intestine; *c*, anus. *B*, Fully developed echinopædium or pluteus of the same: *a'*, mouth; *b*, stomach and intestine; *c*, anus; *d*, *d*, processes of body containing prolongations of internal skeleton. *C*, Echinopædium of an echinid advanced so far that spines, pedicels, and pedicellariæ are visible.

painter's-easel larva, from its shape, and was originally described as a distinct genus by Müller in 1846. Compare cuts under *Bipinnaria* and *echinopædium*.

Pluto (plö′tō), *n.* [L., < Gr. Πλούτων, poet. also Πλουτεύς, Pluto, orig. epithet of Hades, the underworld (as a source of grain, etc.), < πλοῦτος, wealth: see *Plutus*.] In *Rom. myth.*, the lord of the infernal regions, son of Saturn and brother of Jupiter and Neptune. He is represented as an elderly man with a dignified but severe aspect, often holding in his hand a two-pronged fork. He was generally called by the Greeks *Hades*, and by the Romans *Orcus*, *Tartarus*, and *Dis*. His wife was Proserpine, daughter of Jupiter and Ceres, whom he seized in the island of Sicily while she was plucking flowers, and carried to the lower world. See cut on following page.—**Pluto monkey**, *Cercopithecus pluto*, of western Africa.

plutocracy (plö-tok′rā-si), *n.* [< Gr. πλουτοκρατία, an oligarchy of wealth, < πλοῦτος, wealth, + *-κρατία*, < κρατεῖν, rule.] Government by the wealthy class; the rule of wealth; also, a class ruling by virtue of its wealth. Also *plutarchy*.

plutocrat (plö′tō-krat), *n.* [< Gr. πλουτοκρατ-, base of πλουτοκρατία, an oligarchy of wealth: see *plutocracy*.] One who rules or sways a

Pluto, enthroned, with Proserpine. (From a vase-painting.)

community or society by virtue of his wealth; a person possessing power or influence solely or mainly on account of his riches; a member of a plutocracy.

We have had *ploutocrats* who were patterns of every virtue. *Gladstone*, Nineteenth Century, XXI. 17.

The *plutocrats* and bureaucrats, the money-changers and devourers of labour. *Kingsley*, Alton Locke, xli. (*Davies.*)

plutocratic (plō-tō-krat'ik), *a.* [< *plutocrat* + *-ic.*] Pertaining to or characteristic of a plutocracy or a plutocrat: as, a *plutocratic* government; *plutocratic* ideas.

plutologist (plō-tol'ō-jist), *n.* [< *plutolog-y* + *-ist.*] One skilled in plutology, or the science of wealth and its distribution.

As the *plutologists* have explained, the means of happiness are immensely increased by that complex system of mutual co-operation which has been gradually organized among civilised men. *H. Sidgwick*, Methods of Ethics, p. 406.

plutology (plō-tol'ō-ji), *n.* [< Gr. πλοῦτος, wealth, + *-λογία*, < λέγειν, speak: see *-ology.*] The science of wealth; the body of natural laws governing the production and distribution of wealth; political economy.

Several authors have tried to introduce totally new names [for political economy], such as *plutology*, chrematistics, catallactics. *Jevons*, Pol. Econ. (2d ed.), Pref.

Plutonian (plō-tō'ni-an), *a.* and *n.* [< L. *Plutonius*, < Gr. Πλουτώνιος, of Pluto or the nether world, < Πλούτων, Pluto: see *Pluto.*] **I.** *a.* Of or pertaining to Pluto; Plutonic.

The night's *Plutonian* shore. *Poe*, The Raven.

II. *n.* A Plutonist.

Plutonic (plō-ton'ik), *a.* [< L. *Pluto(n-)*, < Gr. Πλούτων, Pluto, + *-ic.*] 1. Of or relating to Pluto or the regions of fire; subterranean; dark. —2. Pertaining to or designating the system of the Plutonists: as, the *Plutonic* theory. —3. In *geol.*, formed deep below the surface.

Plutonic rocks are such igneous rocks as have been formed under conditions of depth and pressure, and have cooled slowly, so as to have acquired in general a distinctly crystalline structure: the term *Plutonic* is opposed to *volcanic*, the former designating rocks formed at some depth beneath the surface, the latter rocks of igneous origin but of superficial formation. As used by Lyell, the word is nearly the equivalent of *metamorphic.*

Granite is thus a decidedly *plutonic* rock — that is, it has consolidated at some depth beneath the surface, and in this respect differs from the superficial volcanic rocks, such as lava, which have flowed out above ground from volcanic orifices. *A. Geikie*, Text-Book of Geology, II. ii. § 7.

Plutonic theory, the geological theory that the present aspect and condition of the earth's crust are mainly due to igneous action.

Several modern writers, without denying the truth of the *Plutonic* or metamorphic *theory*, still contend that the crystalline and non-fossiliferous formations, whether stratified or unstratified, such as gneiss and granite, are essentially ancient as a class of rocks. *Lyell*, Prin. of Geol. (11th ed.), I. 129.

Plutonism (plō'tō-nizm), *n.* [< *Pluton-ist* + *-ism.*] The doctrines of the Plutonists.

Plutonist (plō'tō-nist), *n.* [< *Pluton-ic* + *-ist.*] One who adopts the Plutonic theory.

Plutus (plō'tus), *n.* [L., < Gr. Πλοῦτος, the god of riches, a personification of πλοῦτος, riches, wealth; prob. from the root of πλέως, full, L. *plus*, more, etc.: see *plus.*] In *classical myth.*, a personification of wealth, described as a son of Iasion and Demeter, and intimately associated with Eirene or Peace, who is often represented in art grouped with the infant Plutus. Zeus is said to have blinded him, in order that he might not bestow his favors exclusively on good men, but should distribute his gifts without regard to merit.

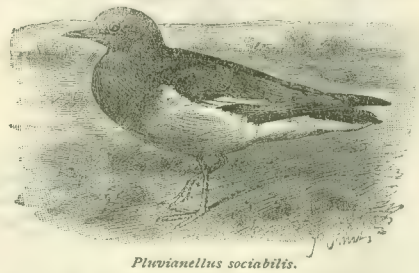
pluvial (plō'vi-al), *a.* and *n.* [I. *a.* = F. *pluvial* = Pr. Sp. Pg. *pluvial* = It. *piuviale*, < L. *pluvialis*, of or pertaining to rain, < *pluvia*, rain, < *pluvius*, rainy: see *pluvious.* II. *n.* < F. *pluvial* (Sp. *capa pluvial*), < ML. *pluvialis*, etc., a rain-cloak: see I.] **I.** *a.* 1. Rainy; humid; relating to rain; also, very rainy; characterized by great or extensive rainfall. —2. In *geol.*, depending on or arising from the action of rain.

The particular kind of denudation effected by means of rain is called *pluvial* denudation. *Huxley*, Physiography, p. 131.

II. *n. Eccles.*, a cope: so called from its use in outdoor processions, etc., as a protection from the weather.

Pluviales (plō-vi-ā'lēz), *n. pl.* [NL., pl. of L. *pluvialis*, pertaining to rain: see *pluvial.*] The plovers and plover-like birds: synonymous with *Charadriomorphæ.*

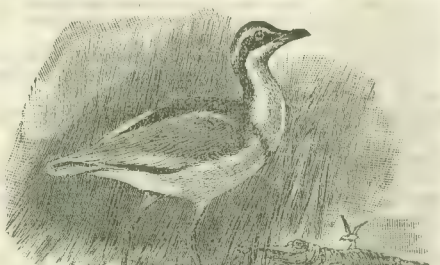
pluvialiform (plō-vi-al'i-fôrm), *a.* [< NL. *pluvialiformis*, < *Pluviales*, q. v., + L. *forma*, form.] Plover-like; pluvialine; charadriomorphic.



Pluvialiformes (plō-vi-al-i-fôr'mēz), *n. pl.* [NL., pl. of *pluvialiformis*: see *pluvialiform.*] The schizognathous water-birds, an extensive series of wading and swimming birds more or less related to the plovers, corresponding to the *Charadriomorphæ* and *Cecomorphæ* of Huxley, or the orders *Limicolæ*, *Longipennes*, and *Pygopodes.*

pluvialine (plō'vi-ạ-lin), *a.* [< *Pluvial-es* + *-ine*[1].] In *ornith.*, of or pertaining to a plover; resembling or related to the plovers; charadriomorphic: as, *pluvialine* characters; a *pluvialine* genus of birds.

pluviameter (plō-vi-am'e-tėr), *n.* Same as *pluviometer.*

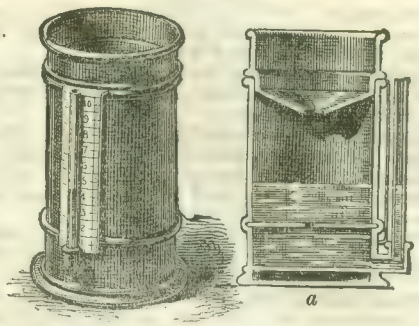


pluviametrical (plō″vi-ạ-met'ri-kạl), *a.* Same as *pluviometric.*

Pluvianellus (plō″vi-ạ-nel'us), *n.* [NL. (Hombron and Jacquinot), dim. of *Pluvianus:* see *Pluvianus.*] A genus of small wading birds related to the turnstones and surf-birds, with a hind toe and very short tarsus, containing one species, *P. sociabilis*, from the southern regions of South America.

Pluvianellus sociabilis.

Pluvianus (plō-vi-ā'nus), *n.* [NL. (Vieillot, 1816), < L. *pluvia*, rain: see *pluvial.*] A genus of plovers, belonging to the subfamily *Cursoriinæ;* the crocodile-birds. *P. ægyptius*, the only species, inhabits northern Africa, and is among the birds supposed to be the trochilus of Herodotus (the *Hoplopterus spinosus* being another). See *trochilus*, and cut under *spur-winged.* Also called *Cursorius*, *Hyas*, *Ammoptila*, and *Chlodromus.*



Crocodile-bird (*Pluvianus ægyptius*).

pluviograph (plō'vi-ō-grāf), *n.* [< L. *pluvia*, rain, + Gr. γράφειν, write.] A self-recording rain-gage.

In Beckley's *pluviograph* a pencil, attached to a vessel which sinks as it receives the rain describes a curve on a sheet of paper fixed round a rotating cylinder. *Encyc. Brit.*, XX. 257.

pluviometer (plō-vi-om'e-tėr), *n.* [Also *pluviameter;* < L. *pluvia*, rain, + Gr. μέτρον, measure.] An instrument for collecting and measuring the quantity of water that falls in rain, snow, etc., at a particular place; a rain-gage. See cut in next column.

Pluviometer. *a*, vertical section.

pluviometric (plō″vi-ō-met'rik), *a.* [< *pluviometer* + *-ic.*] Made by means of a pluviometer: as, *pluviometric* observations.

pluviometrical (plō″vi-ō-met'ri-kạl), *a.* [< *pluviometric* + *-al.*] Same as *pluviometric.*

pluviometrically (plō″vi-ō-met'ri-kạl-i), *adv.* In a pluviometric manner; by means of pluviometry; by the use of the pluviometer.

pluviometry (plō-vi-om'et-ri), *n.* [< L. *pluvia*, rain, + Gr. *-μετρία*, < μέτρον, measure.] The measurement of the amount of precipitation of rain or snow; the use of the pluviometer.

pluvioscope (plō'vi-ō-skōp), *n.* [< L. *pluvia*, rain, + Gr. σκοπεῖν, view.] A rain-gage; a pluviometer.

The results are here tabulated of the pluviometric observations taken at Paris during the years 1860–70 with the *pluvioscope* invented by the author [M. Hervé Mangon]. *Nature*, XXXV. 479.

Pluviose (plō'vi-ōs), *n.* [F., < L. *pluviosus*, full of rain, < *pluvia*, rain.] The fifth month of the French revolutionary calendar, from January 20th to February 18th inclusive in the year 1794.

pluvious (plō'vi-us), *a.* [< ME. *pluvyous* = F. *pluvieux* = Pr. *ploios* = Sp. *pluvioso* = Pg. *pluvioso, chuvoso* = It. *piovoso*, < L. *pluvius*, rainy, causing or bringing rain, < *pluere*, rain, impers. *pluit*, it rains.] Rainy; pluvial.

Chapman, The Blind Beggar of Alexandria (song).

They adore him, they *ply* him with flowers, and hymns, and incense, and flattery. *Thackeray.*

8†. To apply; devote with persistency or perseverance.

Ne ever cast his mind to covet prayse,
Or *ply* himselfe to any honest trade.
Spenser, F. Q., III. vii. 12.

9†. To exert; acquit.

But it is worthy of memorie to see how the women of ye towne did *plie* themselues with their weapons, making a great massacre vpon our men.
Webbe, Travels (ed. Arber), p. 23.

II. *intrans.* **1†.** To bend; yield; incline.

The gold of hem hath now so badde alayes
With bras that, though the coyne be fair at ye,
It wolde rather breste atwo than *plye*.
Chaucer, Clerk's Tale, l. 1113.

To *plie* this waie or that waie to good or to bad, ye shall haue as ye vse a child in his youth.
Ascham, The Scholemaster, p. 46.

As like a lion he could pace with pride,
Ply like a plant, and like a river slide.
Sir J. Davies, Dancing.

2. To keep at work or in action; busy one's self; work steadily; be employed.

All D'Aulnay's company *plied* for their fortifying with palisadoes, and the friars as busy as any.
Winthrop, Hist. New England, II. 162.

Ere half these authors be read (which will soon be with *plying* hard and daily), they cannot choose but be masters of any ordinary prose. *Milton.*

In vain their airy Pinions *ply*.
Congreve, Pindaric Odes, ii.

And around the bows and along the side
The heavy hammers and mallets *plied*.
Longfellow, Building of the Ship.

3. To proceed in haste; sally forth.

Thither he *plies*,
Undaunted to meet there whatever power
Or spirit of the nethermost abyss
Might in that noise reside. *Milton*, P. L., ii. 954.

Adriaen Block . . . *plied* forth to explore the vicinity.
Bancroft, Hist. U. S., II. 33.

4. To go back and forth or backward and forward over the same course; especially, to run or sail regularly along the same course, or between two fixed places or ports; make more or less regular trips: as, the boats that *ply* on the Hudson; the steamers that *ply* between New York and Fall River; the stage *plied* between Concord and Boston: said both of the vessels or vehicles that make the trips and of those who sail or run them.

And then they *ply* from th' eaues vnto the ground,
With mud-mixt Reed to wall their mansion round.
Sylvester, tr. of Du Bartas's Weeks, ii., The Handy-Crafts.

Cæsar, causing all his Boats and Shallops to be fill'd with Souldiers, commanded to *ply* up and down continually with relief where they saw need. *Milton*, Hist. Eng., ii.

Busy housewives *plied* backwards and forwards along the lines, helping everything forward by the nimbleness of their tongues. *Irving*, Knickerbocker, p. 129.

5. *Naut.*, to beat; tack; work to windward: as, to *ply* northward.

That day we *plyed* downe as farre as our Ladie of Holland, and there came to an anker.
Hakluyt's Voyages, I. 310.

The Currents at Cape La Vela do seldom shift, therefore Ships that *ply* to Wind-ward to get about it do not *ply* near the shore, but stand off to Sea.
Dampier, Voyages, II. iii. 101.

She was flying dead into the east, and every minute her keel passed over as many fathoms of sea as would take her hours of *plying* to recover.
W. C. Russell, Death Ship, xli.

6. To offer one's services for trips or jobs, as boatmen, hackmen, carriers, etc.

He was forced to *ply* in the streets, as a porter, for his livelihood. *Spectator.*

There is at Edinburgh a society or corporation of errand-boys called Cawdies, who *ply* in the streets at night with paper lanterns, and are very serviceable in carrying messages.
Smollett, Humphrey Clinker (J. Melford to Sir Watkin Phillips).

[It] will be readily pointed out by any one of the fifty intelligent fly-drivers who *ply* upon the pier.
Barham, Ingoldsby Legends, II. 139.

ply (plī), *n.* [< *ply*, *v.*] **1.** A fold; a thickness: often used in composition to designate the number of thicknesses or twists of which anything is made: as, three-*ply* thread; three-*ply* carpets.

I found myself at last on the diver's platform, twenty pounds of lead upon each foot, and my whole person swollen with *ply* and *ply* of woollen underclothing.
R. L. Stevenson, Education of an Engineer.

2. Bent; turn; direction; bias.

Custom is most perfect when it beginneth in young years; . . . late learners cannot so well take up the *ply*.
Bacon, Custom and Education (ed. 1887).

He bent all the subordinate branches of their government to the *ply* of his own favourite passion.
Goldsmith, Seven Years' War, v.

Under Elizabeth the growing taste for theatrical representations had begun gradually to displace it [the baiting of animals, and especially of bulls and bears], and to give a new *ply* and tone to the manners of the rich.
Lecky, Eng. in 18th Cent., iv.

He [Hamilton] accepted the constitution as it was, and did his best to give it the *ply* which he desired by practical interpretation. *Nineteenth Century*, XXIII. 105.

Plyctolophinæ, Plyctolophus. See *Plictolophus*, etc.

plyer, *n.* See *plier*.

plyght[1]**†,** *n.* and *v.* A Middle English form of *plight*[1], *plight*[2], etc.

plyght[2]**†, plyghte†.** Middle English forms of the preterit and past participle of *pluck*[1].

Plymouth Brethren. See *brother*.

Plymouth cloak†. A staff; a cudgel. [Slang.]

[That is, a cane, a staff; whereof this is the occasion. Many a man of good extraction, coming home from far voyages, may chance to land here, and, being out of sorts, is unable for the present time and place to recruit himself with clothes. Here (if not friendly provided) they make the next wood their draper's shop, where a staff cut out serves them for a covering. For we use, when we walk *in cuerpo*, to carry a staff in our hands, but none when in a cloak. *Ray*, Proverbs (1742), p. 238.]

Reserving still the emblème of a souldier (his sword) and a *Plimouth cloake*, otherwise called a battoone.
Lenten's Characterismi, Char. 30. (*Nares.*)

Shall I walk in a *Plymouth cloak* (that 's to say) like a rogue, in my hose and doublet, and a crab-tree cudgel in my hand? *Dekker*, Honest Whore, ii.

Plymouthism (plim'uth-izm), *n.* [< *Plymouth* + *-ism*.] The doctrines of the Plymouth Brethren. See *Plymouth Brethren*, under *brother*.

Plymouthist (plim'uth-ist), *n.* [< *Plymouth* + *-ist*.] An adherent of Plymouthism; one of the Plymouth Brethren; a Plymouthite.

There are therefore at least five official divisions or sects of *Plymouthists*. *Encyc. Brit.*, XIX. 239.

Plymouthite (plim'uth-īt), *n.* [< *Plymouth* + *-ite*[2].] One of the Plymouth Brethren.

Plymouth Rock. A large and serviceable variety of the domestic hen, of American origin. Both cock and hen have the plumage finely and evenly barred transversely throughout with blue-black on a ground of pearl-gray. The legs and beak are clear-yellow, and the tail is very small. The normal variety has an upright comb; but there are also pea-combed Plymouth Rocks. White Plymouth Rocks have been introduced recently.

plyt†, plyte†, *n.* Middle English forms of *plight*[2].

P. M. An abbreviation: (*a*) of *post meridiem*, ★'after noon or midday' (also P. M., p. m.): frequently used as synonymous with *afternoon* or *evening*; (*b*) of *postmaster*; (*c*) of *peculiar meter*.

★**pm.** In dental formulæ, an abbreviation of *premolar*.

pneodynamics (nē″ō-dī-nam'iks), *n.* [Irreg. < Gr. πνεῖν, breathe, + δύναμις, power: see *dynamics*.] The science of the mechanics of respiration.

pneogaster (nē-ō-gas'tėr), *n.* [Irreg. < Gr. πνεῖν, breathe, + γαστήρ, the stomach.] The respiratory tract; the respiratory or branchial intestine considered as a part of the general intestinal system, being developed from the embryo in connection therewith. It consists of air-passages in the widest sense, as lungs, windpipes, etc., or their equivalents.

pneogastric (nē-ō-gas'trik), *a.* [< *pneogaster* + *-ic*.] Of or pertaining to the pneogaster.

pneograph (nē'ō-gràf), *n.* [Irreg. < Gr. πνεῖν, breathe, + γράφειν, write.] An instrument invented by Dr. Mortimer Granville for testing and indicating the duration, force, and continuity of expiration in diverse conditions of the lungs. It consists of a delicately suspended and counterpoised semi-disk of talc, which is moved by the breath when held in front of the mouth. The disk carries a needle, which makes a tracing on smoked paper caused to move uniformly in relation with the needle. The tracings indicate by their undulations the character of the expiratory movement, from which the condition of the lungs may be inferred.

pneometer (nē-om'e-tėr), *n.* [Irreg. < Gr. πνεῖν, breathe, + μέτρον, measure.] A spirometer.

pneometry (nē-om'et-ri), *n.* [Irreg. < Gr. πνεῖν, breathe, + μετρία, < μέτρον, measure.] Measurement of inspired or expired air.

pneoscope (nē'ō-skōp), *n.* [Irreg. < Gr. πνεῖν, breathe, + σκοπεῖν, view.] An instrument for measuring the movement of the thorax in respiration.

★**pneuma** (nū'mä), *n.* [NL., < Gr. πνεῦμα, breath, < πνεῖν, blow, breathe. Cf. *neume*, *neuma*.] **1.** Breath; spirit; soul.—**2.** A breathing. In *early church music*: (*a*) A form of ligature at the end of certain plain-chant melodies, resembling the perielesis, but differing from it in being sung to an unmeaning syllable having no connection with the text. Its use can be traced with certainty to the fourth century, and it is still employed in the services of the Roman Catholic Church, especially at high mass. (*b*) Same as *neume*, 2.

pneumarthrosis (nū-mär-thrō'sis), *n.* [NL., < Gr. πνεῦμα, air, + ἄρθρωσις, a jointing: see *arthrosis*.] The presence of air in the cavity of a joint.

pneumathorax (nū-ma-thō'raks), *n.* An erroneous form of *pneumothorax*.

★**pneumatic** (nū-mat'ik), *a.* and *n.* [= F. *pneumatique* = Sp. *pneumático* = Pg. It. *pneumatico*, < L. *pneumaticus*, < Gr. πνευματικός, relating to wind or air, < πνεῦμα, wind, air, breath, spirit, < πνεῖν, blow, breathe.] **I.** *a.* **1.** Of or pertaining to air, or gases in general, or their properties; also, employing (compressed) air or other gas as a motive power: as, *pneumatic* experiments; a *pneumatic* engine. *Pneumatic* notes numerous instruments, machines, apparatus, etc., for experimenting on elastic fluids, or for working by means of the compression or exhaustion of air.

2. Consisting of or resembling air; having the properties of an elastic fluid; gaseous.

The *pneumatic* substance being in some bodies the native spirit of the body. *Lacon.*

3. Moved or played by means of air: as, a *pneumatic* instrument of music.—**4.** In *zoöl.*: (*a*) Filled with air; fitted to receive or contain air; pneumatized, as the air-cells or the bones of birds. (*b*) Of or pertaining to the respiratory system of any animal.—**Pneumatic action,** in *organ-building*, an action in which the keys, stop-knobs, or pedals merely make connections whereby the desired motions may be pneumatically effected. The pneumatic principle involved is either that of a small bellows which is inflated or emptied by the key or coupler, or that of a tube with pistons or valves at the ends which work sympathetically.—**Pneumatic bellows, coupler,** etc. See *pneumatic action*, above.—**Pneumatic cabinet,** in *med.*, an air-tight cabinet in which a patient is placed, so that the atmospheric pressure on the surface of the body may be increased or diminished.—**Pneumatic caisson.** See *caisson*, 3 (*c*).—**Pneumatic car, clock, conductor, drill.** See the nouns.—**Pneumatic despatch,** the transmission of articles from one point to another by air-pressure through a tube specially prepared for the purpose. Practically this is limited to the sending of small articles, as letters, telegraphic despatches, etc., for short distances, as between different stations in a large city. They are inclosed in a suitable box, which is propelled by compressed air through a tube from 2 to 3 inches in diameter; the return takes place by the atmospheric pressure, the air in the tube being exhausted at the first station.—**Pneumatic-despatch tube,** a tube traversed by a car or carrier which receives and delivers letters or parcels at stations along a route. Motion is caused by pressure of air, which is either forced into the tube from behind the car or exhausted in front of it, or both simultaneously. Special devices have been contrived for perfecting the construction of the cars and for arresting them at the points desired. The Brisbane carrier is a hollow ball which rolls along the interior of the pneumatic tube.—**Pneumatic differ-**

entiation, in *med.*, the causing a patient to breathe air of a different tension from that which surrounds his body.—**Pneumatic duct**, in *comp. anat.* See *ductus pneumaticus*, under *ductus*.—**Pneumatic elevator, excavator, gun**, etc. See the nouns.—**Pneumatic jig**, in *mining*, an air-jig; a jig in which the separation is effected by blasts of air instead of an intermittent current of water.—**Pneumatic organ**. See *organ*[1].—**Pneumatic paradox**, that peculiar exhibition of atmospheric pressure which retains a valve on its seat under a pressure of gas, allowing only a film of gas to escape.—**Pneumatic pen**. See *pen*[2].—**Pneumatic philosophy**†, the science of metaphysics or psychology; pneumatology.—**Pneumatic physicians**, a school of physicians, at the head of which was Athenæus, who made health and disease to consist in the different proportions of a fancied spiritual principle, called *pneuma*, from those of the other elementary principles.—**Pneumatic pile**. (*a*) A tube open at the lower or penetrating end, and closed from the air at the top, but communicating with a receiver from which air is exhausted. The pressure of the air acts to force the pile downward, and at the same time the silt within it is pressed upward and discharged into the receiver. (*b*) A caisson within which compressed air excludes the water, permitting necessary operations to be carried on inside it.—**Pneumatic spring, tube**, etc. See the nouns.—**Pneumatic trough**, a form of trough used by the physicist or chemist in experiments with gases. By its use the gas can be collected in a bell-jar or other receptacle over a surface of water or mercury.

II. *n.* 1. In *organ-building*, one of the members of a pneumatic action, whether a bellows or a tube. See *pneumatic action*, above.—2. Same as *pneumatology*, 2, where see quotation.

pneumatical (nū-mat'i-kal), *a.* and *n.* [< *pneumatic* + *-al*.] **I.** *a.* Same as *pneumatic*.

This body then accompanying the soul he calls *pneumatical*, that is (not spiritual in the Scripture sense, but) spirituous, vaporous, or airy.
Cudworth, Intellectual System, p. 785.

II.† *n.* A vaporous substance; a gas. *Bacon.*

pneumatically (nū-mat'i-kal-i), *adv.* By means of pneumatic force or of some pneumatic contrivance: as, *pneumatically* sunk caissons.

pneumaticity (nū-ma-tis'i-ti), *n.* [< *pneumatic* + *-ity*.] The state of being pneumatic, or hollow and filled with air; capacity of being inflated with air; inflation by air: applied to air-passages of animals, the hollow bones of birds, etc.

pneumatics (nū-mat'iks), *n.* [Pl. of *pneumatic*: see *-ics*.] 1. That branch of physics which treats of the mechanical properties of gases, and particularly of atmospheric air. Pneumatics treats of the weight, pressure, equilibrium, elasticity, density, condensation, rarefaction, resistance, motion, etc., of gases; it treats of them also considered as media of sound (acoustics), and as vehicles of heat, moisture, etc. It also comprises the description of those machines which depend for their action chiefly on the pressure and elasticity of air, as the various kinds of pumps, artificial fountains, etc.

2†. The doctrine of spiritual substances; pneumatology.

pneumatize (nū'ma-tīz), *v. t.*; pret. and pp. *pneumatized*, ppr. *pneumatizing*. [< *pneumat(ic)* + *-ize*.] To fill with air; render pneumatic, as bones. *Coues*, Key to N. A. Birds, p. 135.

pneumatocyst (nū'ma-tō-sist), *n.* [< Gr. *πνεῦμα*(*τ-*), air, + *κύστις*, bladder: see *cyst*.] 1. The air-sac, float, or pneumatophore of an oceanic hydrozoan or siphonophorous hydromedusan; one of the several appendages of the stem of these organisms, serving to buoy them in the water. See cuts under *Athorybia* and *Hydrozoa*. When pneumatocysts are wanting, they may be replaced by a general inflation of the stem, called then a *somatocyst*.

2. In *ornith.*, an air-sac or air-space; one of the cavities in a bird's body filled with air. *Coues.*

pneumatocystic (nū″ma-tō-sis'tik), *a.* [< *pneumatocyst* + *-ic*.] Of or having the character of a pneumatocyst, in any sense.

pneumatogram (nū'ma-tō-gram), *n.* [< Gr. *πνευμα*(*τ-*), breath, + *γράμμα*, a writing: see *gram*[2].] A tracing of respiratory movements.

pneumatographic (nū″ma-tō-graf'ik), *a.* [< *pneumatograph-y* + *-ic*.] Of or pertaining to pneumatography: as, a *pneumatographic* communication; a *pneumatographic* medium.

pneumatography (nū-ma-tog'ra-fi), *n.* [< Gr. *πνεῦμα*(*τ-*), wind (in def. 1, a spirit), + *-γραφία*, < *γράφειν*, write.] 1. So-called spirit-writing, independent of the hand of a medium or other material instrument. Also called *independent writing* and *direct writing*.—2. The observing and descriptive stage of pneumatology (sense 3). *O. T. Mason*, Smithsonian Report, 1881, p. 500.

pneumatological (nū″ma-tō-loj'i-kal), *a.* [< *pneumatolog-y* + *-ic-al*.] Pertaining to pneumatology.

pneumatologist (nū-ma-tol'ō-jist), *n.* [< *pneumatolog-y* + *-ist*.] One versed in pneumatology.

pneumatology (nū-ma-tol'ō-ji), *n.* [< Gr. *πνεῦμα*(*τ-*), air, + *-λογία*, < *λέγειν*, speak: see *-ology*.] 1†. The doctrine of or a treatise on the properties of elastic fluids; pneumatics.—2. The branch of philosophy which treats of the nature and operations of mind or spirit, or a treatise on it.

The terms Psychology and *Pneumatology*, or Pneumatic, are not equivalent. The latter word was used for the doctrine of spirit in general, which was subdivided into three branches, as it treated of the three orders of spiritual substances—God, Angels and Devils, and Man.
Sir W. Hamilton, Metaphysics, vi., foot-note.

3. The study of the beliefs, practices, and organizations of men with reference to a supposed world of spirits; spiritual philosophy.

Various terms have been suggested, as comparative mythology, spiritology, *pneumatology*, daimonology, &c.
O. T. Mason, Smithsonian Report, 1881, p. 500.

4. In *theol.*, the doctrine of the Holy Spirit.

The *pneumatology* of Ephesians resembles that of John, as the christology of Colossians resembles the christology of John. *Schaff*, Hist. Christ. Church, I. § 95.

Pneumatomachian (nū″ma-tō-mā'ki-an), *n.* and *a.* [< Gr. *πνευματομάχος*, hostile to the Holy Spirit, < *πνεῦμα*(*τ-*), spirit, + *μάχεσθαι*, quarrel.] **I.** *n.* An adversary of the Holy Ghost; one who denies the existence, personality, or godhead of the Holy Spirit; specifically, one of a sect or party, or group or succession of parties and sects, in the fourth century holding such doctrines. The Pneumatomachians in general taught that the Holy Ghost is a creature, a ministering spirit. Some combined this view with the Arian view that God the Son is a creature, and a few taught the extreme doctrine that the Spirit is the creature of a creature (the Son). Most of them, however, accepted the Homoiousian doctrine of the person of the Son, and these were known as *Macedonians* or *Marathonians*, and also as *Semi-Arians*—the Semi-Arians having as a whole adopted these views. The views of the Pneumatomachians were developed out of Arianism, after the Nicene Council (A. D. 325), and first showed themselves distinctly about 358. The heresy declined rapidly after the Constantinopolitan Council of 381.

II. *a.* Pertaining to the Pneumatomachians.

pneumatometer (nū-ma-tom'e-tėr), *n.* [< Gr. *πνεῦμα*(*τ-*), air, breath, + *μέτρον*, measure.] An instrument for measuring the quantity of air inhaled into the lungs at a single inspiration and given out at a single expiration; a pulmometer; a spirometer. Also called *pneumometer*, *pneumonometer*.

pneumatometry (nū-ma-tom'et-ri), *n.* [As *pneumatometer* + *-y*[3].] The measurement of the air inspired or expired, as with a pneumatometer.

pneumatophonic (nū″ma-tō-fon'ik), *a.* [< *pneumatophon-y* + *-ic*.] Of or pertaining to pneumatophony. [Rare.]

pneumatophony (nū'ma-tō-fō-ni), *n.* [< Gr. *πνεῦμα*(*τ-*), spirit, + *φωνή*, voice.] So-called spirit-speaking; the supposed production of articulate sounds, resembling the human voice or speech, and conveying intelligence, by disembodied spirits. [Rare.]

pneumatophore (nū'ma-tō-fōr), *n.* [< Gr. *πνεῦμα*(*τ-*), air, + *-φορος*, < *φέρειν* = E. *bear*[1]. Cf. LGr. *πνευματόφορος*, borne by the wind, also inspired.] A pneumatocyst, or a structure which supports such a float; especially, the proximal dilatation of the cœnosarc or hydrosome of the *Physophoridæ*. See cuts under *Athorybia* and *Hydrozoa*.

pneumatophorous (nū-ma-tof'ō-rus), *a.* [< *pneumatophore* + *-ous*.] In *zoöl.*, bearing a pneumatocyst; pertaining to a pneumatophore, or having its character.

pneumatosic (nū-ma-tō'sik), *a.* [< *pneumatosis* + *-ic*.] Affected with pneumatosis.

pneumatosis (nū-ma-tō'sis), *n.* [NL., < Gr. *πνευμάτωσις*, a blowing up, inflation, < *πνευματοῦν*, blow up, fill with wind, < *πνεῦμα*(*τ-*), wind: see *pneumatic*.] A morbid accumulation of gas in any part of the body. See *emphysema*.

pneumatothorax (nū″ma-tō-thō'raks), *n.* Same as *pneumothorax*.

pneumectomy (nū-mek'tō-mi), *n.* [For **pneumonectomy*, < Gr. *πνεύμων*, lung, + *ἐκτομή*, excision.] Excision of a portion of a lung.

pneumo-. In the following compounds of Greek *πνεύμων*, lung, *pneumo-* is short for the proper form *pneumono-*.

pneumoactinomycosis (nū-mō-ak″ti-nō-mī-kō'sis), *n.* [NL., < Gr. *πνεύμων*, lung, + NL. *actinomycosis*.] Actinomycosis of the lung.

Pneumobranchia (nū-mō-brang'ki-ą), *n. pl.* [NL., < Gr. *πνεύμων*, lung, + *βράγχια*, gills.] In Gray's classification (1840), same as *Pneumobranchiata*, 3.

Pneumobranchiata (nū-mō-brang-ki-ā'tą), *n. pl.* [NL., < Gr. *πνεύμων*, lung, + NL. *Branchiata*.] 1. An order of gastropods, including those which breathe air in a closed chamber lined with pulmonic vessels: applied by J. E. Gray to the typical pulmonates or pulmonifers, and including most of the inoperculate land-shells as well as the fresh-water forms related to them.—2. In Lamarck's classification (1819), a section of gastropods, containing his family *Limacea*.—3. In Gray's classification (1821), a subclass of *Gasteropodophora*, comprising all terrestrial gastropods, and divided into *Inoperculata* and *Operculata*.

pneumocace (nū-mok'a-sē), *n.* [< Gr. *πνεύμων*, lung, + *κακή*, badness, < *κακός*, bad.] Gangrene of the lungs.

pneumocarcinoma (nū-mō-kär-si-nō'mą), *n.* [NL., < Gr. *πνεύμων*, lung, + L. *carcinoma*.] Carcinoma of the lungs.

pneumocele (nū'mō-sēl), *n.* Same as *pneumonocele*.

pneumoconiosis (nū-mō-kō-ni-ō'sis), *n.* Same as *pneumonoconiosis*. Also *pneumokoniosis*.

pneumoderm (nū'mō-dėrm), *n.* [< Gr. *πνεύμων*, lung, + *δέρμα*, skin.] A gymnosomatous pteropod of the family *Pneumodermidæ*.

pneumoderma[1] (nū-mō-dėr'mą), *n.* [NL., < Gr. *πνεῦμα*, air, + *δέρμα*, skin.] Subcutaneous emphysema.

Pneumoderma[2] (nū-mō-dėr'mą), *n.* [NL. (Péron and Lesueur, 1810), < Gr. *πνεύμων*, lung, + *δέρμα*, skin.] A genus of gymnosomatous pteropods, typical of the *Pneumodermonidæ*, in which processes of the integument perform the function of gills. Also called *Pneumodermis*, *Pneumodermon*, *Pneumodermum*, *Pneumonodermum*.

Pneumoderma violaceum.

Pneumodermatidæ (nū″mō-dėr-mat'i-dē), *n. pl.* [NL., < *Pneumoderma*(*t-*) + *-idæ*.] Same as *Pneumodermidæ*.

Pneumodermidæ (nū-mō-dėr'mi-dē), *n. pl.* [NL., < *Pneumoderma*[2] + *-idæ*.] A family of gymnosomatous pteropods, typified by the genus *Pneumoderma*, having the head and mouth tentaculate. They have a specialized branchial apparatus consisting of at least a lateral gill on one (right) side and generally a posterior gill, suckers on the ventral side of the protrusible anterior part of the buccal cavity, and a jaw. Twelve or more species, of several genera, are known. Also called *Pneumodermatidæ*, *Pneumodermonidæ*, *Pneumonodermatidæ*.

Pneumodermis (nū-mō-dėr'mis), *n.* [NL.] Same as *Pneumoderma*[2]. *Oken.*

Pneumodermon (nū-mō-dėr'mon), *n.* [NL. (Lamarck, 1819): see *Pneumoderma*[2].] Same as *Pneumoderma*[2].

Pneumodermonidæ (nū″mō-dėr-mon'i-dē), *n. pl.* [NL., < *Pneumodermon* + *-idæ*.] Same as *Pneumodermidæ*.

pneumoenteritis (nū-mō-en-te-rī'tis), *n.* [NL., < Gr. *πνεύμων*, lung, + *ἔντερον*, intestine, + *-itis*.] Hog-cholera; swine-plague. See *cholera*.

pneumogastric (nū-mō-gas'trik), *a.* and *n.* [< Gr. *πνεύμων*, lung, + *γαστήρ*, stomach.] **I.** *a.* Pertaining to the lungs and the stomach, or to the functions of respiration and digestion: specifically, in anatomy, noting several nervous structures.—**Pneumogastric ganglion**. See *ganglion*.—**Pneumogastric lobule**. Same as *flocculus*, 2.—**Pneumogastric plexus**. See *gastric plexus* (under *plexus*), and *vagus*.

II. *n.* The pneumogastric nerve. See *vagus*.

pneumogram (nū'mō-gram), *n.* [< Gr. *πνεύμων*, lung, + *γράμμα*, a writing: see *gram*[2].] The tracing yielded by the pneumograph.

pneumograph (nū'mō-gràf), *n.* [< Gr. *πνεύμων*, lung, + *γράφειν*, write.] In *pathol.*, same as *stethograph*.

pneumographic (nū-mō-graf'ik), *a.* [< *pneumograph-y* + *-ic*.] Descriptive of the lungs and air-passages, or the organs of respiration.

pneumography (nū-mog'ra-fi), *n.* [< Gr. *πνεύμων*, lung, + *-γραφία*, < *γράφειν*, write.] 1. Descriptive pneumology; a treatise on or description of the lungs and air-passages, or organs of respiration.—2. The recording of the movements of respiration.

pneumohemothorax (nū-mō-hem-ō-thō'raks), *n.* [NL., < Gr. *πνεῦμα*, air, + *αἷμα*, blood, + *θώραξ*, chest.] The presence of gas and blood or bloody serum in the pleural cavity.

pneumohydrothorax (nū-mō-hī-drō-thō'raks), *n.* [NL., < Gr. *πνεῦμα*, air, + *ὕδωρ* (*ὑδρ-*), water, + *θώραξ*, chest.] The presence of gas and serous liquid in the pleural cavity.

pneumological (nū-mō-loj'i-kal), *a.* [< *pneumolog-y* + *-ic-al*.] Of or pertaining to pneumology.

pneumology (nū-mol′ō-ji), *n.* [< Gr. *πνεύμων*, lung, + *-λογία*, < *λέγειν*, speak: see *-ology*.] The sum of scientific knowledge concerning the lungs and air-passages, or the organs and processes of respiration.

pneumometer (nū-mom′e-tėr), *n.* Same as *pneumatometer*.

pneumometry (nū-mom′et-ri), *n.* Same as *pneumatometry*.

pneumomycosis (nū″mō-mī-kō′sis), *n.* [NL., < Gr. *πνεύμων*, lung, + *μύκης*, fungus, + *-osis*.] The presence of fungi in the lungs. Also *pneumonomycosis*.

pneumonalgia (nū-mō-nal′ji-ą), *n.* [NL., < Gr. *πνεύμων*, lung, + *ἄλγος*, pain.] Pain in the lungs.

pneumonatelectasis (nū-mō-nat-e-lek′tą-sis), *n.* [NL., < Gr. *πνεύμων*, lung, + NL. *atelectasis*.] Atelectasis of the lungs.

pneumonedema (nū″mō-nē-dē′mą), *n.* [< Gr. *πνεύμων*, lung, + *οἴδημα*, swelling.] Edema of ★the lungs; pulmonary edema.

pneumonia (nū-mō′ni-ą), *n.* [= F. *pneumonie* = Sp. Pg. *pneumonia*, < NL. *pneumonia*, < Gr. *πνευμονία*, Attic also *πλευμονία*, a disease of the lungs, < *πνεύμων*, Attic also *πλεύμων*, = L. *pulmo(n-)*, a lung, < *πνεῖν*, breathe: see *pneumatic*. Cf. *pulmonary*.] A name given to various diseases associated with consolidation of portions of the lung tissue, either through blocking up of the alveoli by an exudation or through increase in thickness of the connective-tissue walls of the alveoli. When used without qualification it usually denotes croupous pneumonia.—**Bilious pneumonia**, croupous pneumonia with icterus.—**Catarrhal pneumonia**, lobular pneumonia.—**Central pneumonia**, pneumonia of the central part of a lung.—**Cheesy pneumonia**, bronchopneumonia with consolidation of more or less extensive areas of lung-tissue, with degeneration resulting in the formation of cheese-like masses of debris. Such cases are usually if not always tuberculous, and are usually designated as *phthisis*.—**Chronic interstitial pneumonia**, a chronic pneumonia with excessive increase of the interstitial connective tissue. The disease is often tuberculous in origin, and is sometimes called *fibroid phthisis*.—**Croupous pneumonia**, an acute infectious disease marked by a fibrinous exudate which coagulates in the alveoli of the lung. The symptoms are chill, fever, stabbing pain in the side, rapid respiration, and cough with blood-tinged expectoration. Also called *fibrinous pneumonia*, or, from its distribution to one or more lobes in their entirety, *lobar pneumonia*.—**Desquamative pneumonia**, catarrhal pneumonia in which the alveolar epithelium is shed in considerable quantity.—**Intermittent pneumonia**, croupous pneumonia with frequent marked remissions of pyrexia.—**Lobular pneumonia**, a pneumonia which in its distribution affects the areas belonging to small bronchi scattered here and there, as distinct from lobar pneumonia, in which entire lobes are affected. Also called *catarrhal pneumonia* and *bronchopneumonia*.—**Pneumonia migrans**, a croupous pneumonia which invades progressively from day to day adjacent parts of the lungs.—**Typhoid pneumonia**, croupous pneumonia with exceptionally severe general effects, exhibited in great prostration, delirium, dry tongue, enlarged spleen, often slight icterus, and albuminuria.

pneumonic (nū-mon′ik), *a.* and *n.* [< Gr. *πνευμονικός*, pertaining to the lungs, < *πνεύμων*, lung: see *pneumonia*. Cf. *pulmonic*.] **I.** *a.* 1. Pertaining to the lungs; pulmonary.—2. Pertaining to pneumonia; affected with pneumonia; pulmonitic: as, *pneumonic* patients.

II. *n.* A remedy used in diseases of the lungs.

pneumonitic (nū-mō-nit′ik), *a.* [< *pneumonitis* + *-ic*.] Pertaining to or of the nature of pneumonitis.

pneumonitis (nū-mō-nī′tis), *n.* [NL., < Gr. *πνεύμων*, lung, + *-itis*.] Inflammation of the lungs; pneumonia.

pneumonocarcinoma (nū″mō-nō-kär-si-nō′-mą), *n.* [< Gr. *πνεύμων*, lung, + NL. *carcinoma*, carcinoma.] Carcinoma of the lungs.

pneumonocele (nū′mō-nō-sēl), *n.* [< Gr. *πνεύμων*, lung, + *κήλη*, tumor.] Hernia of the lung, as through an opening in the diaphragm.

Pneumonochlamyda (nū″mō-nō-klam′i-dą), *n. pl.* [NL., < Gr. *πνεύμων*, lung, + *χλαμύς* (*χλαμυδ-*), a cloak, mantle.] A suborder of *Gasteropoda*, having the pallial chamber converted into a lung-sac, but no gills, as in the families *Cyclostomidæ*, *Helicinidæ*, *Aciculidæ*, etc.

pneumonochlamydate (nū″mō-nō-klam′i-dāt), *a.* [< *Pneumonochlamyda* + *-ate*[1].] Belonging to the *Pneumonochlamyda*.

pneumonocirrhosis (nū″mō-nō-si-rō′sis), *n.* [NL., < Gr. *πνεύμων*, lung, + NL. *cirrhosis*.] Cirrhosis of the lungs.

pneumonoconiosis (nū″mō-nō-kō-ni-ō′sis), *n.* [NL., < Gr. *πνεύμων*, lung, + *κόνις*, dust, + *-osis*.] Inflammatory disease of the lungs due to inhalation of irritating particles.

Pneumonoderma (nū″mō-nō-dėr′mą), *n.* [NL.] Same as *Pneumoderma*[2].

pneumonodynia (nū″mō-nō-din′i-ą), *n.* [NL., < Gr. *πνεύμων*, lung, + *ὀδύνη*, pain.] Pain in the lungs.

pneumonomelanosis (nū″mō-nō-mel-ą-nō′sis), *n.* [NL., < Gr. *πνεύμων*, lung, + NL. *melanosis*.] Pulmonary melanosis, or anthracosis.

pneumonometer (nū-mō-nom′e-tėr), *n.* [< Gr. *πνεύμων*, lung, + *μέτρον*, measure.] Same as *pneumatometer*.

pneumonophthisis (nū″mō-nof-thī′sis), *n.* [NL., < Gr. *πνεύμων*, lung, + *φθίσις*, consumption.] Pulmonary phthisis.

pneumonorrhagia (nū″mō-nō-rā′ji-ą), *n.* [NL., < Gr. *πνεύμων*, lung, + *-ραγία*, < *ῥηγνύναι*, break, burst.] Same as *pneumorrhagia*.

pneumony (nū′mō-ni), *n.* Same as *pneumonia*.

Pneumoötoka (nū-mō-ot′ō-ką), *n. pl.* Same as *Pneumotoca*.

pneumoötokous (nū-mō-ot′ō-kus), *a.* Same as *pneumotocous*.

pneumopericarditis (nū-mō-per″i-kär-dī′tis), *n.* [NL., < *pneumo(pericardium)* + *pericarditis*.] Pneumopericardium with pericarditis.

pneumopericardium (nū-mō-per-i-kär′di-um), *n.* [NL., < Gr. *πνεῦμα*, air, + *περικάρδιον*, pericardium: see *pericardium*.] The presence of gas in the pericardial cavity.

pneumophthisis (nū-mof-thī′sis), *n.* [NL., < Gr. *πνεύμων*, lung, + *φθίσις*, consumption: see *phthisis*.] Pulmonary phthisis.

pneumopleuritis (nū″mō-plō-rī′tis), *n.* [NL., < Gr. *πνεύμων*, lung, + *πλευρῖτις*, pleuritis: see *pleuritis*.] Inflammation of the lungs and the pleura; pleuropneumonia.

pneumopyothorax (nū-mō-pī-ō-thō′raks), *n.* [NL., < Gr. *πνεῦμα*, air, + *πύον*, pus, + *θώραξ*, the chest: see *thorax*.] The presence of gas and pus in the pleural cavity. Also called *pyopneumothorax*.

pneumorrhagia (nū-mō-rā′ji-ą), *n.* [NL., < Gr. *πνεύμων*, lung, + *-ραγία*, < *ῥηγνύναι*, break.] Pulmonary hemorrhage.—**Diffuse pneumorrhagia**, an escape of blood into the substance of the lung, with laceration. Also called *pulmonary apoplexy*.

pneumoskeletal (nū-mō-skel′e-tąl), *a.* [< *pneumoskelet-on* + *-al*.] Of or pertaining to the pneumoskeleton.

pneumoskeleton (nū-mō-skel′e-tọn), *n.* [< Gr. *πνεύμων*, lung, + *σκελετόν*, a dry body: see *skeleton*.] An exoskeleton or hard tegumentary structure developed in connection with ■ respiratory or pulmonary organ. Thus, the shell of a mollusk, being developed from the pallium or mantle, which has a respiratory function, constitutes a *pneumoskeleton*. *H. A. Nicholson.*

pneumothorax (nū-mō-thō′raks), *n.* [NL., < Gr. *πνεῦμα*, air, + *θώραξ*, the chest: see *thorax*.] The presence of air in the pleural cavity. Also *pneumatothorax*.

Pneumotoca (nū-mot′ō-ką), *n. pl.* [NL.: see *pneumotocous*.] A division of *Vertebrata*, including air-breathing oviparous vertebrates, as birds and reptiles. *Owen*.

pneumotocous (nū-mot′ō-kus), *a.* [< Gr. *πνεύμων*, lung, + *ὠοτόκος*, egg-laying: see *oötocous*.] Breathing air and laying eggs, as a vertebrate; belonging to the *Pneumotoca*.

pneumotomy (nū-mot′ō-mi), *n.* [< Gr. *πνεύμων*, lung, + *τομή*, a cut, < *τέμνειν*, *ταμεῖν*, cut.] In *surg.*, incision into the lung, as for the evacuation of an abscess.

pneupome (nū′pōm), *n.* [For **pneumonopome*, < Gr. *πνεύμων*, lung, + *πῶμα*, lid.] An operculate pulmonate gastropod.

pnigalion (nī-gā′li-ọn), *n.* [< Gr. *πνιγαλίων*, the nightmare, cf. *πνίξ*, suffocation, < *πνίγειν*, choke.] In *med.*, an incubus; a nightmare.

Pnoëpyga (nō-e-pī′gą), *n.* [NL. (Hodgson, 1844), < Gr. *πνοή*, breath, + *πυγή*, the rump.] A genus of birds of wren-like character, having booted tarsi, and very short tail-feathers hidden by their coverts, commonly referred to the family *Troglodytidæ*. There are several species, all Asiatic, as *P. squamata* (or *albiventer*), *P. pusilla*, and *P. caudata*. The genus had before been called *Tesia* by Hodgson, from the Nepalese name of some bird of this kind. The latest authority refers the genus to the *Timeliidæ*. *R. B. Sharpe*, Cat. Birds Brit. Mus., VI. 301.

Pnoëpyga albiventer.

Pnyx (niks), *n.* [Gr. *πνύξ* (gen. *πυκνός*), a place of assembly (see def.), < *πυκνός*, crowded, close.] A public place of assembly in ancient Athens, where the people met for the discussion of political affairs of the state; also, a popular assembly convened in this place.

Poa (pō′ą), *n.* [NL. (Linnæus, 1737), < Gr. *πόα*, dial. *ποία*, *ποίη*, grass, esp. as fodder, an herb or plant.] A genus of grasses of the tribe *Festuceæ* and subtribe *Eufestuceæ*, characterized by the commonly two- to six-flowered spikelets in a lax panicle, the smooth grain free from the palets, and the keeled and obtuse awnless flowering glume with five nerves converging at the apex. There are 100, or according to some over 200, species, widely dispersed, few in the tropics, most abundant in north temperate regions. They are known in general as *meadow-grass* or *spear-grass*. Some are low annuals, as *P. annua*, the low spear-grass, abundant by American roadsides and paths in parks, and blooming in the south from midwinter onward. The other American species are perennials, with tufted stems, often tall, and soft leaves, flat or less often convolute. The genus contains several valuable hay- and pasture-grasses, of which the most important are *P. pratensis*, the Kentucky blue-grass, June-grass, etc., and *P. arachnifera*, the Texas blue-grass. (See *blue-grass* and *meadow-grass*.) *P. trivialis* is cultivated as *bird-grass*, etc., and *P. cæspitosa* as *Australian grass*. For other species, see *bunch-grass*, *fowl-grass* (under *fowl*[1]), *June-grass*, *silver-grass*, *teff*, and *wire-grass*.

Flowering Plant of Kentucky blue-grass (*Poa pratensis*). *a*, a spikelet; *b*, the empty glumes; *c*, flowering glume, palet, and perfect flower.

Poaceæ (pō-ā′sē-ē), *n. pl.* [NL. (R. Brown, 1814), < *Poa* + *-aceæ*.] The grass family: a name based on the genus *Poa*. See *Gramineæ*. It was used for a large tribe or subfamily, distinguished from *Panicæ* by the absence of a joint to the pedicel beneath the glumes, and by the presence of a stalk or empty glumes or imperfect flowers above the fertile flowers.

poach[1] (pōch), *v.* [Early mod. E. also *poatch*, *potch*, *poche*, *poch*; according to Cotgrave, who gives only the pp. *poché*, < OF. *pocher*, *poucher*, thrust, poke (given by Cotgrave 'thrust or dig out with the fingers'), F. *pocher*, hit (the eye, so as to give one a black eye), also OF. *pocher*, blur (with ink), < LG. *poken*, poke, thrust, = MD. *pochen*, thrust: see *poke*[1], of which *poach*[1] is thus ult. an assibilated form. 2. To be penetrable, as soft muddy or marshy ground; be damp and swampy.

> Chalky and clay lands burn in hot weather, chap in summer, and *poach* in winter. *Mortimer*, Husbandry.

★**poach**[2] (pōch), *v.* [Formerly also *poch* (and *poche*†); appar. < OF. *pocher*, found in the phrase "*pocher le labeur d'autruy*, to poch into, or incroach upon, another man's imployment, practice in trade" (Cotgrave), where the exact sense is undetermined; it might be translated 'to pocket another man's labor' (*pocher*, pocket, < *poche*, a pocket, pouch: see *pouch*, *poke*[2]); or *pocher* may be identical with *pocher*, thrust: see *poach*[1]. Cf. OF. *pocher*, imitate, counterfeit.] **I.** *intrans.* To intrude or encroach upon another's preserves for the purpose of stealing game; kill and carry off game in violation of law.

His greatest fault is he hunts too much in the purlieus; would he would leave off *poaching!*
Beau. and Fl., Philaster, iv. 1.

II. *trans.* To trespass upon, especially for the purpose of killing and stealing game.

So shameless, so abandoned are their ways,
They *poach* Parnassus, and lay claim for praise.
Garth, Claremont.

But he, triumphant spirit! all things dared,
He *poach'd* the wood, and on the warren snared.
Crabbe, Works, I. 67.

poach[3] (pōch), *v. t.* [Early mod. E. also *poatch*, *potch*, *poche*, *poch*; < F. *pocher*, poach (eggs), first appar. in the pp., *œuf poché*, a poached egg, lit. one 'bagged' or cooked with the inner envelop unbroken, thus keeping the form of a small bag or purse: a particular use of *pocher*, bag, inclose in a bag, < *poche*, a bag: see *poach*[2] and compare *pouch*, *v.*] To cook by breaking the shell and dropping the contents whole into boiling water: said of eggs.

Tho. Has drest his excellence such a dish of eggs —— *P. jun.* What, *potched?*
B. Jonson, Staple of News, iii. 1.

Is a man therefore bound in the morning to *potcht* eggs and vinnegar? *Milton*, On Def. of Humb. Remonst.

★**poachard**†, *n.* An obsolete form of *pochard*.

poacher[1] (pō'chėr), *n.* [< *poach*[2] + *-er*[1].] 1. One who poaches; one who intrudes on the preserves of another for the purpose of stealing game; one who kills game unlawfully.—2. The sea-poacher, a fish.—3. The widgeon, *Mareca americana:* so called from its habit of seizing the food for which other ducks have dived. *G. Trumbull.* [Michigan.]

poacher[2] (pō'chėr), *n.* [< *poach*[3] + *-er*[1].] A contrivance for poaching eggs.

poachiness (pō'chi-nes), *n.* The state of being poachy.

The vallies, because of the *poachiness*, they keep for grass. *Mortimer*, Husbandry.

poachy (pō'chi), *a.* [< *poach*[1] + *-y*[1].] Wet and soft; easily penetrated, as by the feet of cattle: said of land.

But marsh lands lay not up till April, except your marshes be very *poachy.* *Mortimer*, Husbandry.

Poacites (pō-a-sī'tēz), *n.* [NL., < Gr. *πόα*, grass, + *-c-* (insignificant) + *-ites*[2].] A genus established by Schlotheim in 1820 for grass-like Paleozoic fossil plant-remains, the type being a plant later called *Equisetites.* *Poacites* was later applied to supposed gramineous remains of Mesozoic and Tertiary age.

poad-milk (pōd'milk), *n.* The first milk given by cows after calving; beestings. *Halliwell.* [Prov. Eng.]

poak (pōk), *n.* [Also *poake;* origin obscure.] Waste arising from the preparation of skins, composed of hair, lime, oil, etc. It is used as manure.

pocan (pō'kan), *n.* [See *poke*[3].] The poke or pokeweed, *Phytolacca Americana.*

pocard†, *n.* An obsolete form of *pochard.*

Bosca [It.], a bird called a *pocard.* *Florio*, 1598.

poccoon, *n.* Same as *puccoon.*

pochard (pō'chärd), *n.* [Also *poker*, and formerly *poachard*, *pocard;* said to be a var. of *poacher*. Cf. *poacher*, 3.] A duck, *Fuligula* or *Æthyia ferina*, belonging to the family *Anatidæ* and subfamily *Fuligulinæ*, more fully called the *red-headed* or *red-eyed pochard*, also *dunbird.* This duck is very common in Europe and many other parts of the Old World, and a variety or very closely related species, *F.* or *Æ. americana*, is equally so in North America, and known as the *redhead.* In the male the head is puffy, and with the neck is rich chestnut-red with coppery or bronzy reflections. The lower neck, fore parts of the body above and below, and rump and tail-coverts are black. The back is white, finely vermiculated with wavy or zigzag black lines. The bill is dull-blue with a black belt at the end, and the feet are grayish-blue with dusky webs. The eyes are orange. The female has the head dull-brown. The length is from 20 to 23 inches, the extent of wings about 33 inches. The pochard is a near relative of the canvasback. The name is extended to some or all of the species of *Fuligula* in a broad sense: as, the white-eyed *pochard.* See cuts under *Nyroca* and *scaup.*

poche[1]† (pōch), *v.* An obsolete form of *poach*[1].

poche[2]†, *n.* A Middle English form of *poke*[2], *pouch.*

pochette (pō-shet'), *n.* [F.] A small violin: see *kit*[5].

pock[1] (pok), *n.* [< ME. *pokke*, pl. *pokkes*, < AS. *poc* (*pocc-*), a pustule, = MD. *pocke*, D. *pok* = MLG. *pocke*, *poche*, LG. *pokken*, pl., = G. dial. *pfocke* (G. *pocke*, < LG.), a pustule, G. *pocken*, pl., smallpox; cf. Gael. *pucaid*, a pimple, Ir. *pucoid* (?), a pustule, *pucadh*, a swelling up; akin to *poke*[2], a bag. Hence pl. *pocks*, taken, esp. in *small pocks*, as a singular, and spelled disguisedly *pox.*] 1. A pustule raised on the surface of the body in an eruptive disease, as the smallpox.

Of *pokkes* and of scabbe, and every sore,
Shal every sheep be hool that of this welle
Drinketh a draughte.
Chaucer, Prol. to Pardoner's Tale, l. 72.

2. A pox; an eruptive disease, as smallpox. [Obsolete or vulgar.]

If God punish the world with an evil *pock*, they immediately paint a block and call it Job, to heal the disease.
Tyndale, Ans. to Sir T. More, etc. (Parker Soc., 1850), p. 105.

Glad you got through the *pock* so well—it takes a second time, some say. *S. Judd*, Margaret, ii. 5.

As soon as ever the *pock* began to decay it took away my eyes altogether.
Mayhew, London Labour and London Poor, I. 451.

pocked (pokt), *a.* [< *pock*[1] + *-ed*[2].] Pitted; marked with pustules, or pits left by them, or with other small lesions, suggesting the appearance of the skin during or after smallpox.

The posterior parts of both lungs were *pocked* with tubercle in the softening stage. *Lancet*, No. 3435, p. 1314.

And of this tufty, flaggy ground, *pocked* with bogs and boglets, one special nature is that it will not hold impressions. *R. D. Blackmore*, Lorna Doone, lix.

★**pocket** (pok'et), *n.* [< ME. *pocket*, *poket*, < AF. **poquet* (Norm. *pouquet*), OF. assibilated *pochet*, *pouchet*, m., also *pochette* (F. *pochette*), f., a pocket, dim. of *poque*, OF. assibilated *poche*, a poke, pocket: see *poke*[2], *pouch.*] 1. A small pouch or bag; specifically, a small pouch inserted in a garment for carrying money or other small articles.

Cered *pokets*, sal peter, vitriole.
Chaucer, Prol. to Canon's Yeoman's Tale, l. 255.

He took a little horn out of his *pocket*,
And he blew 't baith loud and schill.
Lady Marjorie (Child's Ballads, II. 340).

A fellow that has but a groat in his *pocket* may have a stomach capable of a ten-shilling ordinary. *Congreve.*

About 25 lbs. or 35 lbs. of ungummed silk are enclosed in bags of coarse canvas, called *pockets.* *Ure*, Dict., I. 392.

2. That which is carried in the pocket; money; means; financial resources.

For tho there were Fowls to be bought at every house where I lay, yet my *pocket* would not reach them.
Dampier, Voyages, II. i. 93.

They [shippers] have been more cautious since, but have more than once again glutted our markets, and been punished in *pocket.* *Quarterly Rev.*, CXLV. 315.

3. One of the small bags or nets at the corners and sides of some billiard-tables.

At the commencement of the last century the billiard-table was square, having only three *pockets* for the balls to run in, situated on one of the sides.
Strutt, Sports and Pastimes, p. 396.

4. Any cavity or opening forming a receptacle: as, a brace-*pocket*, a post-*pocket*, etc.—5. In a window fitted with sashes, the hole for a pulley.—6. In *mining*, an irregular cavity filled with veinstone and ore; a swelling of the lode in an irregular manner, in which a more or less isolated mass of ore occurs. A pockety lode is one in which the ore is thus distributed, instead of being disseminated somewhat uniformly through the body of the lode.

7. A glen or hollow among mountains. [U. S.]

In many of the *pockets* or glens in the sides of the hill the trees grow to some little height.
T. Roosevelt, Hunting Trips, p. 136.

8. A certain quantity of hops, wool, etc., equal to about 168 pounds.—9. In *racing slang*, a position in a race where one contestant is surrounded by three or more others, so that, owing to the impeding of his advance, he has no chance to win.—10. In *zoöl.* and *anat.*: (*a*) A blind sac; a sac-shaped cavity. (*b*) The external cheek-pouch of a rodent, as of the *Geomyidæ* and *Saccomyidæ.* See cuts under *Geomyidæ* and *Perognathus.* (*c*) The abdominal pouch of a marsupial. (*d*) The abdominal cavity of a halibut or other fish.—11. The trap of a weir, in which the fish are retained or caught. The fish pass from the little pound into the pocket, which is a frame about 16 feet long and 10 feet wide, with sides of netting and a board floor. The fish are left in the pocket by the receding tide, and are taken out at low water. In a deep-water weir the fish are not left by the tide, but must be lifted out with a seine or purse-net. See *weir.*—**Patch-pocket**, a pocket made by sewing a piece of stuff upon the outside of a garment, forming one side of the pocket, the other side being formed by the material of the garment itself. The piece so sewed on is usually of the same material as the garment.—**Pocket borough.** See *borough*[1].—**Pocket veto**, a mode of veto of a bill by a president, governor, or other executive officer, employed at the end of a legislative session. If the President does not interpose the ordinary veto, a bill becomes law at the expiration of ten days; but if the bill was passed within ten days of the adjournment of Congress, the President may retain ("pocket") the bill, which is thus killed at the end of the session without the interposition of a direct veto, and without risking the chances of its passage over the veto. [U. S.]—**To be in pocket**, to have gain or profit.—**To be out of pocket**, to expend or lose money: as, to *be out of pocket* by a transaction.—**To have** or **carry in one's pocket**, to have complete control of.

Dr. Proudie had interest with the government, and the man *carried*, as it were, Dr. Proudie *in his pocket.*
Trollope, Barchester Towers.

To pick one's pocket, to pick pockets, to steal from one's pocket; be in the habit of stealing from the pockets of others.

pocket (pok'et), *v. t.* [< *pocket*, *n.* Cf. F. *pocheter*, carry in the pocket.] 1. To put in a pocket or in one's pocket: as, to *pocket* a ball in billiards; to *pocket* a penknife.

Podalyria (pod-a-lir'i-ą), *n.* [NL. (Lamarck, 1793), < L. *Podalirius*, < Gr. *Ποδαλείριος*, in myth. son of Æsculapius.] A genus of leguminous shrubs, type of the tribe *Podalyrieæ*, characterized by the broad obtuse keel-petals united on the back, the turgid, ovoid, coriaceous pod, simple short-petioled rigid leaves, and a calyx remarkably indented at its broadly bell-shaped base. The 20 species are natives of South Africa, and are silvery-pubescent or villous shrubs, with alternate leaves, awl-shaped stipules, and pink, purple, or blue axillary flowers, usually only one or two together. *P. sericea*, the African satin-bush, and several other species are cultivated for their flowers and silky leaves.

Podalyrieæ (pod″ą-li-rī'ẹ̄-ē), *n. pl.* [NL. (Bentham, 1838), < *Podalyria* + *-eæ.*] A tribe of leguminous plants, characterized by its united sepals, papilionaceous petals, ten separate stamens, and simple or radiately compound leaves. The *Sophoreæ*, the only other papilionaceous tribe with ten free stamens, is different in its pinnate leaves. The *Podalyrieæ* include 27 genera, mainly Australian shrubs, with unjointed pods, and usually simple leaves not jointed to their short petiole. For the best-known

genera, see *Podalyria* (the type), *Baptisia* (the only genus in the eastern United States), *Piptanthus, Pultenæa, Jacksonia*, and *Gompholobium*.

podanencephalia (pod-an-en-se-fā′li-ă), *n.* [NL., < Gr. *πούς* (*ποδ-*), = E. *foot*, + NL. *anencephalia*, q. v.] In *teratol.*, anencephalia with a pedunculated head.

Podargidæ (pō-där′ji-dē), *n. pl.* [NL., < *Podargus* + *-idæ*.] A family of fissirostral picarian birds, typified by the genus *Podargus*, related to the *Caprimulgidæ*, and usually included in that family. They have very broad palatine bones with posterolateral processes, rudimentary basipterygoid processes, no elæodochon or oil-gland, and a pair of powder-down tracts, one on each side of the rump. These birds are confined to the Oriental and Australian regions; some of them are known as *frogmouths*, from the great breadth and deep fissure of the beak. They are nocturnal and insectivorous, and resemble goatsuckers and owls. The genera are *Podargus, Batrachostomus*, and *Ægotheles*. Also *Podargināe* as a subfamily of *Caprimulgidæ*.

podargine (pō-där′jin), *a.* Of or pertaining to the *Podargidæ* or *Podarginæ*.

podargue (pō-därg′), *n.* A bird of the genus *Podargus*.

Podargus (pō-där′gus), *n.* [NL. (Cuvier, 1829), < Gr. *πόδαργος*, swift-footed, < *πούς* (*ποδ-*), foot, + *ἀργός*, swift, bright.] 1. The typical genus of the family *Podargidæ*. There are several species, confined to the Australian and Papuan regions, as *P. strigoides*, or *P. cuvieri*, known to the colonists as *more-pork*, from its cry.

More-pork (*Podargus cuvieri*).

2. [*l. c.*] A species of this genus; a podargue.

podarthral (pō-där′thral), *a.* [< *podarthr-um* + *-al*.] In *ornith.*, joining the toes to the shank; pertaining to the podarthrum: as, the *podarthral* joint or articulation.

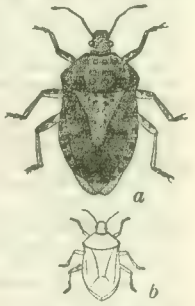
podices, *n.* Plural of *podex*.



Podicipedidæ (pod″i-si-ped′i-dē), *n. pl.* [NL., < *Podicipes* (*-ped-*) + *-idæ*.] A family of birds of the order *Pygopodes*, typified by the genus *Podicipes*; the grebes. The family has many peculiarities, causing it to rank as a suborder called *Podicipedes*, whose characters are the same as those of the family. They have no ambiens, femorocaudal, or accessory tendinosus muscle, only one carotid, short xiphisternum, long narrow pelvis, from fifteen to nineteen cervical vertebræ, a long cnemial process of the tibia and a very large patella, no superorbital depression for a nasal gland, and a special pyloric sac. Cæca are present, and the oil-gland is tufted. The feet are four-toed and lobate, not webbed; the nails are flat and blunt; the tail is rudimentary; the primaries are eleven in number; the lores are naked; the head is usually crested; and the bill is of variable shape. The leading genera are *Æchmophorus, Podiceps, Tachybaptes*, and *Podilymbus*. *Colymbidæ* is a synonym in one of its senses. Also *Podicipidæ, Podicepidæ, Podicipitidæ*. See cuts under *Æchmophorus* and *grebe*.

Podicipes (pō-dis′i-pēz), *n.* [NL., orig. *Podiceps* as a specific name (Linnæus, 1766), later as a generic name (Latham, 1790), tr. E. *arse-foot*; < L. *podex* (*podic-*), rump, + *pes* = E. *foot*.] The typical genus of the family *Podicipedidæ*. It formerly contained all the grebes, but is now usually restricted to those which have the bill moderately stout, not longer than the head, and not hooked at the end, the tarsus not longer than the middle toe and claw, the dimensions over ten inches, and the head usually crested and ruffed. There are numerous species, such as the crested grebe, *P. cristatus*; the red-necked grebe, *P. griseigena*; the horned grebe, *P. cornutus*; and the eared grebe, *P. auritus*. Also called *Colymbus*. Usually *Podiceps*. See cut under *grebe*.

Podilymbus (pod-i-lim′bus), *n.* [NL. (Lesson, 1831), < *Podi*(*ceps*) + (*Co*)*lymbus*.] A genus of *Podicipedidæ*, containing American grebes with a thick stout epignathous bill, and no crests or ruffs, the frontal feathers being mucronate. *P. podiceps* is the commonest grebe of the United States, commonly called the *pied-billed dabchick*. The genus is also called *Hydroka* and *Nexiteles*.

podismus (pō-dis′mus), *n.* [NL., < Gr. *ποδισμός*, a measuring by feet (taken in sense of 'a binding of the feet'), < *ποδίζειν*, measure by feet, also bind the feet, < *πούς* (*ποδ-*), foot.] Spasm of the muscles of the foot.

Podisus (pod′i-sus), *n.* [NL. (Herrich-Schäffer, 1853), < Gr. *πούς* (*ποδ-*), foot, + *ἴσος*, equal.] A genus of pentatomid bugs, with over 30 species, all American. They are of medium size and usually light colors, predaceous in habit, and provided with a strong beak wherewith to impale their prey. *P. placidus* is a North American species, notable as an enemy of the imported currant-worm, *Nematus ventricosus*. *P. spinosus* is common and wide-spread; it attacks many injurious larvæ. See also cut under *soldier-bug*.

Podisus placidus.
a, enlarged; *b*, natural size.

podite (pod′it), *n.* [< Gr. *πούς* (*ποδ-*), foot, + *-ite*.] A limb or leg of a crustacean, especially when developed as an ambulatory appendage, or leg fitted for walking. See *endopodite, exopodite, epipodite*; also *basipodite, coxopodite, dactylopodite, ischiopodite, meropodite, propodite*, and cuts under *Podophthalmia*.

These *podites* are usually seven-jointed.
Encyc. Brit., VI. 635.

poditic (pō-dit′ik), *a.* [< *podite* + *-ic*.] Of or pertaining to a podite.

poditti (pō-dit′i), *n.* [Australian.] The Australian saw-beaked kingfisher, *Syma flavirostris*. ★See cut under *Syma*.

podium (pō′di-um), *n.*; pl. *podia* (-ă). [L. (> It. *podio* = F. *podium*), < *podium* (see def.), < Gr. *πόδιον*, a little foot, dim. of *πούς* (*ποδ-*), foot: see *pew*[1].] 1. In *arch.*, a continuous pedestal; a stylobate; also, a raised platform which surrounded the arena of the ancient amphitheater, upon which sat persons of distinction, or a bench surrounding a room.—2. In *zoöl.* and *anat.*, the foot; the pes: usually applied in ornithology to the toes collectively, without the shank of the foot.—3. In *conch.*, the foot of a mollusk. Its parts are distinguished as *propodium, mesopodium, metapodium*, and *epipodium*, or *fore, middle, hind*, and *side parts*. See cuts under *Gasteropoda, Leptonidæ, Myidæ*, and *Pisidiidæ*.

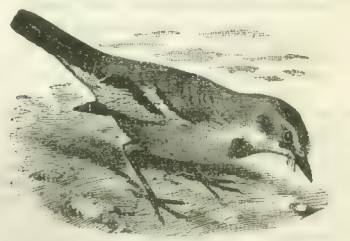
4. In *bot.*: (*a*) A footstalk, stipe, or the like. [Rarely used except in compounds.] (*b*) A joint, internode, or independent unit in the growth of the axis of a plant.

podje (poj′e), *n.* [Native name.] The spectral tarsier, *Tarsius spectrum*, of Borneo and Celebes. See cut under *Tarsius*.

pod-lover (pod'luv″ėr), *n.* The noctuid moth *Dianthœcia capsophila:* an English collectors' name, translating the specific term.

podobranchia (pod-ō-brang'ki-ą), *n.*; pl. *podobranchiæ* (-ē). [NL., < Gr. *πούς* (*ποδ-*), foot, + *βράγχια*, gills.] A foot-gill; one of the respiratory organs of crustaceans which are attached to the legs. Parts of a podobranchia are distinguished as the *base, stem, expanded lamina,* and *apical plume,* besides the proper *branchial filaments.* Podobranchiæ are coxopoditic, or borne upon the coxopodites of the limbs to which they are respectively attached, and of which they are the modified epipodites. See cuts under *Podophthalmia,* especially *M* and *N.*

podobranchial (pod-ō-brang'ki-ąl), *a.* [< *podobranchia* + *-al.*] Of or pertaining to a podobranchia.



podobranchiate (pod-ō-brang'ki-āt), *a.* [< *podobranchia* + *-ate*[1].] Having podobranchiæ.

Podocarpeæ (pod-ō-kär'pē-ē), *n. pl.* [NL. (Reichenbach, 1837), < *Podocarpus* + *-eæ.*] A tribe of plants of the family *Taxaceæ,* based on *Podocarpus* of L'Héritier. The fact that *Podocarpus* is preoccupied invalidates the tribal name.

Podocarpus (pod-ō-kär'pus), *n.* [NL. (Labillardière, 1806), so called in allusion to the thick fleshy stalk which supports the fruit (not so in other conifers); < Gr. *πούς* (*ποδ-*), foot, + *καρπός,* fruit.] 1. A genus of coniferous trees of the family *Taxaceæ,* incorrectly called *Phyllocladus* by most authors.—2. An untenable name for *Nageia,* also of the *Taxaceæ,* characterized by solitary or twin pistillate flowers surrounded by a few scales, bearing a somewhat stalked and projecting blade, which envelops the single adnate and inverted ovule. There are about 40 species, chiefly natives of the southern hemisphere beyond the tropics, and also frequent in montane and eastern tropical Asia. They are evergreen trees, with much diversity in foliage: the leaves are either scattered, opposite, two-ranked, or crowded; scale-like, linear, or broad; and veinless or with many fine parallel veins. The fruit is a globular or ovoid drupe or nut, 1½ inches or less in diameter, in some species edible, as *Nageia andina,* the plum-fir of Chile, with clusters of cherry-like fruits, and *N. excelsa,* the native plum or damson of New South Wales, also called *Mawarra pine* and *white pine.* Several other species are known as *fir* or *pine* among the colonists of New Zealand, Australia, and Cape Colony. Compare *fir* and *pine*[1], and for individual species see *kahikatea, matai,* and *miro.* Many species are among the most important timber-trees of the southern hemisphere, as (besides the preceding) *N. Totara,* the mahogany-pine; *N. cupressina,* the kaw-tabua, one of the chief timber-trees of Java; and the various yellow-woods of Cape Colony. (See *yellow-wood.*) Others are a source of valuable gums, as *N. polystachya,* the wax-dammar of Singapore. Some are but bushes, others reach a great height, as *N. amara* of Java (200 feet), and the yacca-tree of the West Indies (100 feet).

podocephalous (pod-ō-sef'ą-lus), *a.* [< Gr. *πούς* (*ποδ-*), foot, + *κεφαλή,* head.] In *bot.,* having a head of flowers elevated on a peduncle: said of a plant.

Podoces (pō-dō'sēz), *n.* [NL. (Fischer, 1823), < Gr. *ποδώκης,* swift-footed, < *πούς* (*ποδ-*), foot, + *ὠκύς,* swift.] A genus of oscine passerine birds of the family *Corvidæ* and subfamily *Fregilinæ,* with short wings, characteristic of the desert regions of central Asia; the desert-choughs. Four species are described—*P. panderi, P. hendersoni, P. biddulphi,* and *P. humilis.*

Desert-chough (*Podoces panderi*).

Podocoryne (pod″ō-kō-rī'nē), *n.* [NL. (Sars, 1842), < Gr. *πούς* (*ποδ-*), foot, + *κορύνη,* a club.] The typical genus of *Podocorynidæ. P. carnea* is an example. Also *Podocoryna.*

Podocorynidæ (pod″ō-kō-rin'i-dē), *n. pl.* [NL., < *Podocoryne* + *-idæ.*] A family of gymnoblastic hydromedusans, typified by the genus *Podocoryne.*

pododynia (pod-ō-din'i-ą), *n.* [NL., < Gr. *πούς* (*ποδ-*), foot, + *ὀδύνη,* pain.] Pain in the foot; podalgia.

podogyn (pod'ō-jin), *n.* [< F. *podogyne,* < NL. *podogynium,* q. v.] Same as *podogynium.*

podogynium (pod-ō-jin'i-um), *n.*; pl. *podogynia* (-ą). [NL., < Gr. *πούς* (*ποδ-*), foot, + *γυνή,* female (in mod. bot. pistil).] In *bot.,* same as *gynophore.* Compare *basigynium.*

Podolian (pō-dō'li-ąn), *a.* [< It. *Podolia* (see def.) + *-an.*] Of or pertaining to Podolia, a district of western Russia.—**Podolian cattle,** a breed of cattle widely distributed throughout Italy, usually with white or gray coat and enormous horns.—**Podolian marmot,** the *Spalax typhlus. Pennant.*

podology (pō-dol'ō-ji), *n.* [= F. *podologie,* < Gr. *πούς* (*ποδ-*), foot, + *-λογία,* < *λέγειν,* speak: see *-ology.*] A treatise on or a description of the foot. *Dunglison.*

podometer (pō-dom'e-tėr), *n.* [< Gr. *πούς* (*ποδ-*), foot, + *μέτρον,* measure.] Same as *pedometer.*

Podophthalma (pod-of-thal'mą), *n. pl.* [NL.: see *Podophthalmia.*] 1. In *Crustacea,* same as *Podophthalmia. Leach,* 1815.—2. In *conch.,* a division of rostriferous gastropods, having eyes at the ends of cylindrical peduncles which are separated from and at the outer edges of the long subulate tentacles. It includes the family *Ampullariidæ. J. E. Gray,* 1840.—3. [Used as a sing.] A genus of spiders, type of the *Podophthalmidæ.*

Podophthalmata (pod-of-thal'mą-tą), *n. pl.* [NL., pl. of *Podophthalma.*] Same as *Podophthalmia.*

podophthalmate (pod-of-thal'māt), *a.* [< Gr. *πούς* (*ποδ-*), foot, + *ὀφθαλμός,* eye, + *-ate*[1].] Same as *podophthalmic.*

podophthalmatous (pod-of-thal'mą-tus), *a.* [< *podophthalmate* + *-ous.*] Same as *podophthalmic.*

Podophthalmia (pod-of-thal'mi-ą), *n. pl.* [NL., < Gr. *πούς* (*ποδ-*), foot, + *ὀφθαλμός,* eye: see *ophthalmia.*] A division of malacostracous *Crustacea,* having the eyes borne upon movable eye-stalks or ophthalmites, and the cephalothorax forming a carapace; the stalk-eyed crustaceans: distinguished from *Edriophthalmia.* The group is divisible into two orders, *Stomatopoda* and *Decapoda,* the latter containing the most familiar crustaceans, as prawns, shrimps, crawfish, lobsters, and crabs. See also cuts under *Astacidæ, Astacus, Copepoda, copepodstage, endopodite, lobster, prawn,* and *stalk-eyed.*

Parts of the Crawfish (*Astacus fluviatilis*), with the nomenclature of the appendages of the stalk-eyed crustaceans (*Podophthalmia*) and the higher crustaceans (*Malacostraca*) in general.

A, mandible: *a*, its terminal joints, being the palpus of the mandible; *B*, first maxilla; *C*, second maxilla; *ca*, scaphognathite; *D*, first maxilliped; *E*, second maxilliped; *F*, third maxilliped. (*B* right; the others left.) In *A* to *F*, *ab*, endopodite; *c*, exopodite; *d*, epipodite; *e*, setaceous filaments of coxopodite. *M*, cross-section of half a thoracic somite: *a*, the somite; *b*, the coxopodite; *c*, basipodite; *d*, ischiopodite; *h*, branchiferous epipodite; *f*, *g*, branchiæ; *e*, filiform appendage. *N*, a branchiferous epipodite, enlarged: *a*, its point of attachment; *b*, basal enlargement; *c*, *c*, branchial filaments; *d*, terminal lobes.

podophthalmian (pod-of-thal'mi-ąn), *a.* and *n.* **I.** *a.* Same as *podophthalmic.*

II. *n.* A member of the *Podophthalmia.*

podophthalmic (pod-of-thal'mik), *a.* [< Gr. *πούς* (*ποδ-*), foot, + *ὀφθαλμός,* eye (see *ophthalmia*), + *-ic.*] Stalk-eyed, as a crustacean; belonging to the *Podophthalmia.*

Podophthalmidæ (pod-of-thal'mi-dē), *n. pl.* [NL. (Cambridge, 1877), < *Podophthalma* + *-idæ.*] A family of spiders, allied to the *Lycosidæ* and *Agalenidæ,* and having the eyes placed in four rows, the legs long and slender, and the abdomen long and cylindrical: typified by the genus *Podophthalma.* It is represented in the southern United States by the genus *Tetragonophthalma.*

podophthalmite (pod-of-thal'mīt), *n.* [< Gr. *πούς* (*ποδ-*), foot, + E. *ophthalmite.*] The distal or terminal joint of the movable two-jointed ophthalmite or peduncle of the eye of a stalk-eyed crustacean, the other being the *basiophthalmite.* See cut under *stalk-eyed.*

podophthalmitic (pod″of-thal-mit'ik), *a.* [< *podophthalmite* + *-ic.*] Of or pertaining to a podophthalmite.

podophthalmous (pod-of-thal'mus), *a.* [< *podophthalm-ic* + *-ous.*] Same as *podophthalmic.*

podophyllic (pod-ō-fil'ik), *a.* [< *podophyll-in* + *-ic.*] Pertaining to or derived from podophyllin.

podophyllin (pod-ō-fil'in), *n.* [= F. *podophylline;* < *Podophyllum* + *-in*[2].] A resin obtained from the rootstalk of *Podophyllum peltatum.* It is used in medicine as a purgative, and seems to have the power of stimulating the secretion of bile.

podophyllous (pod-ō-fil'us), *a.* [= F. *podophylleux,* < Gr. *ποίς* (*ποδ-*), foot, + *φύλλον,* a leaf.] In *entom.,* having the feet or locomotive organs compressed into the form of leaves.

Podophyllum (pod-ō-fil'um), *n.* [NL. (Linnæus, 1737), so called in allusion to the 5- to 7-parted leaf, thought to resemble the foot of some animal; < Gr. *ποίς* (*ποδ-*), foot, + *φύλλον,* leaf.] A genus of polypetalous plants of the family *Berberidaceæ,* characterized by having the ovules in many rows, the flower with six sepals, from six to nine petals, as many or twice as many stamens, and a large peltate stigma crowning the ovary, which becomes in fruit a berry. There are 5 species, one being *P. peltatum,* the May-apple or wild mandrake of North America, the others central and east Asian species. They are singular herbs, with thick and prolonged poisonous creeping rootstocks, from which rise long-stalked orbicular peltate and deeply lobed leaves, known among children as *umbrellas,* from their resemblance both when folded and when expanded; also called *duck's-foot.* The flowering stem, unlike the other, bears two leaves, peltate near the edge, and between them a single large flat white flower. The leaves are poisonous, but the sweetish yellow egg-shaped fruit is sometimes eaten. See *May-apple,* 1, 2, *mandrake,* 2, *hog-apple,* and *podophyllin.*

podopter (pō-dop'tėr), *n.* [< Gr. *πούς* (*ποδ-*), foot, + *πτερόν,* wing, = E. *feather.*] A member of the *Podoptera.*

podoscaph (pod'ō-skaf), *n.* [< Gr. *πούς* (*ποδ-*), foot, + *σκάφος,* a ship: see *scaphus.*] A hollow apparatus, like a small boat, attached one to each foot, and serving to support the body erect on the water.

Podosomata (pod-ō-sō'mą-tą), *n. pl.* [NL., neut. pl. of *podosomatus:* see *podosomatous.*] In Leach's system, an order of aporobranchiate *Arachnida,* constituted by the single family *Pycnogonidæ.*

podosomatous (pod-ō-som'ą-tus), *a.* [< NL. *podosomatus,* < Gr. *πούς* (*ποδ-*), foot, + *σῶμα*(*τ-*), body.] Having the legs of conspicuous size in comparison with the body; specifically, of or pertaining to the *Podosomata.*

podosperm (pod'ō-spėrm), *n.* [= F. *podosperme,* < Gr. *πούς* (*ποδ-*), foot, + *σπέρμα,* seed: see *sperm.*] In *bot.,* same as *funicle,* 4.

podospermium (pod-ō-spėr'mi-um), *n.* [NL.: see *podosperm.*] In *bot.,* same as *funicle,* 4.

Podosphæra (pod-ō-sfē'rą), *n.* [NL. (Kunze), < Gr. *πούς* (*ποδ-*), foot, + *σφαῖρα,* a ball.] A genus of pyrenomycetous fungi of the family *Erysiphaceæ.* The appendages are free from the mycelium, and dichotomously branched at the end. The perithecium contains but a single ascus. *P. Oxyacanthæ* is the cherry-blight.

Podostemaceæ (pod″ō-stē-mā'sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Podostemon* + *-aceæ.*] A family of dicotyledonous archichlamydeous (haplochlamydeous) plants of the order *Rosales,* characterized by the ovary of two or three cells, with numerous ovules in each cell, and by the aquatic habit, with creeping or expanded disks in place of roots, attached to stones under water, from which arise stems with small leaves like mosses, or fronds resembling algæ. The flowers are minute, with one, two, few, or many stamens, one ovary and two or three styles, a three- or five-cleft perianth, or in its place a row of little scales, and the fruit a small capsule. There are about 175 species, belonging to 5 tribes and 22 genera, of which *Podostemon* is the type. They are small plants of rapid rivers and brooks, growing firmly attached to stones under water. Properly *Podostemonaceæ.*

Podostemon (pod-ō-stē'mon), *n.* [NL. (Michaux, 1803), in allusion to the stamens supporting the ovary; < Gr. *πούς* (*ποδ-*), foot, + *στήμων,* warp (stamen).] A genus of aquatic plants, type of the family *Podostemonaceæ* and tribe *Eupodostemoneæ,* characterized by the two stamens with filaments united more than half their length, the two awl-shaped and entire stigmas, and an equally two-valved, oval, obtuse pod with two cells and eight ribs. There are about 12 species, natives of America and the

East Indies, with one, the type species, *P. Ceratophyllum*, the threadfoot or river-weed, extending into the northern United States. They have erect or branching stems, growing fast to stones, or in some the plant forms a lichen-like crust, sending up short branches only. Their usual aspect is much that of a filamentous or membranous seaweed.

Podostomata (pod-ō-stō′ma-tă), *n. pl.* [NL., neut. pl. of **podostomatus*: see *podostomatous*.] A class of *Arthropoda*, composed of the orders *Trilobita* and *Merostomata* (the latter containing the *Xyphosura*, *Synziphosura*, and *Eurypterida*): so called from the foot-like or ambulatory character of the mouth-parts. They are an ancient generalized type, represented at the present day by the king-crabs only.

podostomatous (pod-ō-stom′a-tus), *a.* [< NL. **podostomatus*, < Gr. *πούς* (*ποδ-*), foot, + *στόμα*, mouth.] Having foot-like mouth-parts; belonging to the *Podostomata*.

podotheca (pod-ō-thē′kă), *n.*; pl. *podothecæ* (-sē). [NL., < Gr. *πούς* (*ποδ-*), foot, + *θήκη*, sheath.] **1.** In *ornith.*, the covering of the foot, in so far as it is bare of feathers; the tarsal envelop and the sheaths of the toes.—**2.** In *entom.*, a leg-case, or that part of the integument of a pupa covering a leg.

podothecal (pod-ō-thē′kal), *a.* [< *podotheca* + *-al*.] Sheathing or investing the foot; of or pertaining to a podotheca.

podotrochilitis (pod-ō-trō-ki-lī′tis), *n.* [NL., < Gr. *πούς* (*ποδ-*), foot, + *τροχιλία*, pulley, + *-itis*.] An inflammatory disease of the fore foot in the horse, involving the synovial sheath between the sesamoid or navicular bone of the third phalanx (or hoof) and the flexor perforans playing over it: commonly called *navicular disease*. It is a frequent cause of lameness.

Podoura, podouran, etc. See *Podura*, etc.

pod-pepper (pod′pep″ėr), *n.* See *Capsicum*.

pod-shell (pod′shel), *n.* A bivalve mollusk of the family *Pharidæ*.

pod-shrimp (pod′shrimp), *n.* An entomostracous crustacean whose carapace is hinged or valvular, and thus capable of inclosing the legs as in a pod. The existing pod-shrimps are all small, but the type is an old one, formerly represented by large entomostracans. It is illustrated in the cuts under *Estheriidæ* and *Limnetis*.

The once giant *pod-shrimps* of Silurian times.
Encyc. Brit., VI. 663.

pod-thistle (pod′this″l), *n.* The stemless thistle, *Carduus acaulis*.

The people at Brackley . . . always spoke of the stemless thistle as the *pod-thistle*.
Academy, Jan. 11, 1890, p. 30.

Podura, Podoura (pō-dū′ră, pō-dō′ră), *n.* [NL. (Linnæus, 1748), < Gr. *πούς* (*ποδ-*), foot, + *οὐρά*, tail.] **1.** A Linnean genus of apterous insects, corresponding to the modern order *Thysanura*, used by later naturalists with various restrictions, and now typical of the family *Poduridæ*. They have but one tarsal claw. Some forms are found on standing water, others on the snow. They are known as *springtails* and *snow-fleas*. See cut under *springtail*.

2. [*l. c.*] A species of this genus; a poduran.

poduran, podouran (pō-dū′ran, pō-dō′ran), *a.* and *n.* [< *Podura* + *-an*.] **I.** *a.* Same as *podurous*.

II. *n.* A member of the genus *Podura* or the family *Poduridæ*.

Podurellæ†, Podourellæ† (pod-ū-rel′ē, pod-ō-rel′ē), *n. pl.* [NL., dim. of *Podura*.] In early systems of classification, as Leach's and Latreille's, a group of thysanurous insects, typified by the genus *Podura*, inexactly corresponding to the modern order or suborder *Collembola*.

Poduridæ, Podouridæ (pō-dū′ri-dē, pō-dō′ri-dē), *n. pl.* [NL. (Burmeister, 1838), < *Podura* + *-idæ*.] A family of thysanurous insects, suborder *Collembola*, typified by the genus *Podura*, to which various limits have been assigned. It was formerly nearly equivalent to *Collembola*, but is now restricted to forms with the body cylindrical and the appendage of the fourth abdominal segment developed into a saltatory apparatus. The mouth-parts are very rudimentary. The respiration is tracheal, though the podurans are supposed also to breathe directly through the integument. They are found almost everywhere in damp places. There are several genera besides *Podura*, as *Anura*, *Achoreutes*, *Tomocerus*, *Orchesella*, and *Lepidocyrtus*. See *snow-flea*, and cut under *springtail*.

podurous (pō-dū′rus), *a.* [< Gr. *πούς* (*ποδ-*), foot, + *οὐρά*, tail.] Belonging or pertaining to the genus *Podura* in any sense.

pod-ware (pod′wār), *n.* Pulse growing in pods or cods. See *podder*, 2. *Halliwell.* [Prov. Eng.]

podyperidrosis (pod-i-per-i-drō′sis), *n.* [NL., < Gr. *πούς* (*ποδ-*), foot, + *ὑπέρ*, over, beyond, + *ἱδρωσις*, perspiration: see *hidrosis*.] Excessive sweating of the feet.

poe[1], *n.* See *poi*.

poe[2] (pō′e), *n.* [Capt. Cook's rendering of a Tahitian name. Also *poy*, *pue*.] The poe-bird, originally called the *poe bee-eater*.

poe-bird (pō′e-bėrd), *n.* [< *poe*[2] + *bird*[1].] The poe, tui, or parson-bird, *Prosthemadera cincinnata* or *novæ-zealandiæ*, a meliphagine bird of New Zealand and Auckland. It is about as large as a blackbird, iridescent-black in color, with a patch of long curly white plumes on each side of the neck, and a white band on the wings. It is valued both by the natives for its plumage, which contributes to the ornamentation of the feather mantles worn by them, and also as a cage-bird, from the fineness of its song and its powers of mimicry. See cut under *parson-bird*.

pœcile (pē′si-lē), *n.* [< Gr. *ποικίλη*, sc. *στόα*, a porch adorned with fresco-paintings, fem. of *ποικίλος*, many-colored, mottled, pied, variegated, various, manifold; akin to L. *pingere* (√ *pic*), paint: see *picture*, *paint*.] A stoa or porch on the agora of ancient Athens: so called from the paintings of historical and religious subjects with which its walls were adorned. See *stoa*.

pœcilite (pē′si-līt), *n.* Same as *bornite*. Also ★*poikilite*.

pœcilitic (pē-si-lit′ik), *a.* and *n.* [Also *poikilitic*, and incorrectly *pæcilitic*; < Gr. *ποικίλος*, many-colored, mottled, + *-it-ic*.] A name suggested by Conybeare as an equivalent for *New Red Sandstone*, in allusion to its variegated color, the rocks of which this group is made up consisting chiefly of red, yellow, and variegated sandstones, conglomerates, and marls, with occasional beds of limestone. See *sandstone*, *Permian*, and *New Red Sandstone* (under *sandstone*).

pœcilocyte (pē′sil-ō-sīt), *n.* [< Gr. *ποικίλος*, many-colored, + *κύτος*, a hollow.] A non-nucleated red blood-corpuscle of abnormal shape.

pœcilocytosis (pē″si-lō-sī-tō′sis), *n.* [NL., as *pœcilocyte* + *-osis*.] The presence of pœcilocytes in the blood.

pœcilonym (pē′si-lō-nim), *n.* [< Gr. *ποικίλος*, various, manifold, + *ὄνυμα*, *ὄνομα*, a name: see *onym*.] One of two or more names for the same thing; a synonym. *Wilder; Leidy.*

pœcilonymic (pē-si-lō-nim′ik), *a.* [< *pœcilonym-y* + *-ic*.] Characterized by or pertaining to pœcilonymy.

An unusually complete combination of *pœcilonymic* ambiguities. *Buck's Handbook Med. Sci.*, p. 528.

pœcilonymy (pē-si-lon′i-mi), *n.* [< *pœcilonym* + *-y*[3].] The use of several different names for the same thing; application of different terms indifferently to a thing; varied or varying nomenclature. *The Nation*, July 18, 1889.

Pœcilopoda (pē-si-lop′ō-dă), *n. pl.* [NL., < Gr. *ποικίλος*, many-colored, manifold, + *πούς* (*ποδ-*) = E. *foot*.] In Latreille's system of classification, the second order of his *Entomostraca*, divided into two families, *Xiphosura* and *Siphonostoma*. It was a highly artificial group, including *Limulus* with numerous parasitic crustaceans, fish-lice, etc., as *Argulus*, *Caligus*, etc. Divested of these and restricted to the *Xiphosura*, the term is synonymous with *Merostomata* in one sense. See *Merostomata*.

pœcilopodous (pē-si-lop′ō-dus), *a.* Of or pertaining to the *Pœcilopoda*.

pœcilothermic (pē″si-lō-ther′mik), *a.* [< Gr. *ποικίλος*, various, + *θέρμη*, heat.] Varying in bodily temperature with that of the surrounding medium, as is particularly the case with cold-blooded animals. Also *poikilothermic*. [Rare.]

Most of the lower animals are *poikilothermic*, or, as they have less appropriately been called, cold-blooded.
Claus, Zoöl. (trans.), I. 74.

poem (pō′em), *n.* [< OF. *poëme*, F. *poème* = Sp. Pg. It. *poema*, < L. *poëma*, < Gr. *ποίημα*, anything made or done, a poem, < *ποιεῖν*, make. Cf. *poet*.] **1.** A written composition in metrical form; a composition characterized by its arrangement in verses or measures, whether in blank verse or in rime: as, a lyric *poem*; a pastoral *poem*.

The first and most necessarie poynt that euer I founde meete to be considered in making of a delectable *poeme* is this, to grounde it upon some fine inuention.
Gascoigne, Notes on Eng. Verse, § 1 (Steele Glas, etc., ed. (Arber).

A *poem* is not alone any work or composition of the poets in many or few verses; but even one alone verse sometimes makes a perfect *poem*. *B. Jonson*, Discoveries.

A *poem*, round and perfect as a star.
Alex. Smith, A Life Drama, ii.

There is no heroic *poem* in the world but is at bottom a biography, the life of a man. *Carlyle*, Sir Walter Scott.

It is not metres, but a metre-making argument, that makes a *poem*. *Emerson*, The Poet.

2. A written composition which, though not in verse, is characterized by imaginative and poetic beauty in either the thought or the language: as, a prose *poem*.

poematic (pō-e-mat′ik), *a.* [< Gr. *ποιηματικός*, poetical, < *ποίημα*, a poem: see *poem*.] Relating to a poem; poetical. *Coleridge.*

Cf. *poem*, *poet*.] **1.** The art of poetic composition; skill in making poems.

Poesie therefore is an arte of imitation, for so Aristotle termeth it in his word Mimesis—that is to say, a representing, counterfetting, or figuring foorth.
Sir P. Sidney, Apol. for Poetrie.

Poesy is a part of learning in measure of words for the most part restrained, but in all other points extremely licensed. *Bacon*, Advancement of Learning, ii. 141.

A poem . . . is the work of the poet, the end and fruit of his labour and study. *Poesy* is his skill or craft of making, the very fiction itself, the reason or form of the work.
B. Jonson, Discoveries.

2. Poetry; metrical composition.

By the many formes of *Poesie* the many moodes and pangs of louers throughly to be discouered.
Puttenham, Arte of Eng. Poesie, p. 36.

Simonides said that picture was a dumb *poesie*, and *poesie* a speaking picture. *Holland*, tr. of Plutarch, p. 805.

Music and *poesy* used to quicken you.
Shak., T. of the S., i. 1. 36.

I am satisfied if it cause delight; for delight is the chief, if not the only, end of *poesy*; instruction can be admitted but in the second place; for *poesy* only instructs as it delights. *Dryden*, Def. of Essay on Dram. Poesy.

The lofty energies of thought,
The fire of *poesy*.
Whittier, The Female Martyr.

3†. A poem.

Some few ages after came the poet Geffery Chaucer, who, writing his *poesies* in English, is of some called the first illuminator of the English tongue.
Verstegan, Rest. of Decayed Intelligence, vii.

4†. A motto or sentimental conceit engraved on a ring or other trinket. See *posy*.

A hoope of Gold, a paltry Ring
That she did giue me, whose *Poesie* was
For all the world like Cutlers Poetry
Vpon a knife; Loue mee, and leaue mee not.
Shak., M. of V. (folio 1623), v.

Nay, and I have *poesies* for rings too, and riddles that they dream not of. *B. Jonson*, Cynthia's Revels, ii. 1.

poet (pō′et), *n.* [< ME. *poete*, < OF. *poëte*, F. *poète* = Sp. Pg. It. *poeta* = D. *poëet* = G. Sw. Dan. *poet*, < L. *poeta*, < Gr. *ποιητής*, a maker, poet, < *ποιεῖν*, make. Cf. *poem*, *poesy*.] **1.** One who composes or indites a poem; an author of metrical compositions.

A *poet* is a maker, as the word signifies; and he who cannot make, that is invent, hath his name for nothing.
Dryden.

Search'd every tree, and pry'd on every flower,
If anywhere by chance I might espy
The rural *poet* of the melody.
Dryden, Flower and Leaf, l. 125.

2. One skilled in the art of making poetry, or of metrical composition; one distinguished by the possession of poetic faculties or susceptibilities; one endowed with the gift and power of imaginative invention and creation attended by corresponding eloquence of expression, commonly but not necessarily in a metrical form.

Semblably they that make verses, expressynge therby none other lernynge, but the crafte of versifienge, be not of auncient writers named *poetes*, but only called versifyers. *Sir T. Elyot*, The Governour, i. 13.

I begin now, elevated by my Subject, to write with the Emotion and Fury of a *Poet*, yet the Integrity of an Historian. *Wycherley*, Love in a Wood, Ded.

The *poet* represents the things as they are impressed on his mind by the hand of the Creator.
Landor, Chesterfield and Chatham.

The *poet* is the man whose emotions, intenser than those of other men, naturally find a vent for themselves in some form of harmonious words, whether this be the form of metre or of balanced and musical prose.
J. C. Shairp, Poetic Interpretation of Nature, i.

Poet laureate. See *laureate*.—**Poet's cassia.** See *Osyris*.

poetaster (pō′et-as-tėr), *n.* [= OF. *poëtastre* = Sp. It. *poetastro*, < NL. **poetaster*, < L. *poeta*, a poet (see *poet*), + dim. *-aster*.] A petty poet; a feeble rimester, or a writer of indifferent verses.

He [Voltaire] was well acquainted with all the petty vanities and affectations of the *poetaster*.
Macaulay, Frederic the Great.

He makes no demand on our charity in favor of some *poetaster* for whom he may have imbibed a strange affection. *Whipple*, Ess. and Rev., I. 32.

poetastry (pō′et-as-tri), *n.* [< *poetaster* + *-y*3.] The rimed effusions of a poetaster; paltry verses.

poetess (pō′et-es), *n.* [= F. *poëtesse* = Sp. *poetisa* = Pg. *poetiza* = It. *poetessa*, < ML. *poetissa*, fem. of L. *poeta*, a poet: see *poet* and *-ess*.] A woman who is a poet.

poethood (pō′et-hụ̊d), *n.* [< *poet* + *-hood*.] The state or quality of being a poet; the inherent qualifications or the conditions that constitute a poet. *S. Lanier*, The English Novel, p. 47.

poetic (pō-et′ik), *a.* [= F. *poëtique* = Sp. *poético* = Pg. It. *poetico* (cf. D. G. *poetisch* = Sw. Dan. *poetisk*), < L. *poeticus*, < Gr. ποιητικός, creative, poetic, < ποιεῖν, make (> ποιητής, poet): see *poet*.] 1. Of or pertaining to poetry; of the nature of or expressed in poetry; possessing the qualities or the charm of poetry: as, a *poetic* composition; *poetic* style.

In our own day such *poetic* descriptions of Nature have burst the bonds of metre altogether, and filled many a splendid page of *poetic* or imaginative prose.
J. C. Shairp, Poetic Interpretation of Nature, viii.

2. Of or pertaining to a poet or poets; characteristic of or befitting a poet: as, *poetic* genius; *poetic* feeling; *poetic* license.

Then farewell hopes o' laurel boughs,
To garland my *poetic* brows!
Burns, To James Smith.

He [Faraday] was always in the temper of the poet, and, like the poet, he continually reached that point of emotion which produces *poetic* creation. *Stopford Brooke*, Faraday.

3. Endowed with the feeling or faculty of a poet; having the susceptibility, sensibility, or expression of a poet; like a poet: as, a *poetic* youth; a *poetic* face.

What warm, *poetic* heart but inly bleeds,
And execrates man's savage, ruthless deeds!
Burns, Brigs of Ayr.

4. Celebrated, or worthy to be celebrated, in poetry: as, a *poetic* scene.

When you are on the east coast of Sicily you are in the most *poetic* locality of the classic world.
C. D. Warner, Roundabout Journey, p. 104.

Mere trade became *poetic* while dealing with the spices of Arabia, the silks of Damascus, the woven stuffs of Persia, the pearls of Ceylon.
C. E. Norton, Church-building in Middle Ages, p. 41.

5. Of or pertaining to making or shaping, especially to artistic invention and arrangement. [Recent.]

Poetic philosophy is a form of knowledge having reference to the shaping of material, or to the technically correct and artistic creation of works of art.
Ueberweg, Hist. Philos. (trans.), I.

Poetic justice, an ideal distribution of rewards and punishments such as is common in poetry and works of fiction, but seldom exists in real life.

And so it came to pass that quite unintentionally, and yet by a sort of *poetic justice*, Rodrigue's letter to Rose, as hers to him, was written by a third person.
The Century, XXXVII. 584.

Poetic license, a privilege or liberty taken by a poet in using words, phrases, or matters of fact in order to produce a desired effect.

poetical (pō-et′i-kạl), *a.* [< *poetic* + *-al*.] Same as *poetic*.

Poetical expression includes sound as well as meaning. "Music," says Dryden, "is inarticulate poetry."
Johnson, Pope.

poetically (pō-et′i-kạl-i), *adv.* In a poetical sense or manner; according to the laws of poetry.

The critics have concluded that it is not necessary the manners of the hero should be virtuous. They are *poetically* good if they are of a piece. *Dryden*, Æneid, Ded.

poetics (pō-et′iks), *n.* [Pl. of *poetic*: see *-ics*. Cf. F. *poëtique* = Sp. Pg. It. *poetica*, f., poetics.] That branch of criticism which treats of the nature and laws of poetry.

poeticule (pō-et′i-kūl), *n.* [< L. *poeta*, a poet, + dim. term. *-culus*.] A petty poet; a poetaster.

A study which sets before us in fascinating relief the professional *poeticule* of a period in which as yet clubs, coteries, and newspapers were not.
A. C. Swinburne, Nineteenth Century, XXI. 97.

poetization (pō″et-i-zā′shọn), *n.* [< *poetize* + *-ation*.] Composition in verse; the act of rendering in the form of poetry. Also spelled *poetisation*.

The great movement for the *poetization* of Latin prose which was begun by Sallust ran its course till it culminated in the monstrous style of Fronto. *Encyc. Brit.*, XX. 187.

poetize (pō′et-īz), *v.*; pret. and pp. *poetized*, ppr. *poetizing*. [< F. *poëtiser* = Sp. Pg. *poetizar* = It. *poetizzare*, *poetezzare*, < ML. *poetizare*, *poetisare*, compose poetry, < L. *poeta*, a poet: see *poet* and *-ize*.] **I.** *intrans.* To compose poetry; write as a poet.

I versify the truth, not *poetize*. *Donne*.

II. *trans.* To make poetic; cause to conform to poetic standards; express in a poetic form.

What Ovid did but *poetize*, experience doth moralise, our manners actually perform. *Rev. T. Adams*, Works, I. 212.

Virgil has, upon many occasions, *poetized* . . . a whole sentence by means of the same word.
Goldsmith, Poetry Distinguished from other Writing.

Instead of the sublime and beautiful, the near, the low, the common, was explored and *poetized*.
Emerson, Misc., p. 93.

Also spelled *poetise*.

poet-musician (pō″et-mū-zish′ạn), *n.* One in whom the gifts and skill of the poet and the musician are united; a bard.

poetress† (pō′et-res), *n.* [< OF. *poeteresse*, as if < ML. **poetrissa* for L. *poetris*, *poetria*, a poet, < Gr. ποιήτρια, fem. of ποιητής, a poet: see *poet*. Cf. *poetess*.] Same as *poetess*.

Most peerless *poetress*,
The true Pandora of all heavenly graces. *Spenser*.

poetry (pō′et-ri), *n.* [< ME. *poetrye*, *poetrie*, < OF. *poetrie*, *poeterie*, *poterie*, *poetrerie* = OIt. *poetria*, < ML. *poetria*, poetry (cf. L. *poetria*, < Gr. ποιήτρια, a poetess), < L. *poeta*, a poet: see *poet* and *-ry*.] 1. That one of the fine arts which addresses itself to the feelings and the imagination by the instrumentality of musical and moving words; the art which has for its object the exciting of intellectual pleasure by means of vivid, imaginative, passionate, and inspiriting language, usually though not necessarily arranged in the form of measured verse or numbers.

By *poetry* we mean the art of employing words in such a manner as to produce an illusion on the imagination, the art of doing by means of words what the painter does by means of colours. *Macaulay*, Milton.

Poetry is itself a thing of God;
He made his prophets poets; and the more
We feel of poesie do we become
Like God in love and power—under-makers.
Bailey, Festus, Proem.

The grand power of *Poetry* is its interpretative power, by which I mean . . . the power of so dealing with things as to awaken in us a wonderfully full, new, and intimate sense of them, and of our relations with them.
M. Arnold, Maurice de Guérin.

We shall hardly make our definition of *poetry*, considered as an imitative art, too extended if we say that it is a speaking art of which the business is to represent by means of verbal signs arranged with musical regularity everything for which verbal signs have been invented.
Encyc. Brit., IX. 207.

2. An imaginative, artistic, and metrical collocation of words so marshaled and attuned as to excite or control the imagination and the emotions; the language of the imagination or emotions metrically expressed. In a wide sense poetry comprises whatever embodies the products of the imagination and fancy, and appeals to these powers in others, as well as to the finer emotions, the sense of ideal beauty, and the like. In this sense we speak of the *poetry* of motion.

The essence of *poetry* is invention: such invention as, by producing something unexpected, surprises and delights. *Johnson*, Waller.

Poetry is not the proper antithesis to prose, but to science. *Poetry* is opposed to science, and prose to metre. . . . The proper and immediate object of science is the acquirement or communication of truth; the proper immediate object of *poetry* is the communication of immediate pleasure. *Coleridge*.

No literary expression can, properly speaking, be called *poetry* that is not in a certain deep sense emotional whatever may be its subject matter, concrete in its method and its diction, rhythmical in movement, and artistic in form.
Encyc. Brit., XIX. 257.

3. Composition in verse; a metrical composition; verse; poems: as, heroic *poetry*; lyric or dramatic *poetry*; a collection of *poetry*.

Oon seyde that Omere made lyes
Feyninge in his *poetries*.
Chaucer, House of Fame, l. 1477.

And this young birkie here, . . . will his . . . *poetries* help him here? *Scott*, Rob Roy, xxiii.

Arcadic, lyric, etc., **poetry.** See the adjectives.

Lament of the Border Widow (Child's Ballads, III. 87).

poinder, *n.* A dialectal form of *pinder*. Also *punder*. [Sc.]

I 'll . . . get my bit supper frae Ringan the *poinder* up by. *Scott*, Antiq., xxiv.

poinding (pün′-, pin′ding), *n.* [V. n. of *poind*.] In *Scotch law*, a process by which a creditor may enforce his demand by seizure of movable property. It is carried into effect either by sale and payment of the proceeds to the creditor, or by appraisal of the goods and their delivery to the creditor on account. *Personal poinding* cannot be prosecuted, except against a tenant for rent, until the debtor has been charged to pay or perform and the days allowed therefor have expired. The right of a private creditor to reach things in action and some other movables, such as money and ornaments on the person, has been questioned. *Real poinding*, or *poinding of the ground*, is the remedy of one who is enforcing a lien or burden on land, as distinguished from a personal obligation to seize movables found on the land, other than those of strangers, and other than those of a tenant in excess of rent actually due from him.

poinette, *n.* See *poynet*.

poing (pwaṅ), *n.* [F., the fist, = Sp. *puño* = Pg. *punho* = It. *pugno*, < L. *pugnus*, fist.] In *her.*, a fist or closed hand used as a bearing.

Poinsettia (poin-set′i-ä), *n.* [NL. (Graham, 1836), named after Joel R. *Poinsett*, American minister to Mexico, who discovered the plant there in 1828.] **1.** A genus of American apetalous plants of the family *Euphorbiaceæ* and tribe *Euphorbieæ*, by some authors included as a section of the vast genus *Euphorbia*.—**2.** [*l. c.*] *Poinsettia pulcherrima*, a plant much cultivated in conservatories. It is conspicuous for the large scarlet floral leaves surrounding its crowded yellowish cymes of small flowers, and is much used for decoration, especially in churches. Also called *Christmas-flower* or *Easter-flower*, in England *lobster-flower* and *Mexican flame-leaf*, and in Mexico *flora de pasqua*.

★**point**[1] (point), *n.* and *a.* [< ME. *point*, *poynt*, *pointe*, *poynte*; < (*a*) OF. *point*, *poinct*, *punt*, F. *point*, m., a point, dot, full stop, period, speck, hole, stitch, point of time, moment, difficulty, etc., = Sp. *punto* = Pg. *ponto* = It. *punto*, m., = OFries. *punt*, *pont* = D. *punt* = MLG. *punte*, LG. *punt*, *pünt* = MHG. *punct*, *punt*, *puncte*, *punte*, G. *punkt* = Icel. *punktr* = Sw. L. *punctus* (*punctu-*), a pricking, stinging, also a point, < *pungere*, prick, punch); (*b*) < OF. *pointe*, *poincte*, *puinte*, F. *pointe*, f., a point, bodkin, small sword, place, etc., also sharpness, pungency, etc., = Sp. *punta* = Pg. *ponta* = It. *punta*, f., < ML. *puncta*, f., a point, etc., fem. of L. *punctus*, pp. of *pungere*, prick, pierce, punch: see above.] **I.** *n.* **1.** The sharp end of something, as of a thorn, pin, needle, knife, sword, etc.

With the egge of the knyfe youre trenchere vp be ye reysande
As nyghe the *poynt* as ye may.
Babees Book (E. E. T. S.), p. 138.

Eight forky arrows from this hand have fled,
And eight bold heroes by their *points* lie dead.
Pope, Iliad, viii. 362.

This barbed the *point* of P.'s hatred.
Dickens, Great Expectations, II. 217.

2. That which tapers to or has a sharp end; a tapering thing with a sharp apex. (*a*†) A sword.

Why, I will learn you, by the true judgment of the eye, hand, and foot, to control any enemy's *point* in the world.
B. Jonson, Every Man in his Humour, i. 4.

(*b*) In *etching*, an engraving-tool consisting of a metallic point, a sewing-needle or a medium embroidery-needle, or a rat-tail file ground to an evenly rounded tapering point, not too sharp if intended for use on an etching-ground, but much more trenchant if it is to be employed in dry-point on the bare copper.

There were also many fragments of boxwood, on which were designs of exquisite beauty, drawn with the *point*.
C. T. Newton, Art and Archæol., p. 379.

(*c*) In *printing*, a projecting pin on a press for marking the register by perforating the paper. (*d*) A small diamond or fragment of a diamond used for cutting glass. (*e*) A punch used by stone-masons to form narrow ridges in the face of a stone which is to be afterward dressed down. (*f*) A wedge-shaped chisel for nigging ashlar. (*g*) A triangular piece of zinc for holding glass in the sash before the putty is put in. (*h*) *pl.* In *rail.*, the switches or movable guiding-rails at junctions or stations. [Eng.]

For horse traction fixed *points* of chilled cast-iron or steel are sufficient, as the driver can turn his horses and direct the car on to either line of rails.
Encyc. Brit., XXIII. 507.

(*i*) A branch of a deer's antler. See *antler*.

He was a fine buck of eight *points*.
T. Roosevelt, Hunting Trips.

(*j*) In *backgammon*, one of the narrow tapering spaces on which the men are placed. (*k*) *pl.* Spurs or stout needles suitably fastened in a flat board, on which printed sheets are placed by passing the needles through the point-holes; this is done to insure the exact cutting of printed sheets that have uneven margins. *Knight*, Bookbinding.

3. A salient or projecting part; a part of an object projecting abruptly from it, as a peak from a range or a promontory from the coast.

And the sayde yle Cirigo is directely ayenst the *poynt* of Capo Maleo in Morrea.
Sir R. Guylforde, Pylgrymage, p. 13.

The splintered *points* of the crag are seen,
With water howling and vexed between.
Whittier, Mogg Megone.

4. A salient feature or physical peculiarity; especially, a feature which determines the excellence of an animal; characteristic; trait.

So remarkable was their resemblance [two horses] in *points*, action, and color that . . . even the grooms came out to see. *J. W. Palmer*, After his Kind, p. 226.

5. The salient feature of a story, discourse, epigram, or remark; that part or feature of a saying, etc., which gives it application; the directly effective part; hence, the possession of such a feature; force or expression generally: as, he failed to see the *point* of the joke; his action gave *point* to his words.

Every author has a way of his own in bringing his *points* to bear. *Sterne*, Tristram Shandy, i. 9.

Both her [Madame de Lieven's] letters and her conversation are full of *point*. *Greville*, Memoirs, Feb. 3, 1819.

An epigram now is a short satire closing with a *point* of wit. *I. D'Israeli*, Amen. of Lit., II. 352.

6. The precise question or matter in dispute or under consideration; the principal thing to be attended to; the main difficulty to be met or obviated: as, these are side issues—*let* us come to the *point*.

He maintained, which was in *fact* the *point* at issue, that the opinions held at that *day* by the Quakers were the same that the Ranters had held long ago.
Southey, Bunyan, p. 42.

"You haven't told me about the Greek yet," says Charles Wall, clinging to the *point*.
W. M. Baker, New Timothy, p. 115.

7. An indivisible part of an argument, narrative, or account; a particular; a detail; an item. See *at all points* and *in point of*, below.

Where she no *point* had of diffame no dais.
Rom. of Partenay, l. 3392.

But for y am a lewed man, paraunter y migte
Passen par aventure & in som *poynt* erren.
Piers Plowman's Crede (E. E. T. S.), l. 846.

Told him every *poynt* how he was slayn.
Chaucer, Nun's Priest's Tale, l. 202.

But in what particular *points* the oracle was, in faith I know not. *Sir P. Sidney*, Arcadia, i.

You are now beyond all our fears, and have nothing to take heed on your self but fair ladies. A pretty *point* of security, and such a one as all Germany cannot afford.
Sir John Suckling, Letters (1648), p. 86.

8. Particular end, aim, purpose, or concern; object desired: as, to gain one's *point*.

The constant design of both these orators, in all their speeches, was, to drive some one particular *point*.
Swift, To a Young Clergyman.

Our Swain,
A very hero till his *point* was gained,
Proved all unable to support the weight
Of prosperous fortune.
Wordsworth, Excursion, vi.

I suppose the *point* of the exhibition lay in hearing the notes of love and jealousy warbled with the lisp of childhood; and in very bad taste that *point* was.
Charlotte Brontë, Jane Eyre, xl.

The rain always made a *point* of setting in just as he had some out-door work to do. *Irving*, Rip Van Winkle.

9†. Case; condition; situation; state; plight.

He departed that Ryvere in 360 smale Ryveres, because that he had sworn that he scholde putte the Ryvere in suche *poynt* that a Woman myghte wel passe there withouten castynge of hire Clothes.
Mandeville, Travels, p. 41.

He was a lord ful fat and in good *poynt*.
Chaucer, Gen. Prol. to C. T., l. 136.

And over yere thai wol been in goode *pointe*,
Withouten scorf or scalle in cors or jointe.
Palladius, Husbondrie (E. E. T. S.), p. 154.

Amaunt be-thought hym that he myght come neuer in better *poynt* to conquere his Castell that he so longe hadde loste, and sente after peple. *Merlin* (E. E. T. S.), ii. 350.

10†. A deed or feat; an exploit.

Yf thow durst, par ma fay,
A *poynt* of armys undyrtake,
Thow broke her wille fore ay.
Torrent of Portugal, p. 36. (*Halliwell.*)

11. A mark made by the end of a sharp instrument, such as a pin, needle, pen, etc.; a dot or other sign to mark separation, to measure from, etc. Specifically—(*a*) A mark of punctuation; a character used to mark the divisions of composition, or the pauses to be observed in reading or speaking, as the comma (,), the semicolon (;), the colon (:), and especially the period or full stop (.).

There abruptly it did end,
Without full *point*, or other Cesure right.
Spenser, F. Q., II. x. 68.

Who shall teach the propriety and nature of *points* and accents of letters? *Purchas*, Pilgrimage, p. 168.

But thy Name all the Letters make;
Whate'er 'tis writ, I find That there,
Like *Points* and Comma's ev'ry where.
Cowley, The Mistress, The Thief.

Hence—(*b*) A stop; a conclusion; a period.

And ther a *pount*; for ended is my tale.
Chaucer, Canon's Yeoman's Tale, l. 469.

(*c*) A diacritical mark, indicating a vowel, or other modification of sound: especially in Hebrew, Arabic, etc. (*d*) A dot used in writing numbers—(1) inserted after the units' place to show where the decimals begin (specifically called a *decimal point*); or (2) placed over a repeating decimal, or over the first and last figures of a circulating decimal: thus, $\frac{5}{6} = .83$; $\frac{22}{71} = 1.2567$; or (3) used to separate a series of figures representing a number into periods of a certain number of figures each. (*e*) In *musical notation*, a dot affixed to a note, either after it, to increase its time-value (see *dot*), or above or below it, as a sign of a staccato effect (see *staccato*). (*f*) A speck or spot; a jot; a trace; hence, figuratively, a very small quantity.

Thei cowde not in hym espi no *poynte* of covetise.
Merlin (E. E. T. S.), i. 106.

12. An object having position but not extension. (*a*) A place having spatial position but no size.

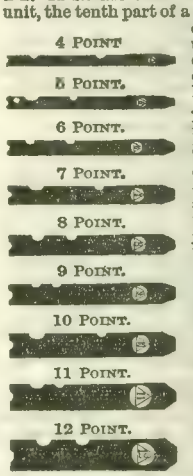
A *point* has no extension.
W. Chauvenet, Elementary Geometry, p. 9.

We sometimes speak of space, or do suppose a *point* in it, at such a distance from any part of the universe. *Locke.*

All rays proceeding from a *point* pass through a single *point* after reflexion, because they undergo a change in their direction greater in proportion as the *point* of the mirror struck is distant from the principal axis.
Lommel, Light (trans.), p. 42.

(*b*) In *astron.*, a certain place marked in the heavens, or distinguished for its importance in astronomical calculations: as, vertical *points* (the zenith and the nadir); equinoctial *points*; solstitial *points*. (*c*) In *persp.*, any definitive position with reference to the perspective plane: as, *point* of sight; vanishing-*point*. (*d*) That which has position in time, but no definite continuance; an instant of time.

And a-noon as he was comen his felowes recouered that were in *pointe* to leve place. *Merlin* (E. E. T. S.), iii. 459.



The period of his [Henry V.'s] accession is described as a *point* of time at which his character underwent some sort of change. *Stubbs*, Const. Hist., § 645.

13. Precise limit or degree; especially, the precise degree of temperature: as, the boiling-*point* of water.

Oh, furious desire, how like a whirlwind
Thou hurriest me beyond mine honour's *point!*
Beau. and Fl., Knight of Malta, i. 1.

They [the Jesuits] appear to have discovered the precise *point* to which intellectual culture can be carried without risk of intellectual emancipation.
Macaulay, Hist. Eng., vi.

14. A small unit of measurement. (*a*) A linear unit, the tenth part of a geometrical line, the twelfth part of a French line. (*b*) In *typog.*, a unit of measure for grading and determining with precision the different bodies of printing types. In the United States, the point is .0138 of an inch, or .0351+ centimeter. The French point, by the Didot system, is .0376+ centimeter. Twelve points French are nearly equal to thirteen points American. The body of pica, for instance, is 12 points in size, and the new designation for pica is 12 *point*. The point system was introduced in 1737 by Fournier the younger, a type-founder of Paris. As made by him, this point was not a regular fraction of any legally prescribed measure. François-Ambroise Didot readjusted this point as a fraction of the standard royal foot, in which form it was gradually accepted by the printing-trades of France and Germany. The American point was adopted by the United States Type-Founders' Association in 1883, and made of smaller size, to prevent a too marked disturbance of the sizes then in regular use. The old names of types and their relation to each other are shown by the number of points assigned to each size in the following table:

Points.	Name of Type.	Points.	Name of Type.
3	Excelsior	14	English
3½	Brilliant	16	Two-line brevier
4	Semi-brevier	18	Great primer
4½	Diamond	20	Paragon
5	Pearl	22	Two line small pica
5½	Agate	24	Two-line pica
6	Nonpareil	28	Two-line English
7	Minion	32	Four-line brevier
8	Brevier	36	Three-line pica
9	Bourgeois	40	Double paragon
10	Long primer	44	Four-line small pica
11	Small pica	48	Four-line pica.
12	Pica		

(*c*) *Naut.*, an angular unit, one eighth of a right angle, or 11¼°, being the angle between adjacent points of the compass (see *compass*, *n.*, 7): as, to bring the ship up half a *point*.

I find the compass of their doctrine took in two and thirty *points*. *Swift*, Tale of a Tub, viii.

15. A unit of fluctuation of price per share or other standard of reference on the exchanges, etc. In stock transactions in the United States a point is $1 (or in Great Britain £1); in coffee and cotton it is the hundredth part of a cent, and in oil, grain, pork, etc., one cent: as, Erie preferred has declined five *points*; coffee has gone up 200 *points*.

In the afternoon there had been one of the usual flurries in the "street." Zenith and Nadir preferred had gone off three *points*. *The Century*, XXXVIII. 209.

16. A unit of count in a game (compare def. 19); hence, an advantage in any struggle: as, I have gained a *point*.

Charles's impudence and bad character are great *points* in my favour. *Sheridan*, School for Scandal, iv. 2.

17. In *piquet*, the number of cards in the longest suit of a hand: as, what is your *point*? Six.—**18.** In *lace-making*, needle-point lace: as, Alençon *point*; Dresden *point*; a collar of *point*. See cut under *lace*. Used in the plural, the term denotes lace, especially fine lace in general: as, a christening-robe trimmed with French *points*; especially so used in the eighteenth century, in such phrases as "he is well in *points*"—that is, well supplied with lace. *Point* is also used freely in English in connection with the decorative arts (as a tapestry of Beauvais *point*), referring to some peculiar kind of work, and is even applied to bobbin-lace and the like. It also denotes vaguely a pattern or a feature of a pattern in works of embroidery and the like, usually in connection with the stitch or the peculiar method of work which produces it. Thus, *dentelle, point d'Angleterre*, means literally lace, English style of work, but the phrase *English point* is more often used for it, causing great confusion with the proper sense of needle-point lace. See *lace*.

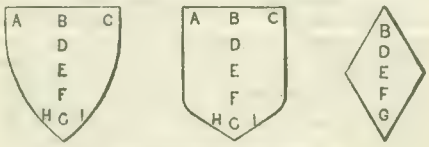
We shall all ha' bride-laces
Or *points*. *B. Jonson*, Tale of a Tub, i. 2.

19. A lace with tags at the end. Such laces, about eight inches long, consisting often of three differently colored strands of yarn twisted together and having their ends wrapped with iron, were used in the middle ages to fasten the clothes together, but gave place to buttons in the seventeenth century. They were also made of silk or leather. They or their tags were much used as small stakes in gaming, as forfeits, counters, and gratuities—uses explaining many allusions in old writers, especially the figurative use of the word for a small value, or a thing of small value.

Points in Costume.

Al in a kirtel of a lyght waget,
Ful faire and thikke been the *poyntes* set.
Chaucer, Miller's Tale, l. 136.

I pray yow bryng hom *poynts* and lasys of silk for you and me. *Paston Letters*, II. 358.



He made his pen of the aglet of a *point* that he plucked from his hose. *Latimer*, 4th Sermon bef. Edw. VI., 1549.

In matters not worth a blewe *poinct* . . . we will spare for no cost. *Udall*, tr. of Apophthegms of Erasmus, p. 8.

Full large of limbe and every joint
He was, and cared not for God or man a *point*.
Spenser, F. Q., I. ii. 12.

20. A fastening resembling a tagged lacing. (*a*) A short narrow strip of leather sewed to any part of harness to form a buckling-strap. (*b*) *Naut.*, a short piece of rope or sennit used in reefing sails. See *reefing-point*.

21. In *fencing*, a stab or puncture with the point of a sword; a blow with the button of the foil when properly directed: as, he can give me three *points* in ten (i. e., he can make ten hits or points on me while I make seven on him).—**22.** In *her.*: (*a*) One of the nine recognized positions on the shield which denote the locality of figures or charges. (*b*) The middle part of either the chief or the base as distinguished from the dexter and sinister cantons. (*c*) A bearing which occupies the base of the escutcheon. It is usually considered as a pile reversed—that is, rising from the base and reaching to the upper edge of the escutcheon; but it is very often of less height, reaching only to the fesse-point or to the nombril, and sometimes is merely the base itself bounded by a horizontal line separating it from the rest of the field. Plain point is especially treated in the way last mentioned. The bearing is very rare in English armory, and hence some writers treat it as synonymous with *base*, and others as synonymous with *pile reversed*. It is also customary to represent the sides of the sharply angled point as concavely curved, while those of the pile are straight. (*d*) A division of the field barwise: thus, three *points* gules, argent, and azure, means that the field is divided into three horizontal stripes, of which the uppermost is red, the middle one silver, etc.—**23†.** Ordinance; law; act.

The Nine Points of the Shield.
A, dexter chief point; B, chief point; C, sinister chief point; D, honor point; E, fesse-point; F, nombril; G, base or flank point; H, dexter base point; I, sinister base point.

The comyns of this present yeld affermen and enacte alle the *poyntes* of this yeld, for the grete ease, pease, profitz, and tranquilite of the Cyte.
English Gilds (E. E. T. S.), p. 404.

24†. A slur; an indignity.

But the triet men of Troy traitur hym cald,
And mony *pointtes* on hym put for his pure shame,
That disseruet full duly the dethe for to haue.
Destruction of Troy (E. E. T. S.), l. 7900.

25. The action or attitude of a dog in pointing game: as, he comes to a *point* well.

In the pointer and setter, the fit almost always occurs just after a *point*, the excitement of which appears to act upon the brain. *Dogs of Great Brit. and America*, p. 349.

26. In games: (*a*) In *cricket*, a fielder who stands at a short distance to the right of the batsman, and slightly in front of him. See diagram under *cricket*[2]. (*b*) In *lacrosse*, a player who stands a short distance in front of the goal, and whose duty is to prevent the ball from passing through the goal. (*c*) *pl.* In *base-ball*, the position occupied by the pitcher.—**27.** A thing to be pointed at, or the mere act of pointing; especially, a flitch of bacon or the like, which is not eaten, but only pointed at as a pretense for seasoning: as, to dine on potatoes and *point* (that is, on nothing but potatoes): a jocular expression in vogue in Ireland.

Their universal sustenance is the root named potato, . . . generally without condiment or relish of any kind, save an unknown condiment named *point*.
Carlyle, Sartor Resartus.

28†. A particular signal given, as by the blast of a trumpet or the beat of a drum; hence, a note; a call.

On a sudden we were alarmed with the noise of a drum, and immediately entered my little godson to give me a *point* of war. *Steele*, Tatler, No. 95.

The trumpets and kettledrums of the cavalry were next heard to perform the beautiful and wild *point* of war, appropriated as a signal for that piece of nocturnal duty.
Scott, Waverley, xlvi.

29. In *music*, the entrance of a voice or an instrument with an important theme or motive. —**Accidental point.** See *accidental*.—**Acting point**, in *physics*, the exact point at which any impulse is given.—

See under *lace*.—**Neutralization point.** See *neutralization*, 1.—**Neutral points,** points on the commutator of a dynamo upon which the collecting brushes rest: generally the extremities of a diameter at right angles to the resultant lines of force.—**Nodal points.** See *nodal*.—**Objective, occipital, original, parabolic point.** See the adjectives.—**Painful points,** points painful on pressure, occurring in many cases of neuralgia in the course of any affected nerve: described by Valleix in 1840.—**Petit point.** Same as *tent-stitch*.—**Pinch points.** See *pinch*.—**Point à brides.** (*a*) The ground of lace when made of brides or bars. (*b*) Lace having a bride ground, as opposed to that having a réseau ground.—**Point appliqué.** See *appliqué*.—**Point à réseau,** lace which has a net ground worked together with the pattern, as is the case with Mechlin.—**Point at infinity.** See *infinity*, 3.—**Point d'Alençon.** Same as *Alençon lace* (which see, under *lace*).—**Point d'Angleterre.** See *English point-lace* (*a*), under *lace*.—**Point d'appui.** See *appui*.—**Point d'Argentan.** Same as *Argentan lace* (which see, under *lace*).—**Point de gaze,** a very fine needle-made ground for lace, generally identified with the finest Brussels lace when wholly made with the needle.—**Point de raccroc,** a method of fastening together the different pieces of lace as in Brussels and Bayeux laces: it is not sewing, but a fresh row of meshes imitating in part the ground of the lace.—**Point d'esprit,** in *lace-making*: (*a*) Originally, a small oval figure occurring in various kinds of guipure, and usually consisting of three short lengths of cord or parchment laid side by side and covered with the thread: such ovals were arranged in various patterns, but especially in rosettes. (*b*) A much smaller solid or mat surface, square or oblong, used to diversify the net ground of certain laces.—**Point de Valenciennes.** Same as *Valenciennes lace* (which see, under *lace*).—**Point de velin.** Same as *vellum point*.—**Point diamond.** See *diamond*.—**Point duchesse.** Same as *duchesse lace* (which see, under *lace*).—**Point for point,** in detail; precisely; exactly.

This sergeaunt cam unto his lord ageyn,
And of Grisildes wordes and hir chere
He tolde him *point for point*.
Chaucer, Clerk's Tale, l. 521.

Point impaled, in *her.*, a point divided vertically or palewise, the two parts of different tinctures.—**Point of alteration** or **duplication,** in *medieval musical notation*, a dot placed after and properly above the first of two short notes in perfect rhythm as a sign that the second note after it is long.—**Point of attack,** that part of a defended position which is chosen for the main assault or onset; in siege operations, that part of the defenses which must be reduced in order to force the garrison to surrender.

Up to that time I had felt by no means certain that Crump's landing might not be the *point of attack*.
U. S. Grant, Personal Memoirs, I. 336.

Point of coincidence. See *coincidence*.—**Point of contrary flexure,** a point on a plane curve at which a tangent moving along the curve ceases to turn in one direction and begins to turn in the opposite way.—**Point of day,** dawn; daybreak. [Obsolete or poetical.]

So shall I sey to alle the princes that thei be redy at the *poynte of day* for to ride. *Merlin* (E. E. T. S.), iii. 585.

Point of dispersion, in *optics*, that point from which the rays begin to diverge, commonly called the *virtual focus*.—**Point of distance.** See *distance*.—**Point of division** or **imperfection,** in *medieval musical notation*, a dot placed between two short notes to indicate a rhythmic division like that marked by the modern bar.—**Point of election.** See *election*.—**Point of fall,** in *gun.*, the point first struck by the projectile. *Tidball*, Manual of Artillery.—**Point of fusion of metals.** See *fusion*.—**Point of honor.** (*a*) See *honor*. (*b*) In *her.*, a point in the escutcheon immediately above the center: also called the *heart*.—**Point of horse,** in *mining*, the spot where a vein, as of ore, is divided by a mass of rock into one or more branches.—**Point of incidence,** in *optics*, that point on a surface upon which a ray of light falls.—**Point of law,** a specific legal principle or rule. The term is generally used to indicate a discriminating application, or the precise effect on a given state of facts, of the appropriate legal principle or provision.—**Point of magnetic indifference.** See *magnetic*.—**Point of order,** in deliberative bodies, a question raised as to whether proceedings are in conformity with parliamentary law and with the special rules of the particular body itself.—**Point of osculation.** See *osculation*.—**Point of perfection,** in *medieval musical notation*, a dot placed after a long note in triple or perfect rhythm to prevent its being made duple or imperfect by position.—**Point of reflection,** in *optics*, the point from which a ray is reflected.—**Point of refraction,** in *optics*, that point in the refracting surface where the refraction takes place.—**Point of regard,** the point at which the eye is directly looking. Its image falls in the middle of the macula lutea of the retina.—**Point of sight.** Same as *point of vision*.

Therefore, as in perspective, so in tragedy, there must be a *point of sight* in which all the lines terminate, otherwise the eye wanders, and the work is false.
Dryden, Grounds of Criticism in Tragedy.

Point of view, a position from which one looks, or from which a picture is supposed to be taken; hence, the state of mind, or predisposition, which consciously or unconsciously modifies the consideration of any subject.—**Point of vision,** the position from which anything is observed, or is represented as being observed; the position of the eye of the observer. Also called *point of sight, point of view, center of projection, center of vision*, etc.—**Point plat,** in *lace-making*: (*a*) Flowers or sprigs of bobbin-work, as opposed to needle-point work. See *plat*3, *a.*, 2. (*b*) Application-lace in which such pillow-made flowers are applied to a net ground. See *application-lace* and *Brussels lace* (both under *lace*).—**Points and pins,** an old game similar to skittles.—**Points of support,** in *arch.*, those points or surfaces on the plan of the piers, walls, columns, etc., upon which an edifice rests, or in which the various pressures are collected and met.—**Points of the compass.** See *compass, n.*, 7.—**Point-to-point,** in a straight line; across country.

To test a good hunter there is nothing like a four-mile *point-to-point* steeplechase. *Edinburgh Rev.*, CLXVI. 409.

Poristic points. See *poristic*.—**Power of points,** in *elect.*, the effect of fine points in promoting electrical discharge. The density (electrical) at any point of a charged body is inversely as the radius of curvature, and is, therefore, relatively great at the extremity of a fine point. When it reaches a certain limit, the electricity escapes easily, and charged bodies may thus be silently discharged.—**Principal points,** in *optics*, of a lens or a combination of lenses, the two points on the optical axis which possess the property (among others) that the line drawn from the first principal point to any point in the object is parallel to the line drawn from the second principal point to the corresponding point in the image. The angle subtended by the object at the first principal point, therefore, equals that subtended by the image at the second. Gauss first discovered these points, and introduced the term *Hauptpunkt*, of which *principal point* is the translation.—**Rose-point,** in *lace-making*, the peculiar style identified with Venetian needle-point lace of the early part of the seventeenth century. The pattern is rather large, with beautifully designed conventional flowers, and is especially distinguished by the decided relief which is given to it, so that it is often said to resemble carved ivory. The pattern is so distributed that there is but little space for the ground to occupy, and this ground is composed of large brides or bars decorated with picots.—**Spanish point,** galloons and passements of silk, silk and gold, silver, and the like, which were in demand during the latter part of the seventeenth and in the eighteenth century. Much of it was made in the Spanish Netherlands, and much also in Genoa.—**Spinal point.** See *craniometry*.—**Subnasal, supra-auricular, supraclavicular,** etc., **point.** See the adjectives, and cut under *craniometry*.—**Supranasal point.** Same as *ophryon*.—**Supraorbital point.** Same as *ophryon*.—**The Five Articles and the Five Points.** See *article*.—**To back a point,** in *sporting*, to come to a point on observing that action in another dog: said of pointers and setters.—**To be at a point**†, to be determined or resolved.

Be at a point with yourselves, as the disciples of Christ which had forsaken themselves, to follow not your will but God's will.
J. Bradford, Letters (Parker Soc., 1853), II. 120.

To blow heads and points. See *head*.—**To cast a point of traverse.** See *cast*1.—**To come to points**†, to fight with swords.

They would have *come to points* immediately, had not the gentlemen interposed.
Smollett, Sir L. Greaves, iii. (*Davies.*)

To control the point. See *control*.—**To give points to,** (*a*) To give odds to; have the advantage of.

Any average Eton boy could *give points to* his Holiness in the matter of Latin verses. *The American*, 1883, VI. 333.

(*b*) To give a valuable or advantageous hint, indication, or piece of information to: as, he can *give* us *points* on that subject. [Slang.]—**To make a point.** (*a*) To rise in the air with a peculiar motion over the spot where quarry is concealed: said of a hawk. (*b*) To make a particular desired impression; "score."—**To make a point of,** to be resolved to (do something) and do it accordingly; insist upon: as, to *make a point of* rising early.—**To point**†, in every detail; completely.

A faithlesse Sarazin, all armde *to point*.
Spenser, F. Q., I. ii. 12.

Hast thou, spirit,
Perform'd *to point* the tempest that I bade thee?
Shak., Tempest, i. 2. 194.

To stand upon points, to be punctilious; be overnice or over-scrupulous.

This fellow doth not *stand upon points*.
Shak., M. N. D., v. 1. 118.

To strain a point, to exceed the reasonable limit; make an exception or concession, as of a rule in business, or a position in an argument.—**Tressed point,** a lace made of human hair.—**Tritactic, quadritactic, quinquetactic, sextactic,** etc., **point,** a point where two plane curves have three, four, five, six, etc., consecutive points in common.—**Vellum point,** lace worked on a pattern drawn on parchment, to correspond with which the main lines of the threads are laid; hence, needle-point lace of almost any sort.—**Venice point.** Same as *rose-point*: indicating both the lace itself and the method of working it.—**Vowel points,** in the Hebrew and other Eastern alphabets, certain marks placed above or below the consonants, or attached to them, as in the Ethiopic, representing the vocal sounds or vowels which precede or follow the consonant sounds.

II. *a.* Made with the needle: said of lace. Compare *needle-point*.

The principal *point* (i. e., strictly, needle-made) laces are the ancient laces of Italy, Spain, and Portugal, and the more modern lace of France, called point d'Alençon.
Industrial Arts (S. K. Handbook), p. 261.

The girl recognized her own portrait without the slightest embarrassment, and merely *pointed* her pencil at her master. *H. W. Preston*, Year in Eden, viii.

5. To direct the observation or attention of.

Whosoever should be guided through his battles by Minerva, and *pointed* to every scene of them, would see nothing but subjects of surprise. *Pope.*

6. To indicate; show; make manifest: often with *out*.

But O vaine judgement, and conditions vaine,
The which the prisoner *points* unto the free!
Spenser, F. Q., IV. xii. 11.

Ars. What will you do, Philaster, with yourself?
Phil. Why, that which all the gods have *pointed out* for me. *Beau. and Fl.*, Philaster, i. 2.

And will ye be sae kind, fair may,
As come out and *point* my way?
The Broom of Cowdenknows (Child's Ballads, IV. 46).

What a generous ambition has this man *pointed* to us! *Steele*, Tatler, No. 251.

7. To indicate the purpose or point of.

If he means this ironically, it may be truer than he thinks. He *points* it, however, by no deviation from his straightforward manner of speech. *Dickens.*

8. To give in detail; recount the particulars of.

Of what wight that stant in swich disjoynte,
His wordes alle or every look to *poynte*.
Chaucer, Troilus, iii. 497.

9. In *masonry*, to fill the joints of (brickwork or stonework) with mortar, and smooth them with the point of a trowel: as, to *point* a wall: often with *up*.

Point all their chinky lodgings round with mud.
Addison, tr. of Virgil's Georgics, iv.

10. To give a point to; sharpen; forge, grind, file, or cut to a point: as, to *point* a dart or a pin; also, to taper, as a rope (see below). Hence—**11.** Figuratively, to give point, piquancy, or vivacity to; add to the force or expression of.

There is a kind of drama in the forming of a story, and the manner of conducting and *pointing* it is the same as in an epigram. *Steele*, Guardian, No. 42.

Beauty with early bloom supplies
Her daughter's cheek, and *points* her eyes. *Gay.*

He left the name at which the world grew pale
To *point* a moral or adorn a tale.
Johnson, Vanity of Human Wishes, l. 222.

With joys she'd griefs, had troubles in her course,
But not one grief was *pointed* by remorse.
Crabbe, Works, I. 93.

To point a rope, to taper a rope at the end, as by taking out a few of its yarns, and with these working a mat over it, for neatness, and for convenience in reeving through a block.—**To point a sail**, to rig points through the eyelet-holes of the reefs in the sail. [Rare.]—**To point the leaders**, in *four-in-hand driving*, to give the leaders an intimation with the reins that they are to turn a corner.—**To point the yards of a vessel**, to brace the yards up sharp: often done when steaming, to expose less surface to the wind.

II. *intrans.* **1.** To indicate direction or direct attention with or as with the finger.

They are portentous things
Unto the climate that they *point* upon.
Shak., J. C., i. 3. 32.

This fable seems to *point* at the secrets of nature.
Bacon, Physical Fables, vii., Expl.

Their neighbors scorn them, Strangers *poynt* at them.
Dekker, Seven Deadly Sins, p. 15.

Thus having sumarily *pointed* at things wch Mr. Brewster (I thinke) hath more largly write of to Mr. Robinson, I leave you to the Lords protection.
Cushman, quoted in Bradford's Plymouth Plantation, p. 38.

2. To lead or direct the eye or the mind in some specified direction: with *to:* as, everything *points to* his guilt; to *point* with pride *to* one's record.

None of these names can be recognised, but they *point* to an age when foreign kings, possibly of the Punjab, ruled this country by satraps.
J. Fergusson, Hist. Indian Arch., p. 151.

How Latin, together with Greek, the Celtic, the Teutonic, and Slavonic languages, together likewise with the ancient dialects of India and Persia, *points* back *to* an earlier language, the Mother, if we so may call it, of the whole Indo-European or Aryan family of speech.
Macmillan's Mag., I. 35.

Everything *pointed to* a struggle that night or early next morning. *Cornhill Mag.*, Oct., 1888.

Hym self armyd *atte poynte-devise*.
Generydes (E. E. T. S.), l. 3307.

So noble he was of stature,
So faire, so joly, and so fetys,
With lymes wrought *at poynt devys*,
Delyver, smert, and of grete myght,
Ne sawe thou nevere man so lyght.
Rom. of the Rose, l. 830.

point-device† (point'dē-vīs'), *adv.* [By ellipsis from *at point device.*] Same as *at point-device* (which see, under *point-device, n.*).

The wenche she was full proper nyce,
Amonge all other she bare great price,
For sche coude tricke it *point device*,
But fewe like her in that countree.
The Miller of Abington. (*Halliwell.*)

point-device (point'dē-vīs'), *a.* [< *point-device, adv.*] Precise; nice; finical; scrupulously neat. [Obsolete or archaic.]

Then your hose should be ungartered, your bonnet unbanded, your sleeve unbuttoned, your shoe untied, and every thing about you demonstrating a careless desolation. But you are no such man; you are rather *point-device* in your accoutrements, as loving yourself, than seeming the lover of any other. *Shak.*, As you Like it, iii. 2. 401.

Men's behaviour should be like their apparel, not too strait or *point device*, but free for exercise or motion.
Bacon, Ceremonies and Respects (ed. 1887).

Otto looked so gay, and walked so airily, he was so well-dressed and brushed and frizzled, so *point-de-vice*, and of such a sovereign elegance.
R. L. Stevenson, Prince Otto, ii. 1.

pointe (F. pron. pwañt), *n.* [F.: see *point*[1].] A triangular scarf; a half-shawl folded in a point: usually of lace or other fine and delicate fabric.

pointed (poin'ted), *a.* [< *point*[1] + *-ed*[2].] **1.** Sharp; having a sharp point: as, a *pointed* rock.

The various-colour'd scarf, the shield he rears,
The shining helmet, and the *pointed* spears.
Pope, Iliad, x. 85.

2. Aimed at or expressly intended for some particular person; directly applicable or applied; emphasized: as, a *pointed* remark.

Only ten days ago had he elated her by his *pointed* regard. *Jane Austen*, Northanger Abbey, xxix.

This is a comprehensive, brief, *pointed*, and easily understood exposition of the whole subject.
Science, XII. 229.

3. Epigrammatical; abounding in conceits or lively turns; piquant; sharp.

His moral pleases, not his *pointed* wit.
Pope, Imit. of Horace, II. i. 76.

They cast about them their *pointed* antitheses, and often subsided into a clink of similar syllables, and the clinch of an ambiguous word. *I. D'Israeli*, Amen. of Lit., II. 352.

Pointed arch, an arch bounded by two arcs each less than 90°. The arch of this form is characteristic of European medieval architecture from the middle of the twelfth century, though examples of its use occur earlier. Its logical and consistent use was devised and perfected in France. The pointed arch of much Oriental architecture is an independent development, which never led to the logical conclusions and constructive methods of the French pointed architecture. See *Pointed style*, below.

Gothic architecture differs from Romanesque far more fundamentally than by the use of *pointed arches* in place of round arches, or by the substitution of one decorative system for another.
C. H. Moore, Gothic Architecture, p. 7.

Pointed ashler. See *ashler*, 3.—**Pointed box**, in *mining*, a box in the form of an inverted pyramid, forming one of a series of three or four, and used for dressing ore according to the method devised by Von Rittinger. Also called a *V-vat*, and frequently by the German name *Spitzkasten* (that is, 'point-box').—**Pointed cross**, in *her.*, a cross having every one of its four arms pointed abruptly, or with a blunt point, differing from the cross fitché of all four, which is like a four-pointed star.—**Pointed style**, in *arch.*, a general phrase under which are included all the different varieties of advanced medieval architecture, generally called *Gothic*, from the common application of the pointed arch and vault in the twelfth century until the general diffusion of Renaissance architecture toward the beginning of the sixteenth century. This style, as fully developed by the middle of the thirteenth century, exhib-

its great flexibility and adaptability to all purposes, and is thoroughly in accord with the conditions imposed upon the architect by northern climates, which demand, among other things, spacious and well-lighted interiors for public meetings, and high-pitched roofs which can shed rain rapidly and upon which heavy masses of snow cannot lodge. While the pointed arch and vault are the most obvious characteristics of this style, they are in fact merely necessary details of it. It is fundamentally a system of construction in stone in which a skeleton framework of ribs and props forms the essential organic part of the building. All the weights and strains are collected in a relatively small number of points, where the loads are sup-

ported by vertical props or piers, while the lateral pressures are counterbalanced by buttresses and flying-buttresses. Upon the ribs rest shells of masonry constituting the vaults or ceiling, and between those of the props which fall in the exterior boundary of the building thin inclosing walls are carried up, which walls may be, and in the most perfect examples often are, almost entirely done away with, giving place to light-transmitting screens of colored glass supported by a slender secondary framework of stone and metal. The use of the pointed arch and vault has the advantage over that of the earlier semicircular forms that the pressures outward are less strong and more easily counteracted; and good examples of the style are as carefully studied, and founded upon principles as scientific and proportions as subtle, as the best Greek work. See *medieval architecture*, under *medieval*, for an outline of the history of the style, and *Decorated*, *Flamboyant*, *Perpendicular*, and *Tudor* for the characteristics of some of its varieties. See also *early English architecture*, under *early*.

pointedly (poin'ted-li), *adv.* In a pointed manner. (*a*) With point or force; with lively turns of thought or expression.

He often wrote too *pointedly* for his subject. *Dryden.*

(*b*) With direct assertion; with explicitness; with direct reference to a subject.

pointedness (poin'ted-nes), *n.* 1. The state or quality of being pointed; sharpness.

High, full of rock, mountain, and *pointedness*. *B. Jonson*, Discoveries.

2. Epigrammatical smartness or keenness.

In this [you] excel him [Horace], that you add *pointedness* of thought. *Dryden*, Ded. of tr. of Juvenal.

pointel (poin'tel), *n.* [< ME. *poyntel*, < OF. *pointel*, F. *pointeau*, a point, prick, = Sp. *puntel*, a glass-blowers' pipe, < ML. **punctellum*, LL. *punctillum*, a little point, dim. of L. *punctum*, a point, see *point*[1]. Cf. *pontil*, *ponty*, etc., and *pointal*. 1. A point or sharp instrument; especially, such an instrument used in writing; in the middle ages, a style used with ivory tablets or for writing on a soft surface, as of wax.

His felawe hadde a stafe tipped with horn,
A peyre of tables al of yvory,
And a *poyntel* polysshed fetisly,
And wroot the names alwey as he stood
Of alle folk that gaf hym any good.
Chaucer, Summoner's Tale, l. 34.

2. Any sharp-pointed thing resembling a pencil, as the pistil of a plant. Also *pointal*.

It [the basilisk] is not halfe a foot long, and hath three *pointels* (Galen saith) on the head, or, after Solinus, strakes like a Mitre. *Purchas*, Pilgrimage, p. 560.

A breathless ring was formed about
That sudden flower: get round at any risk
The gold-rough *pointel*, silver-blazing disk
O' the lily! *Browning*, Sordello.

3. A pavement formed of materials of a lozenge shape, or of squares set diagonally. *Imp. Dict.* Also *pointal*.

pointeling†, *adv.* See *pointling*.

point-equation (point'ē-kwā″shon), *n.* An ★equation in point-coördinates.

pointer (poin'tėr), *n.* [< *point*[1] + *-er*[1]. Cf. F. *pointeur*, < ML. *punctator*, < *punctare*, point; cf. Sp. *puntero* = Pg. *ponteiro*, < ML. as if **punctarius*, < L. *punctum*, point: see *point*[1].] 1. One who or that which points. Specifically—(*a*) One of the hands of a clock or watch; the index-hand of a circular barometer, anemometer, or the like. (*b*) A long tapering stick used by teachers or lecturers in pointing out places on a map, or words, figures, diagrams, etc., on a blackboard. (*c*) One of a breed of sporting-dogs. A pointer is a modified hound, of medium size, differing from the setter in being close-haired. When game is scented the pointer stands stiffly, with the muzzle raised and stretched toward the game, the tail straight out behind, and usually one fore foot raised. Most setters are now trained to this same action, instead of to drop before game as formerly. Pointers are usually liver-colored, or liver and white, but many retain the tan marks of the foxhound, and some are black. They are used chiefly for hunting birds, and make excellent retrievers.

The *pointer* is known to have come originally from Spain. *The Century*, XXXI. 122.

(*d*) *pl.* With the definite article, the two stars of the constellation Ursa Major which guide the eye of the observer to the pole-star.

2. A light pole with a black ball on the end of it, used at the masthead of a whaler when the boats are down. *Macy.*—3. *Naut.*, one of the pieces of timber fixed fore-and-aft, and diagonally inside of a vessel's run or quarter, to connect the stern-frame with the after-body. See *counter*[3], 4. Also called *snake-piece*.—4. A pointed tool; especially, one used for cutting, graving, boring, and the like: a term common to many trades: as, a stone-cutters' *pointer*; a silversmiths' *pointer*.—5. A tool used by bricklayers for clearing out the old mortar in pointing brickwork.—6. The lever of a railroad-switch.—7. In *printing*, the workman who adjusts sheets by means of the point-holes on a press.—8. A hint; an indication; a point; an item of information which may be used with advantage: as, *pointers* in a race or a game. [Slang.]

pointer-dog (poin'tėr-dog), *n.* Same as *pointer*, 1 (*c*).

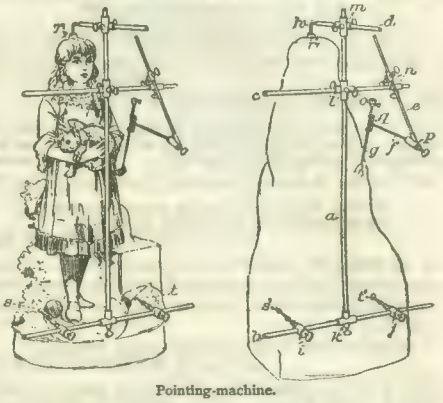
point-finder (point'fin″dėr), *n.* In *persp.*, an instrument employed for determining the vanishing-point in making projections.

point-hole (point'hōl), *n.* In *printing*, one of the needle-holes made in the margins of paper when printed on the first side or in the first color. If the sheet is fitted by means of these point-holes when printing on the second side or in the second color, the second impression will be in the same position, or in exact register.

-pointic. An adjectival suffix used in mathematical language. An *m-pointic* contact is a contact consisting in two curves having *m* consecutive points in common.

pointillé (F. pron. pwaṅ-tē-lyā′), *a.* [F., pp. of *pointiller*, dot, stipple, < *pointe*, point, dot: ★see *point*[1].] See *pounced work*, under *pounced*[1].

pointing (poin'ting), *n.* [Verbal n. of *point*[1], *v.*] 1. The art of indicating the divisions of a writing; punctuation.—2. The marks or points made, or the system of marks employed, in punctuation.—3. The act of removing mortar from between the joints of a stone or brick wall, and replacing it with new mortar; also, the material with which the joints are refilled.—4. In *sculp.*, the operation of marking off into regular spaces by points the surface of a plaster or clay model, preliminary to reproducing it in marble, as well as the reproduction of these points on the marble block. The distances between the points being easily measurable, accuracy is insured. Both the Greeks and the Romans pointed the marble blocks out of which their sculptures were to be cut. Pointing-marks are visible on a head of Alcibiades in the Louvre, and at Rome on the colossal statues in the Quirinal and the Discobolus in the Vatican.



5. In *milling*, the first treatment of grain in the high-milling process. It consists in rubbing off the points of the grain, clipping the brush, and removing the germ-end, and is performed either by a machine similar to a smut-mill or by millstones set at an appropriate distance apart.

6. In *chanting*, the act, process, or result of indicating exactly how the words shall be adapted to the music, or of making such an adaptation. Since the same melody may be used with many different texts, and the same melody and text may be variously adapted to each other, pointing becomes an intricate art, if both rhetorical and musical propriety is to be maintained. No method of pointing is yet recognized as standard, and the differences between different editors are considerable.

7. The conical softish projection, of a light-yellow color, observable in an abscess when nearly ripe. *Thomas*, Med. Dict.—8. *Naut.*, the operation of tapering the end of a rope and covering the tapered portion with the yarns that have not been removed for tapering.—**Cross pointing**, a peculiar kind of braiding made by using the outer yarns of a rope after it has been tapered. The yarns are twisted up into nettles; every alternate one is turned up and the intermediate one down; an upper nettle is brought down to the right of its corresponding lower one and the lower one is laid up, all round the rope; then what are now the upper nettles are brought down to the left of the lower ones, and so on.—**Flat-joint pointing**, the operation of filling the joints of masonry evenly with mortar, and of marking them with a trowel.—**Tuck-joint pointing**, the operation of finishing the joints of masonry with fine mortar, left projecting slightly, and formed to parallel edges; tuck-pointing.

pointingly† (poin'ting-li), *adv.* Pointedly; perspicuously. *B. Jonson*, Volpone, Ded.

pointing-machine (poin'ting-ma-shēn″), *n.* 1. A machine for cutting something (as a picket, a peg, a match, etc.) to a point.—2. A machine for finishing the ends of pins, nails, etc.—3. A machine or, more properly, an apparatus used by sculptors in the production of stone or marble copies of clay models, to locate accurately any point in the copy of the modeled figure. It consists of a round standard *a*, and three round cross-bars *b*, *c*, *d*, made adjustable by means of the sliding-crosses and set-screws *k*, *l*, *m*. On *b* are two adjustable stocks *i*, *j*, with steel points, and at *h* is a third point rigidly attached to *d*. In the clay model, or, more usually, in a plaster cast of it, are fixed small metal socket-plates *s*, *t*, *r*, each with a small countersink or socket. To these three points the standard is adjusted, the axis of the standard being, when applied to *s*, *t*, *r*, always coincident with the intersection of two fixed planes. To the stone to be cut three socket-plates *s′*, *t′*, *r′* are fixed in such positions that the points will exactly fit their countersinks. The cross-bar *c* being adjustable vertically on the standard, its axis may be made to coincide with any third plane of projection cutting at right angles the two fixed vertical planes intersecting in the axis of the standard. On *a* is another cross-bar *e*, with an adjustable universal-motion sliding-cross *n*, and to *e* is also attached at *p* a socket holding a bar *f* that also carries at *q* a friction-spring holder for the pointer *g*, the sliding motion of which in the holder is limited by the **stop** *o*. Suppose the instrument to be set on the socket-plates, and the pointer *g* arranged to just touch the tip of the cat's

Pointing-machine.

tail in the model. It is then applied to the stone, and if it does not simultaneously touch the bottoms of all the sockets when the point of *g* touches the stone, the latter is cut carefully away till *s*, *t*, and *r* all bed home in their sockets and the point of *g* just touches the bottom of the cut. Other points in the surface are located similarly as guides for the cutting, and intermediate points are located as the cutting proceeds. The instrument is also used to test the accuracy of the work as it progresses, and remarkable fidelity in the copy is attainable by its use.

4. A machine for preparing printed sheets for cutting.

pointing-stock (poin'ting-stok), *n.* An object of scandal or scorn. Compare *laughing-stock*.

I, his forlorn duchess,
Was made a wonder and a *pointing-stock*
To every idle rascal follower.
Shak., 2 Hen. VI., ii. 4. 46.

point-lace (point'lās), *n.* See *lace*.

pointless (point'les), *a.* [< *point* + *-less*.] 1. Having no point; terminating squarely or in a rounded end.

After the procession folowed therle of Northumberlande with a *poinctless* sword naked. *Hall*, Rich. III., an. 2.

An arrow with a *pointless* head will fly further than a pointed one. *M. and W. Thompson*, Archery, p. 34.

2. Without point or force: as, a *pointless* joke.

O'er the protracted feast the suitors sit,
And aim to wound the prince with *pointless* wit.
Fenton, in Pope's Odyssey, xx.

3. In *bot.*, same as *muticous*.

pointleted (point'let-ed), *a.* [< *point* + *-let* + *-ed*[2].] In *bot.*, having a small distinct point; apiculate.

pointling†, *adv.* [Also *pointeling*; ME. *poyntelynge*; < *point* + *-ling*[2].] With the point directed forward.

He myght wel see a spere grete and longe that came streyghte upon hym *poyntelynge*.
Morte d'Arthur, ii. 165. (*Nares.*)

pointment†, *n.* [By apheresis for *appointment*.] Appointment; arrangement.

Two kynges mo were in his *poyntement*,
With the nowmber of knyghtes accordeng.
Generydes (E. E. T. S.), l. 2178.

To this *poyntment* euery man was agreed, and on the Monday in the mornyng Sir Johan Bouchyer and his company came to the house.
Berners, tr. of Froissart's Chron., II. xix.

He made *poyntment* to come to my house this daye.
Udall, Flowers, fol. 45.

point-pair (point'pār), *n.* A degenerate conic consisting of two coincident straight lines connected by two points. It may also be considered as two points, the line between them being a bitangent. The two conceptions are equally legitimate.

point-paper (point'pā″pėr), *n.* Pricked paper used for copying or transferring designs. *E. H. Knight.*

pointrel (poin'trel), *n.* [Cf. *pointel*.] A graving-tool. *E. H. Knight.*

★pointsman (points'man), *n.*; pl. *pointsmen* (-men). A man who has charge of the points or switches on a railway; a switchman. [Eng.]

Hast thou ne'er seen rough *pointsmen* spy
Some simple English phrase—"*With* care"
Or "This side uppermost"—and cry
Like children? No? No more have I.
C. S. Calverley, Thoughts at a Railway Station.

point-sphere (point'sfēr), *n.* A point considered as an infinitesimal sphere.

point-tool (point'tōl), *n.* In *turning*, a flat tool having a V-shaped point.

pointy (poin'ti), *a.* [< *point* + *-y*[1].] Well-put; pithy; full of point. [Slang.]

poise (poiz), *v.*; pret. and pp. *poised*, ppr. *poising*. [Formerly also *poize*, *peise*, *peize*, *peiz*, *pease*, *peaze*, *paise*, *paize*, *payse*; < ME. *poisen*, *peisen*, *peysen*, *paysen*, < OF. *poiser*, *peiser*, F.

Cf. *poise*, *n.*] **I.** *trans.* **1.** To weigh; ascertain by weighing or balancing; figuratively, to weigh; ponder; consider.

Ac the pounde that she payed by *poised* a quarteroun more Than myne owne auncere who-so weyzed treuthe.
Piers Plowman (B), v. 218.

Payse euery thyng in 3owre iust aduertence.
Political Poems, etc. (ed. Furnivall), p. 46.

And *poise* the cause in justice' equal scales,
Whose beam stands sure, whose rightful cause prevails.
Shak., 2 Hen. VI., ii. 1. 204.

Much more lett 's *peiz* and ponder
Th' Almighties Works, and at his Wisedom wonder.
Sylvester, tr. of Du Bartas's Weeks, i. 2.

2. To counterbalance; be of equal weight with.

Your good opinion shall in weight *poise* me
Against a thousand ill.
Fletcher (and another), Love's Cure, ii. 2.

Thou continent of wealth, whose want of store,
For that it could not *peize* th' unequal scale
Of avarice, giv'st matter to my moan!
Middleton, Family of Love, ii. 4.

Be it the weightiest and most rich affair
That ever was included in your breast,
My faith shall *poise* it.
B. Jonson, Case is Altered, i. 2.

3. To balance; make of equal weight; hold or place in equilibrium: as, to *poise* the scales of a balance.

Moderatly exercise your body with some labour, or playeng at the tennys, or castyng a bowle, or *paysyng* weyghtes or plommettes of leede in your handes, or some other thyng, to open your poores, & to augment naturall heate.
Babees Book (E. E. T. S.), p. 247.

The just skale of even, *paized* thoughts.
Marston, What you Will, Prol.

The world, who of itself is *peised* well,
Made to run even upon even ground.
Shak., K. John, ii. 1. 575.

Chaos wild
Reign'd where these heavens now roll, where earth now rests
Upon her centre *poised*.
Milton, P. L., v. 579.

The falcon, *poised* on soaring wing,
Watches the wild-duck by the spring.
Scott, Rokeby, iii. 1.

He became conscious of a soul beautifully *poised* upon itself, nothing doubting, nothing desiring, clothed in peace.
R. L. Stevenson, Will o' the Mill.

4†. To hold suspended or in suspense; delay.

I speak too long; but 'tis to *peize* the time,
To eke it and to draw it out in length.
Shak., M. of V., iii. 2. 22.

5. To weigh or press down; force.

Chawmbyrs with chymnes, and many cheefe inns;
Payseede and pelid downe playsterede walles.
Morte Arthure (E. E. T. S.), l. 3043.

II. *intrans.* To be balanced or suspended; hence, figuratively, to hang in suspense.

Breathless racers whose hopes *poise* upon the last few steps.
Keats.

And everywhere
The slender, graceful spars
Poise aloft in the air.
Longfellow, Building of the Ship.

poise (poiz), *n.* [Formerly also *poize*, *peise*, *peize*, *paise*; < ME. *poyse*, *peis*, (*a*) < OF. *pois*, *peis*, m., F. *poids* (the *d* introduced during the sixteenth century on account of a supposed derivation from L. *pondus*, weight) = Pr. *pens*, *pes* = Sp. Full heauie is the *paise* of Princes ire.
Puttenham, Arte of Eng. Poesie, p. 110.

Some others were in such sort bound vnto pillers with their faces turned to the wall, hauing no staie vnder their feet, and were violentlie weighed down with the *peise* of their bodies.
Foxe, Martyrs, The Ten First Persecutions.

When I have suit, . . .
It shall be full of *poise* and difficult weight,
And fearful to be granted.
Shak., Othello, iii. 3. 82.

A stone of such a *paise*
That one of this time's strongest men, with both hands, could not raise.
Chapman, Iliad, xii.

2. A weight; especially, the weight or mass of metal used in weighing with steelyards to balance the substance weighed.

They make many smaule diamundes, whiche . . . are soulde by a *poyse* or weight which they caule Mangiar.
R. Eden, tr. of Antonio Pigafetta (First Books on America, [ed. Arber, p. 265).

Laborynge with *poyses* made of leadde or other metall.
Sir T. Elyot, The Governour, i. 16.

3. A thing suspended or attached as a counterweight; hence, that which counterbalances; a counterpoise.

Men of an unbounded imagination often want the *poise* of judgment.
Dryden.

4. A state of balance; equipoise; equilibrium; hence, equanimity.

The particles that formed the earth must convene from all quarters toward the middle, which would make the whole compound to rest in a *poise*.
Bentley, Sermons.

It is indeed hard for the weak and unsteady hearts of men to carry themselves in such a *poize* between both as not to make the shunning of one inconvenience the falling into another.
South, Sermons, XI. vii.

But what was most remarkable, and, perhaps, showed a more than common *poise* in the young man, was the fact that, amid all these personal vicissitudes, he had never lost his identity.
Hawthorne, Seven Gables, xii.

5. The condition of balancing or hovering; suspended motion.

Like water-reeds the *poise*
Of her soft body, dainty thin.
D. G. Rossetti, Staff and Scrip.

The tender *poise* of pausing feet.
A. C. Swinburne, Life of Blake.

poiseless (poiz'les), *a.* [Formerly also *peizless*; < *poise* + *-less*.] Without weight; light.

poiser (poi'zėr), *n.* [Formerly also *peizer*, *payser*; < *poise* + *-er*[1].] **1.** One who poises or weighs; a weigher.

The officers deputed to manage the coynage are porters to beare the tynne, *peizers* to weigh it, a steward, comptroller, and receiver to keepe the account.
Carew, Survey of Cornwall, fol. 14.

2. That which poises or balances; specifically, in *entom.*, the halter or balancer of a dipterous insect or ■ male coccid. See cut under *halter*.

poison (poi'zn), *n.* [< ME. *poisoun*, *poyson*, *poysone*, *puyson*, *puisun*, a potion, poison, < OF. *poison*, *puison*, potion, poison, F. *poison*, poison, = Pr. *poizo* = Sp. *poción*, potion (*ponzoña*, poison, = Pg. *peçonha*, poison), = It. *pozione*, potion, < L. *potio(n-)*, drink, ■ draught, a poisonous draught, a potion, < *potare*, drink: see *potion*, of which *poison* is but an older form.] **1†.** A drink; a draught; a potion.

And nailede hym [Christ] with thre nayles naked on the rode,
And with a pole *poyson* putten to hus lippes,
And beden hym drynke, hus deth to lette, and hus dayes lengthen.
Piers Plowman (C), xxi. 52.

2. Any substance which, introduced into the living organism directly, tends to destroy the life or impair the health of that organism.

Hereby was signified that, as glasse by nature holdeth no *poyson*, so a faythful counsellor holdeth no treason.
Norton and Sackville, Ferrex and Porrex, ii.

Tobacco, coffee, alcohol, hashish, prussic acid, strychnine, are weak dilutions; the surest *poison* is time.
Emerson, Old Age.

3. Hence, that which taints or destroys moral purity or health or comfort: as, the *poison* of evil example.

Plato also, that diuine Philosopher, hath many Godly medicines agaynst the *poyson* of vayne pleasure.
Ascham, The Scholemaster, p. 77.

Why linger We? see, see your Lover 's gone;
Perhaps to fetch more *poison* for your heart.
J. Beaumont, Psyche, iii. 115.

Aërial poison. Same as *miasma*. — **Arrow-poison**, the juice of various plants used by savages in Africa, South America, Java, etc., for anointing arrows to render them deadly. The plants so used include several euphorbias, two species of *Strychnos*, the manchineel, and the poison-bulb. See especially *curari*. — **Poison of Pahonias** or **Phonias**, an exceedingly violent poison obtained from the seeds of *Strophanthus hispidus*, an apocynaceous plant of the Gaboon, where it is used as an arrow-poison, under the name of *inée*, *onaye*, or *onage*.

This even-handed justice
Commends the ingredients of our *poison'd* chalice
To our own lips.
Shak., Macbeth, i. 7. 11.

The *poysoned* weed is much in shape like our English Iuy.
Capt. John Smith, Works, II. 113.

None knew, till guilt created fear,
What darts or *poison'd* arrows were.
Roscommon, tr. of Horace's Odes, i. 22.

2. To administer poison to; attack, injure, or kill by poison.

He was so discouraged that he *poisoned* himself and died.
2 Mac. x. 13.

How easy 'twere for any man we trust
To *poison* one of us in such a bowl.
Beau. and Fl., Maid's Tragedy, iv. 2.

3. To taint; mar; impair; vitiate; corrupt.

My rest
Was *poison'd* with th' extremes of grief and fear.
Quarles, Emblems, iv. 11.

Constantine with his mischevous donations *poyson'd* Silvester and the whole Church.
Milton, Eikonoklastes, xvii.

poisonable (poi'zn-a-bl), *a.* [< *poison* + *-able*.] **1†.** Capable of poisoning; venomous.

Tainted with Arianism and Pelagianism, as of old, or Anabaptism and Libertinism, or such like *poisonable* heresies, as of late.
Tooker, Fabrick of the Church (1604), p. 54. (*Latham.*)

2. Capable of being poisoned.

poison-ash (poi'zn-ash), *n.* Same as *poison-sumac*.

poison-bag (poi'zn-bag), *n.* Same as *poison-sac*.

poison-bay (poi'zn-bā), *n.* An evergreen shrub, *Illicium Floridanum*, whose leaves are reputed poisonous.

poison-berry (poi'zn-ber″i), *n.* Any one of the various species of *Cestrum;* also, the boraginaceous shrub *Morelosia Bourreria*. [West Indies.]

poison-bulb (poi'zn-bulb), *n.* The South African herb *Buphone toxicaria*, of the family *Amaryllidaceæ*, whose coated bulb is said to furnish the Kafirs an arrow-poison.

poison-cup (poi'zn-kup), *n.* A name given to certain old glass beakers, tankards, etc., from the belief that poison poured into them would break them and thus be detected.

poison-dogwood (poi'zn-dog″wůd), *n.* Same as *poison-sumac*.

poison-elder (poi'zn-el″dėr), *n.* Same as *poison-sumac*.

poisoner (poi'zn-ėr), *n.* One who poisons or corrupts, or that which poisons or corrupts.

poison-fang (poi'zn-fang), *n.* One of the superior maxillary teeth of certain serpents, as the viper and rattlesnake, having a channel in it through which the poisonous fluid is conveyed into the wound when they bite; a venom-fang. The fang ordinarily lies recumbent, but when the serpent bites it is erected and the poison-gland is at the same time compressed and emptied of its secretion, which is injected through the hollow fang into the wound. See cut under *Crotalus*.

poisonful† (poi'zn-fůl), *a.* [< *poison* + *-ful*.] Poisonous; full of poison.

The spider, a *poisonfull* vermine, yet climes to the roof of the king's palace.
White, Sermons (1665), p. 53.

poison-gland (poi'zn-gland), *n.* A gland which secretes poison, as in ■ venomous serpent. See cuts under *chelicera* and *Hymenoptera*.

poison-hemlock (poi'zn-hem″lok), *n.* Same as *hemlock*, 1.

poisonie†, *a.* Same as *poisony*.

poison-ivy (poi'zn-ī″vi), *n.* One of several North American species of *Rhus*, poisonous to the touch. They are shrubs, either erect or climbing by aërial roots upon trees, rocks, and fences. The best-known species are *R. radicans* and *R. Toxicodendron*. They are popularly distinguished as *three-leafed ivy* from the innocuous Virginia creeper or five-leafed ivy, *Parthenocissus quinquefolia*, the leaves having respectively three and five leaflets. Known also as *poison-oak*, which see. The poison is a non-volatile oil, toxicodendrol, present in all parts of the plant, which causes severe cutaneous swelling and blisters, with intense smarting and itching. See ★*toxicodendrol*, in the supplement.

poison-nut (poi'zn-nut), *n.* **1.** The nux vomica. —**2.** The fruit of *Cerbera Manghas*, and doubtless of *C. Odollam*.

poison-oak (poi'zn-ōk), *n.* An erect shrub of Pacific North America, *Rhus diversiloba*, also called *yeara*, similar in its effects to poison-ivy. The name is often applied also to poison-ivy, especially to the non-climbing species.

poison-organ (poi'zn-ôr″gan), *n.* Any part or organ capable of inflicting a poisoned wound; an organic apparatus for poisoning.

poisonous (poi'zn-us), *a.* [Formerly also *poisnous*, *poysnous* (= Sp. *ponzoñoso*); as *poison* + *-ous*.] Having the properties of a poison; containing poison; venomous; hence, corrupting, vitiating, or impairing.

O sovereign mistress of true melancholy,
The *poisonous* damp of night disponge upon me.
Shak., A. and C., iv. 9. 13.

Serpents & *poysnous* toads, as in their bowers,
Doe closely lurke vnder the sweetest flowers.
Times' Whistle (E. E. T. S.), p. 23.

poisonously (poi'zn-us-li), *adv.* In a poisonous manner; with fatal or injurious effects.

poisonousness (poi'zn-us-nes), *n.* The character of being poisonous.

poison-pea (poi'zn-pē), *n.* See *Swainsona*.

poison-plant (poi'zn-plant), *n.* (*a*) One of various species of *Gastrolobium*. (*b*) The Swainson pea. See *Swainsona*. (*c*) A bird's-foot trefoil, *Lotus australis*. [All Australian.]

poison-sac (poi'zn-sak), *n.* A sac or pouch containing or secreting poison; a poison-gland.

poisonsome† (poi'zn-sum), *a.* [< *poison* + *-some*.] Poisonous. *Holland.*

poison-sumac (poi'zn-shō″mak), *n.* A small handsome tree, *Rhus Vernix*, of swamp-borders in eastern North America. It is similar in its effects to poison-ivy, and even more virulent. Its leaves have from seven to thirteen leaflets, and, like those of the other sumacs, become brilliantly red in the autumn. In this condition it is often unwittingly gathered for ornament. It is distinguishable from the others by its smooth leaves, entire leaflets, axis not winged between the leaflets, and white fruit. Also called *poison-* or *swamp-dogwood, poison-elder, poison-ash.*

poison-tooth (poi'zn-töth), *n.* Same as *poison-fang* or *venom-fang.*

poison-tower (poi'zn-tou″ėr), *n.* In the production of arsenic, as practised in Saxony and Silesia, one of the chambers in which the fumes ★of arsenic and sulphur are condensed.

poison-tree (poi'zn-trē), *n.* Any tree of poisonous character, especially species of *Rhus;* also *Croton Verreauxii*, a small Australian tree.

poison-vine (poi'zn-vīn), *n.* 1. The poison-ivy.—2. The milk-vine, *Periploca Græca.*

poisonwood (poi'zn-wůd), *n.* 1. A small poisonous tree, *Metopium Metopium*, of the West Indies and southern Florida, whose bark yields upon incision a gum with emetic, purgative, and diuretic properties. Also called *burnwood, coral-sumac, mountain manchineel, hog-plum*, etc. —2. A small euphorbiaceous tree, *Gymnanthes lucida*, of the same habitat. Its wood, which is hard and close-grained, dark-brown streaked with yellow, is manufactured into canes, and is also valued for fuel.

poisony†, *a.* [< *poison* + *-y*[1].] Poisonous.

Eunomus, who at the first had sowne
His *poisony* seeds.
Sylvester, tr. of Du Bartas's Triumph of Faith, ii. 43.

poisure† (poi'zūr), *n.* [< *poise* + *-ure.*] Weight; poise.

Nor is this forc'd,
But the mere quality and *poisure* of goodness.
Fletcher, Wit without Money, i. 1.

poitrel (poi'trel), *n.* [Formerly also *peitrel, peytrel, petrel*, etc., < ME. *peytrel, peitrel, paytrelle, payetrelle*, < OF. *poitral, poictral, poictrail*, F. *poitrail* = Sp. *petral, pretal* = Pg. *peitoral* = It. *pettorale*, < L. *pectorale*, a breastplate, neut. of *pectoralis*, of the breast: see *pectoral.*] A piece of armor that protected the breast of a horse. The use of the poitrel lingered long after the other parts of the bards had been abandoned.

Poitrel, 15th century.

Curious harneys, as in sadeles, in crouperes, *peytrels* and bridles covered with precious clothing, and riche barres and plates of gold and of silver. *Chaucer*, Parson's Tale.

His *petrell* and reins were embroidered with feathers.
Sir P. Sidney, Arcadia, iii.

poitrine (poi'trin), *n.* [< OF. *poictrine*, a breastplate, the breast, also *peitrine, petrine*, F. *poitrine*, the breast, = Sp. *petrina, pretina*, a girdle, = Pg. *petrina* = It. *pettorina, petturina*, a breastgirdle, < L. as if **pectorina*, < *pectus* (*pector-*), breast: see *pectoral.*] 1. The breastplate of a knight.—2. Same as *poitrel.*

poivrette (pwo-vret'), *n.* [F., < *poivre*, pepper: see *pepper.*] Same as *pepperette.*

poize†, *v.* and *n.* An obsolete form of *poise.*

pokal (pō-käl'), *n.* [= Sw. Dan. *pokal*, < G. *pokal*, < F. *bocal*, a drinking-vessel: see *bocal.*] A drinking-vessel of ornamental character, large and showy; a vessel shaped like a drinking-vessel: a term recently borrowed from the German, and applied especially to vessels of silver and of enameled glass of ★German make.

Pokal of Rock-crystal.

poke[1] (pōk), *v.*; pret. and pp. *poked*, ppr. *poking.* [< ME. *poken, pouken, pukken* = D. *poken* = MLG. LG. *poken*, poke, = Walloon *poquer*, knock: cf. D. *pook*, MLG. *pōk*, LG. *poke*, a dagger; Sw. *påk*, a stick; prob. of Celtic origin: Gael. *puc*, push, Ir. *poc*, a blow, kick, = Corn. *poc*, a shove. Hence the assibilated form *poach*[1].] **I.** *trans.* 1. To thrust or push against; prod, especially with something long or pointed; prod and stir up: as, to *poke* a person in the ribs.

He helde the swerde in his honde all naked, and griped his shelde, and come to hym that yet lay on the grene, and putte the poynte of his swerde on his shelde and be-gan to *pouke* hym. *Merlin* (E. E. T. S.), ii. 367.

The impressions . . . which a man receives from *poking* objects with the end of his walking-stick.
H. Spencer, Prin. of Psychol. (2d ed.), § 79.

The crowning human virtue in a man is to let his wife *poke* the fire. *C. D. Warner*, Backlog Studies, p. 4.

2. To push gently; jog.

And Pandare wep as he to water wolde,
And *poked* ever his nece newe and newe.
Chaucer, Troilus, iii. 116.

3. To thrust or push.

The end of the jib-boom seemed about to *poke* itself into the second story window of a red-brick building.
Scribner's Mag., IV. 611.

4. To force as if by thrusting; urge; incite.

"3us," quod Pieres the plowman, and *pukked* hem alle to gode. *Piers Plowman* (B), v. 643.

You must still be *poking* me, against my will, to things?
B. Jonson, Poetaster, ii. 1.

5. To put a poke on: as, to *poke* an ox or a pig. See *poke*[1], *n.*, 3. [U. S.]—**6**†. To set the plaits of (a ruff).

My poor innocent Openwork came in as I was *poking* my ruff. *Middleton and Dekker*, Roaring Girl, iv. 2.

To poke fun, to joke; make fun. [Colloq.]—**To poke fun at**, to ridicule; make a butt of. [Colloq.]

II. *intrans.* 1. To stoop or bend forward in walking.—2. To grope; search; feel or push one's way in or as in the dark; also, to move to and fro; dawdle.

Hang Homer and Virgil; their Meaning to seek
A man must have *pok'd* into Latin and Greek.
Prior, Down-Hall, st. 3.

Full licence to *poke* about among what there is to *poke* about in the shattered castle.
E. A. Freeman, Venice, p. 342.

★**poke**[1] (pōk), *n.* [< *poke*[1], *v.*] 1. A gentle thrust or push, especially with something long or pointed; a prod; a dig.

"But," concluded Uncle Jack, with a sly look, and giving me a *poke* in the ribs, "I've had to do with mines before now, and know what they are."
Bulwer, Caxtons, xvii. 1.

2. A poke-bonnet.

Governesses don't wear ornaments. You had better get me a grey frieze livery and a straw *poke*, such as my aunt's charity children wear. *George Eliot*, Daniel Deronda, xxiv.

3. A sort of collar or ox-bow from the lower part of which a short pole projects, placed about the neck of a cow or steer in order to prevent it from jumping fences. [U. S.]—4. A lazy person; a dawdler. [U. S.]

They're only worn by some old-fashioned *pokes.*
Lowell, Fitz Adam's Story.

poke[2] (pōk), *n.* [< ME. *poke*, also irreg. *palke* = MD. *poke* = Icel. *poki*, appar. connected with AS. *pohha, pohcha*, ONorth. *poha, pocca*, a bag. Hence (from ME. or E.) A bag; a sack; a pouch; a pocket.

"Trewely, frere," quath y tho, "to tellen the the sothe,
Ther is no peny in my *palke* to payen for my mete."
Piers Plowman's Crede (E. E. T. S.), l. 399.

And in the floor, with nose and mouth to-broke,
They walwe as doon two pigges in a *poke.*
Chaucer, Reeve's Tale, l. 358.

And then he drew a dial from his *poke.*
Shak., As you Like it, ii. 7. 20.

2†. A large, wide, bag-like sleeve formerly in vogue. Same as *poke-sleeve.*

An hool cloith of scarlet may not make a gowne,
The *pokes* of purchace hangen to the erthe.
MS. Digby 41, *f.* 7. (*Halliwell.*)

3. A bag or bladder filled with air and used by fishermen as a buoy.

When the *pokes* are used, the officer gives the order to "Blow up! Blow up!" and a man with soundlungs grasps one of these membranous pouches and inflates it. . . . It is then attached to the whale, and, being of a white color, may be readily seen at quite a distance from the ship.
Fisheries of U. S., V. ii. 270.

4. The stomach or swimming-bladder of a fish. —5. A cock, as of hay. [Prov. Eng.]

I pray thee mow, and do not go
Until the hay 's in *pokes.*
Ballad of the Mower, quoted in N. and Q., 7th ser., VI. [287.

6. A customary unit of weight for wool, 20 hundredweight.—**A pig in a poke**, a pig in a bag.

poke[3] (pōk), *n.* [Mass. (Natick) Ind. *poke, pooke.*] Same as *pokeweed* or *garget.*—**Hydrangea-leafed poke.** See *Phytolacca.*—**Indian poke**, the American, false, or white hellebore, *Veratrum viride.*

poke[4] (pōk), *n.* The small green heron more fully called *shitepoke.* [U. S.]

poke[5]†, *n.* Scrofula.

Aubanus Bohemus referres that struma or *poke* of the Bavarians and Styrians to the nature of their waters.
Burton, Anat. of Mel., p. 71. (*Davies.*)

poke-bag (pōk'bag), *n.* [So called in allusion to the shape of the nest; < *poke*[2] + *bag.*] The bottletit: same as *feather-poke.* [Local, Eng.]

pokeberry (pōk'ber″i), *n.*; pl. *pokeberries* (-iz). The fruit of the pokeweed.

poke-bonnet (pōk'bon″et), *n.* A bonnet having a projecting front of a nearly conical form, worn about the beginning of the nineteenth century and later.

His mamma . . . came fawning in with her old *poke-bonnet.* *Thackeray*, Lovel the Widower, vi.

poke-dial† (pōk'dī″al), *n.* A pocket-dial; specifically, a ring-dial.

poke-milkweed (pōk'milk″wēd), *n.* An American plant, *Asclepias phytolaccoides*, with some resemblance to pokeweed.

poke-net (pōk'net), *n.* A pole-net.

poker[1] (pō'kėr), *n.* [< *poke*[1] + *-er*[1].] One ★who or that which pokes. (*a*) An iron or steel bar or rod used in poking or stirring a fire. (*b*) A small stick or iron used for setting the plaits of ruffs; a poking-stick. (*c*) An iron instrument used for driving hoops on masts. It has a flat foot at one end and a round knob at the other.—**Red-hot-poker.** Same as *flame-flower.*

poker[2] (pō'kėr), *n.* [Cf. Sw. *pocker*, Dan. *pokker*, the devil, deuce, and see *puck.* Cf. *hodge-poker.*] Any frightful object; a bugbear. ★[Colloq.]—**Old Poker**, the devil. [Slang.]

poker[3] (pō'kėr), *n.* [Prob. a corruption of G. *pochen*, < *pochen*, brag (lit. knock), a game that preceded the introduction of poker into America and resembled it in some respects. Cf. F. *poque*, a similar game.] A game of cards played by any number from 2 to 7, with a full pack of 52 cards, which rank from the ace down to the deuce. The age, the player to the dealer's left, puts up one chip as a blind and five cards are then dealt to each player, one at a time. Before seeing any of his cards, the player to the left of the age may straddle the blind by doubling its amount. If he does so, the one on his left may over-straddle, and so on. The cards dealt, each player, beginning with the one on the left of the age, or the last straddler, if any, declares to play or pass. Those who play must put into the pool double the amount of the blind or of the last straddle, if any. This is the ante, and if any player wishes to increase it, he may do so, to any amount within the limit agreed upon. Any following player wishing to draw cards or play his hand must equal the ante. When it comes to the age and the straddlers, they must make good or pass out. If no one will ante to play against the blind, the deal is void and the next one must be a jack pot. All who have anted discard any number of cards and ask the dealer for others in their places. When all have drawn, the player to the left of the age makes the first bet or passes out, even if the age is no longer in the pool, as the privilege of the age never passes, not even to a straddler. The order of betting is to the left, and when a bet is made each player in turn must do one of three things: bet an equal amount, raise it, or pass out. A player who is raised may raise again. If no one will bet, the last man to throw up his cards takes the pool. If a bet or raise is made, either in the antes or after the draw, and no one will see it, the better takes the pool. When a bet has been made and called, no one raising higher, the hands are shown and the best poker hand takes the pool. The hands rank as follows, beginning with the lowest: (1) the highest card in any hand; (2) one pair; (3) two pairs; (4) three of the same denomination; (5) a "straight"—a sequence of five cards not of the same suit (sometimes omitted); (6) a flush—five cards of the same suit not in sequence; (7) a full—three cards of the same denomination and a pair; (8) four cards of the same denomination; and (9) a straight flush—a sequence of five cards of the same suit. There are varieties of the game known as *whisky-poker, straight poker*, etc. [U. S.]

poker[4] (pō'kėr), *n.* [Cf. *pochard.*] One of various kinds of wild ducks, especially the pochard. [Local, Eng.]

pokerish[1] (pō'kėr-ish), *a.* [< *poker*[1] + *-ish*[1].] Like a poker; stiff. [Colloq.]

pokerish[2] (pō'kėr-ish), *a.* [< *poker*[2] + *-ish*[1].] Frightful; causing fear, especially to children; uncanny: as, a *pokerish* place. [Colloq.]

pokerishly (pō'kėr-ish-li), *adv.* Like a poker; stiffly. [Colloq.]

"I'm afraid I'm interrupting a pleasant tete-a-tete?" says the old lady, *pokerishly.*
R. Broughton, Cometh up as a Flower, xxxvi.

poke-root (pōk'röt), *n.* The Indian poke (see under *poke*[3]), or its root; also, the root of the pokeweed.

poker-painting (pō'kėr-pān″ting), *n.* The process or act of producing poker-pictures.

poker-picture (pō′kėr-pik′tūr), *n.* An imitation of a sepia drawing, executed by singeing the surface of wood with a heated poker.

poke-sleeve† (pōk′slēv), *n.* A loose sleeve having a part hanging below the arm like a bag.

poke-stick (pōk′stik), *n.* A stick rounded at the end, used by some tribes of American Indians to aid them in gorging food at a feast.

pokeweed (pōk′wēd), *n.* A plant of the genus *Phytolacca*, especially *P. Americana* of eastern North America. This is a strong-growing branching herb, bearing racemes of white flowers and deep-purple juicy berries, their coloring principle too evanescent for use. The young shoots are boiled like asparagus, and the berries and root, especially the latter, are emetic, purgative, and somewhat narcotic, officinal in the United States. Also called *poke, scoke, garget, inkberry-weed,* and *pigeon-berry.* Obscure names are *coakum* and *pocan.*

poking (pō′king), *p. a.* [Ppr. of *poke*[1], *v.*] Drudging; servile. [Colloq.]

> Some *poking* profession or employment in some office of drudgery. *Gray*, Works, II. xxxvi.

poking-stick† (pō′king-stik), *n.* An instrument formerly used to adjust the plaits of ruffs.

> Pins and *poking-sticks* of steel. *Shak.*, W. T., iv. 4. 228.
>
> The horning-busk and silken bridelaces are in good request with the parson's wife; your huge *poking-sticke*, and French periwig, with chambermaids and waiting gentlewomen. *Heywood*, If you Know not Me (Works, ed. Pearson, I. 258).

poky (pō′ki), *a.* [< *poke*[1] + *-y*[1].] 1. Slow; dull; stupid: said of persons.—2. Confined; cramped; musty; stuffy: said of places.—3. Poor; shabby. [Colloq. in all uses.]

> The ladies were in their *pokiest* old head-gear and most dingy gowns when they perceived the carriage approaching. *Thackeray*, Newcomes, lvii.

Polabian (pō-lā′bi-an), *a.* and *n.* [< *Polab*, one of a tribe dwelling 'on the Elbe' (< Bohem. *po*, near, on, + *Labe*, L. *Albis*, G. *Elbe*, the Elbe), + *-ian*.] **I.** *a.* Of or pertaining to the Polabs or to their language.

II. *n.* A Slavic language, allied to Polish or to Czech, formerly spoken in northern Germany.

Polabish (pō-lā′bish), *a.* and *n.* [= G. *Polabisch;* as *Polab(ian)* + *-ish*[1].] Same as *Polabian.*

polacca[1] (pō-lak′ä), *n.* [Also *polacre, polaque* (< F.), and *polacre;* < It. *polacca*, a vessel so called.] A vessel with two or three masts, used on the Mediterranean. The masts are usually of one piece.

polacca[2] (pō-lak′ä), *n.* [It. *polacca*, fem. of *Polacco*, Polish: see *Polack*.] In *music*, same as ★*polonaise*.—**Alla polacca**, in the style of a polonaise.

Polack (pō′lak), *n.* [< D. *Polak* = G. Sw. *Polack* = Dan. *Polak* = Sp. Pg. *Polaco* = It. *Polacco*, Polish, a Pole, < Pol. *Polak* = Russ. *Polyakŭ*, a Pole: see *Pole*[3].] A Pole; a Polander.

> His nephew's levies . . . appear'd
> To be a preparation 'gainst the *Polack*.
> *Shak.*, Hamlet, ii. 2. 63.
>
> These vsed to make sudden inrodes vpon the *Polachs*. *Purchas*, Pilgrimage, p. 421.

polacre (pō-lā′kėr), *n.* 1. Same as *polacca*[1].—2. A mast of one piece, without tops.

polant†, *n.* Same as *poulaine*.

Poland bill. See *bill*[3].

Polander (pō′lan-dėr), *n.* [< *Poland* (see def.) + *-er*[1]. The name *Poland* is an accom. (simulating *land*) of **Polen*, < D. G. Sw. Dan. *Polen* = F. *Pologne* = Sp. Pg. It. *Polonia*, ML. *Polonia*, Poland: see *Pole*[3].] A Pole, or native of Poland.

> The Grand Council of the *Polanders*. *Milton*, Letters of State, Feb. 6, 1650.

Poland manna. Same as *manna-seeds*.

Polanisia (pol-a-nis′i-ä), *n.* [NL. (Rafinesque, 1819), so called in allusion to the many differences between the stamens and those of the related genus *Cleome;* irreg. < Gr. *πολύς*, many, + *ἄνισος*, unequal, dissimilar, < *ἀν-* priv. + *ἴσος*, equal.] A genus of dicotyledonous choripetalous plants of the family *Capparidaceæ* and tribe *Cleomeæ*, distinguished by its short receptacle, 4 entire petals, 8 or more free stamens, and numerous reniform seeds in a long two-valved pod. There are about 14 species, mainly tropical or subtropical, one, *P. graveolens*, extending north to Quebec and Manitoba. They are annual herbs, commonly glandular and of a strong peculiar odor, bearing palmate or undivided leaves, and small flowers in terminal clusters, which are purplish, greenish, etc. Several species with white, pink, or yellow flowers are occasionally cultivated.

Flowering Branch of *Polanisia viscosa*. *a*, a flower; *b*, a pod; *c*, a seed; *d*, the rhizome and roots.

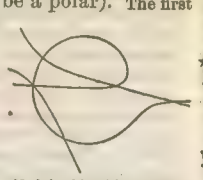
polaque (pō-lak′), *n.* Same as *polacca*[1].

polar (pō′lär), *a.* and *n.* [= F. *polaire* = Sp. ★Pg. *polar* = It. *polare*, < NL. *polaris*, < L. *polus*, pole: see *pole*[2], *n.*] **I.** *a.* 1. Of or pertaining to a pole or the poles of a sphere. (*a*) Of or pertaining to either extremity of the axis round which the earth, or any other sphere, revolves. (*b*) Pertaining to the points in which the axis of the earth meets the sphere of the heavens.

2. Proceeding, issuing from, or found in the regions near the poles of the earth or of the heavens: as, the *polar* ocean; a *polar* bear.

> Two *polar* winds, blowing adverse
> Upon the Cronian sea. *Milton*, P. L., x. 289.

3. Pertaining to a magnetic pole or poles; pertaining to the points of a body at which its attractive or repulsive energy is concentrated.—4. In *anat.*, having poles in any way distinguished, as a cell: said especially of ovum-cells and nerve-cells. There may be one, two, or several poles, when the cell is distinguished as *unipolar, bipolar,* or *multipolar.*



5. In *higher geom.*, reciprocal to a pole; of the nature of a polar. See II.—**Polar angle**, the angle at a pole formed by two meridians.—**Polar axis**, that axis of an astronomical instrument, as an equatorial, which is parallel to the earth's axis.—**Polar bands**, Same as *Noah's ark*, 3.—**Polar bear.** See *bear*[2], 1, and cut under *Plantigrada*.—**Polar cells**, in *Dicyemida*, cells of the cortical layer which invest the head-end of the body: distinguished from *parapolar cells*, further back.—**Polar circles**, two small circles of the earth parallel to the equator, the one north and the other south, distant 23° 28′ from the pole. The north polar circle is called the *arctic circle*, and the south polar circle the *antarctic circle*. The distance of each from its own pole is equal to the obliquity of the ecliptic, and the spaces within the two circles are called the *frigid zones*.—**Polar clock**, an optical apparatus whereby the hour of the day is found by means of the polarization of light.—**Polar coördinates.** See *coördinate*.—**Polar curve** with respect to a line, the locus in tangential coördinates corresponding to the polar curve with respect to a point.—**Polar developable.** See *developable*.—**Polar dial.** See *dial*.—**Polar distance**, the distance of a point on a sphere from one of the poles of the sphere.—**Polar equation**, an equation in polar coördinates.—**Polar forces**, in *physics*, forces that are developed and which act in pairs, with opposite tendencies, as in magnetism, etc.—**Polar formation.** See *formation*.—**Polar globule**, in the maturation of the ovum, a small globule, composed of a part of the germinal vesicle together with a small amount of the vitellus, which is extruded into the perivitelline space. Also called *polar vesicle, extrusion-globule*.—**Polar hare.** See *hare*[1], 1.—**Polar lights**, the aurora borealis or australis.—**Polar line**, the last of the polar curves with respect to a point.—**Polar line of a skew curve.** See *line*[2].—**Polar map-projection.** See *projection*.—**Polar multiplication.** See *multiplication*.—**Polar nucleus**, in *bot.*, the fourth nucleus in each group at the two extremities of the embryo-sac, which move toward the middle of the embryo-sac and there coalesce to form the secondary nucleus of the embryo-sac. *Goebel*.—**Polar opposite of a point** with respect to two conics in a plane, the point of intersection of the polars of the first point with respect to the two conics.—**Polar pantograph.** See *pantograph*.—**Polar plane of a point** with respect to a conicoid or quadric surface, the plane of tangency with the conicoid of a cone having its vertex at the point.—**Polar projection**, a map-projection in which the earth's pole is taken as the center of projection: generally, either the gnomical or the equal-distance projection is chosen.—**Polar reciprocal.** See *reciprocal*.—**Polar star**, the pole-star. *Tennyson*.—**Polar surface**, in *solid geometry*, a locus in all respects analogous to the polar curve of plane geometry.—**Polar triangle** of ABC, in *spherical trigonometry*, a spherical triangle A′B′C′ where A′ is that pole of *a* on the same side of *a* as A, B′ of *b* as B, C′ of *c* as C.—**Polar vesicle.** Same as *polar globule*.—**Polar whale.** See *whale*.—**Syn. 2.** *Polar, Arctic.* That which is *polar* belongs to or is connected with the north or south pole; that which is *arctic* belongs to a limited region about the north pole. See definitions of *arctic* and *antarctic*.

II. *n.* A plane curve whose point-equation is derived from that of another plane curve (with respect to which it is said to be a polar) by operating one or more times (according as it is *first, second,* etc., *polar*) with the symbol $x'.\mathrm{d}/\mathrm{d}x + y'.\mathrm{d}/\mathrm{d}y + z'.\mathrm{d}/\mathrm{d}z$, where x', y', z' are the trilinear coördinates of a fixed point (of which the curve is said to be a polar). The first polar of a point with respect to a curve is a curve of the next lower order, cutting the primitive curve at all the points of tangency of tangents to the primitive from the fixed point, as well as at all the nodes of the primitive, and tangent to the primitive at every cusp of the latter. Thus, the polar of a point with respect to a conic is simply the straight line joining the points of tangency of tangents from that point to the conic. The harmonic mean of the distances from the fixed point, measured along any given radius of the intersections of any polar of that point, is the same as that of the distances of the intersections of the primitive curve; and the same is equally true of products of pairs or triplets or any number of intersections. In a generalized sense, mathematicians speak of a polar of a curve with respect to another curve: if the tangential equation of the first curve is $(a, b, c, \ldots)(u, v, w)^s$, and the point-equation of the second curve is $(A, B, C, \ldots)(x, y, z)^m$, where $m > s$, then the polar of the first with respect to the second is

$$(a, b, c, \ldots)(\mathrm{d}/\mathrm{d}x, \mathrm{d}/\mathrm{d}y, \mathrm{d}/\mathrm{d}z)^s (A, B, C, \ldots)(x, y, z)^m.$$

But if $s > m$, the polar of the second curve with respect to the first is

$$(A, B, C \ldots)(\mathrm{d}/\mathrm{d}u, \mathrm{d}/\mathrm{d}v, \mathrm{d}/\mathrm{d}w)^m (a, b, c \ldots)(u, v, w)^s.$$

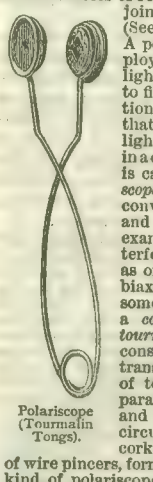
Nodal cubic with its conic polar.

polar-bilocular (pō′lär-bī-lok′ū-lär), *a.* In *bot.*, having two cells or loculi, as certain spores.

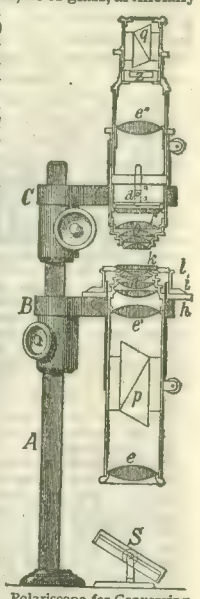
polaric (pō-lar′ik), *a.* [< *polar* + *-ic*.] Polar. [Rare.]

polarily† (pō′lär-i-li), *adv.* In a polary manner; with respect to polarity.

> If an iron be touched before, it varieth not in this manner; for then it admits not this magnetical impression, as being already informed by the loadstone, and *polarily* determined by its preaction. *Sir T. Browne*, Vulg. Err., ii. 2.



★**polarimeter** (pō-la-rim′e-tėr), *n.* [= F. *polarimètre;* < NL. *polaris*, polar, + Gr. *μέτρον*, measure.] A polariscope; more specifically, an instrument for measuring the amount of polarized light in the light received from a given source, or for measuring the angular rotation of the plane of polarization. See *photo-polarimeter, polaristrobometer,* and *saccharimeter*.



polarimetry (pō-la-rim′et-ri), *n.* [< NL. *polaris*, polar, + Gr. *-μετρία*, < *μετρεῖν*, measure.] The art or process of measuring or analyzing the polarization of light.

Polaris (pō-lā′ris), *n.* [NL., < L. *polus*, pole: see *polar, pole*[2].] The pole-star.

polarisable, polarisation. See *polarizable, polarization*.

★**polariscope** (pō-lar′i-skōp), *n.* [= F. *polariscope;* irreg. < NL. *polaris*, polar, + Gr. *σκοπεῖν*, view.] An optical instrument, various forms of which have been contrived, for exhibiting the polarization of light, or for examining substances in polarized light. The essential parts of the instrument are the polarizing and analyzing plates or prisms, and these are formed either from natural crystals or of a series of reflecting surfaces, as of glass, artificially joined together. (See *polarization*.) A polariscope employing parallel light, and designed to find the extinction-directions — that is, planes of light-vibration — in a crystal section, is called a *stauroscope*. One using converging light, and employed in examining the interference figures, as of uniaxial and biaxial crystals, is sometimes called a *conoscope*. The *tourmalin tongs*, consisting of two transparent plates of tourmalin, cut parallel to the axis, and mounted in circular pieces of cork held in a kind of wire pincers, form the simplest kind of polariscope for viewing axial interference figures. The more complex and convenient forms have polarizing prisms of Iceland spar mounted in a vertical stand resembling that of a microscope, with a movable stage, coarse adjustment, and other arrangements. When the polariscope is essentially a microscope with Nicol prisms and attachments for viewing crystal-sections in polarized light, it is usually called a *polarization-microscope* or *polarizing microscope*. The *saccharimeter* and the *polaristrobometer* are special forms of polariscope designed to measure the angular rotation of the plane of polarization of an optically active substance, as a sugar solution, quartz, etc. See *rotation*, and ★*rotatory power* (under *rotatory*).

Polariscope (Tourmalin Tongs).

Polariscope for Converging Light. (After Fuess.)

A, upright support; *B*, lower adjustable arm carrying tube with polarizer *p*; *C*, upper arm with coarse adjustment, carrying tube with analyzer *q*, also objective system *o*, and eyelens *e′*; *S*, mirror reflecting the light through polarizer *p* and lenses *e, e′* in parallel rays upon the converging system *n*; *k*, support for object under examination, revolving with the collar *l*, having a graduated circle at *i*, also index and vernier at *h*; *z*, quartz wedge for determination of character of double refraction; *r*, glass micrometer adjusted by screw at *a*.

polariscopic (pō-lar-i-skop′ik), *a.* [< *polariscope* + *-ic*.] Pertaining to a polariscope; ascertained by the polariscope.

polariscopist (pō-lar′i-skō-pist), *n.* [< *polariscope* + *-ist*.] One who is expert in the use of the polariscope.

polariscopy (pō-lar′i-skō-pi), *n.* [NL. *polaris*, polar, + Gr. *σκοπεῖν*, view.] That branch of optics which deals with polarized light and the use of the polariscope.

polarise, polariser. See *polarize, polarizer.*

polaristic (pō-la-ris′tik), *a.* [< *polar* + *-ist-ic.*] Pertaining to or exhibiting poles; having a polar arrangement or disposition. [Rare.]

polaristrobometer (pō″lar-i-strō-bom′e-tėr), *n.* [< NL. *polaris*, polar, + Gr. *στρόβος*, a whirling around, + *μέτρον*, measure.] A form of polarimeter or saccharimeter devised by Wild. Its special feature is the use of a double calcite interference-plate, which produces, in monochromatic light, a set of parallel black lines or fringes, which disappear in a certain relative position of the polarizer and analyzer; this gives a delicate means of fixing the plane of polarization as rotated by the sugar solution under examination. See *saccharimeter.*

★**polarity** (pō-lar′i-ti), *n.* [= F. *polarité* = Sp. *polaridad* = Pg. *polaridade* = It. *polarità*, < NL. **polarita(t-)s*, < *polaris*, polar: see *polar.*] 1. The having two opposite poles; variation in certain physical properties, so that in one direction they are the opposite of what they are in the opposite direction: thus, a magnet has *polarity.* Usually, as in electrified or magnetized bodies, these are properties of attraction or repulsion, or the power of taking a certain direction: as, the *polarity* of the magnet or magnetic needle. (See *magnet.*) A substance is said to possess *magnetic polarity* when it possesses poles, as shown by the fact that it attracts one pole of a magnetic needle and repels the other.

> A magnetical property which some call *polarity.*
> *Boyle*, Works, III. 309.

2. The being attracted to one pole and repelled from the other; attraction of opposites: literal or figurative: as, electricity has *polarity.*

> It seemed Clifford's nature to be a Sybarite. It was perceptible even there, in the dark old parlor, in the inevitable *polarity* with which his eyes were attracted towards the quivering play of sunbeams through the shadowy foliage. *Hawthorne*, Seven Gables, vii.

3. The having of an axis with reference to which certain physical properties are determined.—4. The having, as a ray, variation of properties in reference to different inclinations to a plane through the ray; polarization. [This use of the word is objectionable.]

polarizable (pō′lär-ī-zą-bl), *a.* [< *polarize* + *-able.*] Capable of being polarized. Also spelled ★*polarisable.*

polarization (pō″lär-i-zā′shọn), *n.* [= F. *polarisation* = It. *polarizzazione;* as *polarize* + *-ation.*] 1. The state, or the act producing the state, in which an undulatory system, such as a beam of light, owing to its mode of vibration, has different properties on its different sides, so that opposite sides are alike, but the maximum difference is between two sides at right angles to each other.—2. Less properly, the acquisition of polarity, in any sense.

Angle of polarization, circular polarization. See *polarization of light.*—**Electrolytic polarization,** in *elect.*: (*a*) The process of depositing a film of gas upon the plate in a voltaic cell, or upon the electrodes in electrolysis. (*b*) The condition thus produced. Thus, in the electrolysis of water polarization of the electrodes takes place, the one becoming coated with a film of oxygen, the other with a film of hydrogen gas. The phrase is most frequently used to describe the process by which the negative plate in a voltaic cell becomes coated with hydrogen, with the result of giving rise to a reverse electromotive force, and thus of weakening the current. On the methods of preventing this, see *cell,* 8.—**Elliptic polarization.** See *polarization of light.*—**Plane of polarization,** the plane which includes the incident ray and the ray which is reflected (or refracted) and polarized.—**Polarization of a dielectric, or dielectric polarization,** a phrase introduced by Faraday to describe the condition of a non-conductor or dielectric, as he conceived it, when in a state of strain under the action of two adjacent charges of positive and negative electricity, as, for example, in the condenser.—**Polarization of light,** a change produced in light by reflection from or transmission through certain media by which the transverse vibrations of the ether (see *light*[1]) are limited to a single plane, while in a ray of ordinary light these vibrations take place indifferently in any plane about the line of propagation. Polarization may be effected (1) by reflection from a surface of glass, water, or similar substance, and it is most complete if the angle of incidence has a certain value, depending upon the substance, called the *angle of polarization* (for glass 54½°), the tangent of this angle being equal to the refractive index of the given substance (Brewster's law); (2) by transmission through a series of transparent plates of glass placed in parallel position at the proper angle to the incident ray; and (3) by double refraction in any transparent anisotropic crystal (see *refraction*). In the last case the two rays into which the incident ray is separated upon refraction are polarized in planes at right angles to each other, as, for example, in transparent calcite (Iceland spar), in which this double refraction is most marked. A prism of Iceland spar may be prepared in such a way that one of the two refracted rays suffers total reflection and is extinguished; the other ray, which passes through, is polarized, its vibrations taking place in the direction of the shorter diagonal of the cross-section. Such a prism is called a *Nicol prism,* or simply a *nicol.* If two such prisms are placed in the path of a beam of ordinary light, it will pass through them if their positions are parallel; if, however, the nicols are crossed—that is, have their shorter diagonals, or, in other words, their vibration-planes, at right angles to each other—the light which passes through the first prism (called the *polarizer*) will be extinguished by the second (called the *analyzer*). Two sections of a crystal of tourmalin, another doubly refracting substance, cut parallel to the vertical axis, will act in the same way as the nicols, transmitting the light if placed parallel, arresting it if placed with axes at right angles to each other. In the tourmalin one of the rays is almost entirely absorbed by the crystal, and that which passes through is polarized with its vibrations parallel to the axis. In addition to the above *plane polarization* of a light-ray, there is also what is called *circular* and *elliptical polarization,* in which the vibrations of the ether-particles take place in circles and ellipses. This property, belonging to certain substances, as quartz, cinnabar, and solution of sugar, has the effect of rotating the plane of polarization of the light transmitted through them to the right (right-handed) or to the left (left-handed). A light-ray passing through a transparent medium in a strong magnetic field, or reflected from the pole of a powerful electromagnet, also suffers a rotation of the plane of polarization. See *rotation,* and *rotatory power,* under *rotatory.*

polarization-microscope (pō″lär-i-zā′shọn-mī″krọ-skōp), *n.* An instrument consisting essentially of a microscope and a polariscope combined. See *microscope.*

★**polarize** (pō′lär-īz), *v. t.*; pret. and pp. *polarized,* ppr. *polarizing.* [= F. *polariser* = Sp. *polarizar* = It. *polarizzare;* as *polar* + *-ize.*] 1. To develop polarization in, as in a ray of light which is acted upon by certain media and surfaces; give polarity to. See *polarization.*

> If sound's sweet influence *polarize* thy brain,
> And thoughts turn crystals in the fluid strain.
> *O. W. Holmes*, A Rhymed Lesson.

2. In *elect.*, to coat with a film of gas, as the negative plate in a voltaic cell.

Also spelled *polarise.*

Polarizing angle. Same as *angle of polarization,* for which see *polarization of light,* under *polarization.*—**Polarizing microscope.** See *polariscope.*

polarized (pō′lär-īzd), *p. a.* 1. Having polarization; affected by polarization: as, *polarized* light; *polarized* radiant heat.—2. In *elect.*, having the surface covered with a film of gas, as the negative plate of a simple voltaic cell (with hydrogen) after a brief use.

Also spelled *polarised.*

Polarized rings. See *interference figures,* under *interference,* 5.

polarizer (pō′lär-ī-zėr), *n.* In *optics,* that part of a polariscope by which light is polarized: distinguished from *analyzer.* Also spelled *polariser.*

polar-plant (pō′lär-plant), *n.* Same as *compass-plant.* [Rare.]

polary† (pō′lą-ri), *a.* [< NL. *polaris:* see *polar.*] Tending to a pole; turning toward a pole.

> All which acquire a magnetical *polary* condition, and, being suspended, convert their lower extream unto the North; with the same attracting the Southern point of the needle. *Sir T. Browne*, Vulg. Err., ii. 2.

polatouche (pol-ä-tösh′), *n.* [F.] The small flying-squirrel of Europe and Asia, a species of the genus *Sciuropterus.* Also *palatouche.*

polayne†, *n.* Same as *poulaine.*

poldavis†, *n.* Same as *poledavy.*

polder (pōl′dėr), *n.* [D.] A boggy or marshy soil; a morass; specifically, a tract of marshy land in the Netherlands, Flanders, and northern Germany, which has been reclaimed and brought under cultivation.

polder-land (pōl′dėr-land), *n.* In the Netherlands and adjoining regions, marshy land which has been reclaimed and brought under cultivation.

> Thus the privileges of the Abbey of St. Pierre of Ghent of about the year 830 mention the existence of a partnership of fifty members for the working of some *polder-land.*
> *W. K. Sullivan*, Introd. to O'Curry's Anc. Irish, p. cexii.

poldern†, **poldron**†, *n.* Obsolete forms of *pauldron.*

poldway†, *n.* Same as *poledavy. Weale.*

pole[1] (pōl), *n.* [< ME. *pole,* < AS. *pāl,* a pole, = ★OFries. *pāl, pēl* = D. *paal* = MLG. *pāl* = OHG. *phāl,* MHG. *phāl, pfāl,* G. *pfahl* = Icel. *pāll* = Sw. *påle* = Dan. *pæl,* a pale, post, stake, = OF. *pal* (> ME. *pal, pale,* E. *pale*[1]), F. *pal* = Sp. *palo* = Pg. *pao, pau* = It. *palo,* a stake, stick, < L. *pālus,* a stake, pale, prop, stay: see *pale*[1], from the same L. source, derived through OF.] 1. A long, slender, tapering piece of wood, such as the trunk of a tree of any size, from which the branches have been cut; a piece of wood (or metal) of much greater length than thickness, especially when more or less rounded and tapering.

> In the euenyng they entred with a thousand Spaniards & other, & slewe one citizen & set his hed on a *polle,* & caused it to be borne afore them.
> *Hall*, Hen. VIII., an. 19.

> Vines that grow not so low as in France, but vpon high *poles* or railes. *Coryat*, Crudities, I. 95.

Specifically—(*a*) A rod used in measuring. (*b*) In a two-horse vehicle, a long tapering piece of wood, forming the shaft or tongue, carrying the neck-yoke or the pole-straps, and sometimes the whiffletrees, by means of which the carriage is drawn. (*c*) A fishing-rod. (*d*) A bean-pole or hop-pole. (*e*) A ship's mast.

2. A perch or rod, a measure of length containing 16½ feet or 5½ yards; also, a measure of surface, a square pole denoting 5½ × 5½ yards, or 30¼ square yards.

> In dyuers odur placis in this lande they mete grounde by *pollis,* gaddis, and roddis; som be of xviij foote, som of xx. fote, and som xxi. fote in lengith.
> *Arnold's Chron.*, p. 173.

3. A flatfish, *Pleuronectes* or *Glyptocephalus cynoglossus,* also called *pole-dab.* [Local, Eng.]—4. That part of the sperm-whale's lower jaw which holds the teeth. See *pan*[1], 12.—**Barber's pole.** See *barber.*—**Setting pole,** a pole with which a boat is pushed through the water.—**To set a pole.** See ★*set.*—**Under bare poles.** See *bare*[1].

pole[1] (pōl), *v.*; pret. and pp. *poled,* ppr. *poling.* [< *pole*[1], *n.*] I. *trans.* 1. To furnish with poles for support: as, to *pole* beans.—2. To bear or convey on poles.—3. To impel by means of a pole, as a boat; push forward by the use of poles.—4. In *copper-refining,* to stir with a pole.

II. *intrans.* To use a pole; push or impel a boat with a pole.

> From the beach we *poled* to the little pier, where sat the Bey in person to perform a final examination of our passports. *R. F. Burton*, El-Medinah, p. 120.

★**pole**[2] (pōl), *n.* [< ME. *pol* = D. *pool* = G. Sw. Dan. *pol,* < OF. *pol,* F. *pôle* = Sp. Pg. It. *polo,* < L. *polus,* < Gr. *πόλος,* a pivot, hinge, axis, pole, < *πέλειν, πέλεσθαι,* be in motion; prob. of like root with *κέλεσθαι,* urge on, *κέλλειν,* drive on, L. *-cellere* in *percellere,* urge on, impel, strike, beat down, etc.] 1. One of the two points in which the axis of the earth produced cuts the celestial sphere; the fixed point about which (on account of the revolution of the earth) the stars appear to revolve. These points are called the *poles of the world,* or the *celestial poles.*

> She shook her throne that shook the starry *pole.*
> *Pope*, Iliad, viii. 241.

2. Either of the two points on the earth's surface in which it is cut by the axis of rotation. That one which is on the left when one faces in the direction of the earth's motion is the *north pole,* the other the *south pole.*

3. In general, a point on a sphere equally distant from every part of the circumference of a great circle of the sphere. Every great circle has two such poles, which lie in a line passing through the center of the sphere and perpendicular to the plane of the great circle—that is, in an axis of the sphere. Thus, the zenith and nadir (on the celestial sphere) are the poles of the horizon. So the poles of the ecliptic are two points on the surface of the celestial sphere equally distant (90°) from every part of the ecliptic.

Hence—4. In any more or less spherical body, one of two opposite points of the surface in any way distinguished; or, when there is a marked equator, one of the two points most remote from it: as, in botany, the *poles* of certain spores or sporidia.—5. The star which is nearest the pole of the earth; the pole-star.—6. The firmament; the sky.

> The God that made both sky, air, earth, and heaven,
> Which they beheld, the moon's resplendent globe,
> And starry *pole.* *Milton*, P. L., iv. 724.

7. One of the points of a body at which its attractive or repulsive energy is concentrated, as the free ends of a magnet, one called the *north,* the other the *south pole,* which attract more strongly than any other part. See *magnet.*—8. In *math.*: (*a*) A point from which a pencil of lines radiates: as, the *pole*—that is, the origin—of polar coördinates. (*b*) A point to which a given line is polar. (*c*) A curve related to a line as a polar is to a point, except that tangential are substituted for point coördinates; the result of operating upon the equation of a curve with the symbol $(u'.\mathrm{d}/\mathrm{d}u + v'.\mathrm{d}/\mathrm{d}v + w'.\mathrm{d}/\mathrm{d}w)$, where u', v', w' are the coördinates of the line of which the resulting curve is pole relative to the primitive curve. See *polar, n.*—**Altitude or elevation of the pole.** See *altitude.*—**Analogous pole,** that end of a pyro-electric crystal, as tourmalin, at which positive electricity is developed with a rise, and negative electricity with a fall, in temperature. See *pyro-electricity.*—**Antilogous pole,** that end of a pyro-electric crystal, as tourmalin, at which negative electricity is developed with a rise, and positive with a fall, in temperature. See *pyro-electricity.*—**Austral, blue, boreal, chlorous pole.** See the adjectives.—**Consecutive poles, consequent poles.** See *mag-*

net.—**Galactic poles.** See *galactic.*—**Magnetic pole.** (*a*) One of the points on the earth's surface where the dipping-needle stands vertical. The term has also sometimes been improperly applied to the points of maximum magnetic intensity, of which there are two in each hemisphere, neither of them near the pole of dip. (*b*) In a magnetic body, either of the two regions where the lines of force enter or leave the body. For convenience these regions are sometimes assumed to be points. A line joining the poles is called the *magnetic axis*, and generally a magnet may be considered as if the magnetic forces were concentrated at the extremity of this line. When a magnetic body is freely suspended, the magnetic axis assumes a direction parallel with the lines of force of the magnetic field in which it is. On the surface of the earth this direction is in a vertical plane approximately north and south, and that end of the magnet which points to the north is generally called the *north pole* or the *north-seeking pole*. The fact that this pole is opposite (in character) to the north pole of the earth gives rise to some confusion in the nomenclature of the poles. Some physicists have used the epithets *marked* and *unmarked* to designate the north-seeking and south-seeking poles respectively. The words *austral* and *boreal* are also used. A magnet may have more than two poles, or points of maximum magnetic intensity, and in fact all parts of a magnet are in a state of polarity, the actual poles of the magnet being the result of all polarization.—**Multiple pole.** Same as *multipolar.*—**Pole of a glass,** in *optics*, the thickest part of a convex lens, or the thinnest part of a concave lens; the center of its surface. *Hutton.*—**Pole of a line** with reference to a conic, the point of intersection of the tangents to the conic having their points of contact at the intersections of the conic with the line.—**Pole of a plane** with reference to a conicoid, the vertex of the cone tangent to the conicoid on the plane.—**Pole of revolution.** When a globe or sphere revolves about one of its diameters as an axis, each extremity of such diameter is called a *pole of revolution.*—**Pole of verticity,** the earth's magnetic pole, at which a freely suspended magnetic needle assumes a vertical position.—**Poles of a voltaic pile or battery,** the plates at the extremities of a voltaic battery, or the wires which join them, the end which is chemically passive being called the *positive pole*, and that which is chemically active the *negative pole.* See *battery, cell, electrode.*—**Poles of maximum cold.** See *temperature.*—**Red pole,** the boreal pole.—**Strength of pole,** the force exerted between a magnetic pole and a unit pole at a unit distance.—**The marked pole of a magnet.** See *marked.*—**To depress the pole.** See *depress.*—**Unit pole,** a magnetic pole between which and another of equal strength, separated from it by a unit's distance, a unit's force is exerted.

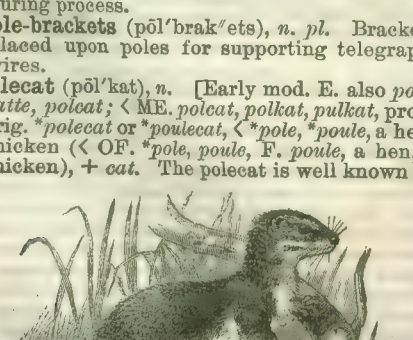
Pole[3] (pōl), *n.* [= G. *Pole* = D. *Pool*, a Pole (*Polen*, Poland); < Pol. *Polak*, a Pole (see *Polack*); cf. *Polsko*, Poland, *Polski*, Polish.] A native or an inhabitant of Poland, a former kingdom of Europe, divided, since the latter part of the eighteenth century, between Russia, Prussia, and Austria.

pole[4]†, *n.* An obsolete spelling of *pool*[1].

pole[5]†, *n.* and *v.* An obsolete spelling of *poll*[1].

poleax, pollax (pōl'aks), *n.* [Also *polleaxe;* commonly *poleax*, as if < *pole*[1] + *ax*[1], but prop. *pollax*, < ME. *pollax*, < MLG. *polexe*, a poleax, < *pol*, poll, head, + *exe* = E. *ax*[1]: see *poll*[1] and *ax*[1].] 1. Formerly, a weapon or tool consisting of an ax-head on a long handle, and often combined with a hook at the end, or a blade like a pick on the side opposite the blade of the ax; later, more loosely, a battle-ax.

> The Pentioners with ther *poleaxes* on each side of her Maiestie. *Booke of Precedence* (E. E. T. S., extra ser.), i. 22.



2. (*a*) A weapon used in the navy by boarders and also to cut away rigging, etc. It is a hatchet with a short handle at the end of which is a strong hook. (*b*) An ax for slaughtering cattle.

pole-bean (pōl'bēn), *n.* Any one of the twining varieties of the common garden bean, requiring the support of a pole. See *bean*[1], 2.

pole-burn (pōl'bėrn), *v. i.* To discolor and lose flavor by overheating, as tobacco when hung too closely on poles in the first stage of the curing process.

pole-brackets (pōl'brak″ets), *n. pl.* Brackets placed upon poles for supporting telegraph-wires.

polecat (pōl'kat), *n.* [Early mod. E. also *polecatte, polcat;* < ME. *polcat, polkat, pulkat*, prob. orig. **polecat* or **poulecat*, < **pole*, **poule*, a hen, chicken (< OF. **pole, poule*, F. *poule*, a hen, a chicken), + *cat.* The polecat is well known as a chicken-thief. The word **pole, poule*, a hen, chicken, is not elsewhere found in ME. (except as in the derivatives *poult, poultry, pullet, pullen*, etc.), and the first element of *polecat* has been variously identified with (*a*) *Pole*[3] or *Polish;* (*b*) OF. *pulent*, stinking; or (*c*) ME. *pol*, E. *pool*, in the assumed sense of 'hole' or 'burrow.'] 1. The fitchew or foulmart, *Putorius fœtidus* of Europe, of a dark-brown color, with a copious fine pelage much used in furriery and for making artists' brushes. See *fitch*[2].—2. One of several other quadrupeds, mostly of the family *Mustelidæ*, which have a strong offensive smell. Specifically—(*a*) Any American skunk, especially the common one, *Mephitis mephitica.* See *skunk.* (*b*) The African zoril, *Zorilla striata* or *Z. capensis.* (*c*) A kind of paradoxure.

Fitch or Polecat (*Putorius fœtidus*).

polecat-weed (pōl'kat-wēd), *n.* The skunk-cabbage, *Spathyema fœtida.*

pole-chain (pōl'chān), *n.* A chain on the front end of a carriage-pole. It is connected with the collar or the breast-chains of the harness. *E. H. Knight.*

pole-changer (pōl'chān″jėr), *n.* A device by means of which the direction of the current in an electric circuit may conveniently be reversed. Also called *pole-changing key* or *switch.*

pole-clipt† (pōl'klipt), *a.* Entwined or embraced by means of supporting poles: said of a vineyard. See *clip*[1].

> Thy *pole-clipt* vineyard. *Shak.*, Tempest, iv. 1. 68.

pole-crab (pōl'krab), *n.* A double loop attached to the metallic cap or pole-tip on the end of the pole of a vehicle. The loops receive the breast-straps of the harness. When pole-chains are used, hey are attached to rings added to the pole-crab.

pole-dab (pōl'dab), *n.* Same as *pole*[1], 3. [Local, Eng.]

poledavy† (pōl'dā-vi), *n.* [< F. *Pouldavid*, name of a place in Brittany, < Bret. *poull*, pool, + *David*, David.] A coarse linen; hence, any coarse ware.

> Your deligence, knaves, or I shall canvase your *poledavyes;* deafen not a gallant with your anon, anon, sir, to make him stop his eares at an over-reckoning. *The Bride*, sig. C. iii. (*Halliwell.*)

> You must be content with homely *Polldavie* Ware from me, for you must not expect from us Country-folks such Urbanities and quaint Invention that you, who are daily conversant with the Wits of the Court, and of the Inns of Court, abound withal. *Howell*, Letters, I. ii. 10.

pole-evil†, *n.* An obsolete form of *poll-evil.*

pole-hammer (pōl'ham″ėr), *n.* A martel-de-fer with a long handle. See *Lucerne hammer*, under *hammer*[1].

> In the fourteenth century the war hammer was in general use, and was often of considerable weight. The foot soldiers had it fixed on a long pole, whence the name *Pole-hammer*, given to it in England. *W. K. Sullivan*, Introd. to O'Curry's Anc. Irish, p. ccccxlix.

pole-head (pōl'hed), *n.* [For **pollhead* (?); < *poll*[1] + *head.* Cf. *tadpole.*] A tadpole. *Halliwell.* [Prov. Eng.]

pole-hook (pōl'hůk), *n.* 1. A hook on the end of a carriage-tongue.—2. Same as *boat-hook.* *E. H. Knight.*

pole-horse (pōl'hôrs), *n.* A shaft-horse as distinguished from a leader; a wheeler.

pole-lathe (pōl'lāŦH), *n.* Same as *center-lathe*, 2.

poleless (pōl'les), *a.* [< *pole*[1] + *-less.*] Without a pole.

> Horses that draw a *pole-lesse* chariot. *Sir R. Stapleton*, tr. of Juvenal, x. 155.

polemarch (pol'e-märk), *n.* [= F. *polémarque* = Pg. *polemarco*, < Gr. *πολέμαρχος*, one who leads a war, polemarch, < *πόλεμος*, war, + *ἄρχειν*, be first.] A title of several officials in ancient Greek states. At Athens the polemarch was the third archon, who was as late as Marathon the titular military commander-in-chief, and was later a civil magistrate having under his especial care all strangers and temporary sojourners in the city, and all children of parents who had lost their lives in the service of their country.

pole-mast (pōl'mȧst), *n.* *Naut.*, a mast composed of a single piece or tree, in contradistinction to one built up of several pieces.

polemic (pō-lem'ik), *a.* and *n.* [= F. *polémique* = Sp. *polémico* = Pg. It. *polemico*, polemic (F. *polémiques* = Sp. *polémica* = Pg. It. *polemica*, n., polemics), < Gr. *πολεμικός*, warlike, < *πόλεμος*, war.] **I.** *a.* Of or pertaining to controversy; controversial; disputative: as, a *polemic* essay or treatise; *polemic* divinity or theology; *polemic* writers.

> The nullity of this distinction has been solidly shewn by most of our *polemick* writers of the Protestant church. *South*, Sermons.

II. *n.* 1. A disputant; one who carries on a controversy; a controversialist; one who writes in support of an opinion or a system in opposition to another.

> Each staunch *polemic*, stubborn as a rock. *Pope*, Dunciad, iv. 195.

2. A controversy; a controversial argument.

> It is well that, in our *polemic* against metaphysics, there should be no room left for ambiguity or misconception. *J. Fiske*, Cosmic Philos., I. 125.

> Prof. Huxley, in his *polemic* against Herbert Spencer, states quite rightly that the most perfect zoölogical beings present that subordination pushed to the extreme degree. *Contemporary Rev.*, L. 433.

polemical (pō-lem'i-kạl), *a.* [< *polemic* + *-al.*] Of or pertaining to polemics or controversy; controversial; polemic: as, *polemical* logic.

> The former [error in doctrine] I must leave to the conviction of those *polemicall* discourses which have been so learnedly written of the several points at difference. *Bp. Hall*, Christ. Moderation, ii. § 1.

polemically (pō-lem'i-kạl-i), *adv.* In a polemical manner; controversially; disputatively; in polemic discourse or argument; in the manner of polemics.

polemicist (pō-lem'i-sist), *n.* [< *polemic* + *-ist.*] One given to controversy; a polemic. [Rare.]

polemics (pō-lem'iks), *n.* [Pl. of *polemic:* see *-ics.*] The art or practice of disputation; controversy; specifically, that branch of theology which is concerned with the history or conduct of ecclesiastical controversy: the word more particularly denotes offensive as distinguished from defensive controversy: opposed to *irenics.*

polemist (pol'e-mist), *n.* [= F. *polémiste;* < Gr. *πολεμιστής*, a combatant, < *πολεμίζειν*, fight, < *πόλεμος*, war.] A controversialist; a polemic. [Rare.]

> Other political *polemists* of his kind. *The Century*, XXXV. 201.

Polemoniaceæ (pol-e-mō-ni-ā'sē-ē), *n. pl.* [NL. (Jussieu, 1804), < *Polemonium* + *-aceæ.*] A family of sympetalous plants, the phlox family, type of the order *Polemoniales.* It is characterized by the five stamens inserted on the corolla-tube alternate to its five equal and convolute lobes, the three-cleft thread-like style, the superior three-celled ovary, with two or more ovules in each cell, and a capsular fruit. There are about 200 species, belonging to 9 genera, of which *Polemonium, Phlox, Gilia, Rosenbergia*, and *Cantua* yield many handsome species in cultivation. They are chiefly natives of western North America, with others in the Andes, and a few in Europe and temperate parts of Asia, mostly herbs, of mild and innocent properties, with ornamental and bright-colored flowers. See cuts under *Cobæa* and *Jacob's-ladder.*

polemoniaceous (pol-e-mō-ni-ā'shius), *a.* Of or pertaining to the *Polemoniaceæ.*

Polemoniales (pol-e-mō-ni-ā'lēz), *n. pl.* [NL. (Bentham and Hooker, 1876), < *Polemonium*, q. v.] An order of dicotyledonous sympetalous plants, characterized by a single compound ovary and stamens mostly adnate to the middle of the corolla-tube or above. It includes 20 families, of which the *Polemoniaceæ* constitute the type, and among the most important of which are the *Convolvulaceæ, Boraginaceæ, Menthaceæ, Solanaceæ, Scrophulariaceæ*, and *Acanthaceæ.*

Polemonium (pol-e-mō'ni-um), *n.* [NL. (Tournefort, 1700) (cf. L. *polemonia*, valerian), < Gr. *πολεμώνιον*, valerian (?), said by Pliny to be from *πόλεμος*, war, because the cause of war between two kings; by others, to be so named from the philosopher *Polemon* of Athens, or from King *Polemon* of Pontus.] A genus of plants, the type of the family *Polemoniaceæ*, characterized by its declined stamens, pilose filament-bases, bractless calyx, deeply three-valved capsule, and from two to twelve ovules in each cell. There are about 15 species, natives of Europe, Asia, North America, Mexico, and Chili. They are delicate plants with pinnate leaves and terminal cymes of ornamental blue, violet, or white flowers, commonly broadly bell shaped. *P. cæruleum* is known as *Jacob's-ladder*, also *Greek valerian*, and sometimes in England as *makebate* or *charity. P. reptans* is locally known as *abscess-root*, and improperly as *forget-me-not.*

polemoscope (pol'e-mō-skōp), *n.* [= F. *polémoscope* = Sp. Pg. *polemoscopio*, < Gr. *πόλεμος*, war, + *σκοπεῖν*, view.] A perspective glass fitted with a mirror set at an angle, designed for viewing objects that do not lie directly before the eye: so named from its possible use in warfare to observe the motions of the enemy from behind defenses. Opera-glasses also are sometimes constructed in this way, to admit of seeing persons obliquely without apparently directing the glass at them.

polemy† (pol'e-mi), *n.* [< Gr. *πόλεμος*, war.] War; warfare; hence, contention; resistance. *Sir E. Dering.*

pole-net (pōl'net), *n.* A net attached to a pole for fishing; a shrimping-net; a poke-net.

polenta (pō-len'tạ), *n.* [= F. *polente, polenta* = Sp. Pg. It. *polenta*, "a meate vsed in Italie,

made of barlie or chesnut flowre soked in water, and then fride in oyle or butter" (Florio, 1598), "barley-grotes, a meate much used in Italie" (Florio, 1611), now generally applied to porridge of maize, < L. *polenta*, *polentum*, peeled barley; cf. Gr. *πάλη*, the finest meal.] 1. In Italy: (*a*) A porridge made of Indian meal (maize-meal), the principal food of the poorer people throughout large sections of the country. The meal is yellow and not very fine, with a sharp granulated character. The porridge is made very stiff, and usually poured out while hot into a flat pan about half an inch deep. It is cut with a string when partly cool.

A kind of meal called *polenta* made of Indian corn, which is very nourishing and agreeable. *Smollett*, Travels, xx.

(*b*) A porridge made of chestnut-meal, much used in autumn.—2. In France, a porridge made of barley-meal, not common except in the south.

pole-pad (pōl'pad), *n.* In *artillery*, a stuffed leather pad fixed on the end of the pole of a field-carriage to preserve the horses from injury.

pole-piece (pōl'pēs), *n.* A mass of iron forming the end of an electromagnet, by means of which the lines of magnetic force are concentrated and directed. In dynamos the pole-pieces are shaped so as to inclose the surface in which the armature revolves.

pole-plate (pōl'plāt), *n.* In *building*, a small wall-plate resting on the ends of the tie-beams of a roof, and supporting the lower ends of the common rafters.

pole-prop (pōl'prop), *n.* In *artillery*, a short rod or bar fastened under the pole of a gun-carriage, to support it when the horses are unhitched.

pole-rack (pōl'rak), *n.* In *tanning*, *dyeing*, and other industries, a rack which supports the poles on which articles are suspended or laid for drying, draining, etc.

pole-rush (pōl'rush), *n.* The bulrush, *Scirpus lacustris*. Also *pool-rush*. [Prov. Eng.]

pole-sling (pōl'sling), *n.* A pole, about twenty-five feet long, from which are suspended a leather seat and a board for the feet, carried by two or more bearers: used for traveling in Dahomey. *N. A. Rev.*, CXLV. 361.

pole-staff (pōl'staf), *n.* The pole of a net.

pole-star (pōl'stär), *n.* 1. Polaris, a star of the second magnitude, situated near the north pole of the heavens. It served in former times, and still serves among primitive peoples, as a guide in navigation. It is now about 1¼° from the pole, very nearly in a line with the two stars in the Dipper (*α* and *β*) which form the further edge of the bowl. About 5,000 years ago the pole-star was *α* Draconis, and in about 12,000 it will be *α* Lyræ.

It is wel knowen (moste noble prince) that the starre which we caule the *pole starre*, or northe starre (cauled of the Italians Tramontana), is not the very poynte of the pole Artyke vppon the whiche the axes or extremities of heauens are turned abowte.

R. Eden, tr. of Peter Martyr (First Books on America, [ed. Arber, p. 90).

2. Hence, that which serves as a guide or director; a lodestar.—3. In *biol.*, a polar star; one of the two stellate figures which may surround the poles of the fusiform nucleus-spindle in the process of karyokinesis.

pole-strap (pōl'strap), *n.* A heavy strap for connecting a carriage-pole with the collar of a horse; a pole-piece. See cut under *harness*.

poletet, *n.* A Middle English form of *pullet*.

pole-tip (pōl'tip), *n.* A cylindrical cap fixed on the front end of the pole of a vehicle.

pole-torpedo (pōl'tôr-pē″dō), *n.* A torpedo projected on the end of a pole, and operated from a boat or vessel: usually called *spar-torpedo*.

pole-vault (pōl'vâlt), *n.* A vault, generally over a horizontal bar, performed with the aid of a pole.

pole-vaulting (pōl'vâlt″ing), *n.* The act or practice of vaulting with the aid of a pole.

pol-evil†, *n.* An obsolete spelling of *poll-evil*.

poleward, polewards (pōl'wärd, -wärdz), *adv.* [< *pole*² + *-ward*, *-wards*.] Toward the pole (either north or south).

The waters at the equator, and near the equator, would produce steam of greater elasticity, rarity, and temperature than that which occupies the regions further *polewards*. *Whewell*.

polewig (pōl'wig), *n.* A fish, the spotted goby, *Gobius minutus*, which inhabits British and neighboring shores. It is of a transparent golden-gray color, with a multitude of tiny black dots upon the back, and generally marked with dark blotches upon the sides and a black spot on the dorsal fin. Also called *pollybait*. [Prov. Eng.]

poley¹†, *n.* An obsolete form of *poly*.

poley² (pō'li), *a.* [For **polly*, < *poll*¹ + *-y*¹.] Without horns; polled. [Eng.]

If it had been any other beast which knocked me down but that *poley* heifer, I should have been hurt.

H. Kingsley, Geoffry Hamlyn, xxix. (*Davies*.)

poleynt, *n.* See *poulaine*.

polhode (pol'hōd), *n.* [Irreg. formed (by Poinsot, in 1852) < Gr. *πόλος*, axis, pole, + *ὁδός*, way, path.] A non-plane curve, the locus of the point of contact with an ellipsoid of a plane tangent at once to that surface and to a concentric sphere.—**Associate of the polhode**, the locus of the point of contact of a plane with an ellipsoid rolling upon it and having a fixed center; herpolhode.

Polian (pō'li-an), *a.* [< *Poli* (see def.) + *-an*.] Described by or named from the Neapolitan naturalist Poli (1746–1825).—**Polian vesicles**, cæcal diverticula of the circular vessel of the ambulacral system of *Echinodermata*. They are of the nature of arrested or abortive madreporic canals which have blind ends, and therefore do not place the cavity of the ambulacral system in communication with the perivisceral cavity of the animal. See cuts under *Holothurioidea*, *Echinoidea*, and *Synapta*.

polianite (pol'i-an-īt), *n.* [Named in allusion to its gray color, < Gr. *πολιός*, gray, + *-an-* + *-ite*².] Anhydrous manganese dioxid (MnO_2), a mineral of a light steel-gray color and hardness nearly equal to that of quartz. It crystallizes in tetragonal forms, and is isomorphous with rutile (TiO_2), cassiterite (SnO_2), and zircon (ZrO_2SiO_2). It has often been confounded with the commoner mineral pyrolusite.

polianthea (pol-i-an'thē-ạ), *n.* [NL., < Gr. *πολύς*, many, + *ἄνθος*, flower.] A commonplace-book containing many flowers of eloquence, etc.

Your reverence, to eke out your sermonings, shall need repair to postils or *polianthea*s.

Milton, On Def. of Humb. Remonst., Postscript.

Polianthes (pol-i-an'thēz), *n.* [Also *Polyanthes*; NL. (Linnæus, 1737), from the pure-white flowers; = Sp. *poliantes*, < Gr. *πολιός*, white, + *ἄνθος*, flower.] A genus of ornamental plants of the family *Amaryllidaceæ* and tribe *Agaveæ*, characterized by the long undivided raceme bearing twin flowers with a prominent and curved tube dilated upward into thick, spreading lobes, by the conical ovary within the base of the perianth, and by the short, erect, tuberous rootstock. There are 12 species, natives of Mexico and Central America. They produce a tall unbranched wand-like stem, with a tuft of linear leaves at its base, and many showy fragrant white flowers clothing the upper portion. *P. tuberosa* is the tuberose.

police (pō-lēs'), *n.* [< F. *police* = Sp. *policía* = Pg. *policia* = It. *polizia*, *pulizia* = D. *politie*, *politie* = MLG. *policie*, *polici*, *pollicie* = G. *polizei*, *policei* = Sw. Dan. *politi*, civil government, police; < L. *politia*, the state, < Gr. *πολιτεία*, citizenship, government, the state, < *πολίτης*, a citizen, < *πόλις*, a city. Cf. *policy*¹, *polity*.] 1. Public order; the regulation of a country or district with reference to the maintenance of order; more specifically, the power of each state, when exercised (either directly by its legislature or through its municipalities) for the suppression or regulation of whatever is injurious to the peace, health, morality, general intelligence, and thrift of the community, and its internal safety. In its most common acceptation, *the police* signifies the administration of the municipal laws and regulations of a city or incorporated town or borough by a corps of administrative or executive officers, with the necessary magistrates for the immediate use of force in compelling obedience and punishing violation of the laws, as distinguished from judicial remedies by action, etc. The primary object of the police system is the prevention of crime and the pursuit of offenders; but it is also subservient to other purposes, such as the suppression of mendicancy, the preservation of order, the removal of obstructions and nuisances, and the enforcing of those local and general laws which relate to the public health, order, safety, and comfort.

But here are no idle young Fellows and Wenches begging about the Streets, as with you in London, to the Disgrace of all Order, and, as the French call it, *Police*.

Burt, Letters from the North of Scotland (1720), quoted in [N. and Q., 7th ser., IV. 346.

Rome was the centre of a high *police*, which radiated to Parthia eastwards, to Britain westwards, but not of a high civilization. *De Quincey*, Philos. of Roman Hist.

Where Church and State are habitually associated, it is natural that minds even of a high order should unconsciously come to regard religion as only a subtler mode of *police*. *Lowell*, Among my Books, 1st ser., p. 77.

2. An organized civil force for maintaining order, preventing and detecting crime, and enforcing the laws; the body of men by whom the municipal laws and regulations of a city, incorporated town or borough, or rural district are enforced. A police force may be either open or secret. An open police is a body of officers dressed in uniform, and known to everybody; a secret police consists of officers whom it may be difficult or impossible to distinguish from ordinary citizens, the dress and manners of whom they may think it expedient to assume, in order that they may the more easily detect crimes, or prevent the commission of such as require any previous combination or arrangement. See *detective*, *constable*.

Time out of mind the military department has had a name; so has that of justice; the power which occupies itself in preventing mischief, not till lately, and that but a loose one, the *police*.

Bentham, Introd. to Morals and Legislation, xvi. 17, note 2.

3. In the United States army, the act or process of policing (see *police*, *v.*, 2): a kind of fatigue duty: as, to go on *police*; to do *police*.—**Commissioners of police.** See *commissioner*.—**Military police.** (*a*) An organized body employed within an army to maintain civil order, as distinct from military discipline. (*b*) A civil police having a military organization. Such are the French gendarmerie, the sbirri of Italy, and the Irish constabulary.—**Mounted police**, a body of police who serve on horseback.—**Police board**, in several of the United States, a board constituted by the justices of the county for the control of county police, public buildings, roads, bridges, ferries, county funds, lunatics, paupers, vagrants, etc. *Murfree*, Justices' Practice.—**Police burgh.** See *burgh*.—**Police captain**, in some of the larger cities of the United States, as in New York, a subordinate officer in the police force having general charge of the members of the force serving in his precinct, and special powers of search and entry for purposes of search.—**Police commissioner.** (*a*) See *commissioner*. (*b*) In Scotland, one of a body elected by the ratepayers to manage police affairs in burghs.—**Police constable**, a member of a police force; a policeman. Abbreviated *P. C.*—**Police court**, a court for the trial of offenders brought up on charges preferred by the police.—**Police inspector**, a superintendent or superior officer of police, or of a subordinate department therein.—**Police jury**, the designation in Louisiana of the local authority in each parish (corresponding nearly to the board of supervisors of each county in many other States), invested with the exercise of ordinary police powers within the limits of the parish, such as prescribing regulations for ways, fences, cattle, taverns, drains, quarantine, support of the poor, etc.—**Police magistrate**, a judge who presides at a police court.—**Police office.** Same as *police station*.—**Police officer**, a policeman; a police constable.—**Police power**, in *constitutional law*, in a comprehensive sense, the whole system of internal regulation of a state, by which the state seeks not only to preserve the public order and to prevent offenses against the state, but also to establish for the intercourse of citizens with citizens those rules of good manners and good neighborhood which are calculated to prevent a conflict of rights and to insure to each the uninterrupted enjoyment of his own so far as is reasonably consistent with a like enjoyment of rights by others. (*Cooley*.) Definitions of the *police power* must be taken subject to the condition that the State cannot, in its exercise, for any purpose whatever, encroach upon the powers of the general government, or rights granted or secured by the supreme law of the land. (*Supreme Court of U. S.*) The question as to what are the proper limits of the police power in the United States is a judicial one, depending in each case upon the relation of the act in question to the situation of the people and the condition of the federal legislation. In a long and fluctuating line of decisions it has been held to include quarantine laws, fire and building laws, laws for draining marshes, licensing slaughter-houses, excluding paupers and immigrants, caring for the poor, regulating highways, bridges, carriers, peddlers, etc., within the limits of the State (so far as not interfering with interstate commerce or an equality of freedom), laws prohibiting and abating nuisances, prohibiting lotteries, the sale of adulterated and simulated food-products, and the manufacture and sale of intoxicating liquors, but not, however, the sale in the original package of articles of interstate commerce, nor discriminating against sales by persons from without the State as compared with those within it.—**Police rate**, a tax levied for the purposes of the police. [Brit.]—**Police sergeant**, a petty officer of police.—**Police station**, the station or headquarters of the police force in a municipality or district thereof, usually, if not always, containing a lock-up for the temporary detention of accused or suspected persons, and accommodations for officers and magistrate. Also *police office*.—**Prefect of police.** See *prefect*.

police (pō-lēs'), *v. t.*; pret. and pp. *policed*, ppr. *policing*. [< *police*, *n.*] 1. To watch, guard, or maintain order in; protect or control by means of a body of policemen: as, to *police* a district; to *police* the inland waters of a country.

Princes . . . are as it were inforced to . . . entend to the right *pollicing* of their states, and haue not one houre to bestow vpon any other ciuill or delectable Art.

Puttenham, Arte of Eng. Poesie, p. 36.

From the wilds she came
To *policed* cities and protected plains.

Thomson, Liberty, iv.

2. To clean up; clear out; put in order: as, to *police* the parade-ground. [U. S.]

policeman (pō-lēs'man), *n.*; pl. *policemen* (-men). 1. One of the ordinary police, whose duty it usually is to patrol a certain beat for a fixed period, for the protection of property and for the arrest of offenders, and to see that the peace is kept.—2. In *entom.*, a soldier-ant. *Pascoe*.—3. In *coal-mining*, a wood or iron guard around or covering the mouth of a pit, or placed at mid-workings.—4. A kind of swab, used for cleaning vials, etc., made by slipping a piece of rubber tubing over the end of a glass rod.

police-nippers (pō-lēs'nip″ėrz), *n. pl.* Handcuffs or foot-shackles. Compare *nipper*¹, 5 (*j*). [Slang.]

policial (pō-lish'al), *a.* [= Pg. *policial*; < *police* + *-al*.] Of or pertaining to the police. [Rare.]

It thus happened that he found himself the cynosure of the *policial* eyes. *Poe*, Tales, I. 215.

policiant†, *n.* [Early mod. E., written *politien;* < OF. *policien*, a public man, a statesman, < *policie*, *police*, government, policy: see *police*, *policy*[1].] An officer of state. *Puttenham*, Arte of Eng. Poesie, p. 122.

policlinic (pol-i-klin'ik), *n.* [= G. *poliklinik;* as Gr. *πόλις*, city, + E. *clinic*. Sometimes written *polyclinic* (= F. *polyclinique*), as if 'a clinic for many'; as Gr. *πολύς*, many, + E. *clinic*.] A ★general city hospital or dispensary.

policy[1] (pol'i-si), *n.* [Early mod. E. also *policie*, *pollicie;* < ME. *policie*, < OF. *policie*, < L. *politia*, < Gr. *πολιτεία*, polity: see *police*, *polity*.]

1†. Polity; administration; public business.

In alle governaunce and *policye*.
Chaucer, Pardoner's Tale, l. 138.

2. Object or course of conduct, or the principle or body of principles to be observed in conduct; specifically, the system of measures or the line of conduct which a ruler, minister, government, or party adopts and pursues as best for the interests of the country, as regards its foreign or its domestic affairs: as, a spirited foreign *policy;* the commercial *policy* of the United States; a *policy* of peace; public *policy*.

As he is a Spirit, vnseen he sees
The plots of Princes, and their *Policies*.
Sylvester, tr. of Du Bartas's Weeks, i. 1.

This was the Serpents *policie* at first, Balaams *policie* after, Babels *policy* now. *Purchas*, Pilgrimage, p. 38.

The legislation and *policy* of Mary were directed to uproot everything that Edward VI. had originated.
Stubbs, Medieval and Modern Hist., p. 322.

3. Prudence or wisdom in action, whether public or private; especially, worldly wisdom: as, honesty is the best *policy*.

That maner of iniurie whiche is done with fraude and deceyte is at this present tyme so communely practised that, if it be but a little, it is called *policie*.
Sir T. Elyot, The Governour, iii. 4.

In these days 'tis counted *pollicie*
To vse dissimulation.
Times' Whistle (E. E. T. S.), p. 94.

It is my *Policy* at this time to thank you most heartily for your late copious Letter, to draw on a second.
Howell, Letters, I. ii. 9.

The politic nature of vice must be opposed by *policy*.
Sir T. Browne, Christ. Mor., i. 18.

4. In Scotland, the pleasure-grounds around a nobleman's or gentleman's country house. [In this use its primary sense is 'the place or tract within which one has authority to administer affairs.']

My father is just as fond of his *policy* and his gardens; but it 's too little for a *policy*, and it 's more than a garden.
Mrs. Oliphant, Joyce, xvii.

Policy of pourboire. See *pourboire*.—**Policy of the law.** See *law*[1].—**Syn. 2** and **3.** *Policy*, *Polity*, address, shrewdness. *Polity* is now confined to the constitution or structure of a government. It may be used of civil government, but is more often used of ecclesiastical government: as, Hooker's "Laws of Ecclesiastical *Polity*": Congregational or Presbyterian *polity*. *Policy* has the sense of the management of public affairs: as, a certain bequest is pronounced invalid by the courts as being contrary to public *policy*. *Polity* has neither a narrower nor a lower sense; *policy* has both. The narrower sense of *policy* is system of management, especially wise management; the lower sense is cunning or worldly wisdom.

The Pope's *policy* was to have two Italian interests which could be set against one another, at the pleasure of the Roman See, which thus secured its own safety and influence. *Woolsey*, Introd. to Inter. Law, § 44.

Protestantism may be described as that kind of religious *polity* which is based upon the conception of individual responsibility for opinion. *J. Fiske*, Evolutionist, p. 266.

Public policy. See *public*.

policy[1]† (pol'i-si), *v. t.* [= Pg. *policiar;* < *policy*[1], *n.*] To reduce to order; regulate by laws; police.

It is a just cause of war for another nation, that is civil or *policied* to subdue them. *Bacon*, Holy War.

Towards the *policying* and perpetuating of this your new Republic, there must be some special Rules for regulating of Marriage. *Howell*, Letters, iv. 7.

policy[2] (pol'i-si), *n.*; pl. *policies* (-siz). [An alteration, conformed to what would reg. be **police* = F. *police*, < Pr. *polissa*, **polisa* (< It. ?), also *pódiza* = Sp. *póliza* = Pg. *apólice* = Cat. *polissa* = It. *póliza*, *pólisa*, now *polizza*, a written receipt, a note, bill, schedule, policy, etc., < ML. *apodixa*, *apodissa*, a receipt, a voucher, popular form of *apodixia*, a proof, for L. *apodixis*, < Gr. *ἀπόδειξις*, a showing, a proof: see *apodixis*, *apodictic*.] **1.** A written contract by which a person, company, or party engages to pay a certain sum on certain contingencies, as in the case of fire or shipwreck, in the event of death, etc., or on the condition of receiving a fixed sum or percentage on the amount of the risk, or certain periodical payments. See *insurance*.

A *policy* of insurance is a contract between A. and B. that, upon A.'s paying a premium equivalent to the hazard run, B. will indemnify or insure him against a particular event. *Blackstone*, Com., II. xxx.

2. A ticket or warrant for money in the public funds. [Eng.]—**3.** A form of gambling in which numbers from 1 to 78 are placed in a wheel and thirteen of these numbers are drawn out. The exact order in which they are drawn is recorded. Bets are made upon single numbers coming out, or upon the order or position they will occupy in the line, or upon combinations of numbers and their order, called gigs and saddles. The odds paid are in proportion to the improbability. The famous negro gig, 4–11–44, means that those three numbers will come in that order among those drawn. [U. S.]—**Endowment policy.** See *endowment*.—**Open policy,** a policy of insurance in which the value of the ship or goods insured is not fixed, but left to be ascertained in case of loss; or in which the subject of insurance is not limited, so that other things may be added from time to time.—**Time policy,** a policy of insurance in which the limits of the risk as regards time are clearly specified.—**Valued policy.** See the quotation.

A *valued policy* is one in which a value has been set upon the property or interest insured, and inserted in the policy, the value thus agreed upon being in the nature of liquidated damages. *Angell*, on Ins., § 5.

Wagering policy, or **wager policy,** a pretended insurance founded on an ideal risk, where the insured has no interest in the thing insured, and can therefore sustain no loss by the happening of any of the misfortunes insured against. Such insurances were often expressed by the words "interest or no interest." Wager policies, as above defined, were prohibited by statute 19 Geo. III., c. 37, and are generally invalid in the United States.

policy-book (pol'i-si-bůk), *n.* In an insurance-office, a book in which the policies issued are entered or recorded.

policy-holder (pol'i-si-hōl″dėr), *n.* One who holds a policy or contract of insurance.

policy-shop (pol'i-si-shop), *n.* A place where the slips used in the game of policy may be purchased, and the players make their bets and get the list of the numbers drawn each day.

policy-slip (pol'i-si-slip), *n.* The ticket given on a stake of money at a policy-shop. [U. S.]

poliencephalitis (pol″i-en-sef-ą-lī'tis), *n.* [NL., < Gr. *πολιός*, gray, + *ἐγκέφαλος*, the brain, + *-itis*.] Inflammation of the gray matter of the brain: applied to inflammation of the nuclei of origin of cranial nerves, and also to inflammation of the cortex. Also *polioëncephalitis*.—**Poliencephalitis inferior.** Same as *progressive bulbar paralysis*. See *paralysis*.—**Poliencephalitis superior.** Same as *ophthalmoplegia progressiva*. See *ophthalmoplegia*.

poligar (pol'i-gär), *n.* [Also *polligar*, *polygar*, etc.; < Canarese *pālegāra*, Telugu *palegādu*, Marathi *pālegār*, Tamil *pālaiyakāran*, a petty chieftain.] Originally, a subordinate feudal chief, generally of predatory habits, occupying tracts more or less wild in the presidency of Madras, India, or a follower of such a chieftain; now, nearly the same as *zemindar*. *Yule and* ★*Burnell*.

poling (pō'ling), *n.* [Verbal n. of *pole*[1], *v.*] **1.** The act of using a pole for any purpose.—**2.** A process used in toughening copper. It consists in plunging a long pole of green wood (birch is preferred) into the fused metal on the floor of the refining furnace. This process reduces the oxid which the refined metal still holds, and brings the copper to what is called "tough pitch," or to the highest attainable degree of malleability. A somewhat similar process, known by the same name, is employed in the refining of tin.

3. In *hort.*, the operation of scattering worm-casts on garden-walks with poles.—**4.** The boards (collectively) used to line the inside of a tunnel during its construction, to prevent the falling of the earth or other loose material.—**5.** Cramming for examination; hard study. [College slang, U. S.]

polioëncephalitis (pol″i-ō-en-sef-ą-lī'tis), *n.* Same as *poliencephalitis*.

poliomyelopathy (pol″i-ō-mī-e-lop'ą-thi), *n.* [NL., < Gr. *πολιός*, gray, + *μυελός*, marrow, + *-παθία*, < *παθεῖν*, 2d aor. of *πάσχειν*, suffer: see *pathos*.] Disease of the gray matter of the spinal cord.

poliomyelitis (pol″i-ō-mī-e-lī'tis), *n.* [NL., < Gr. *πολιός*, gray, + *μυελός*, marrow, + *-itis*.] Inflammation of the gray matter of the spinal cord.—**Anterior poliomyelitis,** inflammation of the anterior horns of the gray matter of the spinal cord. In children called *infantile paralysis*.

Polioptila (pol-i-op'ti-lą), *n.* [NL. Addison, Spectator, No. 215.

(*b*) In *bookbinding*, a steel tool of rounded form, used for rubbing and polishing leather on book-covers.

polishing-bed (pol'ish-ing-bed), *n.* A machine for smoothing and polishing the surface of stone by the attrition of rubbers. These, for plane surfaces, are wooden blocks covered with felt, and are charged with emery in the first stages of the operation and with putty-powder for finishing. Rubbers for moldings are formed of old bagging cut into strips, folded, and nailed to blocks in such a way as to present edges or folds of the cloth to enter into the hollows of the moldings.

polishing-cask (pol'ish-ing-kȧsk), *n.* A tumbling- or rolling-barrel in which light articles of metal are placed with some polishing-powder, and cleaned and burnished by attrition against one another. A similar apparatus is used for polishing grained gunpowder.

polishing-disk (pol'ish-ing-disk), *n.* In *dentistry*, one of a number of small instruments of different shapes and sizes for polishing the surfaces of teeth, dentures, or fillings; a small polishing-wheel. They are rotated by means of a drill-stock, and used with a fine polishing-powder. Disks of sandpaper or emery-paper are also used.

polishing-hammer (pol'ish-ing-ham″ėr), *n.* A hammer with a polished face, for the fine dressing of metal plates. Compare *planishing-hammer*.

Laundry Polishing-iron. *a*, polishing-iron; *b*, polishing-surface.

polishing-iron (pol'ish-ing-ī″ėrn), *n.* 1. A burnishing-tool for polishing the covers of books.—2. A laundry-iron for polishing shirt-fronts, collars, cuffs, and other starched pieces. It sometimes has a convex face.

polishing-jack (pol'ish-ing-jak), *n.* A polishing-machine armed with a lignum-vitæ slicker, for polishing leather when considerable pressure is required. *E. H. Knight.*

polishing-machine (pol'ish-ing-ma-shēn″), *n.* A machine which operates a rubbing-surface for bringing to a polish the surfaces of materials or articles to which a polish is desired to be given, as in polishing metals, stone, glass, wood, horn, or articles made from these or other materials. The rubbing may be reciprocatory or rotary; or it may be irregular, as where small articles are polished by the tumbling process, in a rotating cylinder containing abrasive or smoothing substances. Specifically—(*a*) A machine for grinding and polishing plate-glass. In one form of glass-polishing machine, the plate is supported on a bed which has a slow reciprocating motion, and the polishing is effected by rubbers carried in a frame moved by a reciprocating arm. The rubbing-surfaces are of felt. Moist sand and afterward different grades of emery are used for grinding. The polishing-powder is Venetian pink, and is used with water. The final polish is given by hand with tripoli, crocus, or dry putty-powder. (*b*) In *stone-working*, a polishing-bed. (*c*) In *agri.* and *milling*, a machine for removing by trituration the inner cuticle of rice or barley; a whitening-machine. (*d*) In *cotton-manuf.*, a machine for smoothing or burnishing cotton threads by brushing after the sizing. (*e*) In *wood-working*, a machine for smoothing wood surfaces, employing an emery-wheel, or a wheel armed with sand-paper or emery-paper.

polishing-mill (pol'ish-ing-mil), *n.* A lap of metal (lead, iron, or copper), leather, list, or wood used by lapidaries in polishing gems.

Thus we have the slitting-mill, the roughing-mill, the smoothing-mill, and the *polishing-mill*, all generally of metal.
Byrne, Artisan's Handbook, p. 197.

polishing-paste (pol'ish-ing-pāst), *n.* Polish of any kind made in the form of a paste.

polishing-powder (pol'ish-ing-pou″dėr), *n.* 1. Any pulverized material used to impart a smooth surface by abrasive or wearing action, as corundum, emery, Venetian pink, crocus, tripoli, putty-powder, or oxid of tin for glass-polishing; whiting for cleaning and polishing mirrors and window-glass; corundum, emery, and the dust of diamonds, sapphires, and rubies for lapidaries' work; corundum, emery, pumice-stone, rottenstone, chalk, rouge, and whiting for metals; and pumice-stone for wood. Powders which, like plumbago and its various compounds, adhere to other surfaces to form a superimposed polished surface are generally called *polishes*, as stove-polish.

Specifically—2. Same as *plate-powder*.

polishings (pol'ish-ingz), *n. pl.* The fine particles removed from a surface by polishing; particularly, the dust produced in polishing articles made from precious metals, which is saved, and reduced again to concrete form; also, particularly, the dust produced in cutting hard precious stones, which is saved, and used for arming tools in lapidary work.

polishing-slate (pol'ish-ing-slāt), *n.* 1. A slate, usually gray or yellow, composed of microscopic infusoria, found in the coal-measures of Bohemia and in Auvergne in France, and used for polishing glass, marble, and metals.—2. A kind of whetstone used for sharpening or polishing the edges of tools after grinding on a revolving grindstone.

polishing-snake (pol'ish-ing-snāk), *n.* A kind of serpentine quarried near the river Ayr in Scotland, and formerly used for polishing the surfaces of lithographic stones.

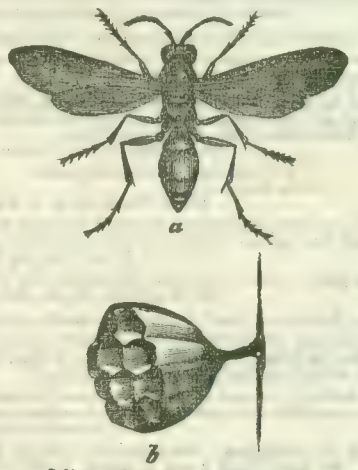
polishing-stone (pol'ish-ing-stōn), *n.* Same as *polishing-slate*.—**Blue polishing-stone**, a dark slate of uniform density, used by jewelers, clock-makers, silversmiths, etc.—**Gray polishing-stone**, a slate similar in character to the blue, but paler and of coarser texture. See *honestone* and *hone*[1].

polishing-tin (pol'ish-ing-tin), *n.* A thin plate of tinned iron, usually the full size of the leaf, placed between the cover and first leaf and between the cover and last leaf of a book, to prevent the progress of dampness in a newly pasted-up book, and to keep the linings smooth.

polishing-wheel (pol'ish-ing-hwēl), *n.* 1. A wheel armed with some kind of abrasive material, as sandpaper, emery, corundum, etc., and used for smoothing rough surfaces.—2. A wheel having its perimeter covered with leather, felt, cotton, or other soft smoothing material, for bringing partly polished surfaces to a fine degree of polish. See *emery-wheel*, *buff-wheel*, etc.

polishment (pol'ish-ment), *n.* [< OF. *polissement*; as *polish* + *-ment*. Cf. F. *poliment* = Sp. *pulimento* = Pg. *polimento* = It. *pulimento*.] 1. The act of polishing.—2. The condition of being polished.

In the mind nothing of true celestial and virtuous tendency could be, or abide, without the *polishment* of art and the labour of searching after it.
Waterhouse, Apology for Learning (1653), p. 5. (*Latham.*)



[Rare in both senses.]

polish-powder (pol'ish-pou″dėr), *n.* Same as ★*polishing-powder*.

polissoir (F. pron. po-lē-swor'), *n.* [F., < *polir*, polish: see *polish*[1].] In *glass-manuf.*, an implement, consisting of a smooth block of hard wood with a rod of iron for a handle, used for flattening sheet-glass while hot on the flattening-stone. Also called *flattener*.

The flattener now applies another instrument, a *polissoir*, or rod of iron furnished at the end with a block of wood.
Glass-making, p. 129.

The court of Turin is reckoned the most splendid and *polite* of any in Italy; but by reason of its being in mourning, I could not see it in its magnificence.
Addison, Remarks on Italy (ed. Bohn), I. 507.

He is just *polite* enough to be able to be very unmannerly with a great deal of good breeding.
Colman, Jealous Wife, ii.

3. Polished or refined in style, or employing such a style: now rarely applied to persons: as, *polite* learning; *polite* literature (that is, belles-lettres).

Some of the finest treatises of the most *polite* Latin and Greek writers are in dialogue, as many very valuable pieces of French, Italian, and English appear in the same dress.
Addison, Ancient Medals, ii.

He [Cicero] had . . . gone through the studies of humanity and the *politer* letters with the poet Archias.
Middleton, Cicero (ed. 1755), I. 36.

The study of *polite* literature is generally supposed to include all the liberal arts. *Goldsmith*, Origin of Poetry.

=**Syn. 2.** *Civil*, *Polite*, *Courteous*, *Urbane*, *Complaisant*, gracious, affable, courtly, gentlemanly, ladylike. *Civil*, literally, applies to one who fulfils the duty of a citi-

sen; it may mean simply not rude, or observant of the external courtesies of intercourse, or quick to do and say gratifying and complimentary things. *Polite* applies to one who shows a polished civility, who has a higher training in ease and gracefulness of manners; politeness is a deeper, more comprehensive, more delicate, and perhaps more genuine thing than civility. *Polite*, though much abused, is becoming the standard word for the bearing of a refined and kind person toward others. *Courteous*, literally, expresses that style of politeness which belongs to courts: a *courteous* man is one who is gracefully respectful in his address and manner — one who exhibits a union of dignified complaisance and kindness. The word applies to all sincere kindness and attention. *Urbane*, literally city-like, expresses a sort of politeness which is not only sincere and kind, but peculiarly suave and agreeable. *Complaisant* applies to one who pleases by being pleased, or obliges and is polite by yielding personal preferences; it may represent mere fawning, but generally does not. See *genteel*.

A man of sober life,
Fond of his friend, and *civil* to his wife.
Pope, Imit. of Horace, II. ii. 189.

A *polite* country esquire shall make you as many bows in half an hour as would serve a courtier for a week.
Addison, Spectator, No. 119.

Like a very queen herself she bore
Among the guests, and *courteous* was to all.
William Morris, Earthly Paradise, II. 303.

So I the world abused — in fact, to me
Urbane and *civil* as a world could be.
Crabbe, Works, VIII. 169.

He was a man of extremely *complaisant* presence, and suffered no lady to go by without a compliment to her complexion, her blonde hair, or her beautiful eyes, whichever it might be. *Howells*, Venetian Life, xx.

Lecky, Europ. Morals, I. 310.

Within any territory which appears on the map as a Roman province there was a wide difference of *political* conditions; all that appears geographically as the province was not in the provincial condition.
E. A. Freeman, Amer. Lects., p. 321.

4†. Politic; sagacious; prudent; artful; skilful.

I cannot beget a project with all my *political* brain yet.
B. Jonson, Bartholomew Fair, iii. 1.

Orthodox school in political economy, that school of economists which follows the doctrines laid down by Adam Smith, Ricardo, J. S. Mill, and their disciples. — **Political arithmetic.** See *arithmetic*. — **Political assessments.** See *assessment*. — **Political economist**, one who is versed in political economy; a teacher or writer on economic subjects; an economist. — **Political economy**, the science of the laws and conditions which regulate the production, distribution, and consumption of all products, necessary, useful, or agreeable to man, that have an exchangeable value; the science of the material welfare of human beings, particularly in modern society, considered with reference to labor, and the production, distribution, and accumulation of wealth. It includes a knowledge of the conditions which affect the existence and prosperity of useful industry, and the laws or generalizations which are deduced from an observation of the relations between the industrial and commercial methods of a people and their prosperity and physical well-being. The principal topics discussed in political economy are — (1) labor, wages, the laws of population, production on a large or on a small scale, trade-unions, etc.; (2) capital and interest, profit, monopoly return, risk, wages of superintendence, etc.; (3) rent; (4) money, credit, banking; (5) competition and governmental interference with the natural course of trade; (6) value, including price, cost of production, and the relative demand and supply; (7) international trade, including the questions of free trade and protection; (8) the influence of government upon economic relations; and (9) the progress of civilization. — **Political geography.** See *geography*. — **Political law**, that part of jurisprudence which relates to the organization and polity of states, and their relations to each other and to their citizens and subjects. — **Political liberty, power,** etc. See the nouns. — **Political science**, the science of politics, including the consideration of the form of government, of the principles that should underlie it, of the extent to which it should intervene in public and private affairs, of the laws it establishes considered in relation to their effects on the community and the individual, of the intercourse of citizen with citizen as members of a state or political community, etc. — **Political verse**, in *medieval* and *modern Greek poetry*, a verse composed without regard to quantity and always having an accent on the next to the last syllable. The name is especially given to a verse of fifteen syllables, an accentual iambic tetrameter catalectic. Lord Byron has compared with this measure the English line,

"A captain bold of Halifax, who lived in country quarters."

This is the favorite meter in modern Greek poetry. *Political* in this connection means 'common,' 'usual,' 'ordinary.' = **Syn.** See *politic*.

II. *n.* 1. A political officer or agent, as distinguished from military, commercial, and diplomatic officers or agents; specifically, in India, an officer of the British government who deals with native states or tribes and directs their political affairs. — 2. A political offender or prisoner.

As the *politicals* in this part of the fortress are all persons who have not yet been tried, the [Russian] Government regards it as extremely important that they shall not have an opportunity to secretly consult one another.
G. Kennan, The Century, XXXV. 528.

politicalism (pō-lit'i-kal-izm), *n.* [< *political* + *-ism*.] Political zeal or partisanship.

politically (pō-lit'i-kal-i), *adv.* 1. In a political manner; with relation to the government of a nation or state; as regards politics. — 2†. In a politic manner; artfully; with address; politicly.

The Turks *politically* mingled certain Janizaries, harquebusiers, with their horsemen. *Knolles*, Hist. Turks.

politicaster (pō-lit'i-kas-tėr), *n.* [= Sp. It. *politicastro*; as *politic*, *n.*, + *-aster*.] A petty politician; a pretender to political knowledge or influence.

We may infallibly assure our selvs that it will as wel agree with Monarchy, though all the Tribe of Aphorismers and *Politicasters* would perswade us there be secret and misterious reasons against it.
Milton, Reformation in Eng., ii.

politician (pol-i-tish'an), *n.* and *a.* [Formerly also *polititian*, *polititien*; < F. *politicien*, a politician; as *politic* + *-ian*.] **I.** *n.* 1. One who is versed in the science of government and the art of governing; one who is skilled in politics.

The first *polititiens*, deuising all expedient meanes for th' establishment of Common wealth, to hold and containe the people in order and duety.
Puttenham, Arte of Eng. Poesie, p. 5.

He is the greater and deeper *politician* that can make other men the instruments of his will and ends.
Bacon, Advancement of Learning, ii. 169.

2. One who occupies himself with politics; one who devotes himself to public affairs or to the promotion of the interests of a political party; one who is practically interested in politics; in a bad sense, one who concerns himself with public affairs not from patriotism or public spirit, but for his own profit or that of his friends, or of a clique or party.

This is the masterpiece of a modern *politician*, how to qualify and mould the sufferance and subjection of the people to the length of that foot that is to tread on their necks: how rapine may serve itself with the fair and honourable pretences of public good; how the puny law may be brought under the wardship and control of lust and will: in which attempt if they fall short, then must a su-

perficial colour of reputation by all means, direct or indirect, be gotten to wash over the unsightly bruise of honour. *Milton*, Reformation in Eng., ii.

A *politician*, where factions run high, is interested not for the whole people, but for his own section of it. *Macaulay*, Hallam's Const. Hist.

A sincere Utilitarian, therefore, is likely to be an eager *politician*. *H. Sidgwick*, Methods of Ethics, p. 459.

3†. A politic or crafty person; a petty and generally an unscrupulous schemer; a trickster.

The Diuell . . . was noted . . . to be a greedie pursuer of newes, and so famous a *politician* in purchasing that Hel, which at the beginning was but an obscure village, is now become a huge citie, whervnto all countreys are tributarie. *Nashe*, Pierce Penilesse, p. 9.

The *politician*, whose very essence lies in this, that he is a person ready to do any thing that he apprehends for his advantage, must first of all be sure to put himself into a state of liberty as free and large as his principles, and so to provide elbow-room enough for his conscience to lay about it, and have its free play in. *South*, Sermons (1737), I. 324.

Pot-house politician, a politician of low aims and motives; a professional politician, ignorant, irresponsible, and often venal: so called from the favorite resorts of such men. =**Syn. 1** and **2**. This word has degenerated so as generally to imply that the person busies himself with partizanship, low arts, and petty management, leaving the enlightened and high-minded service of the state to the *statesman*. A man, however, would not properly be called a *statesman* unless he were also of eminent ability in public affairs.

The Eastern *politicians* never do anything without the opinion of the astrologers on the fortunate moment. . . . *Statesmen* of a more judicious prescience look for the fortunate moment too; but they seek it, not in the conjunctions and oppositions of planets, but in the conjunctions and oppositions of men and things. *Burke*, To a Member of the Nat. Assembly, 1791.

II. *a.* **1†.** Politic; using artifice.

Your ill-meaning *politician* lords. *Milton*, S. A., l. 1195.

2. Of or pertaining to politicians or their methods. [Rare.]

A turbulent, discoloured, and often unsavory sea of political or rather *politician* quasi-social life. *Arch. Forbes*, Souvenirs of some Continents, p. 155.

politicise, *v. i.* See *politicize*.

politicist (pō-lit'i-sist), *n.* [< *politic* + *-ist*.] A student or observer of politics; one who writes upon subjects relating to politics. [Rare.]

politicize (pō-lit'i-sīz), *v. i.*; pret. and pp. *politicized*, ppr. *politicizing*. [< *politic* + *-ize*.] To occupy one's self with politics; discuss political questions. Also spelled *politicise*.

But while I am *politicising*, I forget to tell you half the purport of my letter. *Walpole*, To Mann (1758). (*Davies*.)

Politicizing sophists threaten to be a perfect curse to India. *Contemporary Rev.*, LII. 711.

politicly (pol'i-tik-li), *adv.* In a politic manner; artfully; cunningly.

politico†, *n.* [< Sp. *político* = It. *politico*, a politician: see *politic*, *n.*] A politician; hence, one whose conduct is guided by considerations of policy rather than principle.

He is counted cunning, a meere *politico*, a time-server, an hypocrite. *Bp. Gauden*, Tears of the Church, p. 256. (*Davies*.)

★ **politics** (pol'i-tiks), *n.* [Early mod. E. *politicks*, *polytykes*; pl. of *politic* (see *-ics*).] **1.** The science or practice of government; the regulation and government of a nation or state for the preservation of its safety, peace, and prosperity. *Politics*, in its widest extent, is both the science and the art of government, or the science whose subject is the regulation of man in all his relations as the member of a state, and the application of this science. In other words, it is the theory and practice of obtaining the ends of civil society as perfectly as possible. The subjects which political science comprises have been arranged under the following heads: (1) natural law; (2) abstract politics—that is, the object or end of a state, and the relations between it and individual citizens; (3) political economy; (4) the science of police, or municipal regulation; (5) practical politics, or the conduct of the immediate public affairs of a state; (6) history of politics; (7) history of the political systems of foreign states; (8) statistics; (9) positive law relating to state affairs, commonly called constitutional law; (10) practical law of nations; (11) diplomacy; (12) the technical science of politics, or an acquaintance with the forms and style of public business in different countries.

Hence the stress which Utilitarians are apt to lay on social and political activity of all kinds, and the tendency which Utilitarian ethics have always shewn to pass over into *politics*. *H. Sidgwick*, Methods of Ethics, p. 459.

Machiavelli . . . founded the science of *politics* for the modern world by concentrating thought upon its fundamental principles. *Encyc. Brit.*, XV. 150.

2. In a narrower and more usual sense, the art or vocation of guiding or influencing the policy of a government through the organization of a party among its citizens—including, therefore, not only the ethics of government, but more especially, and often to the exclusion of ethical principles, the art of influencing public opinion, attracting and marshaling voters, and obtaining and distributing public patronage, so far as the possession of offices may depend upon the political opinions or political services of individuals; hence, in an evil sense, the schemes and intrigues of political parties, or of cliques or individual politicians: as, the newspapers were full of *politics*.

When we say that two men are talking *politics*, we often mean that they are wrangling about some mere party question. *F. W. Robertson*.

I always hated *politics* in the ordinary sense of the word, and I am not likely to grow fonder of them. *Lowell*, Biglow Papers, 2d ser., Int.

3. Political opinions; party connection or preference.

Politics, like religion, are matters of faith on which reason sits as little as possible. *Froude*, Sketches, p. 85.

politient†, *n.* See *politician*.

Politique (pol-i-tēk'), *n.* [< F. *politique*: see *politic*.] In *French hist.*, a member of a party, formed soon after the massacre of St. Bartholomew (1572), which aimed at the reconciliation of the Huguenots and the Catholics.

At Court three great parties were contending for power in the King's name—the Guises, the Reformers, and the *Politiques*. *Quarterly Rev.*, CXLVI. 21.

The middle party, the *Politiques* of Europe—the English, that is, and the Germans—sent help to Henry, by means of which he was able to hold his own in the north-west and south-west throughout 1591. *Encyc. Brit.*, IX. 564.

polititious†, *a.* [For **politicious*, < *politic* + *-ious*.] Politic; crafty.

The *polititious* Walker
By an intreague did quail them again.
Undaunted Londonderry (Child's Ballads, VII. 249).

politize† (pol'i-tīz), *v.* [< *polit-y* + *-ize*.] **I.** *intrans.* **1.** To play the politician; act in a politic manner.

Let us not, for feare of a scarecrow, or else through hatred to be reform'd, stand hankering and *politizing* when God with spread hands testifies to us. *Milton*, Reformation in Eng., ii.

II. *trans.* To educate in politics or in polity; make a politician or politicians of. [Rare.]

Its inhabitants [the state's] must be *politized*, for they [according to Feuerbach], all of them, constitute the polis. *Rae*, Contemporary Socialism, p. 116.

polituret† (pol'i-tūr), *n.* [= D. *politoer*, *polituur* = G. Dan. *politur* = Sw. *politur*, *polityr*, < OF. *politure* = Pg. *polidura* = It. *politura*, *pulitura*, < L. *politura*, a polishing, < *polire*, polish: see *polish*[1].] Polish; the gloss given by polishing.

The walls are brick, plaster'd over with such a composition as for strength and *polisture* resembles white marble. *Evelyn*, Diary, Feb. 7, 1645.

polity (pol'i-ti), *n.* [< F. *politie*, *policie*, etc., < L. *politia*, < Gr. πολιτεία, polity, policy, the state: see *policy*[1], the same word in another form.] **1.** Government; form, system, or method of government: as, civil *polity*, ecclesiastical *polity*.

To our purpose therefore the name of Church-*Polity* will better serve, because it containeth both government and also whatsoever besides belongeth to the ordering of the Church in public. *Hooker*, Eccles. Polity, iii. 1.

They alledge 1. That the Church government must be conformable to the civill *politie*. *Milton*, Reformation in Eng., ii.

2. Any body of persons forming a community governed according to a recognized system of government.—**3†.** Policy; art; management; scheme.

It was no *polity* of court,
Albe the place were charmed,
To let in earnest, or in sport,
So many Loves in, armed.
B. Jonson, Masque of Beauty.

=**Syn. 1.** See *policy*[1].

politzerize (pol'it-sėr-īz), *v. t.*; pret. and pp. *politzerized*, ppr. *politzerizing*. [Named after Adam *Politzer*, of Vienna.] To inflate the Eustachian tube and tympanum of, by blowing into the anterior nares while the way down the pharynx is closed by the patient's swallowing at the instant of inflation. Also spelled *politzerise*.

poll[1] (pōl), *n.* [Formerly also *pole*, *pol*; Sc. *pow*; < ME. *poll*, *pol*, head, list (AF. *poll*, list), < MD. *polle*, *pol*, also *bol*, the head, = LG. *polle*, the head, top of a tree, bulb, = Sw. dial. *pull*, the head, = Dan. *puld*, crown (of a hat); according to some, a variant or connection of *bowl*[1], etc.; according to Skeat, the same, by the occasional interchange of initial *p* and *k*, as Icel. *kollr*, top, shaven crown, = OSw. *kull*, *kulle*, crown of the head, Sw. *kulle*, crown, top, peak; cf. Ir. *coll*, head, neck, = W. *col*, peak, top, summit: cf. *kill*[1]. Hence *poll*[1], *v.*, *pollard*, etc.; in comp. *catchpoll*, etc.] **1.** The head, or the rounded back part of the head, of a person; also, by extension, the head of an animal.

And preyen for the, *pol* bi *pol*. *Piers Plowman* (B), xi. 57.

His beard was as white as snow,
All flaxen was his *poll*.
Shak., Hamlet, iv. 5. 196.

Have you a catalogue
Of all the voices that we have procured
Set down by the *poll*? *Shak.*, Cor., iii. 3. 9.

You shall sometimes see a man begin the offer of a salutation, and observe a forbidding air, or escaping eye, in the person he is going to salute, and stop short in the *poll* of his neck. *Steele* Spectator, No. 259.

Hence—**2.** A person, an individual enumerated in a list.—**3.** An enumeration or register of heads or persons, as for the imposition of a poll-tax, or the list or roll of those who have voted at an election.—**4.** The voting or registering of votes at an election, or the place where the votes are taken: in the United States used chiefly in the plural: as, to go to the *poll*; the *polls* will close at four.—**5.** A poll-tax.

According to the different numbers which from time to time shall be found in each jurisdiction upon a true and just account, the service of men and all charges of the war be borne by the *poll* [that is, by a tax of so much per head]. *Winthrop*, Hist. New England, II. 123.

When, therefore, in 1379, an immediate sum of money was required for "instant operations" on the continent, recourse was again had to a *poll*. *S. Dowell*, Taxes in England, III. 6.

6. The broad end or butt of a hammer.

Jake began pounding on it [the door] with the *poll* of an ax. *E. Eggleston*, The Graysons, xxv.

7. The chub or cheven, *Leuciscus cephalus*. Also called *pollard*.—**At the head of the poll**, in Great Britain, having the highest number of votes in an election: as, the Gladstonian candidate was *at the head of the poll*.—**Challenge to the polls.** See *challenge*, 9.—**Hours of Poll Act.** See *Elections Act*, under *election*.

poll[1] (pōl), *v.* [< *poll*[1], *n.* Cf. *kill*[1], *v.*, etym.] **I.** *trans.* **1.** To remove the top or head of; hence, to cut off the tops of; lop; clip; also, to cut off the hair of; also, to cut, as hair; shear; cut closely; mow; also, to remove the horns of, as cattle: as, to *poll* tares, hair, wool, or grass.

Neither shall they shave their heads, nor suffer their locks to grow long; they shall only *poll* their heads. Ezek. xliv. 20.

Ev'ry man that wore long hair
Should *poll* him out of hand.
Queen Eleanor's Fall (Child's Ballads, VII. 294).

So may thy woods, oft *poll'd*, yet ever wear
A green and (when she list) a golden hair.
Donne, Letters, To Mr. J. P.

Since this *polling* and shaving world crept up, locks were locked up, and hair fell to decay. *Dekker*, Gull's Hornbook, p. 88.

2. In *law*, to cut even without indenting, as a deed executed by one party. See *deed poll*, under *deed*.

A deed made by one party only is not indented, but *polled* or shaved quite even, and therefore called a deed-poll, or a single deed. *Blackstone*, Com., II. xx.

3. To rob; plunder; despoil, as by excessive taxation. [In this sense associated with, and perhaps suggested by, the synonymous *pill*[1].]

Neither can justice yield her fruit with sweetness among the briars and brambles of catching and *polling* clerks and ministers. *Bacon*, Judicature (ed. 1887).

Great man in office may securely rob whole provinces, undo thousands, pill and *poll*.
Burton, Anat. of Mel., To the Reader, p. 41.

4. To enumerate one by one; enroll in a list or register, as for the purpose of levying a poll-tax.—**5.** To pay, as a personal tax.

The man that *polled* but twelve pence for his head.
Dryden, tr. of Juvenal's Satires, iii. 263.

6. To canvass or ascertain the opinion of.

W. Phillips, Speeches, etc., p. 379.

7. To receive at the polls: as, A *polled* only 50 votes; also, to cast at the polls: as, a large vote was *polled*.—**8.** To vote at the polls; bring to the polls.

And *poll* for points of faith his trusty vote.
Tickell, From a Lady to a Gentleman at Avignon.

The Greenbackers in 1880 *polled* 307,740 votes in the whole country. *The Nation*, July 31, 1884, p. 81.

II. *intrans.* To vote at a poll; record a vote, as an elector.

I should think it no honour to be returned to Parliament by persons who, thinking me destitute of the requisite qualifications, had yet been wrought upon by cajolery and importunity to *poll* for me in despite of their better judgment. *Macaulay*, in Trevelyan, I. 251.

poll[2] (pol), *n.* [Abbr. of *Polly* (for *Molly*), a familiar form of *Mary* and a common name of parrots.] A parrot: also called *poll-parrot* and *polly*.

poll[3] (pol), *n.* [So called as being one of 'the many,' Gr. *οἱ πολλοί*, the many, pl. of *πολύς*, much, many.] Those students, collectively, at Cambridge University in England who read for or take a 'pass' degree; the passmen.—**Captain of the poll.** See *captain*.

Pollachius (po-lā′ki-us), *n.* [NL. (Nilsson; Bonaparte, 1846), < E. *pollack*.] In *ichth.*, a genus of gadoid fishes closely resembling *Gadus* proper, but having the lower jaw protrusive, with a rudimentary or obsolete barbel, and the teeth of the upper jaw subequal. It contains the true pollack and the green pollack, or coalfish, of the North Atlantic, both sometimes called *green-cod*, and *P. chalcogrammus* of the North Pacific. See cut under *coalfish*.

pollack, pollock (pol′ak, -ok), *n.* [Cf. D. G. *pollack* (< E.); < Gael. *pollag*, a whiting, = Ir. *pullog*, a pollack.] A fish of the genus *Pollachius*. The true pollack, of European waters only, is *P. pollachius*, also called *green-cod*, *greenfish*, *greenling*, *laithe*, *laits*, *leeat*, *leet*, *leets*, *lythe*, *lob*, *skeet*, and *whiting-pollack*. The green pollack of Atlantic waters, both European and American, is a closely related species, *P. carbonarius*, called *coalfish* (and by many other names) in England. Both these fishes are greenish-brown above, with the sides and the belly silvery, the lateral line pale, and the fins mostly pale; but the true pollack has a much more projecting under jaw, the snout twice as long as the eye, the vent more in advance (being below the anterior half of the first dorsal fin), and the first anal fin much longer. The pollack of Pacific waters, *P. chalcogrammus*, is more decidedly different, representing the genus *Theragra* of Lucas. The pollacks are among the important food-fishes of the family *Gadidæ*.

poll-adz (pōl′adz), *n.* An adz with a striking-face on the head or poll, opposite the bit. *E. H. Knight*.

pollage† (pō′lāj), *n.* [< *poll*[1] + *-age*.] A poll-tax; hence, extortion.

pollam (pol′am), *n.* [Telugu *pālemu*, Tamil *pālaiyam*.] A fief; a district held by a poligar.

pollan (pol′an), *n.* [= Sc. *powan*; cf. *pollack*.] The so-called fresh-water herring of Ireland, a variety of whitefish technically known as *Coregonus pollan*, found in the various loughs. The corresponding variety of the Scotch lochs is called *powan* and *vendace*. See *Coregonus* and *whitefish*.

pollarchy (pol′är-ki), *n.* [< Gr. *πολύς*, many (pl. *οἱ πολλοί*, the many), + *ἀρχή*, rule.] The rule of the many; government by the mob or masses. [Rare.]

A contest . . . between those representing oligarchical principles and the *pollarchy*.
W. H. Russell, My Diary, North and South, II. 340. (*Davies*.)

pollard (pol′ärd), *n.* [< *poll*[1] + *-ard*. In def. 2, < ME. *pollard*, AF. *pollard*.] 1. A tree cut back nearly to the trunk, and thus caused to form a dense head of spreading branches, which are in turn cut for basket-making and fagot-wood. Willows and poplars especially are so treated.—2. A clipped coin. The term was applied especially to the counterfeits of the English silver penny imported into England by foreign merchants in the reign of Edward I.

He then retourned into England, and so vnto London, where, by the aduyce of some of his counsayle, he sodeynly dampned certayne coynes of money, called *pollardes*, crocardes, and rosaries, and caused theym to be broughte vnto newe coynage to his great aduantage.
Fabyan, Chron., II., an. 1350.

3. A polled animal, as a stag or an ox without horns.—**4.** Same as *poll*[1], 7.—**5.** A coarse product of wheat.

The coarsest of bran, vsuallie called gurgeons, or *pollard*.

poll-book (pōl′bůk), *n.* A register of persons entitled to vote at an election.

poll-clerk (pōl′klėrk), *n.* A clerk appointed to assist the presiding officer at an election. In British elections that officer may do by poll-clerks any act which he may do at a polling-station, except to arrest, eject, or exclude a person. In South Australia and Queensland the duties of a poll-clerk are to have charge of the ballots and furnish them to voters, as required of the ballot-clerk in New York and Massachusetts.

polled (pōld), *p. a.* [Pp. of *poll*[1], *v.*] 1. Deprived of the poll; lopped, as a tree having the top cut off.—2. Cropped; clipped; also, bald; shaven.

These *polled* locks of mine, . . . while they were long, were the ornament of my sex. *Sir P. Sidney*, Arcadia, ii.

The *polled* bachelor. *Beau. and Fl.*

3. Having no horns or antlers: noting a stag or other deer that has cast its antlers, or a hornless breed of cattle, or an animal that has lost its horns or whose horns have been removed: as, a *polled* cow. Also called, in Scotland, *dodded*.

The Drumlanrig and Ardrossan herds are extinct. These herds were horned, the latter having latterly become *polled* on the introduction of *polled* bulls from Hamilton.
Amer. Naturalist, XXII. 789.

pollen (pol′en), *n.* [= F. *pollen* = Sp. *polen* = Pg. *pollen* = It. *polline*, < NL. *pollen* (*pollin-*), pollen, < L. *pollen* (*pollin-*), also *pollis* (*pollin-*), fine flour, mill-dust, also fine dust of other things; cf. Gr. *πάλη*, the finest meal.] A fine yellowish dust or powder produced in the anther of a flower (whence it is discharged when mature), which when magnified is found to consist of separate grains of definite size and shape; the male or fecundating element in flowering plants: the homologue of the microspore in cryptogams. The individual grains are usually single-celled and of a globular or oval form, but they may occasionally be composed of two or several cells, curiously irregular in shape. They are often beautifully ornamented with spines, angles, lines, etc., and while they are very uniform in the same species they often differ widely in different species or families. Pollen-grains are usually formed in fours by the division of the contents of mother-cells into two parts and these again into two parts. Each grain has two coats, the inner of which is called the *intine* and the outer the *extine*. See *pollen-tube*.

Grains of Pollen of (*a*) *Œnothera biennis*, (*b*) *Cichorium Intybus*, (*c*) *Hibiscus Moscheutos*, (*d*) *Passiflora cærulea*, and (*e*) *Pinus sylvestris*.

pollen (pol′en), *v. t.* [< *pollen*, *n.*] To cover or dust with pollen; supply with pollen. *Tennyson*, Voyage of Maeldune.

pollenarious (pol-e-nā′ri-us), *a.* [Prop. **pollinarious*; < *pollen* (NL. *pollen*, *pollin-*) + *-arious*.] Consisting of pollen or meal.

pollenarium (pol-e-nā′ri-um), *n.* An erroneous form for *pollinarium*. *Hoffman*.

pollenation (pol-e-nā′shon), *n.* An erroneous form of *pollination*.

Experiments to show, by cross-*pollenations*, the relation between gonotropic irritability and appropriate nutrition upon the growth and direction of pollen-tubes.
Amer. Naturalist, XXIV. 369.

pollen-brush (pol′en-brush), *n.* The corbiculum of a bee. See cut under *corbiculum*.

pollen-catarrh (pol′en-ka-tär″), *n.* Same as *hay-fever*.

pollen-cell (pol′en-sel), *n.* In *bot.*, a cell or chamber of an anther in which pollen is developed.

pollen-chamber (pol′en-chām″bėr), *n.* In gymnosperms, the cavity at the apex of the ovule in which the pollen-grains lie after pollenization. It is beneath the integuments. Also called *pollinic chamber*.

pollen-fever (pol′en-fē″vėr), *n.* Same as *hay-fever*.

pollenger† (pol′en-jėr), *n.* [< **pollager*, < *poll*[1] + *-age* (cf. *pollage*) + *-er*[1]. Cf. *pollard*; and for the form, cf. *porringer*, etc.] 1. A pollard tree. See quotation under *husband*, *n.*, 5.—2. Brushwood. *Tusser*, Husbandry, January.

pollen-grain (pol′en-grān), *n.* See *pollen*.

polleniferous (pol-e-nif′e-rus), *a.* [< NL. *pollen* (*pollin-*), pollen, + L. *ferre* = E. *bear*[1].] An erroneous form of *polliniferous*.

pollenization (pol″en-i-zā′shon), *n.* [< *pollenize* + *-ation*.] An erroneous form of *pollinization* for *pollination*.

pollenize, *v. t.* See *pollinize*.

pollenless (pol′en-les), *a.* Destitute of pollen. *N. E. D.*

pollen-mass (pol′en-más), *n.* In *bot.*, same as *pollinium*.

The sterility of the flowers, when protected from the access of insects, depends solely on the *pollen-masses* not coming into contact with the stigma.
Darwin, Fertil. of Orchids by Insects, p. 29.

pollen-paste (pol′en-pāst), *n.* Pollen mixed with a little honey, as it is stored by bees for the sustenance of their young. Kneaded with more honey and with a secretion from the mouth of the insects, it becomes bee-bread.

pollen-plate (pol′en-plāt), *n.* In *entom.*, a flat or hollowed surface fringed with stiff hairs, used as a receptacle for pollen. These plates are found on the inner sides of the tibiæ and tarsi, or on the sides of the metathorax, of various species of bees. Those on the legs are called *corbicula*. See cut under *corbiculum*.

pollen-sac (pol′en-sak), *n.* The sac in which the pollen is produced; the anther-cell: the homologue of the microsporangium in cryptogams.

pollen-spore (pol′en-spōr), *n.* Same as *pollen-grain*. See *pollen*.

pollent (pol′ent), *a.* [< L. *pollen(t-)s*, ppr. of *pollere*, be strong.] Powerful; prevailing.

We had no arms or merely lawful ones,
An unimportant sword and blunderbuss,
Against a foe *pollent* in potency.
Browning, Ring and Book, II. 100.

pollen-tube (pol′en-tūb), *n.* In *bot.*, the tube through which the fecundating element is conveyed to the ovule. When a pollen-grain is deposited upon a fitting stigma, at a time when the stigmatic secretion is sufficiently abundant, it increases somewhat in size, and soon a tube (sometimes more than one) is thrust forth and passes immediately into the loose tissue of the stigmatic surface. The tube consists of a protrusion of the intine. During its descent the pollen-tube is slender, of about the same caliber throughout, and has extremely thin walls. It extends through the conducting tissue of the style, being nourished by the nutrient matter secreted from the cells of that tissue, until it at last reaches the cavity of the ovary and penetrates the micropyle of the ovule.

poller (pō′lėr), *n.* [Formerly also *powler*; < *poll*[1] + *-er*[1].] One who polls. (*a*) One who shaves persons or cuts their hair; a barber; a hair-dresser. [Rare.]

R. I know him not; is he a deaft barber?
G. O yea; why, he is mistress Lamia's *powler*.
Promos and Cassandra, v. 4. (*Nares*.)

(*b*) One who lops or polls trees. (*c*†) A pillager; a plunderer; one who fleeces by exaction.

The *poller* and exacter of fees.
Bacon, Judicature (ed. 1887).

A promise; a voluntary engagement; also, a paper containing such an engagement.

It seems he granted this following *pollicitation* or promise. *Herbert,* Hist. Reign Hen. VIII., p. 220. (*Latham.*)

2. In *civil law,* a promise without mutuality; a promise not yet accepted by the person to whom it is made. As a general rule, such a promise could be revoked at any time before it was accepted, but a vow made in favor of a public or religious object was irrevocable from the moment it was made. This principle has been reaffirmed by the canon law. In some cases the promiser could be released from the effect of his vow by paying a fifth part of his property.

polligar, *n.* See *poligar.*

pollinar (pol'i-när), *a.* [< LL. *pollinaris* (L. *pollinarius*), belonging to fine flour, < L. *pollen* (*pollin-*), fine flour (NL. pollen): see *pollen.*] In *bot.,* covered with a very fine dust resembling pollen.

pollinarium (pol-i-nā'ri-um), *n.* [NL., < *pollen* (*pollin-*), pollen (see *pollen*), + *-arium.*] In *bot.*: (*a*) In phanerogams, same as *pollinium.* (*b*) In cryptogams, same as *cystidium.*

pollinate (pol'i-nāt), *v. t.*; pret. and pp. *pollinated,* ppr. *pollinating.* [< L. *pollen* (*pollin-*), fine flour (NL. pollen), + *-ate*[2].] In *bot.,* to convey pollen to the stigma of; pollenize. See *pollination.*

pollinated (pol'i-nā-ted), *a.* [< *pollinate* + *-ed*[2].] In *bot.,* supplied with pollen: of the stigma.

pollination (pol-i-nā'shọn), *n.* [= F. *pollination;* as *pollinate* + *-ion.*] 1. In *bot.,* the supplying of pollen to the part of the female organ prepared to receive it, preliminary to fertilization. See *pollen-tube.*

By *pollination* is meant the conveyance of the pollen from the anthers to the stigma of Angiosperms or to the nucleus of Gymnosperms. *Sachs,* Botany (trans.), p. 429.

2. The fertilization of plants by the agency of insects that carry pollen from one flower to another.

pollinctor (po-lingk'tọr), *n.* [L., < *pollingere,* pp. *pollinctus,* wash and prepare a corpse for the funeral pile.] One who prepares materials for embalming the dead.

The Egyptians had these several persons belonging to and employed in embalming, each performing a distinct and separate office: viz., a designer or painter, a dissector or anatomist, a *pollinctor* or apothecary, an embalmer or surgeon, and a physician or priest.
Greenhill, Art of Embalming, p. 177. (*Latham.*)

Alliterative Poems (ed. Morris), ii. 638.

★**polo**[1] (pō'lō), *n.* [< Balti *polo;* cf. Tibetan *pulu. N. E. D.*] A game of ball resembling hockey, played on horseback. It is of Eastern origin, and is played in India, whence it has been introduced into Europe and America.

polo[2] (pō'lō), *n.* A Spanish gipsy dance which originated in Andalusia, and closely resembles certain Eastern dances in its wild contortions of the body. The song to which it is danced is low and melancholy, with startling pauses, and is sung in unison with a rhythmic clapping of hands. The words, called *coplas,* are generally of a jocose character without refrains. Also called *ole.*

polonaise (pō-lọ-nāz'), *n.* [< F. *Polonais,* m., the Polish language, *polonaise,* f., a polonaise (dress), polonaise (music), prop. adj., Polish, < *Pologne* (ML. *Polonia*), Poland: see *Pole*[3].] 1. A light open gown looped up at the sides, showing the front of an elaborate petticoat, and longer behind, worn toward the close of the eighteenth century; also, a similar but plainer gown, not so much drawn back, and draped more simply, worn at the present time.—2. A kind of overcoat, short and usually faced and bordered with fur, worn by men who affected a semi-military dress during the first quarter of the nineteenth century.—3. A Polish dance, consisting mainly of a march or promenade of the dancers in procession.—4. Music for such a promenade, or in its peculiar rhythm, which is triple and stately, with a characteristic division of the first beat of the measures, and a capricious ending of the phrases on the last beat. The origin of the form is uncertain. It was first described by Mattheson in 1739, and it has since been frequently used by various instrumental composers. It received the most elaborate and original treatment from Chopin, many of whose finest works are in this form. The rhythm of the bolero is very similar to that of the polonaise. Also called *polacca.*

Polonese (pō-lō-nēs′ or -nēz′), *n.* [< F. *Polonais*, the Polish language: see *polonaise*.] 1. The Polish language.—2. [*l. c.*] Same as *polonaise*, 1.

The name is also used for some other plants of the genus *Teucrium*.—**Poly-mountain**. Same as *poly;* also, an old-world plant, *Clinopodium Acinos*.

poly-. [L., etc., *poly-*, < Gr. *πολυ-*, combining form of *πολύς*, dial. *πουλύς*, *πολλός*, many, much, neut. *πολύ*, as adv. much, very, many times, often, long, etc.; = Goth. *filu* = AS. *fela*, E. obs. *feel*, much: see *feel*2.] An element in many compounds of Greek origin or formation, meaning 'many' or 'much.' It is equivalent to *multi-* of Latin origin. It is sometimes, but rarely, used in composition with a word of non-Greek origin, as in *polygrooved*, *polypage*.

polyacanthid (pol″i-a-kan′thid), *a.* [< *polyacanth-ous* + *-id*2.] Having pluriserial adambulacral spines, as a starfish: correlated with *monacanthid* and *diplacanthid*.

polyacanthous (pol″i-a-kan′thus), *a.* [< Gr. *πολυάκανθος*, having many thorns, used only as the name of a kind of thorn, < *πολύς*, many, + *ἄκανθα*, thorn, spine.] In *bot.*, having many thorns or spines. *Thomas*, Med. Dict.

polyacoustic (pol″i-a-kös′tik), *a.* and *n.* [= Sp *policústico*, < Gr. *πολύς*, many, + *ἀκουστικός*, of or pertaining to hearing: see *acoustic*.] **I.** *a.* Multiplying or magnifying sound.

II. *n.* An instrument for multiplying or magnifying sounds.

polyacoustics (pol″i-a-kös′tiks), *n.* [Pl. of *polyacoustic* (see *-ics*).] The art or science of multiplying sounds.

polyact (pol″i-akt), *a.* [< Gr. *πολύς*, many, + *ἀκτίς* (*ἀκτιν-*), ray.] Having numerous rays: specifically said of sponge-spicules of the stellate kind.

polyactinal (pol-i-ak′ti-nal), *a.* [< Gr. *πολύς*, many, + *ἀκτίς* (*ἀκτιν-*), a ray, + *-al*.] Many-rayed; multiradiate; in sponges, polyact.

polyad (pol′i-ad), *n.* [< Gr. *πολύς*, many, + term. *-ας* (*-αδ-*) as in *τρίας* (*τριαδ-*), triad: see *-ad*1.] In *chem.*, an element whose valence or quantivalence is greater than two, as a triad, tetrad, hexad, etc.

polyadelph (pol′i-a-delf), *n.* [< Gr. *πολυάδελφος*, having many brothers, < *πολύς*, many, + *ἀδελφός*, brother.] In *bot.*, a plant having its stamens united in three or more bodies or bundles by the filaments.

Polyadelph.

Polyadelphia (pol″i-a-del′fi-ä), *n. pl.* [NL.: see *polyadelph*.] In *bot.*, the eighteenth class of the Linnean system, in which the stamens are united by their filaments into three or more sets or brotherhoods.

polyadelphian (pol″i-a-del′fi-an), *a.* [< *Polyadelphia* + *-an*.] Same as *polyadelphous*.

polyadelphite (pol″i-a-del′fīt), *n.* [< Gr. *πολυάδελφος*, having many brothers (see *polyadelph*), + *-ite*2.] A massive brownish-yellow variety of iron garnet occurring in the zinc-mines in Sussex county, New Jersey.

polyadelphous (pol″i-a-del′fus), *a.* [= F. *polyadelphe* = Pg. *polyadelpho* = It. *poliadelfo*, < Gr. *πολυάδελφος*, having many brothers: see *polyadelph*.] In *bot.*, having the stamens united in three or more bundles or parcels, as in some species of *Hypericum*. Also *polyadelphian*.

polyadenia (pol″i-a-dē′ni-ä), *n.* [NL., < Gr. *πολύς*, many, + *ἀδήν*, gland: see *adenia*.] Pseudoleucemia.

polyadenitis (pol-i-ad-e-nī′tis), *n.* [NL., < Gr. *πολύς*, many, + *ἀδήν*, gland, + *-itis*. Cf. *adenitis*.] Inflammation of numerous glands.

polyadenopathy (pol-i-ad-e-nop′ạ-thi), *n.* [< Gr. *πολύς*, many, + *ἀδήν*, gland, + *πάθος*, disease. Cf. *adenopathy*.] Disease of numerous glands.

polyadenous (pol-i-ad′e-nus), *a.* [< Gr. *πολύς*, many, + *ἀδήν*, gland.] In *bot.*, bearing many glands. *Thomas*, Med. Dict.

polyæmia, *n.* See *polyhemia*.

polyæsthesia, polyesthesia (pol″i-es-thē′si-ä), *n.* [NL., < Gr. *πολύς*, many, + *αἰσθησις*, sensation.] The arousal, by stimulation of a point on the skin, of a perception of two or more pressures: observed normally in tabes dorsalis. Also *polyæsthesis*, *polyesthesis*.

polyæsthetic, *a.* See *polyesthetic*.

Polyalthia (pol-i-al′thi-ä), *n.* [NL. (Blume, 1829), so called with ref. to its supposed healing properties; < Gr. *πολυαλθής*, healing many diseases, < *πολύς*, many, + *ἀλθαίνειν*, heal (> *ἀλθής*, wholesome).] A genus of choripetalous shrubs or trees of the family *Anonaceæ* and tribe *Uvarieæ*, characterized by six thick, flat, ovate or narrow petals, and numerous carpels each with only one or two ovules. The 70 species are natives of tropical Asia, tropical and southern Africa, and Australasia. They bear obliquely feather-veined alternate leaves, and solitary or clustered flowers, followed by globose or oblong one-seeded stalked berries. See *mast-tree*, 2.

polyandria (pol-i-an′dri-ä), *n.* [NL.: see *polyandry*.] 1. Same as *polyandry*.—2. [*cap.*] [Used as a plural.] In *bot.*, the thirteenth class in the Linnean system, consisting of hermaphrodite flowering plants having more than twenty hypogynous stamens of equal length, free from each other and from the pistils.

polyandrian (pol-i-an′dri-an), *a.* [< *polyandry* + *-an*.] Same as *polyandrous*.

polyandric (pol-i-an′drik), *a.* [= F. *polyandrique* = Pg. *polyandrico;* as *polyandr-y* + *-ic*.] Relating to or characterized by polyandry. Also *polyandrous*. *Westminster Rev.*, April, 1868, p. 410.

polyandrion (pol-i-an′dri-on), *n.*; pl. *polyandria* (-ä). [< Gr. *πολυάνδριον*, a place where many assemble, neut. of *πολυάνδριος*, with many men, < *πολύς*, many, + *ἀνήρ* (*ἀνδρ-*), man.] In *Gr. antiq.* and *archæol.*, a monument or a burial inclosure provided by the state for a number of men, usually for those of its citizens who had fallen in a battle. The famous "Lion of Chæronea" which stood within the burial inclosure of the Thebans who died in the battle with Philip of Macedon, 338 B. C., was a monument of this class; and this was itself a close copy throughout of that recently excavated at Thespiæ, which is believed to have commemorated the Thespians who fell at Platæa, 479 B. C.

polyandrious (pol-i-an′dri-us), *a.* In *bot.*, same as *polyandrous*.

polyandrist (pol-i-an′drist), *n.* [< *polyandr-y* + *-ist*.] One who practises polyandry.

polyandrous (pol-i-an′drus), *a.* [< Gr. *πολύανδρος*, with many men, LGr. with many husbands, < *πολύς*, many, + *ἀνήρ* (*ἀνδρ-*), man, male (in mod. bot. stamen).] 1. In *bot.*: (*a*) Belonging to the Linnean class *Polyandria*. (*b*) Having the stamens indefinitely numerous, at least more than twelve.—2. In *zoöl.*, having several male mates; polygamous, as a female animal.—3. In *sociology*, same as *polyandric*.

polyandry (pol-i-an′dri), *n.* [= F. *polyandrie* = Sp. *poliandria* = Pg. *polyandria* = It. *poliandria*, < LGr. *πολιανδρία*, taken in sense of 'a condition of having many husbands' (in bot., stamens), found in sense of 'a condition of having many men, populousness,' < *πολύανδρος*, having many men: see *polyandrous*.] The state of having more husbands than one at the same time; plurality of husbands. It formerly prevailed to some extent in Europe, and is now observed in Tibet, Ceylon, parts of India, among certain tribes in America and the islands of the Pacific, etc. It is sometimes limited to the marriage of the woman to two or more brothers. Among some tribes, for instance, the Eskimo, both polyandry and polygamy are found at the same time.

In the one type, called by M'Lennan Nair *polyandry*, the woman remains with her own kin, but entertains at will such suitors as she pleases.
W. R. Smith, Kinship and Marriage, p. 122.

polyangular (pol-i-ang′gū-lạr), *a.* [< Gr. *πολύς*, many, + L. *angulus*, an angle: see *angular*.] Having many angles.

polyanthea†, *n.* Same as *polianthea*.

Polyanthes (pol-i-an′thēz), *n.* See *Polianthes*.

polyanthous (pol-i-an′thus), *a.* [< NL. *polyanthus*, < Gr. *πολύανθος*, also *πολυανθής*, much-blossoming, having many flowers, < *πολύς*, many, + *ἄνθος*, a flower.] Exhibiting polyanthy. See ★*polyanthy*.

polyanthus, polyanthos (pol-i-an′thus, -thos), *n.* [NL., < Gr. *πολύανθος*, having many flowers: see *polyanthous*.] A garden variety of *Primula elatior* or of the closely allied species *P. veris*, the oxlip, whose flowers are umbeled on a common peduncle several inches high. It is an old garden favorite, which has passed through countless subvarieties. Florists require that a good polyanthus should possess a strong scape, a well-filled truss, a corolla with a short tube, a bright-yellow eye, and a deep, rich brown-crimson limb, bordered with a well-defined yellow edging. See *primrose*.—**Polyanthus Narcissus**. See *Narcissus*.

polyarchist (pol′i-ärk-kist), *n.* [< *polyarch-y* + *-ist*.] One who favors polyarchy.

Plato . . . was no *polyarchist*, but a monarchist, an assertor of one supreme God.
Cudworth, Intellectual System, p. 403.

polyarchy (pol′i-är-ki), *n.* [= F. *polyarchie* = Sp. *poliarquía* = Pg. *polyarchia* = It. *poliarchia*, < Gr. *πολυαρχία*, the government of many, < *πολύς*, many, + *ἀρχειν*, rule.] A government by many, whether by a privileged class (aristocracy) or by the people at large (democracy); any government by several rulers.

Yet he [Aristotle] absolutely denied πολυκοιρανίην, and πολυαρχίαν, a *polyarchy* or mundane aristocracy: that is, a multiplicity of first principles and independent deities. *Cudworth*, Intellectual System, II. 83.

polyarsenite (pol-i-är'se-nīt), *n.* [< Gr. *πολύς*, many, + E. *arsen(ic)* + *-ite*[2].] In *mineral.*, same as *sarkinite*.

polyarthritis (pol^{i}-i-är-thrī'tis), *n.* [NL., < Gr. *πολύς*, many, + NL. *arthritis*, q. v.] Arthritis involving a number of joints.

polyarthrous (pol-i-är'thrus), *a.* [< Gr. *πολύς*, many, + *ἄρθρον*, a joint.] Having many joints or jointed parts; multiarticulate.

polyarticular (pol^{i}-i-är-tik'ū-lăr), *a.* [< Gr. *πολύς*, many, + L. *articulus*, a joint: see *articular*.] Pertaining to a number of joints: as, *polyarticular* rheumatism.

polyatomic (pol^{i}-i-a-tom'ik), *a.* [= F. *polyatomique*; < Gr. *πολύς*, many, + *ἄτομον*, atom: see *atom*, *atomic*.] In *chem.*, noting elements or radicals which have an equivalency greater than two; also, noting compounds having three or more hydroxyl groups, in which hydrogen is easily replaceable by other elements or radicals without otherwise changing the structure of the original compound: thus, glycerol is a *polyatomic* alcohol.

polyautography (pol^{i}-i-â-tog'ra-fi), *n.* [< Gr. *πολύς*, many, + *αὐτός*, self, + *-γραφία*, < *γράφειν*, write. Cf. *autography*.] The act of multiplying copies of one's own handwriting or of manuscripts, as by printing from stone: a form of lithography.

polyaxial (pol-i-ak'si-al), *a.* [< Gr. *πολύς*, many, + L. *axis*, axis, + *-ial*.] Having several axes.

★**polyaxon** (pol-i-ak'son), *a.* and *n.* [NL., < Gr. *πολύς*, many, + *ἄξων*, axis.] **I.** *a.* Having several or many (more than six) axes of growth, as a sponge-spicule; polyaxial, as the form of spicule known as a *sterraster*.

II. *n.* A polyaxial sponge-spicule.

polybasic (pol-i-bā'sik), *a.* [= F. *polybasique*; < Gr. *πολύς*, many, + *βάσις*, base: see *base*[2], *basic*.] In *chem.*, capable of combining with more than two univalent bases: as, *polybasic* acids or radicals.

polybasicity (pol^{i}-i-bā-sis'i-ti), *n.* [< *polybasic* + *-ity*.] The character or property of being polybasic.

polybasite (pō-lib'a-sīt), *n.* [= F. *polybasite*; < Gr. *πολύς*, many, + *βάσις*, base, + *-ite*[2].] An iron-black ore of silver, consisting of silver, sulphur, and antimony, with some copper and arsenic.

Polybia (pō-lib'i-ă), *n.* [NL. (St. Fargeau, 1836), < Gr. *πολύβιος*, with much life, < *πολύς*, much, + *βίος*, life.] A genus of hymenopterous insects of the family *Vespidæ*, or wasps, resembling *Polistes* closely, but differing in the shape of the abdomen. The species are all Central or South American except *P. flavitarsis*, which is found in California. *P. palmarum* is the palm-wasp, so called because it makes its nests on palms.

Polyborinæ (pol^{i}-i-bō-rī'nē), *n. pl.* [NL., < *Polyborus* + *-inæ*.] A subfamily of *Falconidæ*, typified by the genus *Polyborus*, and including the genera *Phalcobænus*, *Senex*, *Milvago*, *Ibycter*, and *Daptrius*; the caracaras, or American vulture-hawks. There is a coracoclavicular articulation, a centric nasal tubercle, an anterior palatal keel, and a superorbital shield, in which respects the *Polyborinæ* resemble falcons; but the external aspect is rather that of vultures. The bill is toothless, and the sternum is single-notched. See cuts under ■*caracara* and *Ibycter*.

polyborine (pol'i-bō-rin), *a.* Of or pertaining to the *Polyborinæ*.

Polyborus (pō-lib'ō-rus), *n.* [NL. (Vieillot, 1816), < Gr. *πολυβόρος*, much-devouring, < *πολύς*, much, + *βορός*, gluttonous.] The typical genus of the subfamily *Polyborinæ*; the caracaras proper. There are several species, of temperate and tropical America, as *P. cherivay*, *P. auduboni*, and *P. lutosus*. See cut under *caracara*.

polybrachia (pol-i-brā'ki-ă), *n.* [NL., < Gr. *πολύς*, many, + L. *brachium*, properly *bracchium*, the arm: see *brachium*.] In *teratol.*, the presence of supernumerary arms.

polybrachus (pō-lib'rā-kus), *n.*; pl. *polybrachi* (-kī). [NL.: see *polybrachia*.] In *teratol.*, a monster with supernumerary arms.

polybranch (pol'i-brangk), *a.* and *n.* [< Gr. *πολύς*, many, + *βράγχια*, gills.] **I.** *a.* Having many gills or numerous branchiæ, as a mollusk or crustacean; of or pertaining to the *Polybranchia* or *Polybranchiata*. Also *polybranchiate*.

II. *n.* A polybranch mollusk or crustacean.

Polybranchia (pol-i-brang'ki-ă), *n. pl.* [NL.: see *polybranch*.] 1. In J. E. Gray's classification (1821), one of two orders (the other being *Pygobranchia*) of nudibranchiate gastropods, having lamellar or plumose gills on the upper surface of the mantle, and containing the families *Tritoniadæ*, *Scyllæidæ*, and *Tethyadæ*.—2. In later systems, a suborder or superfamily comprising the same forms, but subdivided among numerous families: same as *Polybranchiata*, 1.

polybranchian (pol-i-brang'ki-an), *a.* and *n.* Same as *polybranch*.

Polybranchiata (pol-i-brang-ki-ā'tă), *n. pl.* [NL.: see *polybranchiate*.] 1. A suborder or superfamily of nudibranchiate gastropods, characterized by the development of dorsal gill-like appendages variously distributed, but never disposed in a rosette round the anus. It comprised numerous species, classified by modern malacologists among 12 to 15 families. Also called *Polybranchia*.—2. In De Blainville's classification (1825), one of five orders of his second section of *Paracephalophora monoica symmetrica*, composed of the two families *Tetracerata* and *Dicerata*.

polybranchiate (pol-i-brang'ki-āt), *a.* [< NL. *polybranchiatus*, < Gr. *πολύς*, many, + *βράγχια*, gills.] Same as *polybranch*.

Polycarpa (pol-i-kär'pă), *n.* [NL. (Loefling, 1758), so called in allusion to the many little fruits (cf. L. *polycarpus*, < Gr. *πολύκαρπος*, with much fruit, fruitful: see *polycarpous*.] A genus of diffuse dicotyledonous choripetalous herbs of the family *Silenaceæ*, type of the tribe *Polycarpeæ*, and characterized by the five keeled and entire sepals, the five small entire hyaline petals, the three to five stamens, and the one-celled ovary with many ovules, crowned with a short three-cleft style, and becoming a small three-valved capsule. There are 6 species, generally diffused throughout temperate and warmer regions. They are slender annuals, bearing opposite ovate or oblong flat leaves, dry and thin bracts and stipules, and very numerous densely compacted little whitish flowers in much-branched cymes. From the great quantity of its seed, the European species, *P. tetraphyllum*, is called *allseed*.

polycarpellary (pol-i-kär'pe-lā-ri), *a.* [< Gr. *πολύς*, many, + NL. *carpellum*, carpel: see *carpel*, *carpellary*.] In *bot.*, composed of several carpels. Compare *monocarpellary*.

polycarpic (pol-i-kär'pik), *a.* [< *polycarp-ous* + *-ic*.] In *bot.*, producing fruit many times or indefinitely: applied by de Candolle to perennial herbs. Compare *monocarpous* (*a*).

★**polycarpous** (pol-i-kär'pus), *a.* [< Gr. *πολύκαρπος*, with much fruit, fruitful, < *πολύς*, many, + *καρπός*, fruit.] In *bot.*, having a gynœcium composed of two or more distinct ovaries or carpels. Compare *monocarpous*, and cuts under *carpel* and *gynobase*.

polycellular (pol-i-sel'ū-lăr), *a.* [< Gr. *πολύς*, many, + NL. *cellula*, a cell: see *cellular*.] In *bot.*, containing or composed of many cells.

polycentric (pol-i-sen'trik), *a.* [< Gr. *πολύς*, many, + *κέντρον*, point: see *center*[1].] Having several centers or nucleal points.

But a complexity is introduced as soon as the sap-vacuoles appear, in many cases making the cell not monocentric but *polycentric*.

H. Marshall Ward, Nature, XXXV. 301.

Polycentridæ (pol-i-sen'tri-dē), *n. pl.* [NL., < *Polycentrus* + *-idæ*.] A family of acanthopterygian fishes, typified by the genus *Polycentrus*. They have a symmetrical compressed body without lateral line, compressed head with very projectile jaws, a long dorsal and anal fin with many spines, and perfect ventrals. The family contains a few South American fresh-water fishes, somewhat related to the centrarchoids of North America. In Günther's classification it was referred to the *Acanthopterygii perciformes*.

Polycentrus (pol-i-sen'trus), *n.* [NL. (Müller and Troschel, 1848), < Gr. *πολύς*, many, + *κέντρον*, point: see *center*[1].] The typical genus of *Polycentridæ*: so called from the many spines, especially of the anal fin.

polycephalist† (pol-i-sef'a-list), *n.* [< Gr. *πολυκέφαλος*, having many heads (see *polycephalous*), + *-ist*.] One who has or acknowledges many heads or superiors. *Bp. Gauden*, Tears of the Church, p. 541. (*Davies.*)

polycephalous (pol-i-sef'a-lus), *a.* [< Gr. *πολυκέφαλος*, having many heads, many-headed, < *πολύς*, many, + *κεφαλή*, head.] In *bot.*, bearing or consisting of many heads.

Polycera (pō-lis'e-rā), *n.* [NL., < Gr. *πολύκερως*, many-horned, < *πολύς*, many, + *κέρας*, horn.]

Polycera quadrilineata. (Line shows natural size.)

The typical genus of *Polyceridæ*. A true representative species is *P. quadrilineata* of Europe. *P. lessoni* is a beautiful sea-slug of a pale flesh-color marked with green and yellow, found in the North Atlantic ocean, referred by some to a distinct genus *Palio*.

Polyceridæ (pol-i-ser'i-dē), *n. pl.* [NL., < *Polycera* + *-idæ*.] A family of phanerobranchiate doridoid gastropods having a simple pharyngeal bulb, typified by the genus *Polycera*. The branchiæ are not retractile, the labial armature is variable, and the radula is narrow. The species are numerous, and have been grouped by some under three or more subfamilies, elevated by others to family rank.

Polychæta (pol-i-kē'tă), *n. pl.* [NL., neut. pl. of *polychætus*: see *polychætous*.] An order or other group of chætopodous annelids, having the body segmented, the false feet or parapodia with many chætæ, setæ, or bristles (whence the name), and the head tentaculate; the polychætous worms. It is a very large group, of numerous families, including a majority of the annelids, as all the sedentary or tubicolous and the errant marine worms. It is contrasted with the order *Oligochæta*. See cuts under *elytrum*, *Polynoë*, *Protula*, *cerebral*, *esophageal*, *præstomium*, and *pygidium*.

polychæte (pol'i-kēt), *a.* Same as *polychætous*.

polychætous (pol-i-kē'tus), *a.* [< NL. *polychætus*, < Gr. *πολυχαίτης*, with much hair, < *πολύς*, many, + *χαίτη*, long hair, mane: see *chæta*.] Having numerous chætæ, setæ, or bristles of the parapodia, as an annelid; belonging to the *Polychæta*. See cut under *elytrum*.

Forms of *Polychætous* Annelidan larvæ which are called Telotrocha. *Huxley*, Anat. Invert., p. 164.

polychœrany†, *n.* An erroneous form of *polycœrany*.

polycholia (pol-i-kō'li-ă), *n.* Excessive secretion of bile.

polychord (pol'i-kôrd), *a.* and *n.* [= Pg. *polychordo*; < Gr. *πολύχορδος*, many-stringed, < *πολύς*, many, + *χορδή*, string, chord.] **I.** *a.* Having many chords or strings.

II. *n.* A musical instrument invented by F. Hillmer in 1799, but never generally used. It was shaped like a bass viol with a movable fingerboard, and had ten gut strings. It was played either with a bow, or by the fingers, like a lute.

polychorion (pol-i-kō'ri-on), *n.* [< Gr. *πολύς*, many, + *χόριον*, membrane.] In *bot.*, a polycarpous fruit, like that of *Ranunculus*. *Treasury of Botany*.

polychorionic (pol-i-kō-ri-on'ik), *a.* [< *polychorion* + *-ic*.] Having the character of a polychorion.

polychotomous (pol-i-kot'ō-mus), *a.* [< *polychotom-y* + *-ous*.] Divided into more than two groups or series; made or done on the principle of polychotomy, as a classification.

polychotomy (pol-i-kot'ō-mi), *n.* [< Gr. *πολύχοος*, *πολυχόος*, manifold, + *-τομία*, < *τέμνειν*, *ταμεῖν*, cut.] In *zoöl.*, division of a given group of animals into more than two other groups or series: correlated with *dichotomy*. *Amer. Nat.*, XXI. 915.

polychrest† (pol'i-krest), *n.* [= F. *polychreste*, = Pg. *polycresto*, < Gr. *πολύχρηστος*, very useful, < *πολύς*, much, + *χρηστός*, useful, < *χρῆσθαι*, use: see *chrestomathy*.] A medicine that serves for many uses, or that cures many diseases.—**Polychrest salt**, in *old chem.*, potassic sulphate; also, sodio-potassic tartrate.

polychrestic (pol-i-kres'tik), *a.* [< *polychrest-y* + *-ic*.] Admitting of use in various ways, as a drug, or in various connections (as in naming different things), as a word.

polychresty (pol'i-kres-ti), *n.* [< Gr. *πολυχρηστία*, great usefulness, < *πολυχρηστός*, very useful: see *polychrest*.] The character of being polychrestic; the use of polychrestic words. *Buck's Handbook of Med. Sciences*, VIII. 518.

polychroic (pol-i-krō'ik), *a.* Same as *pleochroic*.

Optical properties of the *polychroic* aureolas present in certain minerals, by M. A. Michel Lévy.

Nature, XLI. 215.

polychroism (pol'i-krō-izm), *n.* [= F. *polychroïsme*; < Gr. *πολύχροος*, many-colored, < *πολύς*, many, + *χροιά*, color.] Same as *pleochroism*.

polychroite (pol-i-krō'īt), *n.* [= F. *polychroïte*, < Gr. *πολύχροος*, many-colored (see *polychroism*), + *-ite*[2].] The coloring matter of saffron: so named in consequence of the variety of colors which it exhibits when acted upon by various reagents.

★**polychromatic** (pol^{i}-i-krō-mat'ik), *a.* [< Gr. *πολυχρώματος*, many-colored (see *polychrome*), + *-ic*. Cf. *chromatic*.] 1. Many-colored: as, *polychromatic* light.—2. In *mineral.*, exhibiting a play of colors.—**Polychromatic acid.** See *polychromic acid*, under *polychromic*.—**Polychromatic process**, a carbon photographic process invented by Vidal, analogous to chromolithography in method and object. The first step is to make from the subject as many negatives

as there are colors to be represented, each of these being appropriated for a particular tint, while all parts otherwise tinted in the original are masked on the negative with an opaque pigment. Gelatin pictures of the required tints are then prepared from the negatives, and superimposed in turn by a system of registration over a print of the whole subject previously made with a neutral ground, thus completing the polychromatic picture. This process gives strikingly naturalistic results in the reproduction of goldsmiths' work, enamels, mosaics, etc.

polychrome (pol'i-krōm), *a.* and *n.* [= F. *polychrome;* < Gr. *πολύχρωμος*, also *πολυχρώματος*, many-colored, < *πολύς*, many, + *χρῶμα* (*χρώματ-*), color: see *chrome*.] **I.** *a.* Having or tinted with several or many colors; executed in the manner of polychromy: as, *polychrome* sculpture; *polychrome* architecture.

A large panorama of Pergamon, . . . exhibited in conjunction with a full-size plastic restoration and *polychrome* reconstruction of the eastern front of the Olympian temple. *Tenth Report of the Archæol. Institute of America*, [1888–9, p. 55.

Polychrome printing, the art or process of printing in several colors at the same time.

II. *n.* A fluorescent substance ($C_{15}H_{16}O_9 + 1\frac{1}{2}\ H_2O$), forming prismatic crystals, odorless, with a bitter taste and slight acid reaction. It is obtained from the bark of the horse-chestnut and from quassia-wood, etc. A solution of polychrome appears colorless by transmitted light, but blue by reflected light. Acids destroy the fluorescence. Now called *æsculin*.

polychromic (pol-i-krō'mik), *a.* [< *polychrome* + *-ic*.] Same as *polychromatic*.—**Polychromic acid** (also called *aloetic acid*), an acid produced by the action of nitric acid upon aloes.

polychromy (pol'i-krō-mi), *n.* [= F. *polychromie*, < Gr. as if *πολυχρωμία, < *πολύχρωμος*, many-colored: see *polychrome*.] Decoration or execution in many colors; specifically, the practice of coloring more or less completely statues and the exteriors and interiors of buildings. This practice dates from the highest antiquity, and reached its greatest artistic perfection in Greece, where it was consistently applied to all sculpture and architecture. In archaic examples the coloring was the most complete and strong, and in the case of sculpture was to a great extent conventional—men's flesh, for instance, being colored deep-brown or red, and women's white or yellowish. In the architecture of the best time, while surfaces of considerable extent were still brilliantly colored, as in red or blue, the chief part of many features, as of columns, was left in the natural color of the marble, or perhaps merely slightly tinted, and discreetly set off with meanders or other ornaments in gilding or strong color. Throughout Europe, during the twelfth and thirteenth centuries, architectural polychromy was employed with admirable effect.

Polychrus (pol'i-krus), *n.* [NL. (Cuvier, 1817), < Gr. *πολύς*, many, + *χρώς*, color of the skin, complexion.] 1. A leading genus of lizards of the family *Iguanidæ*, having smooth scales, a small dewlap, no dorsal crest, and the squarish head covered with numerous plates: so called from its versicoloration. *P. marmoratus* inhabits Central America and portions of South America.—2. [*l. c.*] A member of this genus: as, the marbled *polychrus*.

polycladous (pol-i-klā'dus), *a.* [< Gr. *πολύκλαδος*, with many boughs and branches, < *πολύς*, many, + *κλάδος*, a young slip or shoot.] In *bot.*, much-branched.

polyclady (pol'i-klā-di), *n.* [< Gr. *πολύκλαδος*, with many boughs and branches: see *polycladous*.] In *bot.*, the production of a number of branches where there is normally but one. See *plica*, 2.

Polyclетan School of Sculpture.—Amazon, in the Museum of Berlin.

Polycletan (pol-i-klē'tan), *a.* [< L. *Polycletus*, *Polyclitus*, < Gr. Πολύκλειτος, Polycletus (see def.), + *-an*.] Pertaining to the great Greek sculptor Polycletus of Argos and Sicyon, a contemporary and emulator of Phidias, to the school of art inspired by him, or to the sculptural canon of perfect human proportions which he established (see *doryphorus*).

polyclinic, *n.* See *policlinic*.

polycoccous (pol-i-kok'us), *a.* [NL., < Gr. *πολύς*, many, + *κόκκος*, berry: see *coccus*.] In *bot.*, having several cocci: said of a dry pericarp whose lobes separate at maturity.

Polycœlia[1] (pol-i-sē'li-ä), *n.* [NL., < Gr. *πολύς*, many, + *κοιλία*, cavity: see *cœlia*.] A genus of fossil rugose corals of the family *Stauridæ*, from the Permian formation.

Polycœlia[2] (pol-i-sē'li-ä), *n. pl.* [NL., < Gr. *πολύς*, many, + *κοιλία*, cavity.] Animals whose encephalocœle is segmented into several cœliæ, as all skulled vertebrates. They have the neuron partly preaxial, the axon vertebrated, and the heart with more than a single cavity. *Wilder*, Amer. Nat., XXI. 914.

polycœlian (pol-i-sē'li-an), *a.* [< *Polycœlia*[2] + *-an*.] Having several cœliæ; of or pertaining to the *Polycœlia*.

polycœrany† (pol-i-sē'ra-ni), *n.* [Also *polycœranie;* < Gr. (Ionic) *πολυκοιρανίη*, rule of many, < *πολύς*, many, + *κοίρανος*, a ruler.] A government by many rulers, lords, or princes. [Rare.]

The world would be a *polychœrany* or aristocracy of Gods. *Cudworth*, Intellectual System, p. 411.

polyconic (pol-i-kon'ik), *a.* [= F. *polyconique*, < Gr. *πολύς*, many, + *κῶνος*, a cone: see *cone*, *conic*.] Pertaining to or based upon many cones.—**Polyconic map-projection.** See *projection*.

polycoria (pol-i-kō'ri-ä), *n.* [NL., < Gr. *πολύς*, many, + *κόρη*, the pupil of the eye.] The presence of more than one pupil in an eye.

Polycotylea (pol-i-kot-i-lē'ä), *n. pl.* [NL., < Gr. *πολύς*, many, + *κοτύλη*, a vessel, cup: see *cotyle*, 2.] A section of octopod cephalopods characterized by two or three rows of suckers on each arm, comprising the *Octopodidæ*, *Tremoctopodidæ*, and *Argonautidæ:* contrasted with *Monocotylea*.

polycotyledon (pol-i-kot-i-lē'don), *n.* [NL., < Gr. *πολύς*, many, + *κοτυληδών*, cavity: see *cotyledon*.] A plant whose embryo has a whorl of more than two cotyledons or seed-leaves. This is normally the case with the pines and most *Coniferæ*. It is true in appearance in a few aberrant dicotyledons, as the genus *Amsinckia* of the *Boraginaceæ*, whose cotyledons are two-parted, and one species of *Lepidium*, whose cotyledons are three-parted. See cut under *cotyledon*.

polycotyledonary (pol-i-kot-i-lē'don-ā-ri), *a.* [< *polycotyledon* + *-ary*[1].] In *zoöl.*, having many cotyledons, or tufts of fetal villi, as the chorion or placenta of a mammal.

polycotyledonous (pol-i-kot-i-lē'don-us), *a.* [< *polycotyledon* + *-ous*.] Possessing more than two cotyledons, as an embryo; producing an embryo with more than two cotyledons, as a plant.

polycotyledony (pol-i-kot-i-lē'don-i), *n.* [< *polycotyledon* + *-y*[3].] In *bot.*, an aberrant increase in the number of cotyledons, as in *Bichea acuminata*, where they vary from two to five.

polycracy (pō-lik'rā-si), *n.* [< Gr. *πολύς*, many, + *-κρατία*, < *κρατεῖν*, rule.] Government by many rulers; polyarchy.

polycrase (pol'i-krāz), *n.* [< Gr. *πολύς*, many, + *κρᾶσις*, a mixing: see *crasis*.] A rare titanoniobate of uranium, the metals of the yttrium group, and other bases: it is found in Norway, and also in North Carolina.

polycrotic (pol-i-krot'ik), *a.* [< Gr. *πολύς*, many, + *κρότος*, a rattling noise, beat, clash: see *dicrotic*.] Having several beats; having several secondary waves: said of some pulses.

Polyctenes (pō-lik'te-nēz), *n.* [NL. (Westwood; Giglioli, 1864), < Gr. *πολύς*, many, + *κτείς* (*κτεν-*), a comb.] A genus of *Heteroptera*, typical of the family *Polyctenidæ*. The head is armed beneath with rows of long flat spines, whence the name. The species are parasites of bats in Jamaica and China, and doubtless elsewhere. This remarkable form has been of disputed location, being by some referred to the *Anoplura* or true lice.

Polyctenidæ (pol-ik-ten'i-dē), *n. pl.* [NL., < *Polyctenes* + *-idæ*.] A family of aberrant heteropterous insects, represented by the genus *Polyctenes*. *Westwood*, 1874.

polycyclic (pol-i-sik'lik), *a.* [< Gr. *πολύκυκλος*, with many circles, < *πολύς*, many, + *κύκλος*, a ring, circle.] Having many rounds, turns, or whorls, as a shell.

Polycyrtida (pol-i-sèr'ti-dä), *n. pl.* [NL., < Gr. *πολύς*, many, + *κυρτός*, curved, + *-ida*.] A family of *Nassellaria*. The skeleton is an irregular fenestrated shell, composed of several unequal chambers, piled usually irregularly (rarely in definite order varying from that of the *Cyrtoidea*) round a primary capitulum (derivable from the twin shell of the *Sphyroida*), with or without spicules.

polycyrtidan (pol-i-sèr'ti-dan), *a.* and *n.* **I.** *a.* Of or pertaining to the *Polycyrtida*.

II. *n.* A member of the *Polycyrtida*.

polycystic (pol-i-sis'tik), *a.* [< Gr. *πολύς*, many, + *κύστις*, a bag: see *cyst*.] Having many cysts or sacs, as a tumor.

Polycystina (pol″i-sis-tī'nä), *n. pl.* [NL., < Gr. *πολύς*, many, + *κύστις*, bag (see *cyst*), + *-ina*[2].] Ehrenberg's name (given by him in the form *Polycistina*) of all those radiolarians which were known to him: loosely synonymous with *Radiolaria*.

polycystine (pol-i-sis'tin), *a.* and *n.* **I.** *a.* Of or pertaining to the *Polycystina:* now noting one of the divisions of *Radiolaria*.

II. *n.* A member of the *Polycystina*.

polycythemia (pol″i-si-thē'mi-ä), *n.* [NL. *polycythæmia*, < Gr. *πολύς*, many, + *κύτος*, a hollow (cell), + *αἷμα*, blood.] Excess of red corpuscles in the blood.

Polycyttaria (pol″i-si-tā'ri-ä), *n. pl.* [NL., < Gr. *πολύς*, many, + *κύτταρος*, a cell, < *κύτος*, a hollow.] A family or other group of *Radiolaria*, containing compound or colonial forms having many central capsules connected by extracapsular protoplasm; the polycyttarian radiolarians. The capsules are multinuclear, multiplying by fission, and the skeleton is spherical and fenestrated or composed of loose spicules, or absent. Leading forms are *Collosphæra*, *Sphærozoum*, and *Collozoum*. Also called *Collozoa*.

polycyttarian (pol″i-si-tā'ri-an), *a.* and *n.* [< Gr. *πολύς*, many, + *κύτταρος*, a cell, + *-ian*.] **I.** *a.* Having several central capsules; pluricapsular, as a radiolarian; of or pertaining to the *Polycyttaria*.

II. *n.* A member of the *Polycyttaria*.

polydactyl, polydactyle (pol-i-dak'til), *a.* and *n.* [< Gr. *πολυδάκτυλος*, many-toed, < *πολύς*, many, + *δάκτυλος*, a finger, a toe: see *dactyl*.] **I.** *a.* Having many digits, whether fingers or toes; exhibiting or characterized by polydactylism.

II. *n.* A polydactyl animal.

polydactylism (pol-i-dak'ti-lizm), *n.* [= F. *polydactylisme;* as *polydactyl* + *-ism*.] The condition of having many digits—that is, more than the normal number of fingers or toes; the state of being polydactyl.

Polydactylism of Hand.

polydactylous (pol-i-dak'ti-lus), *a.* Same as *polydactyl*.

polydactyly (pol-i-dak'ti-li), *n.* [< *polydactyl* + *-y*[3].] Same as *polydactylism*.

polydelphous (pol-i-del'fus), *a.* An improper form of *polyadelphous*.

polydimensional (pol″i-di-men'shon-al), *a.* [< Gr. *πολύς*, many, + E. *dimension* + *-al*.] Of more than three dimensions. *Nature*, XXX. 24.

polydipsia (pol-i-dip'si-ä), *n.* [NL., < Gr. as if *πολυδιψία, great thirst, < *πολυδίψιος*, very thirsty, *πολύδιψος*, making very thirsty, < *πολύς*, much, + *δίψα*, thirst.] In *pathol.*, excessive thirst. It is usually accompanied by hydruria.

polydromic (pol-i-drom'ik), *a.* Same as *polytropic*.

polydymite (pō-lid'i-mīt), *n.* [< Gr. *πολύς*, many, + *δίδυμος*, twin.] A sulphid of nickel, occurring in isometric octahedrons and in massive forms, of a light-gray color and brilliant metallic luster. A ferriferous variety from Ontario carries a small amount of platinum.

polyedral, polyedron, etc. See *polyhedral*, etc.

polyembryonate (pol-i-em'bri-ō-nāt), *a.* [As *polyembryon-y* + *-ate*[1].] In *bot.*, pertaining to polyembryony; consisting of or having several embryos.

polyembryonic (pol-i-em-bri-on'ik), *a.* [As *polyembryon-y* + *-ic*.] Same as *polyembryonate*.

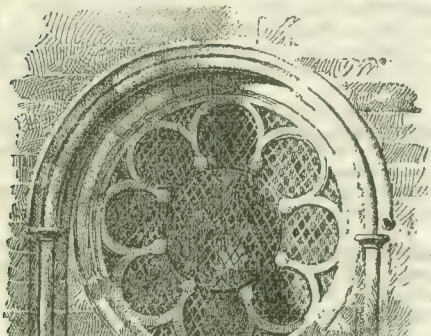
polyembryony (pol-i-em'bri-ō-ni), *n.* [< Gr. *πολύς*, many, + *ἔμβρυον*, an embryo: see *embryo*.] In *bot.*, the production or existence of two or more embryos in one seed—a phenomenon occurring, sometimes regularly and sometimes abnormally, in the development of the ovules of flowering plants. In angiospermous plants this is usually the result, not of the fertilization of a number of egg-cells, but of the formation, in the nucellus, of adventitious buds which grow into the embryo-sac and give rise to a number of embryos. Not all of the embryos reach maturity, but a number frequently do, and are capable of producing new plants. Polyembryony occurs in *Enonymus*, *Niobe*, *Citrus*, *Alchornea*, and other genera.

polyemia, *n.* See *polyhemia*.

polyergic (pol-i-ėr'jik), *a.* [< Gr. *πολύεργος*, much-working, < *πολύς*, much, + *ἔργον*, work.] Acting, or endowed with the power of acting, in many ways.

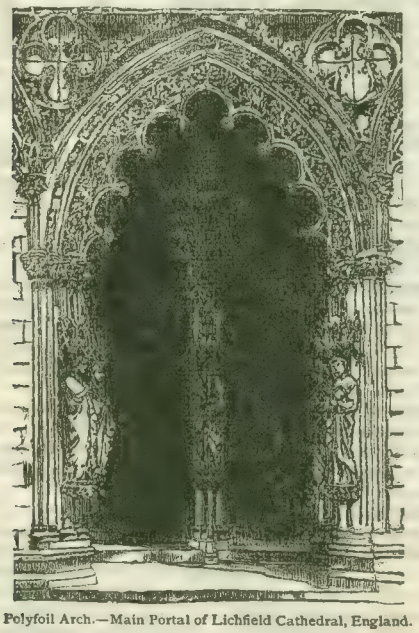
Polyergus (pol-i-ėr'gus), *n.* [NL. (Latreille, 1802), < Gr. *πολύεργος*, much-working, < *πολύς*, much, + *ἔργον*, work.] A genus of *Formicidæ*, having the mandibles almost cylindrical, curved, very narrow, and acute at the tip, ocelli present, and the wings of the female with only one discoidal cell; the Amazon-ants. Two species are found in the United States, but most are tropical or subtropical. *P. rufescens* is a slave-making ant which has lost the building instinct and shows no care for its young, and in which the mandibles have lost their teeth —all as a result of their entire dependence upon slaves.

polyesthesia, *n.* See *polyæsthesia.*



polyesthesis (pol″i-es-thē'sis), *n.* Same as *polyæsthesia.*

polyesthetic, polyæsthetic (pol″i-es-thet'ik), *a.* [< *polyæsthesia* (*-thet-*) + *-ic* (cf. *esthetic*).] Of or pertaining to polyæsthesia.



polyethnic (pol-i-eth'nik), *a.* [< Gr. *πολύς*, many, + *ἔθνος*, a nation, people.] Inhabited by or containing many races or nationalities.

polyfoil (pol'i-foil), *n.* and *a.* [< Gr. *πολύς*, many, + E. *foil*[1]. Cf. *multifoil* and *polyphyllous.*] **I.** *n.* In *arch.*, an opening or ornament consisting of several combined foliations; specifically, a combination of more than five foils; a multifoil.

II. *a.* Consisting or composed of, or decorated with, more than five foils or foliations: as, a *polyfoil* arch.—**Polyfoil arch** an arch the head of which is divided into a number of foils or foliations.

Polyfoil Window.—Hereford Cathedral, England; 13th century.

Polyfoil Arch.—Main Portal of Lichfield Cathedral, England.

Such arches occur especially in medieval architecture later than the time of highest perfection.

Polygala (pō-lig'a-lă), *n.* [NL. (Malpighi, 1675), < L. *polygala*, < Gr. *πολύγαλον*, milkwort, < *πολύς*, much, + *γάλα*, milk.] 1. A genus of herbaceous plants, the milkworts, of the family *Polygalaceæ*, characterized by the great enlargement of the two petaloid inner sepals of its irregular calyx, and by its eight anthers, its two-celled compressed roundish capsule, and its three small petals united into a tube, and often augmented by a lobed crest at the top. There are about 260 species, natives of temperate and warm regions, widely prevalent except in Australia. They are small herbs or sometimes shrubby plants, usually with alternate leaves, and terminal spikes of small or showy flowers of red, yellow, green, white, and other colors. Several cultivated purple-flowered species from the Cape of Good Hope are evergreen shrubs reaching 9 feet in height. *P. lutea*, mainly of the southern United States, is known locally as *bachelor's-buttons*. *P. paucifolia*, another handsome species, is the fringed polygala or flowering wintergreen of the United States; this and *P. polygama* of America are remarkable for their two kinds of flowers, having crimson or purple open flowers above ground, and also abundant white or green unexpanding but fertile subterranean flowers on slender white branches. The root of *P. Senega* is a stimulating expectorant and diuretic, and in large doses cathartic and emetic. It is called *senega* in medicine. (See *senega.*) *P. thesioides* is the chinchin of Chilo, a powerful diuretic, and *P. venenosa*, the katu-tutum of Java, is poisonous to the touch. Many species are claimed as remedies against snake-bites, as *P. viridescens* and *P. paucifolia*, common reddish-flowered plants of the United States, and others in the West Indies, Cape Colony, and the Himalayas. For *P. vulgaris*, also sometimes called *procession-flower* or *passion-flower*, see *milkwort*, 1, *cross-flower*, *gang-flower*, and *rogation-flower.*

2. [*l. c.*] A plant of this genus.

Polygalaceæ (pol″i-gā-lā'sē-ē), *n. pl.* [NL. (Reichenbach, 1828), < *Polygala* + *-aceæ.*] A family of dicotyledonous choripetalous plants of the order *Geraniales*, characterized by its three or five petals, usually eight monadelphous stamens, straight embryo in fleshy albumen, and five sepals, of which the two inner are larger, wing-like, and petaloid. The fruit is either a capsule or a dry or fleshy indehiscent fruit. It includes about 750 species, widely dispersed throughout temperate and warm climates, belonging to 10 genera, of which *Polygala* is the type. They are herbs or undershrubs, rarely becoming small trees, erect or sometimes twining or climbing, with usually entire alternate leaves, and solitary, spiked, or racemed flowers.

polygalaceous (pol″i-gā-lā'shius), *a.* [< *Polygalaceæ* + *-ous.*] Of or pertaining to the *Polygalaceæ.*

Polygaleæ (pol-i-gā'lē-ē), *n. pl.* [NL. (Jussieu, 1809), < *Polygala* + *-eæ.*] The principal tribe of plants of the family *Polygalaceæ*, containing besides *Polygala*, the type, 7 other genera.

Polygalinæ (pol″i-gā-lī'nē), *n. pl.* [NL. (Bentham and Hooker, 1862), < *Polygala* + *-inæ.*] A cohort of dicotyledonous choripetalous plants of the series *Thalamifloræ*, containing the families *Polygalaceæ*, *Tremandraceæ*, *Vochyaceæ*, and *Pittosporaceæ*. The last of these is now placed in the order *Rosales*. The rest fall within the order *Geraniales*, but the group differs still further from the subseries (suborder) *Polygalineæ* of Engler, which does not include the *Vochyaceæ.*

polygaline (pō-lig'a-lin), *n.* [= F. *polygaline;* as *Polygala* + *-ine*[2].] A substance obtained from *Polygala Senega*, apparently identical with *saponin.* Also called *polygalic acid* and *senegin.*

polygam (pol'i-gam), *n.* [< *Polygam-ia.*] A plant of the Linnean class *Polygamia.*

Polygamia (pol-i-gā'mi-ă), *n. pl.* [NL., < Gr. *πολύγαμος*, polygamous: see *polygamous.*] In the Linnean system of classification, a class of plants bearing both hermaphrodite flowers and those with the sexes separated, the different flowers being scattered either on the same plant or on two or three distinct individuals.

polygamian (pol-i-gā'mi-an), *a.* [< *Polygamia* + *-an.*] Belonging or relating to the *Polygamia;* producing hermaphrodite flowers, and also male or female flowers, or both.

polygamist (pō-lig'a-mist), *n.* [= Pg. *polygamista;* as *polygam-y* + *-ist.*] A person who practises polygamy, or who maintains its propriety.

polygamize (pō-lig'a-mīz), *v. i.*; pret. and pp. *polygamized*, ppr. *polygamizing.* [< *polygam-y* + *-ize.*] To practise polygamy. *Sylvester*, tr. of Du Bartas's Weeks, ii., The Handy-Crafts.

polygamodiœcious (pō-lig″a-mō-dī-ē'shus), *a.* [< LGr. *πολύγαμος*, polygamous, + NL. *diœcius*, diœcious.] Same as *diœciously polygamous.* See *polygamous*, 3.

polygamous (pō-lig'a-mus), *a.* [= F. *polygame* = Sp. *polígamo* = Pg. *polygamo* = It. *poligamo*, polygamous, a polygamist; < LGr. *πολύγαμος*, often-married, polygamous, < Gr. *πολύς*, many, + *γάμος*, marriage.] 1. Relating to or characterized by polygamy: as, *polygamous* marriage (a union including more than one spouse of either sex, sanctioned in respect to plurality of wives by the law of some countries, but not recognized as marriage by the law of Christian states).—2. In *zoöl.*, mating with more than one individual of the opposite sex; polyandrous or polygynous, especially the latter, which is more frequent among animals than the former.—3. In *bot.*, bearing both unisexual and bisexual or hermaphroditic flowers in the same species. According to the tendency to become either monœcious or diœcious, they are called *monœciously* or *diœciously polygamous* respectively. In the case of mosses having both barren and fertile inflorescences (flowers) variously disposed on the same plant, *polygamous* is also used for *polygamian.*

polygamy (pō-lig'a-mi), *n.* [Formerly *polygamie, poligamy*, < F. *poligamie*, now *polygamie*, = Sp. *poligamia* = Pg. *polygamia* = It. *poligamia*, < LGr. *πολυγαμία*, polygamy, < *πολύγαμος*, polygamous: see *polygamous.*] 1. Marriage with more than one spouse; the having of a plurality of wives or husbands at the same time. In Christian countries, when a man has more wives than one, or a woman more husbands than one, at the same time, he or she is punishable for polygamy; but if there was a separate marriage with each the first marriage would be valid notwithstanding the subsequent ones, and the later ones would be void. The offense of contracting the subsequent marriage is now termed *bigamy.* But polygamy in the form of polygyny is allowed in some countries, especially among Mohammedans, and was held a matter of faith and duty by the Mormons. Compare *polyandry.*

2. In *zoöl.*, the practice or habit of having more than one mate of the opposite sex; polyandry or polygyny. In mammals, polygamy is the rule with pinniped and various other carnivorous quadrupeds, with the hoofed quadrupeds in general, and in many other groups, especially in its polygynous form. In the class of birds, where monogamy is the rule, polygamy is conspicuous in the rasorial or gallinaceous order, and is exceptionally witnessed in some members of the monogamous orders, as in the cowbirds and cuckoos among passerine and picarian birds.

polygar (pol'i-gär), *n.* See *poligar.*

polygarchy (pol'i-gär-ki), *n.* [= F. *poligarchie* (Cotgrave) = Sp. *poligarquia* = Pg. *polygarchia;* an erroneous form (appar. simulating *oligarchy*, etc.) for *polyarchy:* see *polyarchy.*] An erroneous form of *polyarchy.*

polygastrian (pol-i-gas'tri-an), *a.* and *n.* [< *polygastria* + *-an.*] Same as *polygastric.*

polygastric (pol-i-gas'trik), *a.* and *n.* [< Gr. *πολύς*, many, + *γαστήρ* (*γαστρ-*), stomach.] **I.** *a.* Having or appearing to have many stomachs, as an animalcule; specifically, of or pertaining to the *Polygastrica.*

II. *n.* A polygastric animalcule.

Polygastrica (pol-i-gas'tri-kă), *n. pl.* [NL.: see *polygastric.*] Ehrenberg's name (1830) of those animalcules the appearance of whose movable food-vacuoles led him to suppose they had many proper digestive cavities or stomachs. The term had special application to ciliate infusorians, of which it is now a disused synonym, and less exactly of *Infusoria* at large.

polygastrulation (pol-i-gas-trŭ-lā'shon), *n.* [< Gr. *πολύς*, many, + E. *gastrulation.*] Multiple gastrulation.

★**polygenesis** (pol-i-jen'e-sis), *n.* [< Gr. *πολύς*, many, + *γένεσις*, origin: see *genesis.*] In *biol.*, generation or origination from several separate and independent germs; the doctrine that organisms took rise from cells or embryos of different kinds. It is akin, as a biological theory, to the notion of special creations, and in its application to man is commonly called *polygeny.*

★**polygenetic** (pol″i-jē-net'ik), *a.* [< *polygenesis*, after *genetic.*] 1. Formed by several different causes, in several different ways, or of several different parts.

A composite or *polygenetic* range or chain, made up of two or more monogenetic ranges combined.
Amer. Jour. Sci., 3d ser., V. 429.

2. Pertaining to or characterized by polygenesis.

polygenic (pol-i-jen'ik), *a.* [< *polygen-ous* + *-ic.*] Same as *polygenous*, 1. *Fallows.*

polygenism (pō-lij'e-nizm), *n.* [< *polygen-ous* + *-ism.*] Same as *polygeny.*

polygenist (pō-lij'e-nist), *n.* and *a.* [< *polygen-ous* + *-ist.*] **I.** *n.* An adherent of or believer in polygeny; a special-creationist; particularly, one who advocates the view that the human race consists of several distinct zoölogical races or species.

The granting of the *Polygenist* premises does not, in the slightest degree, necessitate the *Polygenist* conclusion.
Huxley, Critiques and Addresses, p. 163.

II. *a.* Same as *polygenous.*

polygenistic (pol″i-jē-nis'tik), *a.* [< *polygenist* + *-ic.*] Having independent origins, as the races of man or the domestic animals; of or pertaining to polygeny.

polygenous (pō-lij'e-nus), *a.* [< LGr. *πολυγενής*, of many kinds or families, < Gr. *πολύς*, many, + *γένος*, kind: see *genus, -genous.*] 1. Containing or consisting of many different sorts or kinds of things; heterogeneous; composite: as, a *polygenous* mountain (one made up of different strata of rocks).—2. Of or pertaining to polygeny.

polygeny (pō-lij'e-ni), *n.* [< LGr. *πολυγενής*, of many kinds or families: see *polygenous* and *-geny.*] In *anthropol.*, the multiple genesis of man; the supposed independent origin of the human races, as opposed to *monogenism*, or the theory of unity of genesis.

polyglossary (pol-i-glos'ą-ri), *n.*; pl. *polyglossaries* (-riz). [< Gr. *πολύς*, many, + ML. *glossarium*, glossary: see *glossary.*] A glossary or dictionary in several languages. *Gent. Mag.*

polyglot, polyglott (pol'i-glot), *a.* and *n.* [= F. *polyglotte* = Sp. *poligloto* = Pg. *polyglotto* = It. *poliglotto*, < ML. *polyglottus*, < Gr. *πολύγλωττος*, *πολύγλωσσος*, many-tongued, speaking many languages, < *πολύς*, many, + *γλῶττα*, *γλῶσσα*, tongue, language.] **I.** *a.* Using or containing many languages; many-languaged: as, a *polyglot* lexicon or Bible.

II. *n.* **1.** A book containing in parallel columns versions of the same text in several different languages. The most important polyglots are editions of the Bible in which the original Hebrew and Greek texts are given along with the chief versions in other languages. The chief polyglots are — the London polyglot (published in 1657), giving versions in whole or in part in Hebrew, Greek, Chaldee, Syriac, Arabic, Ethiopic, Latin, etc.; the Complutensian polyglot (see *Complutensian*); and the Antwerp and Paris polyglots. A recent collection is Bagster's polyglot.

2. One who understands or uses many languages.

A *Polyglot*, or good Linguist, may be also termed a useful learned Man, especially if versed in School-Languages. *Howell*, Letters, iii. 8.

polyglottic (pol-i-glot'ik), *a.* [< *polyglot* + *-ic.*] Same as *polyglottous.*

polyglottous (pol-i-glot'us), *a.* [< Gr. *πολύγλωττος*, speaking many languages: see *polyglot*, *a.*] Speaking many languages.

While working as a Missionary among the *Polyglottous* tribes of America. *Max Müller*, Sci. of Lang., p. 139.

★**polygon** (pol'i-gon), *n.* [Formerly *polygone*; = F. *polygone* = Sp. *poligono* = Pg. *polygono* = It. *poligono*, a polygon, polygonal, < LL. *polygonum*, < Gr. *πολύγωνον*, a polygon, neut. of *πολύγωνος*, having many angles, < *πολύς*, many, + *γωνία*, corner, angle.] In *geom.*, a closed figure formed by a number of straight lines, each one intersecting two others; especially, a plane figure of this sort; a figure with numerous angles. — **Acceleration-polygon.** Same as *acceleration-diagram* (*a*) (which see, under *diagram*). — **Closed polygon,** a plane polygon inclosing an area: opposed to *open polygon*, which is only a part of a plane polygon. — **Complete polygon,** a plane figure connecting every one of a number of angular vertices with every other one. — **Concave polygon.** Same as *reëntering polygon.* — **Conjugate polygon of *n* sides,** two sets of *n* lines, each cutting all the lines of the other set upon one curve of the *n*th order. — **Convex polygon,** a plane rectilinear figure without reëntrant angles: opposed to *concave polygon.* — **Displacement-polygon.** Same as *displacement-diagram* (*a*) (which see, under *diagram*). — **Funicular polygon,** originally an open polygon representing a series of connected ties, but extended to a closed polygon representing a series of virtual ties and struts. — **Gauche polygon.** See *gauche.* — **Inscriptible polygon,** a polygon with all its vertices lying on one circle. — **Polygon of forces,** a diagram used in graphical statics, depending on a theorem of the same name due to Leibnitz; a polygon each side of which represents in magnitude and direction one of the component forces acting on a material point: if then the polygon is closed, it represents forces in equilibrium. See diagram under *force*[1], 8. — **Reëntering polygon,** a polygon containing one or more reëntrant angles. — **Regular polygon,** a polygon all whose sides and angles are equal: it is further generally understood that the perimeter wraps around the interior only once. — **Similar polygon.** See *similar.* — **Skew polygon,** a non-plane polygon. — **Spherical polygon,** a polygon whose sides lie on a sphere, and are arcs of great circles. — **Steinerian polygon,** a polygon in the Steinerian sense — that is, a figure composed of a number of vertices with connecting lines. — **Stellated polygon,** a polygon which wraps its interior more than once.

Polygonaceæ (pol″i-gō-nā'sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Polygonum* + *-aceæ.*] A family of dicotyledonous apetalous plants, type of the order *Polygonales.* It is characterized by a colored or greenish calyx with four, five, or six imbricated segments, an ovary with one cell and one orthotropous ovule, two or three styles or style-branches, from six to nine perigynous stamens, and stipules with each pair united into a cylindrical sheath (ocrea), or at least leaving, on falling away, a scar forming a complete ring around the stem. It includes about 800 species, belonging to 8 tribes and 30 genera, varying in habit according to distribution, the numerous herbaceous species being mainly in temperate or montane regions, represented by shrubs in western Asia and the Mediterranean, and by trees in tropical America. They bear alternate and usually entire leaves, generally with dilated and clasping petiole-base. The fruit is a small seed-like nut, three-angled or compressed, and inclosed by the withering, persistent flower. Many are weedy plants, especially in the large genera *Rumex* (dock), *Eriogonum*, and *Polygonum* (the type). The most useful genera are *Fagopyrum* (buckwheat) and *Rheum* (rhubarb). See also *Oxyria*, *Coccolobis*, *Kœnigia.*

polygonaceous (pol″i-gō-nā'shius), *a.* In *bot.*, like or belonging to the *Polygonaceæ.*

polygonal (pō-lig'ō-nal), *a.* [= F. Pg. *polygonal*; as *polygon* + *-al.*] Having the form of a polygon; having many angles. — **Polygonal numbers,** in *arith.*, the successive sums from unity up of a series of numbers in arithmetical progression beginning with 1. When the common difference of the series is 1, the sums of the terms give the *triangular* numbers; when the common difference is 2, the sums give the *square* numbers; when it is 3, the sums give the *pentagonal* numbers, and so on. (See *figurate number*, under *figurate.*) These numbers are understood to be called *polygonal numbers* from possessing the property that the same number of points may be arranged according to a certain rule in the form of that polygonal figure to which it belongs. In the cut, 5, 12, and 22 points are shown arranged in pentagonal forms, 5, 12, and 22 being pentagonal numbers.

polygonate (pō-lig'ō-nāt), *a.* [< Gr. *πολύς*, many, + *γόνυ* (*γονατ-*), knee, joint: see *knee.*] Many-jointed: said of some plants and animals. *Thomas*, Med. Dict.

Polygonateæ (pol″i-gō-nā'tē-ē), *n. pl.* [NL. (Bentham and Hooker, 1883), < *Polygonatum* + *-eæ.*] A tribe of liliaceous plants, typified by the genus *Polygonatum*, the Solomon's-seal. It is characterized by a herbaceous leafy stem, nearly or quite unbranched, an inflorescence of axillary flowers or a raceme, rarely a panicle, anthers introrsely dehiscent, the fruit a berry, and anatropous ovules. It includes 9 genera and about 72 species. See *Polygonatum*, *Vagnera*, *Maianthemum*, *Streptopus.*

Polygonatum (pol-i-gon'ą-tum), *n.* [NL. (Tournefort, 1700), < L. *polygonatum*, < Gr. *πολυγόνατον*, Solomon's-seal (so called from the many-jointed rootstocks), < *πολύς*, many, + *γόνυ* (*γονατ-*), knee.] A genus of liliaceous plants, the Solomon's-seal, type of the tribe *Polygonateæ.* It is characterized by the nodding cylindrical flowers, having six short little-spreading lobes, and placed one or two or rarely more together at an axil, and by the undivided style and small stigma. There are about 20 species, scattered through all north temperate regions. They bear a single erect leafy stem from a horizontal thickened deep-buried or creeping rootstock, which is terminated by the upturned bud for the stem of the following year, and is marked by the circular scars of previous similar stems. These seal-like impressions gave the rootstock great fame for magic powers in the middle ages, as able to seal up and heal all wounds, having been stamped with the seal of Solomon, or of the Virgin Mary, whence the popular names *Solomon's-seal* and *Our-Lady's-seal*, the former of which is still in use. (See *Solomon's-seal* and *lady's-seal.*) From its bell-like flowers, resembling a string of tintinnabula, by the monks ascribed to King David, the common English species, *P. multiflorum*, has derived the name *David's-harp*; also, from its upward series of leaves, *ladder-to-heaven*, and, from resemblances to other plants, *lily-of-the-mountain* and *fraxinell.*

polygoneutic (pol″i-gō-nū'tik), *a.* [< Gr. *πολυγονεύεσθαι*, multiply, < *πολύς*, many, + *γόνος*, offspring.] In *entom.*, many-brooded; having several broods during a single year.

polygoneutism (pol″i-gō-nū'tizm), *n.* [< *polygoneut-ic* + *-ism.*] The state or character of being polygoneutic.

polygonometric (pol-i-gon-ō-met'rik), *a.* [< *polygonometr-y* + *-ic.*] Pertaining to polygonometry.

polygonometry (pol″i-gō-nom'et-ri), *n.* [= F. *polygonométrie*, < Gr. *πολύγωνος*, many-angled (see *polygon*), + *-μετρία*, < *μετρεῖν*, measure.] An extension of trigonometry to polygons; the doctrine of polygons, as trigonometry is the doctrine of triangles.

Polygonopoda (pol″i-gō-nop'ō-dą), *n. pl.* [NL., < Gr. *πολύγωνος*, many-angled, + *ποῦς* (*ποδ-*) = E. *foot.*] The sea-spiders: a synonym of *Podosomata* and *Pycnogonida.*

polygonoscope (pol'i-gon-ō-skōp), *n.* [< Gr. *πολύγωνος*, many-angled, + *σκοπεῖν*, view.] An instrument of the nature of the kaleidoscope, used to produce a great variety of geometrical patterns by the reflections from two mirrors supported in a case and connected by an adjustable hinge; specifically, a compact form of carpet-exhibitor for the multiple reproduction of a pattern.

polygonous (pō-lig'ō-nus), *a.* [< Gr. *πολύγωνος*, having many angles: see *polygon.*] Polygonal.

Polygonum (pō-lig'ō-num), *n.* [NL. (Tournefort, 1700), < L. *polygonum*, < Gr. *πολύγονον*, knot-grass, polygony: see *polygon.*] A large genus of plants, type of the family *Polygonaceæ* and tribe *Polygoneæ.* It is characterized by a stem with swollen joints and conspicuous stipular sheaths, flowers with eight or six stamens, two or three styles, and a five-parted and commonly colored perianth, remaining with little change around the black and shining or opaque hard three-angled or compressed nutlet, which is of nearly the same length as the sepals. There are about two hundred species, widely distributed, and some of them nearly or quite cosmopolitan. They are most abundant in the northern hemisphere, but also extend into arctic, alpine, and tropical regions. Although of polymorphous habit, they are easily distinguished by the swollen joints sheathed with the united stipules. (See cut under *node.*) Nearly all are herbs, a few shrubby at the base. Some are tall and erect, as *P. orientale*, the prince's-feather (also called *ragged-sailor*); a very few are floating, some erect and aquatic, and others climbing or trailing, as *P. scandens*, now esteemed for baskets in greenhouses, and *P. vaccinifolium*, the rock-knotweed, from the Himalayas, used for ornamental rockeries. The majority are, however, spreading weedy plants, especially in the section *Avicularia*, a group of about 50 species with wiry and short or prostrate stems, typified by *P. aviculare* (see *knotgrass*, *doorweed*, and *bird's-tares*), also known by many other names, as *allseed*, *armstrong*, *beggar-weed*, *cow-grass*, *crabweed*, *goose-grass*, *iron-grass*, *knotwort*, *ninety-knot*, *pinkweed*, *sparrow-tongue*, *swine's-grass*, etc. Another section, also of about 50 species, *Persicaria*, with erect but weak and juicy stems, is typified by the abundant weed *P. Persicaria*, the lady's-thumb, also called, from the peach-leaf shape of the leaves, *persicary* and *peachwort*, from their dark central spot, *heart's-ease* and *spotted knotweed*, and, from the jointed stem, *crab's-claw* and *redshanks.* Several related species are known as *smartweed*, especially *P. Hydropiper*, also called in England *redknees*, *cider-age*, *lake-weed*, etc., and for which see also *water-pepper*, *culrage*, and *arse-smart.* A related and handsome-flowered species of American river-margins, introduced into cultivation as a source of tannin, is *P. amphibium*, the willow-grass or water-persicaria. The general name *knotweed* is a book-name for many of the species. Many are mild astringents, others strongly diuretic and acid; the most important in medicine is *P. Bistorta* (see *bistort*, *snakeweed*, *adder's-wort*, *astrology*, and *dragonwort*), also known in England as *redlegs*, *twice-writhen*, *Easter-ledges*, etc. *P. Fagopyrum* of many authors, the cultivated buckwheat, is now separated (see *Fagopyrum*). *P. tinctorium* is the Chinese indigo-plant, cultivated in France and Belgium, as also in Japan, as a source of a blue dye, a substitute for indigo. The leaves of *P. orientale* are used in South America as a substitute for tobacco. For the climbing weed *P. Convolvulus*, also called *cornbind*, *bearbine*, *climbing buckwheat*, and *black bindweed*, see *ivy-bindweed.* For other species, see *serpent-grass*, *false buckwheat* (under *buckwheat*), *tear-thumb* (and cut of leaf under *hastate*), and *scratch-grass.* See also cut under *ocrea.*

polygony (pō-lig'ō-ni), *n.* [= OF. *polygone* (F. *polygonum*) = Sp. *poligono* = Pg. *polygono* = It. *poligono*; < L. *polygonos*, *polygonon*, *polygonium*, < Gr. *πολύγονον*, knot-grass, < *πολύς*, many, + *γόνυ*, knee, joint, = E. *knee.*] A plant of the genus *Polygonum*; specifically, the *Polygonum aviculare*, or knot-grass.

Polygordiidæ (pol″i-gôr-dī'i-dē), *n. pl.* [NL., < *Polygordius* + *-idæ.*] A family of worms, typified by the genus *Polygordius*, of a low and generalized type of structure.

Polygordius (pol-i-gôr'di-us), *n.* [NL. (Schneider, 1866), < Gr. *πολύς*, many, + Γόρδιος, Gordius (with ref. to the Gordian knot): see *Gordian*, *Gordius.*] The typical genus of the family *Polygordiidæ*, referred to the annelids as type of an order, *Archiannelida.* *P. purpureus* and *P. lacteus* are two species, found in the sands of European seas.

★**polygram** (pol'i-gram), *n.* [= Pg. *polygramo* = It. *poligramma*, < Gr. *πολύγραμμος*, marked with many stripes, < *πολύς*, many, + *γραμμή*, a stroke, line, *γράμμα*, a mark, line, etc., < *γράφειν*, write.] A figure consisting of many lines.

polygrammatic (pol″i-gra-mat'ik), *a.* [As *polygram* + *-atic*[2] (cf. *grammatic*).] Pertaining or relating to polygrams. — **Polygrammatic telegraph,** a form of semaphore invented by Captain Pasley in 1804.

★**polygraph** (pol'i-grâf), *n.* [= F. *polygraphe* = Pg. *polygrapho* = It. *poligrafo*, < Gr. *πολυγράφος*, writing much, < *πολύς*, much, + *γράφειν*, write.] **1.** An instrument for multiplying copies of a writing; a gelatin copying-pad. — **2.** An author of many works. — **3.** A collection of different works written either by one or by different authors; a book containing articles or treatises on different subjects.

polygraphic (pol-i-graf'ik), *a.* [= F. *polygraphique* = Pg. *polygraphico*; as *polygraph* + *-ic.*] **1.** Pertaining to multiplication of copies of a writing: as, a *polygraphic* instrument. — **2.** Done with a polygraph: as, a *polygraphic* copy or writing. — **Polygraphic paper.** See *paper.*

polygraphical (pol-i-graf'i-kal), *a.* [< *polygraphic* + *-al.*] Same as *polygraphic.*

polygraphy (pō-lig'ra-fi), *n.* [= F. *polygraphie* = Sp. *poligrafía* = Pg. *polygraphia* = It. *poligrafia*, < LGr. *πολυγραφία*, a writing much, < Gr. *πολύς*, much, + *γράφειν*, write.] **1.** Voluminous writing.

No less admirable his [Dr. Willet's] industry, appearing in his Synopses, Comments, and Commentaries, insomuch that one, considering his *polygraphy*, said merrily that he must write while he slept. *Fuller*, Worthies, Cambridgeshire.

2. The art of writing in various ciphers, and also of deciphering such writings.

polygroove (pol'i-grōv), *v. t.*; pret. and pp. *polygrooved*, ppr. *polygrooving.* [< Gr. *πολύς*, many, + E. *groove.*] To make many grooves in.

[The guns] are similar in construction, and will both be *polygrooved* in the rifling. *Times* (London).

polygyn (pol'i-jin), *n.* [< *Polygyn-ia.*] In *bot.*, a plant of the order *Polygynia*.

polygynia[1] (pol-i-jin'i-ạ), *n.* [NL.] Same as *polygyny*.

In certain cantons of Media, according to Strabo, *polygunia* was authorised by express law, which ordained every inhabitant to maintain at least seven wives.
M'Lennan, Primitive Marriage (ed. 1865), viii.

Polygynia[2] (pol-i-jin'i-ạ), *n. pl.* [NL., < Gr. *πολύς*, many, + *γυνή*, female (in mod. bot. pistil).] One of the orders in any of the first thirteen classes of the Linnean system, comprehending those plants which have flowers with more than twelve styles or stigmas.

polygynian (pol-i-jin'i-ạn), *a.* [< *polygynia*[1] + *-an.*] Same as *polygynous*.

polygynic (pol-i-jin'ik), *a.* [< *polygyn-ous* + *-ic.*] Same as *polygynous*.

polygynious (pol-i-jin'i-us), *a.* Same as *polygynous*.

polygynist (pō-lij'i-nist), *n.* [< *polygyn-y* + *-ist.*] One who or that which practises polygyny; an advocate of polygyny.

polygynœcial (pol″i-ji-nē'shal), *a.* [< Gr. *πολύς*, many, + NL. *gynœcium* + *-al.*] In *bot.*, formed by the united pistils of many flowers: said of multiple fruits.

polygynous (pō-lij'i-nus), *a.* [= F. *polygyne*; as *polygyn* + *-ous.*] 1. In *bot.*, having many styles; belonging to the order *Polygynia*.—2. Polygamous, as a male; having more than one female as wife or mate.

Few, perhaps, would stigmatize a legal *polygynous* connexion as impure, however they might disapprove of the law and of the state of society in which such a law was established. *H. Sidgwick*, Methods of Ethics, p. 337.

★**polygyny** (pō-lij'i-ni), *n.* [< NL. *polygynia*, < Gr. **πολυγυνία*, the condition of having many wives, < *πολυγύνης*, *πολυγύναιος*, having many wives, < *πολύς*, many, + *γυνή*, woman, wife.] Marriage of one man with more than one woman at the same time; polygamy as practised by the male.

Polygyny is more frequent than polyandry, being the usual case of polygamy as practised by man and the lower animals.

polygyral (pol-i-jī'ral), *a.* [< Gr. *πολίγυρος*, with many windings, < *πολύς*, many, + *γῦρος*, a circle, ring: see *gyre.*] Having many whorls or gyres, as a univalve shell. *W. G. Binney.*

polyhæmia, *n.* See *polyhemia*.

polyhalite (pol-i-hal'īt), *n.* [< Gr. *πολύς*, many, + *ἅλς* (*ἁλ-*), salt, + *-ite*[2].] A mineral or salt occurring in masses of a fibrous structure, of a brick-red color, being tinged with iron. It is a hydrous sulphate of calcium, magnesium, and potassium. It is found at Ischl in Austria, and also at Berchtesgaden in Bavaria.

polyhedra, *n.* Plural of *polyhedron*.

polyhedral (pol-i-hē'dral), *a.* [< *polyhedron* + *-al.*] Having many faces, as a solid body; of or pertaining to a polyhedron. Also *polyhedric*, *polyhedrous*, *polyedral*, *polyedrous*.—**Polyhedral function**, an algebraic function which remains unchanged when the variable undergoes any of those transformations which would carry a polyhedron, stereographically projected upon the plane of a complex quantity, into a congruent position.

polyhedric (pol-i-hē'drik), *a.* [= F. *polyédrique*; as *polyhedr-on* + *-ic.*] Same as *polyhedral*.

polyhedrical (pol-i-hē'dri-kal), *a.* [< *polyhedric* + *-al.*] Same as *polyhedric*. [Rare.]

polyhedrometric (pol-i-hē-drō-met'rik), *a.* [< *polyhedrometr-y* + *-ic.*] Pertaining to polyhedrometry.

polyhedrometry (pol″i-hē-drom'et-ri), *n.* [< *polyhedron* + Gr. *μετρία*, < *μετρεῖν*, measure.] The system of theorems concerning the numbers of faces, edges, and summits of polyhedra, the numbers of edges belonging to the different faces and summits, and other allied matters. The name is ill formed to express this idea.★

polyhedron (pol-i-hē'dron), *n.*; pl. *polyhedra*, *polyhedrons* (-drạ, -drọnz). [Also *polyedron*; = F. *polyèdre* = Sp. *poliedro* = Pg. *polyedro* = It. *poliedro*, < Gr. *πολύεδρον*, neut. of *πολύεδρος*, with many bases, < *πολύς*, many, + *ἕδρα*, seat, base.] 1. In *geom.*, a solid bounded by plane faces.—2. In *optics*, a multiplying glass or lens consisting of several plane surfaces disposed in a convex form, through each of which an object is seen.—3. In certain fresh-water algæ, one of the angular cells with horn-like processes formed by the swarm-cells produced by the germinating zygospore, in which zoöspores are produced which unite to form new cœnobia.—**Conjugate polyhedra**, two polyhedra each having a summit for every face of the other.—**Doubly reversible polyhedron**, a polyhedron which exhibits, in the faces touching the base, a series repeated twice. So in a *trebly reversible polyhedron*, etc., the series is repeated thrice, etc.—**Generator of a polyhedron.** See *generator*.—**Regular polyhedron**, a polyhedron that has all its summits alike in all respects and composed of plane angles of the same magnitude: sometimes understood as excluding the stellated polyhedra. See cut under *octahedron*.—**Semi-regular polyhedron**, a polyhedron all the summits of which are alike, while the plane angles which compose the summits are not all alike.—**Stellated polyhedron**, a polyhedron that inwraps its center more than once.

polyhedrous (pol-i-hē'drus), *a.* [= F. *polyèdre* = Sp. *poliedro* = Pg. *polyedro* = It. *poliedro*, < Gr. *πολύεδρος*, with many bases: see *polyhedron*.] Same as *polyhedral*.

polyhemia, polyhæmia (pol-i-hē'mi-ạ), *n.* [NL., < Gr. *πολυαιμία*, fullness of blood, < *πολύς*, much, + *αἷμα*, blood.] Excess of blood; plethora. Also *polyemia*, *polyæmia*.

polyhistor (pol-i-his'tọr), *n.* [< L. *polyhistor* (as a title of the grammarian Cornelius Alexander), < Gr. *πολύϊστωρ*, very learned, < *πολύς*, much, + *ἵστωρ*, *ἱστωρ*, knowing: see *history.*] A person of great learning; one who is versed in various departments of study.

I haue much read of admirable things of them [storks] in Ælianus the *polyhistor*. *Coryat*, Crudities, I. 38, sig. E.

Polyhymnia (pol-i-him'ni-ạ), *n.* [L., also *Polymnia* (> F. *Polymnie*), < Gr. *Πολύμνια*, one of the Muses, < *πολύς*, many, + *ὕμνος*, a hymn.] In *Gr. antiq.*, the Muse of the sublime hymn, and of the faculty of learning and remembering: according to some poets, inventor of the lyre, and considered during the final centuries of the Roman empire as the patroness of mimes and pantomimes. In art she is usually represented as in a meditative attitude, voluminously draped, and without any attribute.

polylemma (pol-i-lem'ạ), *n.* [< Gr. *πολύς*, many, + *λῆμμα*, a proposition, assumption: see *dilemma.*] A dilemma with several alternatives: opposed to *dilemma* in the narrow sense.

polylepidous (pol-i-lep'i-dus), *a.* [< Gr. *πολύς*, many, + *λεπίς* (*λεπιδ-*), a scale.] In *bot.*, having many scales.★

polylithic (pol-i-lith'ik), *a.* [< Gr. *πολύλιθος*, of many stones, < *πολύς*, many, + *λίθος*, stone.] Consisting of many stones; built up of several blocks, as a shaft or column: opposed to *monolithic*.

polylogy† (pō-lil'ọ-ji), *n.* [= It. *polilogia*, < Gr. *πολυλογία*, loquacity, talkativeness, < *πολύλογος*, much-talking, talkative, < *πολύς*, much, + *λέγειν*, speak: see *-ology.*] Talkativeness; garrulity.

Many words (battology or *polylogy*) are signs of a fool.
Granger, On Ecclesiastes (1621), p. 115. (*Latham.*)

polyloquent† (pō-lil'ọ-kwent), *a.* [< Gr. *πολύς*, much, + L. *loquen(t-)s*, ppr. of *loqui*, speak.] Talking much; talkative.

polymagnet (pol'i-mag-net), *n.* [< Gr. *πολύς*, many, + E. *magnet.*] An instrument consisting of two or more electromagnets so arranged that the resultant field of force may be varied in many ways. Such an apparatus devised by Tyndall, to be used in exhibiting diamagnetic and other similar phenomena, consists of two electromagnets standing vertically, with adjustable pole-pieces of soft iron, and between them a helix of copper wire. The diamagnetic substance — for example, a bar of bismuth — is supported horizontally in the direction passing through the axis of the helix.

polymastia (pol-i-mas'ti-ạ), *n.* [NL., < Gr. *πολύς*, many, + *μαστός*, breast.] The presence of supernumerary breasts or nipples.★

Polymastiga (pol-i-mas'ti-gạ), *n. pl.* [NL., < Gr. *πολύς*, many, + *μάστιξ* (*μαστιγ-*), a whip.] Protozoans with six, ten, or many flagella, of whatever other character. The genera included by Diesing (1865) under this head were *Chloraster*, *Spondylomorum*, *Phacelomonas*, and *Lophomonas*.

polymastigate (pol-i-mas'ti-gāt), *a.* [< Gr. *πολύς*, many, + *μάστιξ* (*μαστιγ-*), a whip, + *-ate*[1].] Having more than four flagella, as a protozoan; pluriflagellate.

polymastigous (pol-i-mas'ti-gus), *a.* [< Gr. *πολύς*, many, + *μάστιξ* (*μαστιγ-*), a whip, + *-ous.*] Same as *polymastigate*.

Polymastodon (pol-i-mas'tọ-don), *n.* [NL., < Gr. *πολύς*, many, + *μαστός*, teat, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*: see *Mastodon.*] 1. A genus of American Mesozoic mammals from the Puerco beds, having numerous tubercles on the molars, typical of the family *Polymastodontidæ*.—2. [*l. c.*] A member of this genus.

polymastodont (pol-i-mas'tọ-dont), *a.* and *n.* [< Gr. *πολύς*, many, + *μαστός*, breast, + *ὀδούς* (*ὀδοντ-*) = E. *tooth.*] I. *a.* Having many molar tubercles; of or pertaining to the *Polymastodontidæ*.

II. *n.* A polymastodon.

Polymastodontidæ (pol-i-mas-tọ-don'ti-dē), *n. pl.* [NL., < *Polymastodon(t-)* + *-idæ.*] A family of extinct North American Eocene marsupial mammals, represented by the genus *Polymastodon*. They had molars with numerous tubercles arranged in three imperfect or two longitudinal rows. They were of small size.

polymath (pol'i-math), *n.* [= F. *polymathe* = Sp. *polímato*, < Gr. *πολυμαθής*, having learned much, knowing much, < *πολύς*, much, + *μανθάνειν*, *μαθεῖν*, learn.] A person of various learning. Also *polymathist*.

polymathic (pol-i-math'ik), *a.* [= F. *polymathique* = Pg. *polymathico*; as *polymath-y* + *-ic.*] Pertaining to or characterized by polymathy.

polymathist (pō-lim'ạ-thist), *n.* [< *polymath-y* + *-ist.*] Same as *polymath*.

Those *Polymathists* that stand poring all Day in a Corner upon a Moth-eaten Author. *Howell*, Letters, iii. 8.

polymathy (pō-lim'ạ-thi), *n.* [= F. *polymathie* = Sp. *polimatía* = Pg. *polymathia*, < Gr. *πολυμαθία*, much learning, < *πολυμαθής*, having learned much: see *polymath.*] The knowledge of many arts and sciences; acquaintance with many branches of learning, or with various subjects.

That high and excellent learning which men, for the large extent of it, call *polymathy*.
Hartlib, tr. of Comenius's Reformation of Schools (1642), [p. 53. (*Latham.*)

polymatype (pol'i-mạ-tīp), *n.* [Irreg. < Gr. *πολύς*, many, + *τύπος*, type.] A now disused system of type-making by which 150 or 200 types were cast at one operation twice a minute.

polymazia (pol-i-mā'zi-ạ), *n.* [NL., < Gr. *πολύς*, many, + *μαζός*, breast.] Polymastia.

polymechany† (pol-i-mek'ạ-ni), *n.* [< Gr. *πολυμηχανία*, the having many resources, inventiveness, < *πολυμήχανος*, having many resources, inventive, < *πολύς*, many, + *μηχανή*, contrivance, means: see *machine*, *mechanic.*] Practical invention.

In actual experiments and *polymechany*, nothing too profound; a superficial slightness may seem fine for sheets, but prooveth good for nothing.
G. Harvey, Four Letters, iv.

polymelia (pol-i-mē'li-ạ), *n.* [NL.] Same as *polymely*.★

polymelian (pol-i-mē'li-ạn), *a.* [< *polymel-y* + *-ian.*] In *teratol.*, having supernumerary members.

polymelius (pol-i-mē'li-us), *n.*; pl. *polymelii* (-ī). [NL., < Gr. *πολυμελής*, with many limbs: see *polymely.*] In *teratol.*, a monster with supernumerary members.

polymely (pol'i-mē-li), *n.* [< NL. *polymelia*, < Gr. *πολυμελής*, with many limbs or members, < *πολύς*, many, + *μέλος*, a limb.] In *teratol.*, monstrosity by redundancy of parts, or the appearance of supernumerary members, as extra digits and the like.

polymer (pol'i-mėr), *n.* [< *polymer-ous.*] In *chem.*, a compound which is polymeric with some other compound; a polymeride.

We speak of "polymeric" bodies when the several formulæ are intermultiples of the same primitive group (e. g., ethylene, $2 \times CH_2$, and butylene, $4 \times CH_2$, are *polymers* to one another). *Encyc. Brit.*, XVIII. 237.

polymeria (pol-i-mē'ri-ạ), *n.* [NL., < Gr. *πολύς*, many, + *μέρος*, a part.] In *teratol.*, the possession of many parts.★

polymeric (pol-i-mer'ik), *a.* [< *polymer-ous* + *-ic.*] In *chem.*, pertaining to or characterized by polymerism: as, butyric acid ($C_4H_8O_2$) and aldehyde (C_2H_4O) are *polymeric*.

polymeride (pō-lim'ẹ-rid or -rīd), *n.* [< *polymer-ous* + *-ide*[1].] In *chem.*, a compound that exhibits the properties of polymerism with reference to some other compound.

polymerism (pō-lim'ẹ-rizm), *n.* [= F. *polymérisme*; as *polymer-ous* + *-ism.*] 1. In *chem.*, that property of certain compounds by virtue of which they differ in their molecular weights and in their chemical properties, though formed from the same elements, combined in the same proportion. Thus, the molecular weights of butyric acid ($C_4H_8O_2$) and aldehyde (C_2H_4O) are 88 and 44 respectively and their chemical properties are wholly unlike, but both contain the same elements — carbon, hydrogen, and oxygen — combined in the same proportion. See *isomerism*, *metamerism*.

2. Multiplicity of parts; presence of many parts in one whole.

polymerization (pol-i-mer-i-zā'shọn), *n.* [< *polymerize* + *-ation.*] The apparent fusion or union of two or more molecules of a compound, forming a more complex molecule with a higher molecular weight and somewhat different physical and chemical properties. Also spelled *polymerisation*.

In the quenched globule we may possibly encounter a *polymerization* of the molecular structure of the annealed globule. *Amer. Jour. Sci.*, 3d ser., XXXII. 182.

polymerize (pŏ-lim′ẹ-rīz), *v. t.* and *i.*; pret. and pp. *polymerized*, ppr. *polymerizing*. [< *polymer-ous* + *-ize*.] To combine or cause to combine so as to form polymerides. Also spelled *polymerise*.

Prof. Armstrong found hydrocarbons . . . which are readily *polymerised* by sulphuric acid.
Jour. Franklin Inst., CXXI. 172.

Polymerosomata (pol-i-mer-ō-sō′ma-tạ), *n. pl.* [NL., neut. pl. of *polymerosomatus*: see *polymerosomatous*.] In Leach's system of classification, an order of pulmonate *Arachnida*, synonymous with Latreille's *Pedipalpi*, containing the scorpions and their allies, as the *Thelyphonidæ* and *Phrynidæ*: so called from the numerous flexible segments of the body, and contrasted with *Dimerosomata*, *Monomerosomata*, and *Podosomata*.

polymerosomatous (pol-i-mer-ō-som′ạ-tus), *a.* [< NL. *polymerosomatus*, < Gr. *πολύς*, many, + *μέρος*, part, + *σῶμα*, body.] Having the body segmented into many joints, as a scorpion; of or pertaining to the *Polymerosomata*.

polymerous (pŏ-lim′ẹ-rus), *a.* [= F. *polymère*; < Gr. *πολυμερής*, consisting of many parts, < *πολύς*, many, + *μέρος*, part.] 1. Composed of many parts; specifically, in *bot.*, having numerous members in each series or circle. *Gray.*—2. Of or pertaining to polymerism.

polymetameric (pol-i-met-ạ-mer′ik), *a.* [< Gr. *πολύς*, many, + E. *metamere*: see *metameric*.] Of or pertaining to several metameres; lying upon or extending over more than two metameres, as a muscle innervated by different spinal nerves. *Nature*, XXXIX. 151.

polymeter (pŏ-lim′e-tėr), *n.* [< Gr. *πολύς*, many, + *μέτρον*, measure.] 1. An instrument for measuring angles.—2. An apparatus for testing the distance between the rails of a railway line, and detecting inequalities of elevation. *E. H. Knight.*

polymetochia (pol″i-me-tō′ki-ạ), *n.* [NL., < Gr. *πολύς*, many, + *μετοχή*, a participle.] Use of many participles or participial clauses in composition: opposed to *oligometochia*.

polymicroscope (pol-i-mī′krŏ-skōp), *n.* [< Gr. *πολύς*, many, + E. *microscope*.] A microscope arranged on the principle of the revolving stereoscope. The objects to be examined are mounted on plates fastened to a band, and may be presented in succession to the focus of the instrument.

polymignite (pol-i-mig′nīt), *n.* [Irreg. < Gr. *πολύς*, much, + *μιγνύναι*, mix, + *-ite*².] A rare mineral which occurs in small prismatic crystals of a black color and submetallic luster. It is found at Frederiksvaern in Norway, and has received its name from the variety of its constituents—consisting of titanic and niobic acids, zirconia, thoria, lime, yttria, and oxids of iron, cerium, and manganese.

polymitet†, *a.* [ME. *polimite*, < OF. *polimite*, ML. *polymitus*, *polimitus*, < Gr. *πολύμιτος*, consisting of many threads, woven of many (different) threads, < *πολύς*, many, + *μίτος*, thread.] Many-colored.

Of zonge Josephe the cote *polimite*,
Wrougte by the power of alle the Trinite.
Lydgate, MS. Soc. Antiq. 134, f. 13. (*Halliwell.*)

Polymixia (pol-i-mik′si-ạ), *n.* [NL. (Lowe, 1836), < Gr. *πολυμιξία*, promiscuous mingling, < *πολύς*, many, + *μῖξις*, mixing, mingling.] The typical genus of the family *Polymixiidæ*: so called as formerly supposed to indicate a mixture or combination of several diverse forms. There are four species, *P. nobilis* of Madeira, *P. lowei* of Cuba, *P. japonica*, and *P. berndti* of Hawaii.

Polymixiidæ (pol″i-mik-sī′i-dē), *n. pl.* [NL., < *Polymixia* + *-idæ*.] A family of berycoid fishes, typified by the genus *Polymixia*, having an oblong compressed body, blunt head with a pair of barbels on the chin, long dorsal fin with three or four spines, and ventrals with a spine and six or seven rays. It contains four species, inhabiting rather deep water of both the Atlantic and the Pacific.

Polymnia[1] (pŏ-lim′ni-ạ), *n.* See *Polyhymnia*.

Polymnia[2] (pŏ-lim′ni-ạ), *n.* [NL. (Linnæus, 1753), < Gr. *Πολύμνια*, Polyhymnia, one of the Muses: see *Polyhymnia*.] A genus of composite plants of the tribe *Helianthæ* and subtribe *Melampodieæ*. It is characterized by ample leaves, either opposite or alternate above, and corymbose flower-heads with broad involucres, the outer row of bracts often large, leaf-like, and spreading, the ray-flowers in a single row or lacking altogether, and smooth, thick, and nearly cylindrical obovoid achenes, without awns. The 10 species are natives of America, and are found from Canada to Buenos Ayres. They are perennial herbs, shrubs, or trees, often viscid, with yellow flowers, and large angled, lobed, or entire leaves, generally appendaged at the petiole-base with a cup-like membrane, whence their name *leafcup*.

polymnite (pol′im-nīt), *n.* [For **polymniite*, < Gr. *πολύμνιος*, full of moss (< *πολύς*, much, + *μνίον*, moss), + *-ite*².] A stone marked with dendrites and black lines, and so disposed as to represent rivers, marshes, and ponds.

polymorph (pol′i-môrf), *n.* [< Gr. *πολύς*, many, + *μορφή*, form.] 1. In *chem.*, a substance which crystallizes in two or more forms not derivable from each other.

2. In *biol.*, an organism exhibiting or characterized by polymorphism; an individual member of a species or other group which differs from other members of the same group to an unusual degree.

Polymorphi (pol-i-môr′fī), *n. pl.* [NL., pl. of *polymorphus*: see *polymorphous*.] One of the six main divisions of *Braconidæ*, a family of hymenopterous parasites, including those subfamilies in which the clypeus fits closely to the mandibles and the second submarginal cell of the fore wings is large, quadrangular, or wanting. It includes 12 subfamilies and many genera.

polymorphic (pol-i-môr′fik), *a.* [< *polymorph-ous* + *-ic*.] Same as *polymorphous*.

Polymorphina (pol″i-môr-fī′nạ), *n.* [NL. (D'Orbigny), < Gr. *πολύς*, many, + *μορφή*, form, + *-ina*.] The typical genus of *Polymorphininæ*.

Polymorphininæ (pol-i-môr-fi-nī′nē), *n. pl.* [NL., < *Polymorphina* + *-inæ*.] A subfamily of *Lagenidæ*, typified by the genus *Polymorphina*, having the cells of the test arranged spirally or irregularly around the long axis, or (rarely) biserial and alternate.

polymorphism (pol-i-môr′fizm), *n.* [= F. *polymorphisme*; as *polymorph-ous* + *-ism*.] 1. The property of being polymorphous, or capable of existing in different forms; specifically, in *crystal.*, the property of crystallizing in two or more fundamental forms: thus, carbon crystallizes in isometric forms in the diamond, and in hexagonal forms in graphite. When the substance assumes two forms it is said to be *dimorphic*, or to present the phenomenon of *dimorphism*; when three, it is said to be *trimorphic*.

2. In *zoöl.*, difference of form, structure, or type; existence in, or exhibition by, a group of animals, as a species, genus, family, or order, of different types of structure; heterogeneousness.

A considerable number of what have been classed as varieties are really cases of *polymorphism*.
A. R. Wallace, Nat. Select., p. 145.

New complications of structure among the Hydromedusæ are summed up under the head of *polymorphism*. The differentiation of hydriform and medusiform persons is a case of dimorphism; a further distribution of functions, with corresponding modification of form, gives us *polymorphism*. *Encyc. Brit.*, XII. 554.

3. In *bot.*, the comprisal of numerous definite or indefinite subtypes under a given type.

polymorphous (pol-i-môr′fus), *a.* [= F. *polymorphe* = Pg. *polymorpho* = It. *polimorfo*, < NL. *polymorphus*, < Gr. *πολύμορφος*, multiform, manifold, < *πολύς*, many, + *μορφή*, form.] 1. Having or exhibiting many forms; characterized by polymorphism; not isomorphous or monomorphous.

I . . . find it difficult to form any judgment of any author so "many-sided" (to borrow a German expression)—*polymorphous* as Herder. *De Quincey*, Herder.

2. Specifically, in *zoöl.*: (*a*) Undergoing a series of marked changes during development, as most insects. (*b*) Varying much in appearance, form, or structure in the same species or group.—3. In *bot.*, same as 2 (*b*).—4. In *music*, noting a contrapuntal composition, as a canon or a fugue, in which the themes are or may be treated in various ways, as by augmentation, diminution, inversion, etc.

Also *polymorphic*.

polymorphy (pol′i-môr-fi), *n.* [= F. *polymorphie*; < LGr. *πολυμορφία*, manifoldness, < Gr. *πολύμορφος*, manifold: see *polymorphous*.] Same as *polymorphism*.

poly-mountain (pō-li-moun′tān), *n.* See *poly*.

Polymyaria (pol″i-mī-ā′ri-ạ), *n. pl.* [NL., < Gr. *πολύς*, many, + *μῦς*, muscle, + *-aria*.] One of three principal divisions of the *Nematoidea*, containing those threadworms in which the muscles of the body-wall are divided into many series, each made up of many muscle-cells. See *Meromyaria*, *Holomyaria*.

polymyarian (pol″i-mī-ā′ri-ạn), *a.* and *n.* I. *a.* Of or pertaining to the *Polymyaria*.

II. *n.* A polymyarian worm.

Polymyodi† (pol″i-mī-ō′dī), *n. pl.* [NL., < Gr. *πολύς*, many, + *μῦς*, muscle, + *ᾠδή*, song.] In Johannes Müller's system of classification (1847), a tribe of birds of an order *Insessores*, including singing birds whose lower larynx is provided with the full number (five pairs) of song-muscles: thus distinguished from the tribes *Tracheophonæ* and *Picarii* of the same author. The term is nearly equivalent to *Oscines* or *Acromyodi* of later authors.

polymyodian (pol″i-mī-ō′di-ạn), *a.* Same as *polymyoid*.

polymyoid (pol′i-mī-oid), *a.* [< Gr. *πολύς*, many, + *μῦς*, muscle, + *ᾠδή*, song. Cf. *Polymyodi*.] In *ornith.*, having several distinct intrinsic muscles of the syrinx: opposed to *oligomyoid*. The word is nearly synonymous with *acromyodian*, but is of less exact signification. The group of birds it denotes is that of the *Oscines* or singing birds.

polymyositis (pol-i-mī-ō-sī′tis), *n.* [NL., < Gr. *πολύς*, many, + *μῦς* (*μυός*), muscle, + *-itis*: see *myositis*.] Inflammation of a number of muscles.

Polymyxia, *n.* See *Polymixia*.

polyneme (pol′i-nēm), *n.* [< NL. *polynemus*, q. v.] A fish of the genus *Polynemus*.

Polynemidæ (pol-i-nem′i-dē), *n. pl.* [NL., < *Polynemus* + *-idæ*.] A family of acanthopterygian fishes, typified by the genus *Polynemus*. They have a subfusiform shape, with a blunt snout, subabdominal ventrals with a spine and five rays, two dorsals separated by a considerable interval, anal with one or two spines, forked caudal, and pectorals with an entire upper part and several free elongated filiform rays below. Numerous species occur in tropical seas, some of much importance, as the mango-fish of India, *P. paradiseus*.

polynemiform (pol-i-nem′i-fôrm), *a.* [< NL. *Polynemus* + L. *forma*, form.] Having the form of a polyneme; belonging to the *Polynemidæ*.

polynemoid (pol-i-nē′moid), *a.* and *n.* I. *a.* Belonging or relating to the *Polynemidæ*; polynemiform.

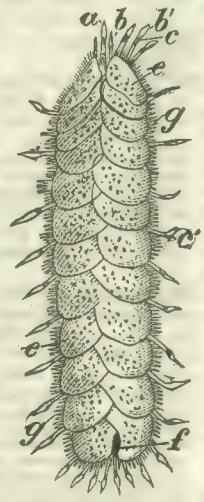
II. *n.* A polynemiform fish; a polyneme.

Polynemus (pol-i-nē′mus), *n.* [NL. (Gronovius, 1754), < Gr. *πολύς*, many, + *νῆμα*, thread: see *nematoid*.] The typical genus of the family *Polynemidæ*, with the lower pectoral rays separated as numerous long slender filaments (whence the name). *P. plebeius* is a very common Indian species.

Polydactylus (*Polynemus*) *plebeius*.

Polynesian (pol-i-nē′siạn), *a.* and *n.* [= F. *polynésien* = Pg. *polynesiano*; < NL. *Polynesia* (see def.), < Gr. *πολύς*, many, + *νῆσος*, island.] I. *a.* 1. [*l. c.*] Full of islands, as an archipelago.—2. Specifically, of or pertaining to Polynesia.—**Polynesian region**, Polynesia, or the Pacific islands, zoögeographically considered. It is sometimes regarded as a division of a very comprehensive Australian region, and is then known more precisely as the *Polynesian subregion*. It consists of all the Pacific islands excepting those that pertain zoölogically to the Papuan or Austromalayan group and to New Zealand. Wallace, who defined this region, divides it into Polynesia proper and the Hawaiian Islands, the former being then considered under the four subdivisions of the Ladrone and Caroline Islands, New Caledonia and the New Hebrides, the Fiji, Tonga, and Samoa Islands, and the Society and Marquesas Islands.

II. *n.* A native or an inhabitant of Polynesia, a division of Oceania east of Australia and Malaysia, or, in the more modern and restricted sense, a division of Oceania east of Micronesia and Melanesia.



polyneuritis (pol″i-nū-rī′tis), *n.* [NL., < Gr. *πολύς*, many, + *νεῦρον*, nerve, + *-itis*. Cf. *neuritis*.] Neuritis affecting a number of nerves; multiple neuritis.

polynia (pŏ-lin′i-ạ), *n.* [Russ. *poluiniya*, an open place in the midst of ice.] An open or unfrozen place in the midst of the ice of a river or lake or in the ocean: a word used in English only by navigators in arctic seas. By some writers it was formerly used with the meaning of an

open or unfrozen (theoretical) sea at the north pole, apparently from the (erroneous) idea that *polynia* is connected with *pole*[2].

In such places as Robeson and Kennedy Channels and Bellot's Straits . . . *polynias* or water-pools are met with on rare occasions throughout the winter.
Nares, Voyage to the Polar Sea, I. 234.

Polynoë (pō-lin'ō-ē), *n.* [NL. (Savigny), < Gr. *πολύς*, much, many, + *νέειν*, swim.] A genus of marine errant annelids of the family *Aphroditidæ:* a name used in different senses. (*a*) Applied by Savigny and most authors to such species as the British *P. squamata*, an inch or two long, with large ovate and reniform ciliated scales imbricated in a double row of 12 along the whole length of the worm, and the body of equal width at both ends. This worm is *Aphrodite squamata* of Linnæus, also known as *Lepidonotus squamatus*. (*b*) After Oersted, 1842, applied to worms resembling (*a*), but with not less than 70 segments covered forward with small scales in pairs, naked behind, as *P. scolopendrina* of the British Islands.

Polynoë squamata, from above, enlarged.
a, prestomial tentacle; *b*, *b'*, superior and inferior prestomial cirrus; *c*, *c'*, notopodial and neuropodial cirrus; *e*, *e*, elytra; *f*, space between the posterior elytra; *g*, *g*, setæ and fimbriæ of the elytra.

polynome (pol'i-nōm), *n.* [=F. *polynôme* = Pg. *polynomo*, n., *polynomio*, adj., = It. *polinomio;* < Gr. *πολύς*, many, + L. *nomen*, name.] A polynomial.

polynomial (pol-i-nō'mi-al), *a.* and *n.* [< *polynome* + *-ial*. Cf. *binomial*.] **I.** *a.* 1. Containing many names or terms.—2. In *zoöl.* and *bot.*, specifically, noting a method of nomenclature in which the technical names of species are not confined to two terms, the generic and the specific, as they are in the binomial system of nomenclature: as, a *polynomial* name; a *polynomial* system of nomenclature: contrasted with *binomial* and *mononomial*.

Also *multinomial*, *plurinominal*.

Polynomial theorem, the theorem for raising a polynomial to any power.

II. *n.* 1. A technical name consisting of more than two terms; a polyonym.—2. An algebraical expression consisting of two or more terms united by addition: as,

$$ax + by + cz - exy - fxz + gyz.$$

Also *multinomial*.

Appell's polynomial, a form

$$A_n x = a_0 x^n + \binom{n}{1} a_1 x^{n-1} + \binom{n}{2} a_2 x^{n-2} + \ldots + a_n.$$

Homogeneous polynomial, a polynomial in which all the terms are of the same degree in the variables.

polynomialism (pol-i-nō'mi-al-izm), *n.* [< *polynomial* + *-ism*.] Polynomial nomenclature; the method or practice of using polynomials.

polynomialist (pol-i-nō'mi-al-ist), *n.* [< *polynomial* + *-ist*.] In *zoöl.* and *bot.*, one who uses polynomials, or a polynomial system of nomenclature, as the pre-Linnean writers usually did.

★**polynuclear** (pol-i-nū'klē-ăr), *a.* [< Gr. *πολύς*, many, + NL. *nucleus:* see *nuclear*.] Having several nuclei, as a cell.

Polyodon (pō-lī'ō-don), *n.* [NL., < Gr. *πολύς*, many, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] 1. In *ichth.*, a genus of selachostomous fishes, named by Lacépède in 1798, the type of the family *Polyodontidæ*, having many teeth crowded in bandlike masses during the youth of its members, these teeth being lost at maturity. *P. spathula* is an example. Also called *Spatularia*. See cuts under *paddle-fish*.—2. In *conch.*, a genus of pulmonate gastropods. *Desmarest.*

polyodont (pol'i-ō-dont), *a.* and *n.* [< Gr. *πολύς*, many, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] **I.** *a.* Having many teeth; multidentate; specifically, of or pertaining to the *Polyodontidæ*.

II. *n.* In *ichth.*, a member of the *Polyodontidæ*.

Polyodontidæ (pol'i-ō-don'ti-dē), *n. pl.* [NL., < *Polyodon(t-)* + *-idæ*.] A family of selachostomous ganoid fishes, typified by the genus *Polyodon*, including the paddle-fishes of the Mississippi basin and related forms of China and Japan. The body is naked, or rough with minute stellate ossifications; the snout is much produced; the very wide mouth contains many minute teeth, in youth at least; the nostrils are double; and the dorsal and anal fins are near the heterocercal fin. Also called *Spatulariidæ*.

polyommatous (pol-i-om'ạ-tus), *a.* [< Gr. *πολυ-ὀμματος*, many-eyed, < *πολύς*, many, + *ὄμμα* (*ὀμματ-*), eye, < √ *ὀπ*, see: see *optic*.] Many-eyed; having many eyes or eye-like organs.

Polyommatus (pol-i-om'ạ-tus), *n.* [NL. (Latreille), < Gr. *πολυόμματος*, many-eyed: see *polyommatous*.] 1. In *entom.*, a genus of butterflies of the family *Lycænidæ*, having many ocelli on the wings (whence the name). There are many species, known as *blues*, as *P. alexis*, the common blue, and *P. argiolus*, the azure blue.—2. A genus of worms. *Quatrefages*, 1850.

polyonomous (pol-i-on'ọ-mus), *a.* Same as *polyonymous*.

polyonomy (pol-i-on'ọ-mi), *n.* Same as *polyonymy*.

polyonym (pol'i-ọ-nim), *n.* [< *polyonym-ous*.] A name consisting of several (specifically, more than three) terms; a polynomial name in zoölogy: correlated with *mononym*, *dionym*, and *trionym*.

polyonymal (pol-i-on'i-mal), *a.* [< *polyonym* + *-al*.] Of or pertaining to a polyonym; polynomial.

polyonymic (pol″i-ọ-nim'ik), *a.* [< *polyonym-y* + *-ic*.] Consisting of more than two terms, as a name in anatomy or zoölogy; polyonymal; polynomial. *Buck's Handbook of Med. Sciences*, VIII. 516.

polyonymist (pol-i-on'i-mist), *n.* [< *polyonym* + *-ist*.] Same as *polynomialist*.

polyonymous (pol-i-on'i-mus), *a.* [< Gr. *πολυ-ώνυμος*, having many names, < *πολύς*, many, + *ὄνυμα*, name.] Having many names or titles; many-titled.

polyonymy (pol-i-on'i-mi), *n.* [Also *polyonomy;* = F. *polyonymie*, < Gr. *πολυωνυμία*, a multitude of names, < *πολύωνυμος*, having many names: see *polyonymous*.] 1. Variety or multiplicity of names for the same object. Specifically—2. In *zoöl.*, same as *polynomialism*.

Polyophthalmus (pol″i-of-thal'mus), *n.* [NL., < Gr. *πολύς*, many, + *ὀφθαλμός*, eye.] A genus of remarkable polychætous annelids, having a pair of eye-like spots on every somite of the body, besides the usual cephalic eyes.

★**polyopia, polyopy** (pol-i-ō'pi-ạ, pol'i-ọ-pi), *n.* [NL., < Gr. *πολύς*, many, + *ὄψ*, face.] The appearance as of two or more objects when there is but one; multiple vision.

polyoptrum, polyoptron (pol-i-op'trum, -tron), *n.*; pl. *polyoptra* (-trạ). [= F. *polyoptre* = It. *poliottro;* < NL. *polyoptrum*, *polyoptron*, < Gr. *πολύς*, many, + √ *ὀπ*, see: see *optic*.] A glass through which objects appear multiplied but diminished. It consists of a lens one side of which is plane, while in the other are ground several spherical concavities, every one of which becomes a plano-concave lens, through which an object appears diminished.

polyopy, *n.* See *polyopia*.

polyorama (pol″i-ọ-rä'mạ), *n.* [= F. *polyorama*, < NL. *polyorama*, < Gr. *πολύς*, many, + *ὅραμα*, view, sight, < *ὁρᾶν*, see.] 1. A view of many objects.—2. An optical apparatus presenting many views. See *panorama*.

polyorganic (pol″i-ôr-gan'ik), *a.* [< Gr. *πολύς*, many, + *ὄργανον*, organ: see *organic*.] Having several diversified or differentiated organs.

In the natural world some beings are monorganic, others are *polyorganic*. *Science*, IX. 534.

★**polyp, polype** (pol'ip), *n.* [= F. *polype* (also *poulpe:* see *poulp*) = Sp. *pólipo* = Pg. *polypo* = It. *polipo* = D. *polyp*, *poliep* = G. Sw. Dan. *polyp*, < L. *polypus*, a polyp, a polypus in the nose, < Gr. *πολύπους*, a polyp, a polypus in the nose, prop. adj., many-footed, < *πολύς*, many, + *ποίς* = E. *foot*.] In *zoöl.*, an animal with many feet or foot-like processes. Specifically—(*a*†) An octopus, or eight-rayed cephalopod: an old usage, often in the form *polypus*, still found in *poulp* or *poulpe*. (*b*) Some isopod crustacean, as a wood-louse, slater, sow-bug, or pill-bug. See *Oniscidæ*. (*c*) Since the middle of the eighteenth century: (1) A hydroid or hydrozoan; an actinoid or actinozoan; some cœlenterate or hollow animal, soft or hard, fixed or free, of variable or no determinate form: as, an actinarian, alcyonarian, tubularian, sertularian, campanularian, or pennatularian *polyp;* a coralligenous *polyp;* a medusiform *polyp;* a ctenophoran *polyp*. In this sense the word is coextensive with *Cœlentera*, though not applicable to all the members thereof. See cuts under *Plumularia*, *Corynida*, and *Obelia*. (2) A polyzoan or bryozoan; especially, an aggregate or colonial one, as a sea-mat, like or likened to a polyp in the preceding sense. (3) Some echinoderm, as a sea-lily, stone-lily, crinoid, or encrinite. (4) Some other animal, as a rotifer, an infusorian, or a sponge: a loose or mistaken usage. (*d*) One of the individuals, persons, or zoöids of a compound, colonial, or aggregate polyp, the whole of which is a polypidom or polypary, or a polyzoary; a polypide or polypite, as of a hydrozoan, actinozoan, or polyzoan: a common present usage, especially with reference to hydriforms. See cut under *Coralliyena*.—**Ascidian polyps†**, the polyzoans or bryozoans; the moss-animalcules.—**Funnel-like polyps.** See *funnel-like*.

polypage (pol'i-pāj), *a.* [< Gr. *πολύς*, many, + E. *page*[1].] Containing several pages.—**Polypage plate**, a stereotype-plate including the matter of several pages.

polypantograph (pol-i-pan'tọ-grȧf), *n.* [< Gr. *πολυς*, many, + E. *pantograph*.] A form of pantograph by which a number of identical designs may be produced simultaneously from a single pattern.

polyparia (pol-i-pā'ri-ạ), *n.*; pl. *polypariæ* (-ē). [NL.: see *polypary*.] The stock of the *Anthozoa* and related polyps; a polypary.

polyparian (pol-i-pā'ri-ạn), *a.* [< *polypar-y* + *-ian*.] Of or pertaining to a polypary.

polyparium (pol-i-pā'ri-um), *n.*; pl. *polyparia* (-ạ). [NL.: see *polypary*.] Same as *polypary*.

polyparous (pō-lip'ạ-rus), *a.* [< Gr. *πολύς*, many, + L. *parere*, produce. Cf. *multiparous*.] Same as *polytocous*, 1.

polypary (pol'i-pā-ri), *n.*; pl. *polyparies* (-riz). [< NL. *polyparium* = F. *polypier;* < L. *polypus*, a polyp: see *polyp* and *-ary*.] The stock of the *Anthozoa* and related polyps; a polyp-stock, polypidom, or polyparia; the horny or chitinous outer covering or envelop with which many of the *Hydrozoa* are furnished. The term is also not uncommonly applied to the very similar structures produced by the *Polyzoa;* but for these *polyzoary* is used by those who desire to keep *polypary* for the *Actinozoa* and *Hydrozoa*. The polypary-producing polypides are propagated by budding, and live together in groups or colonies so associated that each group forms a compound animal, whose united coverings form a compound polypary or polypidom, which is their common home, and is at the same time the central stem or stock sustaining the whole. Every individual polyp thus lives in its own proper cavity in the common polypary, from which it protrudes its body and into which it retracts it at pleasure. Also *polypiarium*.

polyp-colony (pol'ip-kol″ọ-ni), *n.* A colony of polyps; a compound or aggregate polyp.

polype, *n.* See *polyp*.

polypean (pō-lip'ē-ạn), *a.* and *n.* [< *polyp* + *-e-an*.] **I.** *a.* Of or pertaining to a polyp or polypus in any sense.

II. *n.* A polyp; any polyp-like organism.

Polypedates (pol″i-pē-dā'tēz), *n.* [NL., < Gr. *πολύ*, much, + *πήδειν*, jump, in allusion to the powerful legs.] The typical genus of the family *Polypedatidæ*, containing numerous species, chiefly Oriental. *P. maculatus* is a common Indian tree-toad. *P. eques* is called the *spurred tree-toad*. Also, erroneously, *Polypedotes*.

Polypedatidæ (pol″i-pē-dat'i-dē), *n. pl.* [NL., < *Polypedates* + *-idæ*.] A family of anurous salient batrachians, typified by the genus *Polypedates*, containing the so-called glandless tree-toads. It is an ill-characterized group; the species which have been referred to it belong mostly to the *Ranidæ*.

Polypetalæ (pol-i-pet'ạ-lē), *n. pl.* [NL. (Tournefort, 1694), fem. pl. of **polypetalus:* see *polypetalous*.] A division or group of dicotyledonous plants, characterized by distinct or separate petals, forming a circle inside the calyx, as in the single rose, or several circles, as in the water-lily, magnolia, and cactus. The term is now mostly superseded by *Choripetalæ*, which some authors expand to include the *Apetalæ*, thus making it synonymous with the *Archichlamydeæ* of Engler and Prantl. It has proved impossible to maintain the *Apetalæ* and *Choripetalæ* as distinct groups. See *Dicotyledones*.

polypetalous (pol-i-pet'ạ-lus), *a.* [= F. *polypétale* = Sp. *polipétalo* = Pg. *polypetalo* = It. *polipetalo;* < NL. **polypetalus*, < Gr. *πολύς*, many, + *πέταλον*, leaf (NL. petal).] In *bot.*, having two or more separate petals: as, a *polypetalous* corolla. Also *apopetalous*, *dialypetalous*, *choripetalous*. See cut under *corolla*.

polyphagia (pol-i-fā'ji-ạ), *n.* [NL.: see *polyphagy*.] 1. In *med.*, excessive desire of eating; voracity. *Dunglison.*—2. In *zoöl.*, same as *polyphagy*.

polyphagic (pol-i-faj'ik), *a.* [< *polyphag-y* + *-ic*.] Exhibiting or characterized by polyphagy; polyphagous.

★**polyphagous** (pō-lif'ạ-gus), *a.* [= F. *polyphage* = It. *polifago* (< L. *polyphagus*, a glutton), < Gr. *πολυφάγος*, eating too much, < *πολύς*, much, + *φαγεῖν*, eat.] Eating many different kinds of food; almost pamphagous or omnivorous; not monophagous.

Its [a scale-insect's] *polyphagous* habit, or the ease with which it accommodates itself to so great a variety of plants.
C. V. Riley, U. S. Entom. Bull., No. 15, 1887, p. 12.

polyphagy (pō-lif'ạ-ji), *n.* [= F. *polyphagie;* < NL. *polyphagia*, < Gr. *πολυφαγία*, excess in eating, < *πολυφάγος*, eating too much: see *polyphagous*.] The habit or practice of subsisting on many different kinds of food; polyphagous regimen. Also *polyphagia*.

polypharmacy (pol-i-fär'mạ-si), *n.* [= F. *polypharmacie*, < Gr. *πολυφάρμακος*, having to do with many drugs, < *πολύς*, many, + *φάρμακον*, a drug: see *pharmacon*, *pharmacy*.] The prescrib-

ing of many medicines, especially in one prescription. *Dr. J. Brown*, Spare Hours.

polyphase (pol'i-fāz), *a.* [< Gr. *πολύς*, many, + E. *phase*[1], *n.*] In *elect.*, having components of various phase.

polyphemet (pol'i-fēm), *n.* [< *polyphemus.*] One of a group of snail-shells, such as *Helix priamus.*

Polyphemidæ (pol-i-fem'i-dē), *n. pl.* [NL., < *Polyphemus* + *-idæ.*] A family of cladocerous or daphniaceous crustaceans, typified by the genus *Polyphemus.*

polyphemous (pol-i-fē'mus), *a.* [< L. *Polyphemus*, < Gr. Πολύφημος, a one-eyed Cyclops: see *polyphemus.*] One-eyed; monoculous; cyclopean.

polyphemus (pol-i-fē'mus), *n.* [NL., < L. *Polyphemus*, < Gr. Πολύφημος, a Cyclops so named, < *πολυφήμος*, many-voiced, also famous, < *πολύς*, many, + *φήμη*, voice, fame: see *fame*[1].] **1.** An animal which has only one eye, whether naturally or abnormally; a cyclops.—**2.** The specific name of the king-crab, *Limulus polyphemus.*—**3.** [*cap.*] In *Crustacea*, the typical genus of the family *Polyphemidæ:* so called from the large solitary and apparently single eye formed by the coalescence of a pair of eyes. *P. stagnorum* is an example.—**4.** Any member of the family *Polyphemidæ.*—**5.** In *Lepidoptera*, the technical specific and (absolutely) the vernacular name of one of the largest American silkworms or silkworm-moths, *Telea polyphemus.* The caterpillar feeds on many different native trees, as oak, walnut, hickory, willow, elm, maple, poplar, etc., and is of a clear apple-green color with

Polyphemus-moth, with right wings removed. (One half natural size.)

yellow lateral lines. The cocoon is oval and usually wrapped in a leaf, sometimes falling to the ground, but often hanging on the tree all winter. The moth is normally single-brooded in the northern United States, but double-brooded in the southern. The silk can be reeled, but with considerable difficulty, and is lustrous and strong. The moth has a wing-spread of five or six inches, and is of a buff color, with a large eye-spot on each hind wing.

polyphlœsbœan (pol$^{\prime\prime}$i-fles-bē'an), *a.* [< Gr. *πολύφλοισβος* (gen. *πολυφλοίσβοιο*), loud-roaring, frequent in Homer as an epithet of *θάλασσα*, the sea; < *πολύς*, much, + *φλοῖσβος*, roar, noise.] Loud-roaring.

Two men are walking by the *polyphlœsbœan* ocean.
O. W. Holmes, Autocrat, iv.

polyphobia (pol-i-fō'bi-ä), *n.* [NL., < Gr. *πολύς*, many, + *-φοβία*, < *φέβεσθαι*, fear.] Morbid fear of many things: nearly equivalent to *pantophobia.*

polyphone (pol'i-fōn), *n.* [< Gr. *πολύς*, many, + *φωνή*, voice, sound: see *phone*[1].] A written sign capable of being read in more than one way, or standing for two or more phonetic signs.

The different phonetic values of the *polyphones.*
Encyc. Brit., XI. 801.

polyphonia (pol-i-fō'ni-ä), *n.* [NL.: see *polyphony.*] Same as *polyphony.*

polyphonian (pol-i-fō'ni-an), *a.* [< *polyphon-ous* + *-ian.*] Many-voiced; polyphonic.

I love the air; her dainty sweets refresh
My drooping soul, and to new sweets invite me;
Her shrill mouth'd choir sustain me with their flesh,
And with their *Polyphonian* notes delight me.
Quarles, Emblems, v. 6.

polyphonic (pol-i-fon'ik), *a.* [= F. *polyphonique* = Pg. *polyphonico;* as *polyphon-ous* + *-ic.*] **1.** Capable of being read or pronounced in more than one way: said of a written character.

The particular value to be assigned to each of the *polyphonic* characters. *Isaac Taylor*, The Alphabet, I. 46.

2. Consisting of or having many voices or sounds.

The barking crow possesses the most remarkable *polyphonic* powers. It can shriek, laugh, yell, shout, whistle, scream, and bark. *Saturday Rev.*, XXV. 469.

3. In *music:* (*a*) Noting a method of composition or a work in which two or more voice-parts are simultaneously combined without losing their independent character, but with harmonious effect; contrapuntal: opposed on one side to *monodic*, *monophonic*, and *homophonic*, and on another to *harmonic:* as, a fugue is a *polyphonic* form of composition. (*b*) Noting an instrument which is capable of producing more than one tone at a time, as an organ or a harp.

Also *polyphonous.*

polyphonism (pol'i-fō-nizm), *n.* [= Pg. *polyphonismo;* as *polyphon-ous* + *-ism.*] **1.** Multiplicity of sounds, as in the reverberations of an echo.

I have chosen to single out the passages which relate to the *polyphonisms*, or repercussions of the rocks and caverns, and other phonocamptic . . . objects below in the mount. *Derham*, Physico-Theology, i. 3.

2. In *music*, the use of polyphony, or the state of being polyphonic in structure.

polyphonist (pol'i-fō-nist), *n.* [< *polyphon-y* + *-ist.*] **1.** One who professes the art of multiplying sounds, or who makes a variety of sounds; an imitator of a variety of sounds; a ventriloquist.—**2.** One who understands or uses polyphony; a contrapuntist.

polyphonium (pol-i-fō'ni-um), *n.* [NL., < Gr. *πολυφωνία*, variety of tones: see *polyphony.*] In *music*, a polyphonic composition.

polyphonous (pol'i-fō-nus), *a.* [= F. *polyphone*, < Gr. *πολύφωνος*, having many tones, < *πολύς*, many, + *φωνή*, sound, voice, tone: see *phone*[1].] Same as *polyphonic.*

polyphony (pol'i-fō-ni, oftener pō-lif'ō-ni), *n.* [= F. *polyphonie* = Pg. *polyphonia*, < NL. *polyphonia*, < Gr. *πολυφωνία*, variety of tones, < *πολύφωνος*, having many tones: see *polyphonous.*] **1.** The capability of being pronounced in various ways characterizing some written characters.

It will be seen how great an element of ambiguity was introduced by the *polyphony* which arose from the adaptation of a Turanian syllabary to a Semitic language.
Isaac Taylor, The Alphabet, I. 45.

2. In *music*, the act, process, art, or result of simultaneously combining two or more voice-parts so that they shall maintain their individuality and independent interest, and yet shall harmonize with each other; counterpoint. It is opposed to *monody*, *monophony*, and *homophony*, in which a single voice-part is raised into decided prominence, and to *harmony* (in one of its senses), in which the attention is centered upon the successive chords as such rather than upon the voice-parts that constitute them. See *counterpoint*[2], 3.

polyphore (pol'i-fōr), *n.* [= F. *polyphore*, < Gr. *πολυφόρος*, bearing much, < *πολύς*, much, + *φέρειν* = E. *bear*[1].] In *bot.*, a fleshy receptacle with numerous ovaries, as that of a strawberry.

polyphotal (pol'i-fō-tal), *a.* [< *polyphote* + *-al.*] Same as *polyphote.*

polyphote (pol'i-fōt), *a.* [< Gr. *πολύς*, many, + *φῶς* (*φωτ-*), light.] An epithet applied to electric arc-lamps which are so constructed that more than one may be used on the same electric circuit. Monophote lamps require a separate circuit for each lamp.

polyphyletic (pol$^{\prime\prime}$i-fi-let'ik), *a.* [< Gr. *πολύς*, many, + *φυλή*, tribe: see *phyle, phyletic.*] **1.** Pertaining to or derived from several phyla; having several different lines of descent: as, a *polyphyletic* origin.—**2.** Of or pertaining to the doctrine or theory that animals are not monophyletic, but are derived from many different sources.

polyphylline (pol-i-fil'in), *a.* [< *polyphyll-ous* + *-ine*[1].] In *bot.*, same as *polyphyllous.*

polyphyllous (pol-i-fil'us), *a.* [= F. *polyphylle* = Pg. *polyphillo* = It. *polifillo*, < NL. *polyphyllus*, < Gr. *πολύφυλλος*, with many leaves, < *πολύς*, many, + *φύλλον*, leaf.] In *bot.*, many-leafed: as, a *polyphyllous* calyx or perianth.

polyphylly (pol'i-fil-i), *n.* [< NL. **polyphyllia*, < *polyphyllus*, many-leafed: see *polyphyllous.*] In *bot.*, an increase in the number of members or organs in a whorl, as when a normally pentamerous calyx has six or more sepals, as is occasionally the case in the plum. Foliage, leaves, and all the parts of the flowers may be so affected.

polyphyodont (pol-i-fī'ō-dont), *a.* and *n.* [< Gr. *πολυφυής*, manifold (< *πολύς*, many, + *φύειν*, produce), + *ὀδούς* (*ὀδοντ-*) = E. *tooth.*] **I.** *a.* Having several sets of teeth, as a fish: opposed to *monophyodont* and *diphyodont.*

II. *n.* A polyphyodont animal.

Polypi (pol'i-pī), *n. pl.* [NL., pl. of L. *polypus*, a polyp: see *polyp.*] **1.** The polyps as a class or other high group of low invertebrate animals, of which the nearest modern synonym is *Cœlentera* or *Cœlenterata.* Specifically—(*a*†) In Cuvier's system of classification, *Polypi* were the fourth class of his *Radiata*, divided into three orders—*Carnosi*, including *Actinia* and *Lucernaria; Gelatinosi*, including *Hyara* and the *Polyzoa;* and *Polypiferi*, or the corals at large, with *Pennatula*, *Alcyonium*, and also the sponges. (*b*) In Leuckart's system (1848), they were one of two classes of *Cœlentera*, distinguished from *Acalephæ*, and divided into two orders, *Anthozoa* and *Calycozoa.* (*c*) In Milne-Edwards's system (1855), an alternative name of his *Coralliaria*, or the third class of his *Radiaria*, distinguished from echinoderms and acalephs. Also *Polypiaria*, *Polypifera*, *Polypiphera.*

2. [*l. c.*] Plural of *polypus.*

Polypiaria (pol$^{\prime\prime}$i-pi-ā'ri-ä), *n. pl.* [NL., < L. *polypus*, a polyp: see *polyp.*] Same as *Polypi.*

polypiarian (pol$^{\prime\prime}$i-pi-ā'ri-an), *a.* and *n.* [< *Polypiaria* + *-an.*] **I.** *a.* Of or pertaining to the *Polypiaria;* polypiferous; cœlenterate.

II. *n.* A member of the *Polypiaria.*

polypiarium (pol$^{\prime\prime}$i-pi-ā'ri-um), *n.*; pl. *polypiaria* (-ä). [NL.: see *polypary.*] Same as *polypary.*

polypide (pol'i-pid), *n.* [< *polyp* + *-ide*[2].] An individual zoöid of a polyzoarium, or compound polyzoan; the individual organism contained in one of the cells or cups of the ectocyst of a polyzoarium, just as an individual of a compound coralligenous actinozoan is contained in a cup of the polypidom. The polypide of a polyzoan thus corresponds to the polypite of a cœlenterate. See *polypary*, and cuts under *Plumatella* and *Polyzoa.*

polypidom (pol'i-pi-dum), *n.* [< Gr. *πολύπους*, a polyp, + *δόμος*, house.] An aggregate of polypites or polypides; a compound polypary, or the dermal system of a colony of individual actinozoans, hydrozoans, or polyzoans; a polyp-stock, or the stem of a colony of zoöphytes, containing the cells of the individual polypites or polypides which fabricate it. Thus, a piece of coral is the *polypidom* of an actinozoan or hydrozoan; a sea-mat is the *polypidom* (more exactly, the *polyzoary*) of a polyzoan. See cuts under *Coralligena* and *Polyzoa.*

polypier (pol'i-pēr), *n.* and *a.* [< F. *polypier*, < NL. *polypiarium:* see *polypary.*] **I.** *n.* **1.** A polyp in sense (*d*); a polypite or polypide; one individual, or a single cell, of a compound polyp.—**2.** A polypidom, polypary, or polyp-stock; a compound or aggregate polyp; a polyzoarium.

Sometimes each polyp has a distinct *polypier*, but in general it is the common portion of a mass of aggregated polypi which presents the characters peculiar to these bodies, and thus these form aggregated *polypiers*, the volume of which may become very considerable, although each of its constituent parts has dimensions which are very small. *Milne-Edwards*, Manual of Zoölogy, § 619.

II. *a.* Composed of the stony material of some polypidoms; coral-like: as, *polypier* beads. *Catalogue Boban Collection*, 1887.

polypiety (pol-i-pī'e-ti), *n.* [< Gr. *πολύς*, many, + E. *piety.*] Belief in or reverence for anything and everything; tolerance of all kinds of piety or belief. [Rare.]

Polypiety is the greatest impiety in the world. To say that men ought to have liberty of conscience is impious ignorance. *N. Ward*, Simple Cobler, p. 5.

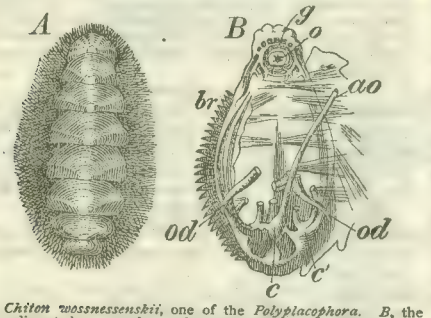
polypifer (pol'i-pi-fėr), *n.* [< L. *polypus*, polyp, + *ferre* = Gr. *φέρειν* = E. *bear*[1].] A polyp or polyp-stock; a member of the *Polypifera.*

Polypifera (pol-i-pif'e-rä), *n. pl.* [NL.: see *polypifer.*] Same as *Polypi.*

polypiferous (pol-i-pif'e-rus), *a.* [< L. *polypus*, polyp, + *ferre* = E. *bear*[1].] Bearing polyps; producing polypites: as, the *polypiferous* surface of a coral. Also *polypiparous*, *polypigerous.*

polypiform (pol'i-pi-fôrm), *a.* [< L. *polypus*, polyp, + *forma*, form.] **1.** Having the form, structure, or character of a polyp; polypomorphic.—**2.** Having the form or appearance of a polypus.

polypigerous (pol-i-pij'e-rus), *a.* [< L. *polypus*, polyp, + *gerere*, carry.] Same as *polypiferous.*



polypiparous (pol-i-pip'a-rus), *a.* [< L. *polypus*, polyp, + *parere*, produce.] Same as *polypiferous.*

polypite (pol'i-pīt), *n.* [= F. *polypite;* as *polyp* + *-ite*[2].] **1.** The fundamental element in the structure of a polyp, as a hydrozoan or an actinozoan; an individual zoöid of a compound polyp; one of the individuals or persons which together fabricate and constitute a polyp-stock or polypary; a hydranth. The term is sometimes extended to the corresponding elements of a polyzoarium, or compound polyzoan, but these are more strictly called *polypides.* See cut under *Athorybia.*

2. A fossil polyp.

polyplacid (pol'i-plas-id), *a.* [< Gr. *πολύς*, many, + *πλακοῦς*, a flat cake: see *placent.*] Having more than one madreporic plate, as a starfish; not monoplacid. Abbreviated *p.*

Polyplacophora (pol″i-plā-kof′ō-rä), *n. pl.* [NL. (J. E. Gray, 1821), neut. pl. of *polyplacophorus:* see *polyplacophorous.*] An order of isopleurous gastropods, exhibiting bilateral symmetry and metameric segmentation. The dorsal shell is in eight successive pieces, sometimes embedded in shell-sacs; there are numerous gill-combs and olfactory tracts, or ctenidia and osphradia; paired genital

A, Chiton wossnessenskii, one of the *Polyplacophora. B,* the same, dissected: *o,* mouth; *g,* the nervous ring; *ao,* aorta; *c,* ventricle; *c′,* an auricle; *br,* left branchia; *od,* oviducts.

ducts distinct from the paired nephridia; and there is a well-developed odontophore with numerous lingual teeth on the radula. The order is conterminous with the family *Chitonidæ* in a broad sense. In J. E. Gray's classification (1821) it was one of 9 orders of cryptobranchiate gastropods. The original form was *Polyplaxiphora.* In Gray's system of the mollusks it was considered as a suborder of heteroglossate scutibranchiate gastropods, and defined as having the gills in two lamellar series on each side of the hinder part of the under side of the mantle-edge, and the shell formed of eight imbricate valves.

polyplacophoran (pol″i-plā-kof′ō-ran), *a.* and *n.* Same as *polyplacophore.*

polyplacophore (pol-i-plak′ō-fōr), *a.* and *n.* [< NL. *polyplacophorus:* see *polyplacophorous.*] **I.** *a.* Bearing many plates, as a chiton; of or pertaining to the *Polyplacophora.*

II. *n.* A member of the *Polyplacophora;* a chiton, or coat-of-mail shell.

polyplacophorous (pol″i-plā-kof′ō-rus), *a.* [< NL. *polyplacophorus,* < Gr. πολύς, many, + πλάξ (πλακ-), a tablet, plate, + φέρειν = E. *bear*[1].] Same as *polyplacophore.*

polyplastic (pol-i-plas′tik), *a.* [< Gr. πολύς, many, + πλαστικός, plastic: see *plastic.*] Having or assuming many forms.

Polyplaxiphora (pol″i-plak-sif′ō-rä), *n. pl.* Same as *Polyplacophora. De Blainville,* 1825, etc.

polyplectron, polyplectrum (pol-i-plek′tron, -trum), *n.* [= F. *polyplectron;* < Gr. πολύς, many, + πλῆκτρον, plectrum: see *plectrum.*] 1. Pl. *polyplectra* (-trä). An obsolete variety of harpsichord or spinet.—2. [*cap.*] [NL. (Temminck, 1815).] A magnificent genus of *Phasianidæ,* of the subfamily *Pavoninæ,* having the tarsi with

Peacock-pheasant (*Polyplectron bicalcaratum*).

two or more spurs, and the plumage more or less ocellated, as in the peacock; the peacock-pheasants. The best-known species is *P. bicalcaratum* or *chinquis;* others are *P. germani, helenæ, schleirmachi,* and *thibetanum.* More different than these are the Napoleon pheasant of the Moluccas, *P. emphanum* (or *napoleonis*), and the Sumatran *P. chalcurum.* Also called *Diplectropus, Diplectron, Diplectrum.*

Polyplectroninæ (pol-i-plek-trō-nī′nē), *n. pl.* [NL., < *Polyplectron,* 2, + *-inæ.*] Same as *Pavoninæ.*

polyplectrum, *n.* See *polyplectron.*

polypnœa (pol-ip-nē′ä), *n.* [NL., < Gr. πολύς, many, + πνοιά, πνοή, breathing, < πνεῖν, breathe.] Increased frequency of respiration.

polypod (pol′i-pod), *a.* and *n.* [< Gr. πολύπους, many-footed, < πολύς, many, + ποίς (ποδ-) = E. *foot.* Cf. *polyp.*] **I.** *a.* Having many legs, feet, arms, or rays. (*a*) In *Crustacea,* more than decapod; having more than ten and fewer than fifty legs. Compare *amphipod, isopod.* (*b*) In *Mollusca,* more than octopod; decapod or decacerous; of or pertaining to the *Polypoda.* (*c*) In *Annelida,* having indefinitely many foot-stumps or parapodia; of or pertaining to the *Polypoda.* (*d*) In *entom.*: (1) myriapod; of or pertaining to the *Polypoda.* (2) Many-footed, as the larvæ of certain hexapods.

II. *n.* 1. A member of the *Polypoda,* in any sense.—2. Same as *polypody.*

Also *polypode.*

Polypoda (pō-lip′ō-dä), *n. pl.* [NL., neut. pl. of *polypus:* see *polypod.*] 1. In Kirby's system (1826), a class of insects corresponding to the modern class *Myriapoda.*—2. In *Annelida,* a large division of worms which are polypod, divided into *Nereidina* and *Serpulina:* distinguished from *Apoda. Macleay,* 1840. [Little used.]—3. An order of cephalopods represented by the nautiloids. See *Nautilidæ.* [Little used.]

polypode (pol′i-pōd), *n.* [= F. *polypode:* see *polypod.*] Same as *polypod.*

Polypodiaceæ (pol-i-pō-di-ā′sē-ē), *n. pl.* [NL. (Robert Brown, 1810), < *Polypodium* + *-aceæ.*] A family of ferns, named from the genus *Polypodium.* This family includes the largest number of genera and species, and may be regarded as the typical family of ferns. They are usually herbaceous plants, with a permanent stem, which remains buried or rooted beneath the soil, or creeps over the stems of trees, or forms a scarcely moving point of growth around which new fronds are annually produced in a circle, or it rises into the air in the form of a simple stem bearing a tuft of fronds at its apex, and sometimes attaining the height of forty feet or more, as in the tree-ferns. The sporangia are collected in dots, lines, or variously shaped clusters on the back or margins of the frond or its divisions, and are provided with an incomplete vertical annulus so that they dehisce transversely. It embraces the tribes *Polypodieæ, Pterideæ, Asplenieæ, Dryopterideæ, Woodsieæ, Davallieæ, Vittarieæ, Alcicornieæ, Oleandreæ,* and *Acrostricheæ.*

polypodiaceous (pol-i-pō-di-ā′shius), *a.* [< *Polypodiaceæ* + *-ous.*] Of or pertaining to the *Polypodiaceæ.*

Polypodieæ (pol″i-pō-dī′ē-ē), *n. pl.* [NL., < *Polypodium* + *-eæ.*] A tribe of ferns of the family *Polypodiaceæ,* typified by the genus *Polypodium.* The sori are on the back of the frond, on the veins, or at the ends of the veins, in roundish clusters, and without indusium of any kind.

Polypodium (pol-i-pō′di-um), *n.* [NL., < L. *polypodium,* a kind of fern: see *polypody.*] The largest and most widely distributed genus of ferns, typical of the family *Polypodiaceæ* and tribe *Polypodieæ.* The fronds are very various in outline, with the sori round, naked, dorsal, in one or more rows on each side of the midrib, or irregularly scattered. About 400 species are known, of which only 9 are found in the United States, *P. vulgare,* which occurs also in the Old World, being the most common. See *polypody.*

The complete plant of Polypody (*Polypodium vulgare*). *a,* pinnule with sori; *b,* a sporangium.

★**polypody** (pol′i-pō-di), *n.* [< ME. *polypodye* = F. *polypode* = Sp. *polipodio* = Pg. *polypodio* = It. *polipodio,* < L. *polypodium,* < Gr. πολυπόδιον, a kind of fern, so called with ref. to the branching rootstock, < πολύπους, many-footed: see *polypode*[1], *polyp.*] A fern of the genus *Polypodium,* chiefly *P. vulgare,* the common polypody, growing commonly on rocks: in England locally called *adder's-fern, wall-* or *wood-fern, polypody of the oak* or *of the wall,* etc. The hoary polypody is *P. polypodioides,* a smaller species abounding in tropical America and reaching north to Ohio, having the fronds grayish-scurfy beneath, growing on trees and roofs, also on rocks. Also *polypod, polypode.*

Take the stinking oil drawn out of *polypody of the oak* by a retort, mixed with turpentine and hive-honey, and anoint your bait therewith.

I. Walton, Complete Angler, p. 128.

Polypogon (pol-i-pō′gon), *n.* [NL. (Desfontaines, 1798), so called in allusion to the many long awns; < Gr. πολύς, much, + πώγων, beard.] A genus of grasses of the tribe *Agrostideæ* and subtribe *Euagrosteæ.* It is characterized by the usually dense and spike-like inflorescence, the one-flowered spikelets with the pedicel not prolonged beyond the flower, and the three-awned glumes, the flowering glume much the smaller, and bearing its awn below the apex. There are about 10 species, widely distributed over temperate and subtropical regions, mainly annuals with decumbent stems and flat leaves. They bear cylindrical spikes almost concealed by their abundant awns, or spicate panicles, which are larger and irregular. See *beard-grass.*

polypoid (pol′i-poid), *a.* [< Gr. πολύπους, polyp, + εἶδος, form.] Resembling a polyp or polypus; polypiform or polypomorphic.

polypoidal (pol-i-poi′dal), *a.* [< *polypoid* + *-al.*] Resembling a polypus.

Polypomedusæ (pol″i-pō-mē-dū′sē), *n. pl.* [NL., < L. *polypus,* polyp, + NL. *Medusa:* see *Medusa,* 2.] A group of epithelarian *Cœlentera,* consisting of the hydrozoans and actinozoans, thus together distinguished from the ctenophorans by the possession of enidoblasts. According to the presence or absence of phacellæ, the *Polypomedusæ* are divided into *Phacellotæ* and *Aphacellæ,* the former consisting of the *Scyphomedusæ* and *Actiniaria,* the latter of the *Hydromedusæ* alone. The polypomedusans are simply the cœlenterates divested of the ctenophorans.

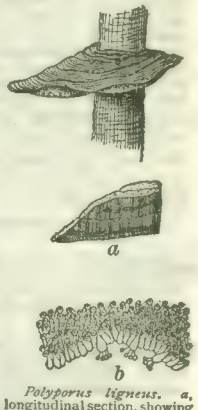
polypomedusan (pol″i-pō-mē-dū′san), *a.* and *n.* **I.** *a.* Pertaining to the *Polypomedusæ,* or having their characters.

II. *n.* A member of the *Polypomedusæ.*

Polypomorpha (pol″i-pō-môr′fä), *n. pl.* [NL., < Gr. πολύπους, polyp, + μορφή, form.] Polyps or polypiform cœlenterates, a prime group or grade of *Hydrozoa:* used when the ctenophores are included in that class, the two divisions then being *Polypomorpha* and *Ctenophora.*

polypomorphic (pol″i-pō-môr′fik), *a.* [< Gr. πολύπους, polyp, + μορφή, form, + *-ic.*] Having the form or character of a polyp; polypoid; polypiform; or pertaining to the *Polypomorpha.*

Polypora (pō-lip′ō-rä), *n.* [NL. (McCoy, 1844), < Gr. πολύπορος, with many passages or pores: see *polyporous.*] A genus of coralligenous hydrozoans or *Hydrocorallinæ,* belonging to the family *Stylasteridæ.*



Polyporaceæ (pol″i-pō-rā′sē-ē), *n. pl.* [NL., < *Polyporus* + *-aceæ.*] A family of hymenomycetous fungi, typified by the genus *Polyporus.* Incorrectly spelled *Polyporiaceæ.*

polyporite (pō-lip′ō-rīt), *n.* [< *Polyporus* + *-ite*[2].] In *geol.,* a fungus-like organism resembling *Polyporus versicolor.*

polyporoid (pō-lip′ō-roid), *a.* [< *Polyporus* + *-oid.*] In *bot.,* similar to, characteristic of, or belonging to the genus *Polyporus.*

polyporous (pō-lip′ō-rus), *a.* [< Gr. πολύπορος, with many pores, < πολύς, many, + πόρος, a passage, pore: see *pore*[2].] Having many pores; cribrate; ethmoid; foraminulate.

Polyporus (pō-lip′ō-rus), *n.* [NL. (Fries, 1815), < Gr. πολύς, many, + πόρος, a passage, pore.] A very large, widely distributed genus of hymenomycetous fungi, typical of the family *Polyporaceæ,* having the hymenium lining long, narrow, round, or angular tubes. They are very familiar objects, forming little shelves or brackets attached to dead or decaying wood, some being very small, others several or many inches in circumference. *P. Laricis* is the white or purging agaric, or larch-agaric, used internally to check sweats, sometimes as a purgative and emetic, and externally as a styptic. See *agaric* and *amadou.*

Polyporus igneus. a, longitudinal section, showing the tubular pores: *b,* transverse section through a part of one of the pores, showing the basidia and the hyphæ.

polypose (pol′i-pōs), *a.* [< L. *polyposus:* see *polyposus.*] Same as *polyposus. Arbuthnot,* Aliments, vi.

polypostem (pol′i-pō-stem), *n.* Same as *polyp-stem.*

polypostylar (pol″i-pō-stī′lär), *a.* [< *polypostyle* + *-ar*[3].] Pertaining to a polypostyle, or having its character.

polypostyle (pol′i-pō-stīl), *n.* [< Gr. πολύπους, many-footed (see *polyposo* = Pg. *polyposo* = It. *polioposo,* < L. *polyposus,* having polypus in the nose, < *polypus,* polypus: see *polypus.*] Of the nature of a polypus; having many feet or roots, like a polypus.

polypragmatic (pol″i-prag-mat′ik), *a.* and *n.* [Formerly *polipragmatick;* < Gr. πολυπράγματος, having many things to do, meddlesome, inquisitive, < πολύς, many, + πρᾶγμα, a thing to do, affair, pl. πράγματα, business: see *pragmatic.*] **I.** *a.* Overbusy or meddlesome; forward; officious. [Rare.]

II. *n.* A meddlesome or officious person.

Jesuited *polipragmaticks.* *Burton.* (*Davies.*)

polypragmatical (pol″i-prag-mat′i-kal), *a.* [< *polypragmatic* + *-al.*] Same as *polypragmatic.*

His [the busybody's] actions are *polypragmatical*, his feet peripatetical. Erasmus pictures him to the life: "He knows what every merchant got in his voyage, what plots are at Rome, what stratagems with the Turk, &c."
Rev. T. Adams, Works, I. 502.

polypragmaty (pol-i-prag′ma-ti), *n.* [As *polypragmat-ic* + *-y*³.] The state of being over-engaged in business or affairs. [Rare.]

polypragmon (pol-i-prag′mon), *n.* [Formerly *polipragmon, polipragman*; < OF. *polipragmon*, < Gr. πολυπράγμων, a busybody, < πολύς, much, many, + πρᾶγμα, affair, πράσσειν, act.] A busybody; an officious person.

polypragmonist† (pol-i-prag′mō-nist), *n.* [< *polypragmon* + *-ist.*] Same as *polypragmon.*

Dry tobacco with my [hornbook's] leaves, you good dry-brained *polypragmonists.* *Dekker*, Gull's Hornbook.

Polyprion (pol-i-prī′on), *n.* [NL. (Cuvier, 1817), < Gr. πολύς, many, + πρίων, a saw.] A genus of serranoid fishes; the stone-basses. The anal spines are strong, the dorsal spines serrated, the branchiostegals seven, and the teeth all villiform; the tail is not forked, and there is a rough ridge on the operculum. *P. americanus* is a large fish, 6 feet long, of the coasts of southern Europe and Africa, sometimes known as the *stone-bass, wreck-fish*, and *cernier*, and *P. oxygeneios* is an inhabitant of the temperate Pacific.

polyprism (pol′i-prizm), *n.* [< Gr. πολύς, many, + πρίσμα, a prism: see *prism.*] A compound prism formed of several prisms of different materials, but of the same angle, connected at their ends, and used to show the unequal refracting power of different media.

polyprismatic (pol″i-priz-mat′ik), *a.* [= It. *poliprismatico*, < Gr. πολύς, many, + πρίσμα, a prism: see *prism, prismatic.*] In *mineral.*, having crystals presenting numerous prisms in a single form.

polyprotodont (pol-i-prō′tō-dont), *a.* and *n.* [< Gr. πολύς, many, + πρῶτος, first, + ὀδούς (ὀδοντ-) = E. *tooth.*] **I.** *a.* Having several front teeth: noting the insectivorous or carnivorous dentition of marsupials, in which the incisors are small, several, and much alike, and the canines large and specialized: contrasted with *diprotodont.*

II. *n.* A polyprotodont marsupial.

Polyprotodontia (pol-i-prō-tō-don′shi-ä), *n. pl.* [NL., neut. pl.: see *polyprotodont.*] The carnivorous or polyprotodont marsupials, a prime division of *Marsupialia*, having more than two incisors (at least in the lower jaw) and specialized canines.

polyp-stem (pol′ip-stem), *n.* A polyp-stock; the stem of a polypidom, common to several polypites. Also *polypostem.*

polyp-stock (pol′ip-stok), *n.* The stock of a polyp; a polypary or polypidom.

Polypteridæ (pol-ip-ter′i-dē), *n. pl.* [NL., < *Polypterus* + *-idæ.*] A family of crossopterygian ganoid fishes, typified by the genus *Polypterus*; the bichirs. They have lozenge-shaped ganoid scales, fins without fulcra, a series of dorsal spines, to which an articulated finlet is attached, anal situated close to the caudal fin, the vent near the end of the tail, the abdominal part of the vertebral column much longer than the caudal portion, and no pseudobranchiæ.

polypteroid (pō-lip′te-roid), *a.* and *n.* **I.** *a.* Resembling or related to the fin-fishes; belonging to the *Polypteroidei.*

II. *n.* A member of the *Polypteroidei.*

Polypteroidei (pō-lip-te-roi′dē-ī), *n. pl.* [< NL. *Polypterus*, q. v., + Gr. εἶδος, form.] A suborder of ganoid fishes, represented by the *Polypteridæ* and some related families.

Polypterus (pō-lip′te-rus), *n.* [NL. (Geoffroy, 1802), < Gr. πολύπτερος, many-winged, < πολύς, many, + πτερόν, feather, wing.] The typical genus of *Polypteridæ*, remarkable for the number of the dorsal spines bearing rays behind. It contains the bichir.

polyptoton (pol-ip-tō′ton), *n.* [L. (> F. *polyptote*), < Gr. πολύπτωτον, neut. of πολύπτωτος, with many cases, < πολύς, many, + πτωτός, verbal adj. of πίπτειν, fall (> πτῶσις, a case).] In *rhet.*, a figure consisting in the use of different cases or inflections of the same word, or of words of the same immediate derivation, in the same context.

One of the most celebrated examples is the distich,

Mors mortis morti mortem nisi *morte* tulisset,
Æternæ vitæ janua clausa foret.

(Unless the *death of Death* had brought *death to death by* [his] *death*, the door of eternal life would have been closed.)

polyptych (pol′ip-tik), *n.* [= F. *polyptique*, < ML. *polyptychum*, a register, roll, < Gr. πολύπτυχον, a writing folded into many leaves, a register, roll, neut. of πολύπτυχος, with many leaves or folds, < πολύς, many, + πτύξ (πτυχ-) or πτυχή, fold. Cf. *policy*², from the same source.] A combination of panels or frames, more than three in number, for receiving paintings on one or both sides of every leaf. Compare *diptych* and *triptych.* *Maskell*, Russian Art, S. K. M. Handbook.

Polyptychodon (pol-ip-tik′ō-don), *n.* [NL. (Owen), < Gr. πολύπτυχος, with many folds (see *polyptych*), + ὀδούς (ὀδοντ-) = E. *tooth.*] A genus of cretaceous plesiosaurians: same as *Basilosaurus.*

polypus (pol′i-pus), *n.*; pl. *polypi* (-pī). [NL., < L. *polypus* (pl. *polypi*), < Gr. πολύπους (pl. πολύποδες, poet. or dial. πολύποι), a polypus: see *polyp.*] **1.** In *zoöl.*: (*a*) A poulp or cuttle. (*b*) A polyp, in any sense. (*c*) [*cap.*] (1) A genus of cuttles. (2) A genus of polyps.—2. In *pathol.*, any kind of tumor growing from a mucous membrane, of rounded form, and more or less distinctly pedunculated. The term is most frequently applied to benign growths.—**Polypus-forceps**, a forceps for grasping and tearing off polypi.

polyrhizal (pol-i-rī′zal), *a.* [< Gr. πολύρριζος, with many roots: see *polyrhizous.*] Same as *polyrhizous.*

polyrhizous (pol-i-rī′zus), *a.* [Prop. **polyrrhizous*; = F. *polyrrhize*; < L. *polyrrhizos*, < Gr. πολύρριζος, with many roots, < πολύς, many, + ῥίζα, root.] In *bot.*, possessing numerous rootlets independently of those by which the attachment is effected.

polysarcia (pol-i-sär′si-ä), *n.* [NL., < Gr. πολυσαρκία, fleshiness, < πολύσαρκος, fleshy: see *polysarcous.*] **1.** Excess of flesh.—2. In *bot.*, an excess of sap, giving rise to unnatural or abnormal growth. *Thomas*, Med. Dict.—**Polysarcia adiposa**, obesity.—**Polysarcia cordis**, obese heart.

polysarcous (pol-i-sär′kus), *a.* [< Gr. πολύσαρκος, having much flesh, fleshy, < πολύς, much, + σάρξ (σαρκ-), flesh.] Affected with polysarcia; obese.

polyscelia (pol-i-sē′li-ä), *n.* [NL., < Gr. πολύς, many, + σκέλος, the leg.] In *teratol.*, a monster having many legs.

polyschematic (pol″i-skē-mat′ik), *a.* Same as *polyschematist.*

polyschematist (pol-i-skē′ma-tist), *a.* [< LGr. πολυσχηματίστος, multiform, < Gr. πολύς, many, + σχηματίζειν, assume form, < σχῆμα(τ-), form: see *scheme.*] Characterized by or existing in many forms or fashions; specifically, in *anc. pros.*, admitting as substitutes feet not metrically equivalent, or containing such feet.

polyscope (pol′i-skōp), *n.* [= F. *polyscope* = Sp. *poliscópio* = Pg. *polyscopo, polyscopio*, < Gr. πολύς, many, + σκοπεῖν, view. Cf. Gr. πολύσκοπος, far-seeing.] 1. In *optics*, a lens plane on one side and convex on the other, but having the convex side formed of several plane surfaces or facets, so that an object seen through it appears multiplied.—2. In *surg.*, an instrument for illuminating the cavities of the body by means of an electric light.

polysepalous (pol-i-sep′a-lus), *a.* [< Gr. πολύς, many, + NL. *sepalum*, sepal.] In *bot.*, having the sepals separate from each other: said of a calyx.

Polysiphonia (pol″i-sī-fō′ni-ä), *n.* [NL. (Greville): see *polysiphonous.*] A very large, widely distributed, and extremely variable genus of red algæ. The fronds are filamentous or subcompressed, distichously or irregularly branching, formed of a monosiphonous axis and several siphons, and either naked or with a cortical layer of irregular cells, furnished with numerous tufts of hyaline, monosiphonous, dichotomous filaments. The tetraspores are in one, rarely two, rows, in slightly altered upper branches; cystocarps ovate-globose or urceolate; spores piriform, on short pedicles. See *dough-balls, niggerhair, lobster-claws.*

polysiphonous (pol-i-sī′fō-nus), *a.* [< Gr. πολύς, many, + σίφων, a tube: see *siphon.*] In *bot.*: (*a*) Having several or many siphons: said of certain algæ. Compare *monosiphonous*, and see *siphon.* (*b*) Resembling, belonging to, or characteristic of the genus *Polysiphonia.*

polysomatic (pol″i-sō-mat′ik), *a.* [< Gr. πολυσώματος, with many bodies, < πολύς, many, + σῶμα, body.] Consisting of an aggregation of smaller grains: used by some lithologists to note a grain or chondrus of this character.

polysomitic (pol″i-sō-mit′ik), *a.* [< Gr. πολύς, many, + E. *somite* + *-ic.*] Consisting of a number of primitively distinct somites which have united or become grouped into a segment or region of the body in any way distinguished from another part of the body: thus, the head, or thorax, or abdomen of an arthropod, such as an insect or a crustacean, is *polysomitic.* *Huxley*, Anat. Invert., p. 220.

polyspast† (pol′i-spast), *n.* [= Sp. *polispastos* = It. *polispasto*, < L. *polyspaston*, < Gr. πολύσπαστον, a hoisting-tackle with many pulleys, neut. of πολύσπαστος, drawn by many cords, < πολύς, many, + σπᾶν, draw: see *spasm.*] **1.** A machine consisting of a combination of pulleys, used for raising heavy weights: a term formerly used by writers on mechanics.—2. An apparatus of the same character formerly used in surgery to reduce dislocations.

polysperm (pol′i-spėrm), *n.* [< Gr. πολύσπερμος, with many seeds: see *polyspermous.*] A plant whose fruit contains many seeds.

All of them easily raised of the kernels and roots, which may be got out of their *polysperms.*
Evelyn, Sylva, II. iii. § 1. (*Latham.*)

polyspermal (pol-i-spėr′mal), *a.* [< *polysperm-ous* + *-al.*] Same as *polyspermous.*

polyspermous (pol-i-spėr′mus), *a.* [= Sp. *polispermo* = Pg. *polyspermo* = It. *polispermo*, < Gr. πολύσπερμος, with many seeds, < πολύς, many, + σπέρμα, seed: see *sperm.*] Containing many seeds: as, a *polyspermous* capsule or berry.

polyspermy (pol′i-spėr-mi), *n.* [< Gr. πολύς, many, + σπέρμα, seed.] Impregnation of an ovum by more than one spermatozoön.

polyspire (pol′i-spīr), *n.* [< Gr. πολύς, many, + σπεῖρα, coil.] In *zoöl.*, a structure resulting from continued spiral growth through several revolutions. *Encyc. Brit.*, XXII. 417.

polysporangium (pol″i-spō-ran′ji-um), *n.*; pl. *polysporangia* (-ä). [NL., < Gr. πολύς, many, + NL. *sporangium.*] The cystocarp of the red sea-weeds. [Obsolete.]

polyspore (pol′i-spōr), *n.* [< Gr. πολύς, many, + σπόρος, seed: see *spore.*] In *bot.*, a compound spore; in certain algæ, a compound spore composed of several or many spores or cells.

Polysporea (pol-i-spō′rē-ä), *n. pl.* [NL., < Gr. πολύς, many, + σπόρος, seed, + *-ea.*] An ordinal name of those coccidiid sporozoans whose cyst-contents are converted into a great many spores, as in the genus *Klossia.* *Aimé Schneider.*

polysporean (pol-i-spō′rē-an), *a.* and *n.* **I.** *a.* Polysporous; of or pertaining to the *Polysporea.*

II. *n.* A member of the order *Polysporea.*

polyspored (pol′i-spōrd), *a.* [< *polyspore* + *-ed*².] In *bot.*, containing or producing many spores, as the asci of certain fungi, which contain from twenty to one hundred or more instead of eight, the usual number.

polysporic (pol-i-spor′ik), *a.* [< *polyspor-ous* + *-ic.*] In *bot.*, same as *polysporous.*

polysporous (pol-i-spō′rus), *a.* [= F. *polyspore*, < Gr. πολύσπορος, with many seeds or crops, < πολύς, many, + σπόρος, seed: see *spore.*] Producing many spores. Specifically—(*a*) In *bot.*, same as *polyspored.* (*b*) In *zoöl.*, polysporean.

polystachous (pō-lis′tā-kus), *a.* [< Gr. πολύς, many, + στάχυς, an ear of corn, a spike.] In *bot.*, having many spikes.

polystaurium (pol-i-stâ′ri-um), *n.* [NL.: see *polystauron.*] Same as *stauracin.*

polystauron (pol-i-stâ′ron), *n.* [< Gr. πολύς, many, + σταῦρον, a stake, pale, cross.] Same as *stauracin.*

polystemonous (pol-i-stem′ō-nus), *a.* [< Gr. πολύς, many, + στήμων, warp (stamen).] Having many stamens; having stamens more than double the number of sepals and petals: said of flowers. *Encyc. Brit.*, IV. 135.

polystichous (pō-lis′ti-kus), *a.* [< Gr. πολύς, many, + στίχος, row, line.] In *nat. hist.*, arranged in numerous rows or ranks; multifarious. Compare *monostichous* and *distichous.*

Polysticta (pol-i-stik′tä), *n.* [NL. (T. C. Eyton, 1836), < Gr. πολύστικτος, much-spotted, < πολύς, many, + στικτός, verbal adj. of στίζειν, prick, spot.] 1. A genus of ducks related to the eiders, but having the bill not gibbous, without frontal processes, and not feathered to the nostrils, and its tomial edge dilated and leathery. There is only one species, *P. stelleri* or *dispar*, known as *Steller's eider*, a beautiful duck of circumpolar distribution. The male is chiefly white, black, and chestnut-brown, tinged with sea-green on the head. Also called *Macropus, Stelleria*, and *Eniconetta* or *Heniconetta.*

2. In *entom.*, a genus of coleopterous insects. ★*Hope*, 1840.

polystigm (pol′i-stim), *n.* [< Gr. πολύς, many, + στίγμα, point, mark.] A figure composed of a number of points.

polystigmous (pol-i-stig′mus), *a.* [< Gr. πολύς, many, + στιγμα, mark: see *stigma.*] In *bot.*, having many carpels, every one bearing a stigma: said of a flower.

Polystoma (pō-lis'tō-mä), *n.* [NL., < Gr. *πολύστομος*, having many mouths, < *πολύς*, many, + *στόμα*, mouth.] Same as *Polystomum*.

Polystomata (pol-i-stō'ma-tä), *n. pl.* [NL., neut. pl. of *polystomatus:* see *polystomatous.*] 1. The sponges or *Porifera*, as metazoic organisms contrasted with all other *Metazoa*, or *Monostomata:* so called from their many mouths or oscula.—2. In Saville Kent's system of classification, one of four sections of *Protozoa*, consisting of the suctorial or tentaculiferous animalcules, or the acinetiform infusorians, having many tentacular organs, each of which serves as a tubular sucking-mouth: contrasted with *Eustomata*, *Discostomata*, and *Pantostomata*. The group is oftener called *Tentaculifera*.

polystomatous (pol-i-stom'a-tus), *a.* [< NL. *polystomatus* (cf. Gr. *πολύστομος*), < Gr. *πολύς*, many, + *στόμα*, mouth.] Having many mouths or apertures for the ingestion of food; specifically, of or pertaining to the *Polystomata*.

polystome (pol'i-stōm), *n.* [= F. *polystome*, < Gr. *πολύστομος*, having many mouths, < *πολύς*, many, + *στόμα*, mouth.] An animal with many mouths. (*a*) A member of the *Polystomata*, in either sense, as a sponge or an acinetiform infusorian. (*b*) A trematoid of the suborder *Polystomea;* a polystome-fluke.

Polystomea (pol-i-stō'mē-ä), *n. pl.* [NL., < Gr. *πολύστομος*, having many mouths: see *polystome.*] A suborder of *Trematoidea*, containing trematoid worms with two small lateral suckers on the head and several posterior suckers, with which a pair of large chitinous hooks are often found. Some species are elongated, and present a kind of segmentation. They are for the most part ectoparasitic. The term is contrasted with *Distomea*.

Polystomeæ (pol-i-stō'mē-ē), *n. pl.* Same as *Polystomea*.

polystome-fluke (pol'i-stōm-flōk), *n.* A fluke or trematoid of the family *Polystomidæ*.

polystomia, *n.* Plural of *polystomium*.

Polystomidæ (pol-i-stom'i-dē), *n. pl.* [NL., < *Polystomum* + *-idæ.*] A family of polystomatous *Trematoidea*, typified by the genus *Polystomum*, having several posterior suckers, usually paired and disposed in two lateral rows, and reinforced by an armature of chitinous hooks.

polystomium (pol-i-stō'mi-um), *n.*; pl. *polystomia* (-ä). [NL.: see *polystome.*] One of the numerous fine pores at the ends of the ramifications of the oral arms in some acalephs, replacing the original mouth, which has become closed by the gradual union of the arms.

Polystomum (pō-lis'tō-mum), *n.* [NL.: see *polystome.*] The typical genus of *Polystomidæ*, having an oral but no lateral sucker on the anterior end, four eyes, and at the posterior end six suckers, each with a hook, two median hooks, and ten small hooks. The species are parasitic, as *P. integerrimum* in the bladder of frogs, and *P. ocellatum* in the pharynx of turtles. A fluke formerly called *P. sanguinicola*, now *Hexathyridium venarum*, is found in venous blood. Also *Polystoma*.

polystyle (pol'i-stīl), *a.* [= F. *polystyle* = It. *polistilo*, < Gr. *πολύστυλος*, with many columns, < *πολύς*, many, + *στῦλος*, a column: see *style*².] In *arch.*, having, characterized by, or supported by many columns; surrounded by several rows of columns, as some Moorish or Arabic courts.

polystylous (pol-i-stī'lus), *a.* [< Gr. *πολύστυλος*, with many columns, < *πολύς*, many, + *στῦλος*, column (style). Cf. *polystyle.*] In *bot.*, bearing many styles. *Gray.*

polysyllabic (pol″i-si-lab'ik), *a.* [= F. *polysyllabique;* as *polysyllab-le* + *-ic.*] Of or pertaining to a polysyllable; consisting of many syllables, specifically of more than three.

polysyllabical (pol″i-si-lab'i-kal), *a.* [< *polysyllabic* + *-al.*] Same as *polysyllabic*.

polysyllabicism (pol″i-si-lab'i-sizm), *n.* [< *polysyllabic* + *-ism.*] Polysyllabic character; the quality of having or of being composed of many (specifically more than three) syllables.

polysyllabism (pol-i-sil'a-bizm), *n.* [< *polysyllab-le* + *-ism.*] Same as *polysyllabicism*.

polysyllable (pol-i-sil'a-bl), *n.* [= F. *polysyllabe* = Sp. *polisílabo* = Pg. *polysyllabo* = It. *polisillabo*, a polysyllable, < Gr. *πολυσύλλαβος*, polysyllabic, < Gr. *πολύς*, many, + *συλλαβή*, syllable: see *syllable.*] A word of several syllables; usually, a word of four or more syllables, words of one syllable being called *monosyllables*, those of two *dissyllables*, and those of three *trisyllables*.

polysyllogism (pol-i-sil'ō-jizm), *n.* [< Gr. *πολύς*, many, + *συλλογισμός*, syllogism: see *syllogism.*] A combination of syllogisms; a chain of reasoning.—**Manifest polysyllogism.** See *manifest*.

polysyllogistic (pol-i-sil-ō-jis'tik), *a.* [< *polysyllog-ism* + *-istic* (cf. *syllogistic*).] Consisting of a chain of syllogisms.

polysymmetrical (pol″i-si-met'ri-kal), *a.* [As *polysymmetry* + *-ic-al.*] Divisible into exactly similar halves by more than one plane, as is the case with all regular flowers. *Actinomorphous* is a synonym.

polysymmetrically (pol″i-si-met'ri-kal-i), *adv.* In a polysymmetrical manner; in accordance with polysymmetry.

polysymmetry (pol-i-sim'et-ri), *n.* [< Gr. *πολύς*, many, + *συμμετρία*, symmetry: see *symmetry.*] Susceptibility of division into like halves by more than one plane; the state of being polysymmetrical.

polysyndeton (pol-i-sin'de-ton), *n.* [NL., = F. *polysyndète* = Sp. *polisíndeton* = Pg. *polysyndeton*, < NL. *polysyndeton*, < Gr. **πολυσύνδετον*, prop. neut. of **πολυσύνδετος*, joined in various ways, < *πολύς*, many, + *σύνδετος*, bound together: see *asyndeton.*] In *rhet.*, a figure consisting in the use of a number of conjunctions in close succession; introduction of all the members of a series of coördinate words or clauses with conjunctions: opposed to *asyndeton*. Asyndeton produces an accelerated, polysyndeton a retarded movement in the sentence. Asyndeton gives an effect of accumulation and energy, polysyndeton demands special and deliberate attention to each separate word and clause introduced. Rom. viii. 35, 38, 39 is an example.

polysynthesis (pol-i-sin'the-sis), *n.* [NL., < Gr. *πολύς*, many, + *σύνθεσις*, composition: see *synthesis.*] Composition of many elements; specifically, in *philol.*, composition from an abnormal number and variety of elements.

polysynthetic (pol″i-sin-thet'ik), *a.* [= F. *polysynthétique*, < Gr. *πολυσύνθετος*, much-compounded, < *πολύς*, much, + *σύνθετος*, compounded: see *synthetic.*] 1. In *philol.*, compounded of a number and variety of elements beyond the usual norm; exhibiting excessive intricacy of synthetic structure, as by the incorporation of objective and adverbial elements in the verb forms; incapsulated: as, a *polysynthetic* word; characterized by such compounds: as, a *polysynthetic* language: first applied by Du Ponceau to the class of languages spoken by the Indian tribes of America. Also *incorporative* and (rarely) *megasynthetic.*—2. In *mineral.*, compounded of a number of thin lamellæ in twinning position to each other, or characterized by this kind of structure: as, a *polysynthetic* twin. See *twin*.

Felspar, very fresh and clear, sometimes with distinct *polysynthetic* twin lines. *Nature*, XXX. 12.

polysynthetical (pol″i-sin-thet'i-kal), *a.* [< *polysynthetic* + *-al.*] Same as *polysynthetic*.

polysynthetically (pol″i-sin-thet'i-kal-i), *adv.* In a polysynthetic manner; by polysynthesis.

polysyntheticism (pol″i-sin-thet'i-sizm), *n.* [< *polysynthetic* + *-ism.*] The character of being polysynthetic.

polysynthetism (pol-i-sin'the-tizm), *n.* [< *polysynthet-ic* + *-ism.*] Polysynthetic structure; polysyntheticism.

If we cannot prove the American languages related except by the characteristic of *polysynthetism*.
Whitney, Life and Growth of Lang., p. 268.

polytechnic (pol-i-tek'nik), *a.* and *n.* [= F. *polytechnique* = Sp. *politécnico* = Pg. *polytechnico* = It. *politechnico*, < Gr. *πολύτεχνος*, skilled in many arts, < *πολύς*, many, + *τέχνη*, art: see *technic.*] **I.** *a.* Concerning or comprehending many arts: noting specifically educational institutions in which instruction is given in many arts, more particularly with reference to their practical application.

II. *n.* 1. An exhibition of objects belonging to the industrial arts and manufactures.—2. An educational institution, especially for instruction in technical subjects. Such institutions are in successful operation all over the world.

polytechnical (pol-i-tek'ni-kal), *a.* [< *polytechnic* + *-al.*] 1. Same as *polytechnic.*—2. Practising many arts.

The trade guilds of the great *polytechnical* cities of India are not, however, always exactly coincident with the sectarian or ethnical caste of a particular class of artisans.
Sir George C. M. Birdwood, Indian Arts, I. 138.

polytechnics (pol-i-tek'niks), *n.* [Pl. of *polytechnic* (see *-ics*).] The science of the mechanical arts.

polyterpene (pol-i-tėr'pēn), *n.* [< *poly*(*meric*) + *terpene.*] In *chem.*, any one of a class of substances polymeric with the terpenes. The class includes, among other substances, caoutchouc, guttapercha, balata, dammar-resin, and the fossil resins fichtelite, hartite, etc. See *polymeric* and *terpene*.

Polythalamacea (pol-i-thal-a-mā'sē-ä), *n. pl.* [NL., < Gr. *πολύς*, many, + *θάλαμος*, chamber, + *-acea.*] An order of cephalopods whose shell is polythalamous, as the ammonites, belemnites, nautili, and related forms.

polythalamaceous (pol-i-thal-a-mā'shius), *a.* Same as *polythalamous*, 2: said of the *Polythalamacea*.

Polythalamia (pol″i-thā-lā'mi-ä), *n. pl.* [NL., < Gr. *πολύς*, many, + *θάλαμος*, chamber.] A division of reticulate amœbiform protozoans, whose test is many-chambered or polythalamian: opposed to *Monothalamia*. The name is less exactly used as a synonym of *Foraminifera*.

polythalamian (pol″i-thā-lā'mi-an), *a.* [< *Polythalamia* + *-an.*] Many-chambered; multilocular; having many compartments: especially, noting *Foraminifera* of such character, in distinction from *monothalamian*. See cut under *Foraminifera*.

polythalamic (pol-i-thal'a-mik), *a.* [< *Polythalamia* + *-ic.*] Having many chamberlets, as a foraminifer; thalamophorous; of or pertaining to the *Polythalamia*.

polythalamous (pol-i-thal'a-mus), *a.* [= F. *polythalame*, < Gr. *πολύς*, many, + *θάλαμος*, chamber.] 1. In *entom.*, having several or many chambers: applied to the nests of insects, and to galls, when they contain many cells or compartments, each destined for or inhabited by a single larva.—2. In *conch.*, having many compartments; multilocular.

polythecial (pol-i-thē'si-al), *a.* [< *polythecium* + *-al.*] Forming a polythecium; pertaining to a compound zoöthecium; compositely zoöthecial.

polythecium (pol-i-thē'si-um), *n.*; pl. *polythecia* (-ä). [NL., < Gr. *πολύς*, many, + *θήκη*, a box.] A compound or aggregate zoöthecium, consisting of several conjoined loricæ, found in various infusorians. *W. S. Kent*, Infusoria, p. 329.

polytheism (pol'i-thē-izm), *n.* [= F. *polythéisme* = Sp. *politeísmo* = Pg. *politheismo* = It. *politeismo*, < NL. **polytheismus*, < Gr. *πολίθεος*, of or belonging to many gods (*δόξα πολίθεος*, polytheism): see *polytheous*, and cf. *theism.*] Belief in more gods than one; the doctrine of a plurality of divine beings superior to man, and having part in the government of the world.

The first author of *polytheism*, Orpheus, did plainly assert one supreme God. *Stillingfleet.*

polytheist (pol'i-thē-ist), *n.* [= F. *polythéiste* = Sp. *politeista* = Pg. *politheista* = It. *politeista*, < NL. **polytheista*, < Gr. *πολίθεος*, of or belonging to many gods: see *polytheism* and *theist.*] One who believes in or maintains polytheism, or the doctrine of a plurality of gods.

The emperor [Hadrian] indeed himself, though a *polytheist*, was very little of an idolater till the conquest by the Arabs. *S. Sharpe*, Hist. Egypt, xv. § 21.

polytheistic (pol″i-thē-is'tik), *a.* [= It. *politeistico;* as *polytheist* + *-ic.*] 1. Pertaining to, of the nature of, or characterized by polytheism: as, *polytheistic* belief or worship.

In all *polytheistic* religions among savages, as well as in the early ages of heathen antiquity, it is the irregular events of nature only that are ascribed to the agency and power of the gods. *Adam Smith*, Hist. Astron., iii.

2. Believing in a plurality of gods: as, a *polytheistic* writer.

polytheistical (pol″i-thē-is'ti-kal), *a.* [< *polytheistic* + *-al.*] Of a polytheistic character.

polytheistically (pol″i-thē-is'ti-kal-i), *adv.* In the manner of a polytheist or of polytheism; as regards polytheism.

polytheize (pol'i-thē-iz), *v. i.*; pret. and pp. *polytheized*, ppr. *polytheizing.* [= F. *polythéiser;* as *polythe-ism* + *-ize.*] To adhere to, advocate, or inculcate the doctrine of polytheism; believe in a plurality of gods. *Milman.*

polytheous†, *a.* [< Gr. *πολίθεος*, of or belonging to many gods, < *πολύς*, many, + *θεός*, god: see *theism.* Cf. *atheous.*] Characterized by polytheism; polytheistical.

Heav'n most abhor'd *Polytheous* piety.
J. Beaumont, Psyche, xxi. 58.

polythore†, *n.* [Origin obscure: app. an error for *polyphone.*] See the quotation.

I went to that famous physitian Sir Fr. Prujean, who shew'd me his laboratorie. . . . He plaied to me likewise on the *polythore*, an instrument having something of the harp, lute, theorbo, &c. It was a sweete instrument, by none known in England, or describ'd by any author, nor us'd but by this skilfull and learned doctor.
Evelyn, Diary, Aug. 9, 1661.

polytocous (pō-lit'ō-kus), *a.* [< Gr. *πολυτόκος*, bringing forth many young ones, < *πολύς*, many, + *-τοκος*, < *τίκτειν*, *τεκεῖν*, bring forth.] 1. Pro-

ducing many or several at a birth; multiparous. Also *polytokous, polyparous.*—2. In *bot.*, fruiting year after year, as perennials: a term proposed by Gray in place of De Candolle's *polycarpous.*

polytomous (pō-lit′ō-mus), *a.* [< Gr. *πολύς*, many, + *τέμνειν, ταμεῖν*, cut.] 1. In *bot.*, subdivided into many distinct subordinate parts, which, however, not being jointed to the petiole, are not true leaflets: said of leaves.—2. Dividing once or repeatedly into sets of three or more branches: opposed to *dichotomous.*

polytomy (pō-lit′ō-mi), *n.* [< *polytom-ous* + *-y*³.] Division into more than two parts: distinguished from *dichotomy.*

polytope (pol′i-tōp), *n.* [< Gr. *πολύς*, many, + *τόπος*, a place.] A form in *n*-dimensional geometry corresponding to a polygon or polyhedron.

Polytrichaceæ (pol″i-tri-kā′sē-ē), *n. pl.* [NL., < *Polytrichum* + *-aceæ.*] A family of acrocarpous bryaceous mosses, typified by the genus *Polytrichum.* It embraces plants that are very variable in size and appearance, of woody or strong texture. The capsule is long-pedicellate, erect or cernuous, and cylindrical or angular, provided with a cucullate calyptra, which may be naked, spinulose, or hairy, and with a peristome of 32, 64, or rarely 16 teeth. Other important genera are *Pogonatum* and *Atrichum.*

polytrichous (pō-lit′ri-kus), *a.* [< Gr. *πολύτριχος*, having much hair, < *πολύς*, many, + *θρίξ* (*τριχ-*), a hair.] Very hairy; densely or uniformly ciliate, as an embryo or an animalcule.

Polytrichum (pō-lit′ri-kum), *n.* [NL. (Dillenius, 1719), < Gr. *πολύτριχος*, having much hair: see *polytrichous.*] A genus of tall showy mosses, type of the family *Polytrichaceæ.* They grow in wide, large tufts from creeping shoots. The stems are erect, woody, and triangular; the leaves are rigid and coriaceous, linear-lanceolate, sheathing below, and spreading above. The capsule is from four- to six-sided, oblong or ovate, and long-pedicelled with a cuculliform calyptra, which is covered with long hairs forming a dense mat, whence the name of *haircap-moss.* The peristome is single, of 64 teeth. The genus is widely distributed in north temperate and arctic countries, there being 8 species and several varieties in North America. See *bear's-bed, silver heather* (under *heather*), *goldilocks*, 5, *haircap-moss, golden maidenhair* (under *maidenhair*), and cut under *paraphysis.*

polytroch (pol′i-trok), *n.* [< *Polytrocha.*] A polytrochal or polytrochous organism.

Polytrocha (pō-lit′rō-kạ), *n. pl.* [NL. (Ehrenberg), < Gr. *πολύς*, many, + *τροχός*, a wheel.] A division of natant *Rotifera* or wheel-animalcules, in which the wheel or swimming-organ has several lobes surrounding the anterior end of the body.

polytrochal (pō-lit′rō-kạl), *a.* [< *Polytrocha* + *-al.*] 1. Having several ciliate zones, or girdles of cilia, as an embryo worm: correlated with *mesotrochal, telotrochal.*—2. In *Rotifera*, of or pertaining to the *Polytrocha.*

polytrochous (pō-lit′rō-kus), *a.* [< Gr. *πολύς*, many, + *τροχός*, a wheel.] Same as *polytrochal.*

polytropic (pol-i-trop′ik), *a.* [< Gr. *πολύς*, many, + *τρέπειν*, turn.] Turning several times round a pole.—**Polytropic function.** See *function.*

polytypage (pol′i-tī-pāj), *n.* [= F. *polytypage*; as *polytype* + *-age.*] A peculiar mode of stereotyping, by which facsimiles of wood-engravings, etc., are produced in metal, from which impressions are taken as from types. See *polytype.*

polytype (pol′i-tīp), *n.* and *a.* [= F. *polytype*; < Gr. *πολύς*, many, + *τύπος*, type: see *type.*] **I.** *n.* A cast or facsimile of an engraving, matter in type, etc., produced by pressing a woodcut or other plate into semi-fluid metal. An intaglio matrix is the result; and from this matrix, in a similar way, a polytype in relief is obtained.

II. *a.* Pertaining to polytypage; produced by polytypage.

polytype (pol′i-tīp), *v. t.*; pret. and pp. *polytyped*, ppr. *polytyping.* [< *polytype, n.*] To reproduce by polytypage: as, to *polytype* an engraving.

polytypic (pol-i-tip′ik), *a.* [< Gr. *πολύς*, many, + *τύπος*, type: see *typic.* Cf. *polytype.*] Same as *polytypical.*

A new species may be one that has been formed by monotypic transformation, the old form disappearing with the production of the new, or it may be one that has arisen through *polytypic* transformation.

Amer. Jour. Sci., 3d ser., XXXIX. 22.

polytypical (pol-i-tip′i-kạl), *a.* Having several or many types; represented by numerous forms: opposed to *monotypical:* as, a *polytypical* family of animals.

polyuresis (pol″i-ū-rē′sis), *n.* [NL., < Gr. *πολύς*, many, + *οὖρησις*, urination, < *οὐρεῖν*, urinate, < *οὖρον*, urine: see *urine.*] Same as *polyuria.*

polyuria (pol-i-ū′ri-ạ), *n.* [NL., < Gr. *πολύς*, much, + *οὖρον*, urine.] The passing of an excessive quantity of urine, especially of normal urine.

polyuric (pol-i-ū′rik), *a.* and *n.* [< *polyuria* + *-ic.*] **I.** *a.* Of, pertaining to, or affected with polyuria.

II. *n.* One affected with polyuria.

polyvoltine (pol-i-vol′tin), *n.* [< Gr. *πολύς*, many, + It. *volta*, turn, time, + *-ine*¹.] A silkworm which yields more than one crop of cocoons a year: usually applied only to those races which have more than four yearly generations.

For the protection of the mulberry-trees, the raising of *polyvoltines*, or worms that hatch several broods a year, is forbidden in many countries. *Pop. Sci. Mo.*, XXXVI. 500.

polyzoa¹† (pol-i-zō′ạ), *n.*; pl. *polyzoæ* (-ē). [NL.: see *polyzoön.*] The original name of one of the animals afterward grouped as *Polyzoa* and *Bryozoa;* a kind of polyzoan or bryozoan.

On *Polyzoa*, a new animal, an inhabitant of some zoophytes. *J. Vaughan Thompson*, Zoöl. Researches (1830).

Polyzoa² (pol-i-zō′ạ), *n. pl.* [NL., pl. of *polyzoön*, q. v.] 1. A class of molluscoid invertebrated animals; the moss-animalcules, sea-mosses, or sea-mats. They are invariably compound, forming aggregated or colonial organisms originating by germination from a single parent polyzoön, and inhabit a polyzoary or polyzoarium comparable to the polypary or polypidom of a compound hydrozoan. (See *polypary.*) The individual or person of such a stock is called a *polypide*, and differs from the polypite of a cœlenterate in having a complete and distinct alimentary canal suspended freely in a body-cavity or cœloma, and in many other respects. There are definite oral and anal apertures, not communicating directly with the perivisceral cavity. The mouth is within an oral disk or lophophore supporting a circlet of ciliated tentacles, the lophophore being comparable to the wheel-organ of rotifers. The intestine is bent on itself toward the oral end of the body, bringing the anus near the mouth, either within or without the circlet of lophophoral tentacles, whence the terms *entoproctous* and *ectoproctous.* There is a well-defined nervous system, the nerve-ganglion being situated in the reëntering angle of the alimentary canal, between the mouth and the anus. The respiratory system is represented by the ciliated tentacles exsertile from the body-sac. There is no heart. The *Polyzoa* are hermaphrodite, and the sexual organs are contained within the body-walls. Besides the true sexual reproduction, and propagation by budding or gemmation, they exhibit in many cases a process of discontinuous gemmation. These creatures are chiefly marine, and are found incrusting submerged stones, shells, wood, seaweed, and other objects; but some inhabit fresh water. There is great diversity in size, form, and outward aspect. Some resemble corals, or polyps of various kinds, and all were confounded with various cœlenterates under the name of *corallines.* Though quite definite as a class, the systematic position of the *Polyzoa* has been much disputed. Besides having been classed as radiates, zoöphytes, and polyps, they have been regarded (*a*) as worms, and approximated to the *Rotifera*, being sometimes associated with the rotifers as a class of *Vermes;* (*b*) as worms, and approximated to the *Gephyrea;* (*c*) as molluscoids, and associated with the brachiopods as a division apart called *Malacoscolices;* (*d*) as molluscoids, and associated with brachiopods and tunicates in a division *Molluscoidea;* (*e*) or as mollusks, classed with brachiopods and lamellibranchs in a group called *Lipocephala.* Their proper position is near or with the brachiopods. The division of the *Polyzoa* into orders, etc., is not less disputed. Regarded as related to the siphunculoid gephyrean worms, the *Polyzoa* have been considered to form a third section, called *Eupolyzoa*, or *Polyzoa* proper, of such organisms (the other two being *Pterobranchia* and *Vermiformia*), and then divided into two subclasses—*Ectoprocta*, with anus external to the circlet of tentacles, and *Endoprocta*, with anus internal to the tentacles—the former consisting of two orders, *Phylactolæmata* and *Gymnolæmata.* Again, the *Polyzoa* proper have been directly divided into (*a*) *Gymnolæmata*, consisting of the *Chilostomata, Cyclostomata*, and *Ctenostomata*, without an epistome, and (*b*) *Phylactolæmata*, with an epistome, these latter being commonly called the *freshwater polyzoans.* The families and genera are numerous, and date back to the Silurian. A member of the class was named a *polyzoa* by J. Vaughan Thompson in 1830; in 1831 Ehrenberg named the class *Bryozoa*, and the two names have since continued in alternative usage.

A Portion of the Polyzoarium of *Plumatella repens*, one of the *Polyzoa*, with several polypides protruding from the cells of the ectocyst.

2. In *Protozoa*, the polyzoan radiolarians: another name of the *Polycyttaria* or *Collozoa.*

polyzoal (pol-i-zō′ạl), *a.* [< *polyzoa* + *-al.*] Same as *polyzoan.*

polyzoan (pol-i-zō′an), *a.* and *n.* [< *polyzoa* + *-an.*] **I.** *a.* Consisting of many zoöids, polypides, or persons in one compound or colonial aggregate; specifically, pertaining to the *Polyzoa*, or having their characters; bryozoan.

II. *n.* 1. A member of the *Polyzoa;* a polyzoön.—2. An individual element of a compound polyzoön; a polypide.

polyzoarial (pol″i-zō-ā′ri-al), *a.* [< *polyzoarium* + *-al.*] 1. Of or pertaining to a polyzoary.—2. Relating to polyzoans or the *Polyzoa. Encyc. Brit.*, XIX. 431.

polyzoarium (pol″i-zō-ā′ri-um), *n.*; pl. *polyzoaria* (-ạ). [NL.: see *polyzoary.*] A compound polyzoan; the common stock of a set of polyzoan polypides, the result of repeated gemmation from a single embryo. Every individual zoöid of the aggregation is a polypide; the common stock consists of an ectocyst and an endocyst, the former furnishing the special cells or cups in which each polypide is contained. See cuts under *Polyzoa, Plumatella*, and *vibraculum.*

polyzoary (pol-i-zō′a-ri), *n.*; pl. *polyzoaries* (-riz). [< NL. *polyzoarium*, < *polyzoön* + *-arium.*] The polypary or polypidom of a polyzoan; a colony of polypides; a compound or aggregate polyzoan; a polyzoal cœncœcium.

polyzoic (pol-i-zō′ik), *a.* [< Gr. *πολύζωος*, named from many animals, < *πολύς*, many, + *ζῷον*, an animal. Cf. *polyzoön.*] Filled with imaginary animals and other beings, as primitive religious conceptions; zoölatrous. *Encyc. Brit.*, XX. 367. [Rare.]

polyzonal (pol-i-zō′nạl), *a.* [< Gr. *πολύς*, many, + *ζώνη*, belt: see *zone.*] Composed of many zones or belts: used by Sir D. Brewster to note burning-lenses composed of pieces united in rings. Lenses of a large size are constructed on this principle for lighthouses, as they can be obtained freer from defects, and have but slight spherical aberration.

Polyzoniidæ (pol″i-zō-nī′i-dē), *n. pl.* [NL., < *Polyzonium* + *-idæ.*] A family of chilognath or diplopod *Myriapoda*, typified by the genus *Polyzonium:* called *Siphonophoridæ* by Newport and *Siphonizantia* or *Sugentia* by Brandt. Also *Polyzonidæ.*

Polyzonium (pol-i-zō′ni-um), *n.* [NL. (Brandt, 1834), < Gr. *πολύς*, many, + *ζώνη*, belt.] The typical genus of *Polyzoniidæ.*

polyzoöid (pol-i-zō′oid), *a.* [< Gr. *πολύς*, many, + E. *zoöid.*] Consisting of many zoöids.

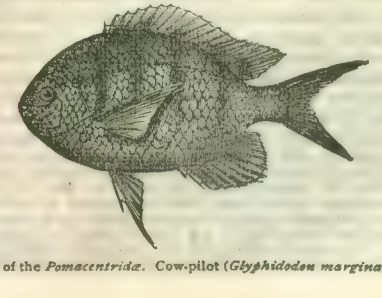
The *polyzoöid* nature of these [sponge-stocks] is made apparent by the presence of many oscula.

Claus, Zoölogy (trans.), p. 210.

polyzoön (pol-i-zō′on), *n.*; pl. *polyzoa* (-ạ). [NL., also *polyzoum;* < Gr. *πολύς*, many, + *ζῷον*, animal. Cf. Gr. *πολύζωος*, named from many animals.] A member of the class *Polyzoa;* a polyzoan.

polyzoum (pol-i-zō′um), *n.*; pl. *polyzoa* (-ạ). [NL.] Same as *polyzoön.*

poma (pō′mạ), *n.*; pl. *pomata* (pō′ma-tạ). [NL., < Gr. *πῶμα*, lid, cover.] The so-called occipital operculum of a monkey's brain, which overlaps parts in front of itself and thus forms a supergyre over the pomatic or external occipital fissure. *Buck's Handbook of Med. Sciences*, VIII. 161.



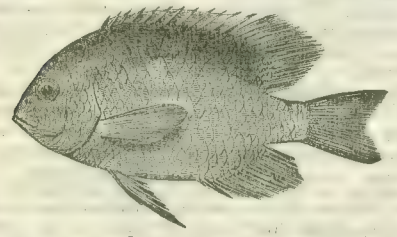
Pomacanthus (pō-ma-kan′thus), *n.* [NL. (Lacépède, 1802), < Gr. *πῶμα*, a lid, cover, + *ἄκανθα*, a thorn.] A genus of chætodont fishes in which the preoperculum has a strong spine at its angle. They are found in the West Indies, and are blackish, banded with yellow. *P. arcuatus* and *P. aureus*, called *black-angel* or chirivita, are the best-known species.

pomace (pum′ās), *n.* [Formerly also *pummace, pomice;* < OF. as if **pomace*, < ML. *pomacium*, cider, < L. *pomum*, an apple, etc.: see *pome.* Cf. *pomage* and *pomade*¹.] 1. The substance of apples or of similar fruit crushed by grinding.—2. Fish-scrap or refuse of fishes from which the oil has been extracted. It is dried by exposure to the sun and ground up into fish-guano. Pomace is very extensively manufactured from the menhaden. Crude pomace is called *chum.*

3. The cake left after expressing castor-oil from the beans.

Pomaceæ (pō-mā′sē-ē), *n. pl.* [NL. (Linnæus, 1751), fem. pl. of *pomaceus:* see *pomaceous.*] See *Pomeæ.*

Pomacentridæ (pō-ma-sen′tri-dē), *n. pl.* [NL., < *Pomacentrus* + *-idæ.*] A family of pharyngognathous fishes, typified by the genus *Poma-*



One of the *Pomacentridæ*. Cow-pilot (*Glyphidodon marginatus*).

centrus, with pseudobranchiæ, ctenoid scales, 3½ gills, and from 5 to 7 branchiostegals; the coral-fishes. They are fishes of tropical seas, like the chætodonts, feeding on animals and vegetable organisms on coral reefs. There are about 15 genera and 160 species. The principal genera are *Pomacentrus* and *Glyphidodon*; seven species of the former and two of the latter, among them *G. marginatus*, reach the coast of the United States or its vicinity.

pomacentroid (pō-ma-sen'troid), *a.* and *n.* **I.** *a.* Resembling, related to, or belonging to the family *Pomacentridæ*.

II. *n.* A fish of the family *Pomacentridæ*.

Pomacentrus (pō-ma-sen'trus), *n.* [NL. (Lacépède, 1802), prop. *Pomatocentrus*, < Gr. πῶμα, lid, + κέντρον, spine.] The typical genus of *Pomacentridæ*, having incisiform teeth fixed in one series. Numerous species inhabit tropical seas, a few reaching southern waters of the United States. These

Pomacentrus fuscus.

fishes are collectively known by the book-name of *demoiselles*. *P. leucostictus* is West Indian and Floridian. *P. fuscus* is a West Indian species. *P. rubicundus* is the well-known garibaldi of the California coast, sometimes placed in another genus, *Hypsypops*, having the opercle and teeth entire. Also *Pomatocentrus*.

pomaceous[1] (pō-mā'shius), *a.* [< NL. *pomaceus*, of or pertaining to apples, etc., < L. *pomum*, a fruit (as an apple, peach, plum, etc.): see *pome*.] 1. Of, pertaining to, or consisting of apples.

Autumn paints
Ausonian hills with grapes: whilst English plains
Blush with *pomaceous* harvests, breathing sweets.
J. Philips, Cider, ii.

2. Having the character of a pome; belonging to the *Pomaceæ*.

pomander (pō-man'dėr), *n.* [Also *pomaunder*; < AF. **pome ambre* (OF. *pomme d'ambre*), < ML. *pomum ambrae*, 'ball of amber.'] 1. A perfume-ball, or a mixture of perfumes, formerly carried in the pocket or suspended from the neck or the girdle, especially as an amulet, or to prevent infection in time of plague.

Your only way to make a good *pomander* is this. Take an ounce of the purest garden mould, cleans'd and steeped seven days in change of motherless rose-water; then take the best labdanum, benjoin, both storaxes, ambergris, civit, and musk. Incorporate them together and work them into what form you please. This, if your breath be not too valiant, will make you smell as sweet as my lady's dog.
A. Brewer (?), Lingua, iv. 3.

He . . . walks all day hanged in *pomander* chains for penance.
B. Jonson, Every Man out of his Humour, ii. 1.

2. A hollow ball or round box used for carrying about the person the ball above described, and sometimes pierced with small openings to allow the perfume to escape.

I have sold all my trumpery; not a counterfeit stone, not a ribbon, glass, *pomander*, brooch, table-book, ballad, knife, tape, glove, shoe-tie, bracelet, horn-ring, to keep my pack from fasting.
Shak., W. T., iv. 4. 609.

He himself carried a *pomander* of silver in the shape of an apple, stuffed with spices, which sent out a curious faint perfume through small holes.
J. H. Shorthouse, John Inglesant, xxxiii.

with numerous seeds, each inclosed in a layer of pulp of reddish color and pleasant subacid taste (the edible part of the fruit). It affords a cooling drink, and in Persia a wine is derived from it, as in Mexico an ardent spirit. The rind contains a large amount of tannin, and has been employed in tanning and as an astringent medicine. The pomegranate is outwardly of a beautiful orange color shaded with red.

There were, and that wot I ful wel,
Of *pome-garnettys* a ful gret del.
Rom. of the Rose, l. 1356.

They brought of the *pomegranates* and of the figs.
Num. xiii. 23.

2. The tree, *Punica Granatum*, which produces the fruit pomegranate. A native of western Asia to northwestern India, it is now widely cultivated and naturalized in subtropical regions. It is a deciduous tree, 15 or 20 feet high, with numerous slender branches, some of them armed with thorns, the leaves lance-shaped or oblong. It is a fine ornamental plant, the flowers scarlet, large, and sometimes doubled. The latter are used in medicine like the fruit-rind, under the name of *balaustines*, and they also afford a red dye. The bark supplies the color of yellow morocco leather, and that of the root is an efficient tæniacide, this property residing in an alkaloid, pelletierine, contained in it. It also yields punicotannic acid and mannit. The pomegranate has been known as a fruit-tree from the earliest times; it was common in Italy in the third century B. C., was familiar to the Hebrews, and its fruit was copied on Egyptian and Assyrian monuments, and later on the pillars of Solomon's temple. It thrives in the southern United States, and can be grown with moderate protection even in the climate of New York.

An orchard of *pomegranates*, with pleasant fruits.
Cant. iv. 13.

3. ★ **pompano** (pom'pa-nō), *n.* [Sp. *pámpano*, applied to the fish *Stromateus fiatola*.] 1. A carangoid fish of the West Indies and South Atlantic and Gulf States, *Trachynotus carolinus*, attaining a length of about 18 inches, and highly esteemed for food. It is of an oblong rhomboid figure, with blunt snout, the spinous dorsal fin atrophied and represented by free spines, and the soft dorsal and anal fins falciform. The color is uniformly bluish above, without dark bands or black on the vertical fins, and silvery or golden on the sides. The name extends to other members of the same genus, as the ovate, round, or short pompano, *T. falcatus*, of tropical seas (and north as far as Virginia), having the vertical fins largely black; and the glaucous or long-finned pompano, *T. glaucus*, of tropical seas (and north as far as Virginia and Lower California), having dark vertical bands on the body.

Common Pompano (*Trachynotus carolinus*).

2. In California, a fish, *Palometa simillima*, abundant in summer along the coast, and highly esteemed for food. It is quite different from the foregoing, and is closely related to the harvest-fish, and to the butter-fish or dollar-fish. It has an ovate body rounded in front, the dorsal and anal fins not falciform, and no series of pores along the sides of the back. It is bluish above and bright-silvery below, with punctulate fins, and the dorsal and anal fins edged with dusk. 3. Along the western coast of Florida, a gerroid fish, *Gerres olisthostoma*. It has an oblong form with a high rounded back, rather large and very smooth scales, and a nearly double dorsal, the anterior part of which has nine spines. It is specifically known as the *Irish pompano*.

Irish Pompano (*Gerres olisthostoma*).

pompano-shell (pom-pä'nō-shel), *n.* A wedge-shell of the genus *Donax*: so called because it is eaten by the pompano. See cut under *Donax*. [Florida.]

Pompeian (pom-pē'an), *a.* [< L. *Pompeianus*, belonging to Pompeii, < *Pompeii* (see def.).] Of or pertaining to Pompeii, a city of Italy, which with Herculaneum and other towns was overwhelmed by an eruption of Mount Vesuvius in the year 79, and of which the ruins have been in part laid bare by excavations begun in 1755. Hence, in *art* and *decoration*, noting the style of wall-painting in both fresco and plain colors which was usual among the Romans at the beginning of the Christian era, and was first made familiar by the excavations at Pompeii.—**Pompeian red**, a red color similar to that found on the walls of many houses in Pompeii. It is an oxid-of-iron color such as would be produced by a light Indian red without too much purple tone, or by a dark Venetian red.

pompelmous, pompelmoose (pom'pel-mus, -mōs), *n.* [Also *pampelmoes*, *pampelmoose*, *pompelmoes*, *pompoleon*; also *pompelo*, *pomelo*, *pummelo*, *pumelo*; prob. of E. Ind. origin.] The shaddock, especially in its larger forms. Compare *pomelo*.

pompelo (pom'pe-lō), *n.* Same as *pompelmous*.

pompeont, *n.* Same as *pumpion*.

pomperkin†, *n.* [Appar. a drink made from apples (cf. *pomace*, *pomade*[1]), ult. < OF. *pome*, apple: see *pome*.] See the quotation.

> The sixt sort of Brittish drinkes is *Pomperkin*, a drinke whose originall was from Pomeranea (a Province in Germany), as some writers relate. Some derive it from the Pomponii (a Noble Roman family). However Authors differ about it, it is not much materiall; most certaine it is that it is made of Apples, as the name of it imports; being nothing but the Apples bruised and beaten to mash, with water put to them, which is a drinke of so weake a condition that it is no where acceptable but among the Rusticks and Plebeyans. *John Taylor*, Drinke and Welcome, [all Drinkes, and all Waters.

pompet†, **pumpet**† (pum'pet), *n.* [< OF. *pompette*, *pompete*, a tuft, topknot, pompon; "*pompette d'imprimeur*, a printer's pumpet-ball" (Cotgrave); dim. of *pompe*, pomp: see *pomp*.] In *printing*, an elastic ball formerly used to ink the types.

The white oxid which sublimes during the combustion of zinc: formerly called *flowers of zinc*. It rises and adheres to the dome of the furnace and the covers of the crucibles.—2. In *med.*, an eruption of deep-seated vesicles suggesting sago-grains, occurring principally on the palms of the hands and the soles of the feet. Also called *chiropompholyx* and *dysidrosis*.—3. [*cap.*] [NL.] In *zoöl.*, a generic name variously used. (*a*) A genus of rotifers of the family *Brachionidæ*. (*b*) A genus of mollusks of the family *Limnæidæ*. (*c*) A genus of hymenopterous insects of the family *Tenthredinidæ*, having wingless males. *Freymuth*, 1870. (*d*) A genus of orthopterous insects of the family *Acridiidæ*. *Stål*, 1873.

Pompilidæ (pom-pil'i-dē), *n. pl.* [NL. (Leach, 1819), < *Pompilus* + *-idæ*.] A family of aculeate hymenopterous insects, typified by the genus *Pompilus*. It is a large and important group, whose members are commonly called *sand-wasps*. They are slender, usually black, with oval abdomen on a short petiole. Most of them burrow in sandy places and provision their nests with insects of various kinds which they have stung to death. Ten genera are represented in North America. The members of one genus, *Ceropales*, appear to be inquilinous.

pompillion†, *n.* Same as *popilion*.

Pompilus (pom'pi-lus), *n.* [NL., < L. *pompilus*, < Gr. πομπίλος, a fish which follows ships, < πομπή, conduct, escort, procession: see *pomp*.] 1. In *ichth.*, a genus of stromateoid fishes: same as *Centrolophus*.—2. In *conch.*, a genus of octopod cephalopods. *Schneider*, 1784.—3. In *entom.*, the typical genus of *Pompilidæ*, founded by Fabricius in 1798. These sand-wasps have strongly spinose legs, and the submedian cell of the fore wings as long as the median cell on the externomedian nervure. Over 200 species are known; one of the most notable is *P. formosus*, the so-called *tarantula-killer* of the southwestern parts of the United States.

pompion, *n.* Same as *pumpion*.

pompiret (pom'pīr), *n.* [Irreg. < L. *pomum*, fruit, apple, + *pirum*, pear.] A kind of apple; a sort of pearmain. *Ainsworth.*

pompoleon (pom-pō'lē-on), *n.* Same as *pompelmous*.

> Marian drew forth one of those extended pieces of black pointed wire with which, in the days of toupees and *pompoons*, our foremothers were wont to secure their fly-caps and head-gear. *Barham*, Ingoldsby Legends, I. 129.

pomposity (pom-pos'i-ti), *n.* [= It. *pompositá*; < ML. *pomposita(t-)s*, < LL. *pomposus*, pompous: see *pompous*.] Pompous conduct or character; pompousness; ostentation.=**Syn.** *Pompousness* may be used in a good sense; *pomposity* always expresses something objectionable. See *pomp* and *pompous*.

pomposo (pom-pō′sō), *a.* [It.: see *pompous.*] In *music*, dignified; grand: noting a passage or movement to be rendered in a grand and dignified style.

pompous (pom′pus), *a.* [= D. *pompeus* = G. *pompös*, *pompos* = Sw. Dan. *pompös*, < F. *pompeux* = Sp. Pg. It. *pomposo*, < LL. *pomposus*, stately, pompous, < L. *pompa*, pomp: see *pomp.*] 1. Full of or characterized by pomp or showy display; ostentatiously grand, dignified, or magnificent; splendid; stately: as, a *pompous* triumph; a *pompous* procession.

I will make relation of those *pompous* ceremonies that were publiquely solemnized.
Coryat, Crudities, I. 36, sig. D.

But nothing is here so *pompous* as double red and stript stocks; which they multiply with care; and their Pains are justly Rewarded. *Lister*, Journey to Paris, p. 194.

2. Exhibiting self-importance or an exaggerated sense of dignity; ostentatiously dignified or self-important; lofty: as, a *pompous* style; *pompous* in manners.

We reprove a sinning brother, but do it with a *pompous* spirit; we separate from scandal, and do it with glory and a gaudy heart. *Jer. Taylor*, Works (ed. 1835), I. 679.

The *pompous* vanity of the old school-mistress . . . annoyed her. *Thackeray*, Vanity Fair, ii.

=**Syn.** 1. Superb, grand, august, lofty, dignified.—2. Magisterial, swelling, inflated, bombastic, grandiloquent, pretentious. That which gives *pompous* its distinctive character among these words and the words used in defining it is the idea of the display of magnificence for the sake of enhancing, properly or improperly, the dignity, etc., of the person or thing most concerned. A *pompous* procession gives dignity to a person thus welcomed to a city; a *pompous* deportment or manner of speech arises from the feeling of one's own importance and the effort to seem what one thinks himself to be. *Pompous* is used in a good sense now only when applied to public ceremonies or celebrations or the ways of courts.

pompously (pom′pus-li), *adv.* In a pompous manner; with great parade or display; magnificently; splendidly; ostentatiously; loftily.

pondweed (pond'wēd), *n.* An aquatic herb of the genus *Potamogeton*, found in numerous species in both hemispheres. *P. natans* is a species found floating or wholly immersed in ponds and ditches in most parts of the world.—**Cape pondweed**, a desirable aquarium plant from the Cape of Good Hope, *Aponogeton distachyon*, of the *Aponogetonaceæ*. It puts forth fragrant flowers with pure-white bracts in the midst of bright-green floating leaves. Compare *Ouvirandra*.—**Choke-pondweed**, a fresh-water plant, *Philotria Canadensis*, introduced into Europe from North America, and in both continents so thriving as often to obstruct canal navigation. [Eng.]—**Horned pondweed**, a slender submerged plant, *Zannichellia palustris*, widely distributed over the world: so called from the beaked nutlets of the fruit.—**Tassel pondweed**. Same as *ditch-grass*.

pone1 (pōn), *n.* [Also *paune*† and *opponet*†, < Delaware (Lenape) *achpoan*, bread (Zeisberger, Brinton and Anthony); compare *n' dapponhe*, I make bread, etc.] **1.** Cornbread; in the southwestern United States, any bread made of Indian corn, especially coarse kinds, used by the negroes and poorer whites, commonly called *corn-pone*; also, finer bread, made with milk and eggs, in flat cakes about an inch thick, very light and delicate. [U. S.]

The bread in gentlemen's houses is generally made of wheat, but some rather choose the *pone*, which is the bread made of Indian meal, . . . not so called from the Latin panis, but from the Indian name oppone.
Beverley, Virginia, iv. ¶ 72.

2. A loaf or cake of such bread. [U. S.]

pone2 (pō'nē), *n.* [< L. *pone*, impv. of *ponere*, place: see *ponent*.] In *old Eng. law*: (*a*) A writ whereby an action depending in an inferior court might be removed into the Court of Common Pleas. (*b*) A writ whereby the sheriff was commanded to take security of a person for his appearance upon an assigned day.

pone3 (pō'nē), *n.* [< L. *pone*, impv. of *ponere*, place: see *ponent*. Cf. *pone*2.] The person who cuts the cards in any game. In all French games the player to the left of the dealer cuts the cards, which are dealt from right to left. In English-speaking countries the cards are dealt from left to right, and the pone sits on the dealer's right.

ponent (pō'nent), *a.* [< OF. *ponent* = Sp. *poniente* = Pg. It. *ponente*, < ML. *ponen(t-)s*, the west, the place of the setting sun, < L. *ponen(t-)s*, ppr. of *ponere*, set, put, lay down, intrans. poet. fall, abate (of winds); prob. contr. of **posnere*, **posinere*, let down, < *po-*, forward, down, + *sinere*, let: see *site*.] **1.** Western. [Rare.]

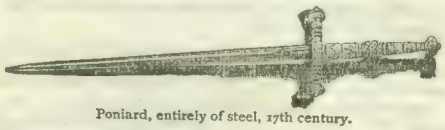
Forth rush the Levant and the *Ponent* winds,
Eurus and Zephyr. *Milton*, P. L., x. 704.

2. [*cap.*] A division of the Paleozoic strata in Pennsylvania, according to the nomenclature suggested by H. D. Rogers: it corresponds to the Catskill group of the New York survey, forming one of the divisions of the Upper Devonian.

ponente (pō-nen'te), *n.* [It.: see *ponent*.] In Italy, the west; the region in the west: as, the Riviera di *Ponente*; hence, the west wind.

Ponera (pō-nē'rą), *n.* [NL. (Latreille, 1804), < Gr. *πονηρός*, bad, useless, < *πονεῖν*, be in distress.] An important genus of ants, typical of the family *Poneridæ*, distributed throughout the tropics. *P. ferruginea* is a Mexican species. The females and workers are armed with spines; the abdomen is elongated, with its first segment comparatively large and often cubical.

Poneridæ (pō-ner'i-dē), *n. pl.* [NL., < *Ponera* + *-idæ*.] One of the five families into which the true ants or *Heterogyna* are now divided. They have the abdominal petiole single-jointed, the abdomen proper constricted between the first and second segments, and the mandibles inserted close together. Four genera are represented in the United States.



ponerology (pon-ẹ-rol'ọ-ji), *n.* [< Gr. *πονηρός*, bad, + *-λογία*, < *λέγειν*, speak: see *-ology*.] In *theol.*, the doctrine of wickedness.

Pongam (pon'gam), *n.* [NL. (Adanson, 1763), < E. Ind. *pongam*.] A genus of leguminous trees of the tribe *Dalbergieæ* and subtribe *Lonchocarpeæ*, characterized by its short, thick, smooth, compressed, and wingless pod, by the union of the ten stamens above into a tube, and by the partial adherence of the wing-petals to the keel. The only species, *P. pinnata* (*Cytisus pinnatus* of Linnæus), is a native of the old world tropics and the Fiji Islands. It bears smooth pinnate leaves, and white or yellow flowers in racemes, ornamental in cultivation under glass. The seeds yield kurung- or poonga-oil.

pongee (pon-jē'), *n.* [Said to be a corruption of Chinese *pŭn-ki*, 'own loom,' or of *pŭn-chih*, 'own weaving' (as if 'home-made'); but all silks woven in China are stamped with one or other of these phrases, along with the name of the house selling them. According to another suggestion, a corruption of Chinese *pun-shih*, 'native (or wild) silk.'] A soft, unbleached washing silk resembling the tasar silk of India, woven in China, chiefly in the province of Shantung, from cocoons of a wild silkworm (*Attacus pernyi*) which feeds on a scrub-oak. The finer kinds, bleached, dyed, or figured after importation, are known in the trade as *China silks*.

pongo (pong'gō), *n.* [= F. *pongo* (NL. *Pongo*); from a native name in Borneo.] **1.** A large anthropoid ape of Borneo, *Simia* (or *Pithecus*) *wurmbi*, known not to be distinct from the ordinary orang-utan, *Simia satyrus*.—**2.** [*cap.*] [NL.] A genus of apes, including the gorilla (*P. gorilla*) and the chimpanzee (*P. troglodytes*). *Lacépède*. [Little used.]

poniard (pon'yärd), *n.* [An altered form of earlier *poiniard*, *poinard* (also corruptly *poinado*, *poinadoe*) = MD. *poniaerd*, D. *ponjaard*, < F. *poignard*, a poniard, < *poing*, fist, < L. *pugnus*, fist: see *pugnacious*. Cf. Sp. *puñal* = Pg. *punhal* = It. *pugnale*, a poniard, of the same ult. origin.]

Poniard, entirely of steel, 17th century.

A stabbing-weapon; a dagger: applied to any such weapon, without reference to shape or make.

Those bloody brothers, Hastings and the rest,
Sheath'd their sharp *poniards* in his manly breast.
Drayton, Miseries of Queen Margaret.

poniard (pon'yärd), *v. t.* [= F. *poignarder*; from the noun.] To stab with or as with a poniard.

But may be it is your ladyship's pleasure that this young esquire shall *poniard* the servants, as well as switch and baton them. *Scott*, Abbot, iv.

ponibility† (pō-ni-bil'i-ti), *n.* [< L. *ponere*, place (see *ponent*), + *-ibility*.] The capability of being placed. *Barrow*. [Rare.]

pons (ponz), *n.*; pl. *pontes* (pon'tēz). [L. (> It. *ponte* = Sp. *puente* = Pg. *ponte* = F. *pont* = W. *pont*), a bridge: see *path*.] In *anat.*, a part which connects two parts, as if bridging the interval between them. Except in phrases, it designates the ventral part of the epencephalon, of which the cerebellum constitutes the remaining dorsal part. The ventral part of the pons is formed by the heavy masses of transverse fibers coming from the middle peduncles of the cerebellum. Also called *pons Varolii* and *pons cerebelli*.—**Brachium pontis.** See *brachium*.—**Pons asinorum.** [L., 'bridge of asses,' F. *pont aux ânes*, 'bridge for asses.' The Latin expression was applied early in the sixteenth century to a diagram showing how to find middle terms to arguments, and "commonly called the *pons asinorum* on account of its apparent difficulty"; OF. *pont aux asnes de logicque* (Rabelais), "the conversion of propositions" (Cotgrave); hence, "*c'est le pont aux asnes* (applicable when such as are ignorant of the true reason or cause of things impute them to witchcraft, fortune, etc.), a shift, evasion, help at a pinch, for a dunce" (Cotgrave), in mod. use equiv. to "everybody knows that," "it is a trite thing." The original allusion seems to have been to the difficulty of getting asses to cross a bridge; hence, to the difficulty of getting students to apprehend what is in fact simple enough if attempted.] A name given to the fifth proposition of the first book of Euclid, which sets forth that, if a triangle has two of its sides equal, the angles opposite to these sides are also equal. This proposition affords a difficulty to the learner, because it is the first one involving any mathematical puzzle. The name is also carelessly given to the Pythagorean proposition (Euc. I. 47).—**Pons hepatis**, a prolongation, often present, of the substance of the left lobe of the liver, uniting it with the square lobe across the umbilical fissure.—**Pons Tarini**, the posterior perforated space at the base of the brain; a depressed gray tract between the diverging crura cerebri and behind the corpora albicantia.—**Pons Varolii**, or **pons cerebelli**. See def.

Pontacq (pon'tak), *n.* [From *Pontacq*, in the Basses-Pyrénées, France, where it is made.] A white wine from southern France, similar to Barsac in flavor.

pontage (pon'tāj), *n.* [< OF. *pontage* = Sp. *pontaje*, *pontazgo* = It. *pontaggio*, < ML. *pontaticum* (also, after OF., *pontagium*), bridge-toll, < L. *pon(t-)s*, bridge: see *pons*.] A toll or tax for the privilege of using a bridge, or a tax for the maintenance and repair of bridges.

The citizens of Hereford fined, in the second year of Henry III., in a hundred marks and two palfreys, . . . that they might be quit throughout England of toll and lastage, of passage, *pontage*, and stallage, and of leve, and danegeld, and gaywite, and all other customs and exactions. *S. Dowell*, Taxes in England, I. 26.

Pontederia (pon-tẹ-dē'ri-ą), *n.* [NL. (Linnæus, 1735), named after Giulio *Pontedera*, 1688–1757, professor of botany at Padua, author of a compend of botany, etc.] A genus of monocotyledonous aquatic plants, type of the family *Pontederiaceæ*, characterized by the funnel-shaped and two-lipped corolla, six stamens, versatile

anthers, and compound ovary with one cell and one ovule. There are but 7 or 8 species, all American, growing in shallow water, with rootstocks creeping in the mud or floating, and covered by long sheaths. The long stout leafstalks rise erect often 2 feet above the water, each bearing a single arrow-shaped, lanceolate, or roundish leaf, with many fine parallel curving veins. The flowers rise a little higher, forming a dense cylindrical spike, blue or purple, or rarely white, and remarkable for their trimorphous stamens, having three lengths of filaments, and three reciprocally different lengths of styles, present in different flowers, facilitating cross-fertilization. *P. cordata*, which is found throughout nearly the whole length of America, is known in the northern United States as *pickerel-weed*, and in the southern as *wampee*. Several former species are now separated as the genus *Piaropus*, as *P. azureus*, the water-plantain of Jamaica, and *P. crassipes*, the bladder-stalked pickerel-weed or gamalote of Guiana, cultivated (under the name *Pontederia*) in tanks under glass as a singular bladder-bearing and floating plant.

Pontederiaceæ (pon-tē-dē-ri-ā′sē-ē), *n. pl.* [NL. (Dumortier, 1829), ⟨ *Pontederia* + *-aceæ*.] A family of monocotyledonous plants of the order *Xyridales*. It is characterized by a perianth of three petals and three similar sepals, all united below into a tube and forming unequal lobes above, by a superior ovary of three complete or imperfect carpels, forming a dry fruit, and by a straight cylindrical embryo extending through the center of copious farinaceous albumen. It includes 25 species, in 7 genera, of which *Pontederia* and *Heteranthera* are the chief, natives of warm northern and extratropical southern regions, extending to Canada, China, and Japan, but lacking in Europe. They are aquatics, erect or floating in fresh water from rootstocks which lie horizontally in the mud, or which extend as runners floating on the water.

pontee (pon-tē′), *n.* Same as *pontil*.

pontes, *n.* Plural of *pons*.

Pg. It. *papa*, pope, < LL. *papa*, a bishop, ML. pope: see *papa*2.] 1. The Bishop of Rome as head of the Roman Catholic Church and hierarchy. The title *pope* (Latin *papa* or *papas*, Greek *πάπας*, *πάππας*), literally 'papa' or 'father,' was given in the early church, both in the East and West, to bishops in general, and has from the middle of the third century to the present day been an especial title of the patriarch of Alexandria. In the Western Church it began to be restricted to the Bishop of Rome in the sixth century, and in 1073 the assumption of the title by any other bishop was formally forbidden. In the Eastern Church the same word (with a different accentuation, *παπᾶς*) became a familiar title of ordinary priests, and is commonly so used at the present day. According to Roman Catholic teaching, the Pope is not only bishop, metropolitan, and patriarch, but, as incumbent of the Roman see, is successor of St. Peter, and as such vicar of Christ and visible head of the whole church, and supreme pastor and teacher of all Christians. From his decision there is no appeal; and when he speaks ex cathedra—that is, in discharge of his office and by virtue of his supreme apostolic authority—his teaching regarding faith and morals is to be accepted as infallible. (See *infallibility*, 1.) Even in very early times the Bishop of Rome addressed other churches in a tone of authority. Constantinople's attempt at equality was checked by Leo I. (440–461). The medieval papacy reached its climax of temporal power under Gregory VII. (1073–85).

2. The patriarch of Alexandria.—3. A priest in the Greek or Russian Church.—4. The head of any church or ecclesiastical system.

And in that Yle dwellethe the *Pope* of hire Lawe, that they clepen Lobassy. *Mandeville*, Travels, p. 308.

Adoration of the Pope. See *adoration*.—**Pope's crown**, in *her.*, same as *tiara*.—**Pope's size**, a size so named as a trade-term. See the quotation.

A year or two ago I bought a merino vest. On the bill I noticed P. S. after it, and by enquiry I elicited that P. S. stood for *pope's size*, and that *pope's size* meant short and stout. *N. and Q.*, 7th ser., VII. 225.

pope2 (pōp), *n.* [Of various uncertain origin; cf. *pape*2, E. dial. *mwope* for *mawp*, etc.] 1. The blacktail, a fish: same as *ruff*3. [Local, Eng.] —2. The bullfinch, *Pyrrhula vulgaris*. [Dorsetshire, Eng.]—3. The red-backed shrike, *Lanius collurio*. [Hants, Eng.]—4. The puffin, *Fratercula arctica*. *Montagu*. [Local, Eng.]—5. The painted finch, or nonpareil. See cut under *Passerina*. [Louisiana.]

popedom (pōp'dum), *n.* [< ME. *popedom*, < AS. *pāpdōm* (= D. *pausdom* = MLG. *pavesdōm* = MHG. *bābestuom*, G. *papstthum* = Sw. *påfvedöme* = Dan. *pavedömme*), < *pāpa*, pope, + *dōm*, jurisdiction: see *-dom*.] The office or dignity of

pope; also, the temporal or spiritual jurisdiction of a pope.

All that world of wealth I have drawn together
For mine own ends; indeed, to gain the *popedom*,
And fee my friends in Rome.
Shak., Hen. VIII., iii. 2. 212.

The next default was in the Bishops, who, though they had renounc't the Pope, they still hugg'd the *Popedome*.
Milton, Reformation in Eng., i.

The Crusades, too, had now made the Western world tributary to the *Popedom*. *Milman*, Latin Christianity, i. 9.

pope-holy†, *a.* [ME. *popeholy, poope-holy;* appar. an accom., as if < *pope*[1] + *holy*, of OF. *papelard*, hypocritical.] Hypocritical. [In the first quotation it is used as a noun, as a quasi-proper name.]

Another thing was don there write
That semede lyk an ipocrite,
And it was clepid *Poope-holy* [OF. *papelardie*].
Rom. of the Rose, l. 415.

Was none suche as hym-self ne none so *pope-holy*.
Piers Plowman (B), xiii. 284.

There be *pope-holy*, which, following a righteousness of their own feigning, resist the righteousness of God in Christ.
Tyndale, Ans. to Sir T. More, etc. (Parker Soc., 1850), p. 36.

pope-Joan (pōp′jōn′), *n.* [From *Pope Joan*, a female pope who, according to tradition, reigned in the middle of the 9th century.] A game of cards. It is played by any number of persons from 3 to 8, with a full pack of cards which are dealt out according to the number engaged, the cards which remain in the stock forming stops. A layout made from another pack is placed on the table, the 7 of diamonds in the center, surrounded by the heart king, spade queen, club jack, and diamond 10. The cards are played and the bets on the layout won as in ★commit and ★matrimony (which see).

popekin (pōp′kin), *n.* [< *pope*[1] + *-kin*.] A little pope; a term of contempt.

popeling (pōp′ling), *n.* [< *pope*[1] + *-ling*[1].] A little or insignificant pope; one who apes the Pope.

After these losses came other troubles vpon him, with other as great or more great enemies (that is, with the Pope and his *popelings*). *Foxe*, Martyrs, I. 282.

popelot†, *n.* [ME.; perhaps < OF. *poupelet*, dim. of *poupon*, baby. Cf. also OF. *papillot*, butterfly.] A pet (?); a darling (?).

In al this world, to seken up and doun,
Ther nas no man so wys that koude thenche
So gay a *popelote*, or swich a wenche.
Chaucer, Miller's Tale, l. 68.

popery (pō′pę-ri), *n.* [< *pope*[1] + *-ery*.] The doctrines, customs, ceremonies, and polity associated with the office and person of the Pope, or with the Roman Catholic Church, of which he is the supreme head; papacy: used in opprobrium.

The name of *popery* is more odious than very paganism amongst divers of the more simple sort.
Hooker, Eccles. Polity, iv. 4.

That prime and leading article of all *popery*, the Pope's supremacy. *South*, Sermons, VI. i.

pope's-eye (pōps′ī), *n.* A large lymphatic gland, or cluster of such glands, in the leg of an ox or a sheep, surrounded with fat. It is regarded as a delicacy.

You should have the hot new milk, and the *pope's-eye* from the mutton. *R. D. Blackmore*, Lorna Doone, l.

pope's-head (pōps′hed), *n.* 1. A large round brush with a long handle, for dusting ceilings, cornices, etc. [Local.]

Chaucer, Parliament of Fowls, l. 359.

Young *popinjays* learn quickly to speak. *Ascham.*

Likewise there be *popiniayes* very great and gentle, and some of them haue their foreheads yellow, and this sort do quickly learne to speak, and speak much.
Hakluyt's Voyages, III. 700.

2. A woodpecker; especially, the green woodpecker of Europe, *Gecinus viridis*.

Popinjay, or Green Woodpecker (*Gecinus viridis*).

The daughters of Pierius, who were turned into *popinjays* or woodpeckers.
Peacham, On Drawing. (*Latham.*)

3. The figure of a parrot or other bird used as a mark for archery or firearms. For this purpose, it was usually hung to the top of a pole so as to swing in the wind.

When the musters had been made and duly reported, the young men, as was usual, were to mix in various sports, of which the chief was to shoot at the *popinjay*, an ancient game formerly practised with archery, but at this period with firearms. This was the figure of a bird, decked with party-colored feathers, so as to resemble a popinjay or parrot. It was suspended to a pole, and served for a mark at which the competitors discharged their fusees and carabines in rotation, at the distance of sixty or seventy paces. He whose ball brought down the mark held the proud title of Captain of the *Popinjay* for the remainder of the day.
Scott, Old Mortality, i.

4. In *her.*, a parrot used as a bearing: always, unless otherwise mentioned in the blazon, represented green, with red legs and beak.—5. A coxcomb; a fop.

To be so pester'd with a *popinjay*.
Shak., 1 Hen. IV., i. 3. 50.

A number of these *popinjays* there are.
B. Jonson, Every Man out of his Humour, ii. 2.

popish (pō′pish), *a.* [< *pope*[1] + *-ish*[1].] Of or pertaining to the Pope or the Roman Catholic Church: used in opprobrium: as, *popish* doctrines or practices; *popish* forms and ceremonies.

Yet, for I know thou art religious,
And hast a thing within thee called conscience,
With twenty *popish* tricks and ceremonies,
Which I have seen thee careful to observe,
Therefore I urge thy oath. *Shak.*, Tit. And., v. 1. 76.

popishly (pō′pish-li), *adv.* To or toward popery; as regards popery: used in opprobrium: as, to be *popishly* inclined.

Owen's unkle, who was a papist, or at least *popishly* affected (from whom he expected legacies), dash'd his name out from his last will and testament.
Wood, Athenæ Oxon., I.

popit, *n.* In *mach.*, same as *poppet*.

popjoying (pop′joi-ing), *n.* [Verbal n. of **popjoy*, appar. an accom. dial. form of **popinjay*, *v.*, < *popinjay*, *n.*, 3.] Idle pastime; sport.

Benjy had carried off our hero to the canal in defiance of Charity, and between them, after a whole afternoon's *popjoying*, they had caught three or four small coarse fish and a perch.
Hughes, Tom Brown's School Days, I. ii. (*Davies.*)

poplar (pop′lär), *n.* [Early mod. E. *popler;* < ME. *popler, poplere, populere* = D. *populier, popelier*, < OF. *poplier, peuplier*, F. *peuplier*, a poplar-tree, poplar, < *peuple*, poplar, < L. *populus*, poplar: see *popple*[2], *Populus*.] 1. A tree of the genus *Populus;* also, the wood of the tree. The poplars are trees of rapid growth, mostly of moderate size, producing varieties of light soft wood, useful for many purposes requiring lightness and moderate strength; in America the wood is largely converted into pulp for paper-making. Various species are planted for shade and ornament. The aspens and cottonwoods are true poplars, though less called by that name. See *asp*[1], *aspen*, and *cottonwood*.

2. A tree of some other genus in some way resembling a poplar.—**Balsam-poplar,** *Populus balsamifera*, the tacamahack. Also called (like the related species *P. candicans*) *balm of Gilead*.—**Black Italian poplar,** a name applied in England to *Populus candicans*, which abounds in Italy, but its origin is not well known.—**Black poplar,** *Populus nigra*, a native of central and southern Europe and temperate Asia, planted as a forest-tree elsewhere in Europe. Its wood is used for flooring, joiners' and coopers' work, and in the making of gunpowder, charcoal, etc., and its buds in the preparation of an ointment. See *ointment of poplar-buds*, under *ointment*.—**Carolina poplar.** Same as *necklace-poplar*.—**Downy poplar,** *Populus heterophylla*, the river- or swamp-cottonwood, a moderate-sized tree of no great value, found in bottom-land swamps from Connecticut to Louisiana and Arkansas.—**Gray poplar,** a variety or hybrid of the white poplar, its wood esteemed best of European poplars.—**Lombardy poplar,** a species, *Populus Italica* (*P. dilatata* of Aiton), or probably a remarkable variety of the black poplar, of Oriental origin. Its fastigiate habit gives it a striking columnar or spire-shaped outline, on account of which it is planted to some extent. It is said that in America only male-flowered individuals are known.—**Necklace-poplar,** the common cottonwood of the eastern United States, *Populus deltoides*, so called on account of its raceme of pods, which resembles a string of beads. It is a large tree, sometimes 150 feet high, found from Vermont to Texas and the base of the Rocky Mountains, bordering all streams of the great plains. Its light soft wood is used for packing-cases, fence-boards, and fuel, and largely for paper-pulp. Also *Carolina poplar*.—**Ointment of poplar-buds.** See *ointment*.—**Ontario poplar.** Same as *balsam-poplar*.—**Poplars of Yarrum**†, buttermilk. [Cant.] (*Davies.*)

Here 's pannum and lap, and good *poplars of Yarrum*.
Brome, Jovial Crew, ii.

Queensland poplar, *Omalanthus populneus*, one of the *Euphorbiaceæ*, a large shrub with poplar-like leaves, found in Australia and the Pacific islands.—**Silver or silver-leaf poplar.** Same as *white poplar*.—**Trembling poplar,** the European aspen. See *asp*[1] and *populin*.—**Tulip-poplar.** Same as *yellow poplar*.—**Weeping poplar,** the variety *penduliformis* of *Populus grandidentata*, the large-toothed aspen. Both species and variety are used ornamentally.—**White poplar,** *Populus alba*, native in Europe and middle Asia, notable for the silvery-white under surface of its wavy-toothed leaves, and often planted, but highly objectionable on lawns, on account of suckers from the roots. Also called *silver poplar, silver-leaf poplar, white asp*, and *abele*.—**Yellow poplar,** the tulip-tree or white-wood. See *Liriodendron*.

poplar-birch (pop′lär-bėrch), *n.* A European tree, *Betula alba*. See *birch*, 1.

★**poplin** (pop'lin), *n.* [= Sp. *populina*, *popelens*, < F. *popeline*, formerly *papeline*, poplin; origin obscure.] A fabric having a silk warp and a weft of wool heavier than the silk, which gives it a corded surface somewhat resembling that of rep. It may be watered, brocaded, or plain.—**Double poplin**, poplin in which both the silk warp and wool weft are very heavy, the heavy wool weft making the corded appearance very prominent and the woven stuff much stiffer and heavier than single poplin.—**Irish poplin**, a light variety of poplin, sometimes also called *single poplin*, made in Dublin, and celebrated for its uniformly fine quality.—**Terry poplin**, a very durable fabric in which, by throwing up to the surface alternate threads of the silk warp, an appearance somewhat resembling Terry velvet is obtained.

poplitæus, popliteus (pop-li-tē'us), *n.*; pl. *poplitæi, poplitei* (-ī). [NL., < L. *poples* (*poplit-*), the ham of the knee, the hock.] A flat triangular muscle at the back of the knee-joint, covered by the gastrocnemius. It arises from the outer side of the external femoral condyle, and is inserted into the upper back part of the tibia.

popliteal (pop-li-tē'al), *a.* [< *poplitæus* + *-al.*] Of or pertaining to the ham, or back of the knee.—**External popliteal nerve.** Same as *peroneal nerve* (which see, under *peroneal*).—**Popliteal aneurism**, aneurism of the popliteal artery.—**Popliteal artery**, the continuation of the femoral artery in the popliteal space, after passing through the foramen in the adductor magnus. It divides, below the popliteal muscle, into the anterior and posterior tibial arteries.—**Popliteal aspect**, the posterior aspect of the leg.—**Popliteal bursæ**, bursæ beneath the heads of the gastrocnemius muscles, and sometimes others, in the popliteal space, often communicating with the knee-joint.—**Popliteal glands**, four or five lymphatic glands surrounding the popliteal artery.—**Popliteal ligament**, the posterior ligament of the knee-joint.—**Popliteal line.** See *line*[2].—**Popliteal nerve**, the larger division of the great sciatic, passing down the middle of the popliteal space to the lower border of the popliteus muscle, where it becomes the posterior tibial. It gives off muscular and articular branches and the external saphenous nerve. Also called *internal popliteal nerve.*—**Popliteal notch, plane**, etc. See the nouns.—**Popliteal region.** Same as *popliteal space.*—**Popliteal space** a lozenge-shaped space at the back of the knee, bounded above by the hamstring-muscles, below by the inner and outer heads of the gastrocnemius; the ham. Also called *popliteal interval.*—**Popliteal surface**, the surface of the femur between the supracondylar lines.—**Popliteal tendons**, the tendons of the muscles forming the boundaries of the popliteal space; the hamstrings.—**Popliteal vein**, the vein accompanying the popliteal artery, formed from the venæ comites of the tibial arteries, and continued as the femoral vein.

poplites, *n.* Plural of *poples.*

popliteus, *n.* See *poplitæus.*

poplitic (pop-lit'ik), *a.* [= OF. *poplitique*, n., < L. *poples* (*poplit-*), the ham of the knee.] Of or pertaining to the poples; popliteal.

popper[1] (pop'ėr), *n.* [< *pop*[1] + *-er*[1].] 1. A utensil for popping corn; a corn-popper. It is made of wire gauze with a cover and a long wooden handle. [U. S.]—2. Anything that pops or makes a popping sound, as a firecracker or pistol.

And all round the glad church lie old bottles
With gunpowder stopped,
Which will be, when the Image re-enters,
Religiously popped.
And at night from the crest of Calvano
Great bonfires will hang,
On the plain will the trumpets join chorus,
And more *poppers* bang.
Browning, Englishman in Italy.

popper[2]† (pop'ėr), *n.* [ME., < (?) *pop*[2], strike, + *-er*[1].] A dagger.

★**poppy** (pop'i), *n.*; pl. *poppies* (-iz). [< ME. *popy*, < AS. *popig, papig* = F. *pavot*, Norm. *papi* = Pr. *paver, papaver* = Sp. *ababol*, corn-poppy, *amapola*, poppy, corn-poppy, = Pg. *papoula* = It. *papavero*, < L. *papaver*, poppy. The Gr. word was *μήκων*; cf. *meconium.* The L. *papaver* suffered considerable change in passing into vernacular use in later languages. With *poppy* in the architectural sense, cf. F. *poupée* in same sense (whence E. *poop*[2]), appar. an extended use of *poupée*, the bunch of flax on a distaff, hence a distaff, also a crown-graft, particular uses of *poupée*, a doll, rag-baby: see *puppet.*] 1. A plant of the genus *Papaver.* The poppies are showy herbs, in the New World cultivated chiefly in gardens, and wild or cultivated in the Old. The opium-poppy, *P. somniferum*, is of importance as the source of opium and as yielding, in its seeds, a valuable oil. (See *poppy-oil* and *maw-seed.*) Its capsules afford also a syrup or extract used as a sedative, and in hot decoction serve as an anodyne application. The opium-poppy is a glaucous plant, with wavy clasping leaves. The petals and seeds vary in color. The variety chiefly cultivated in India and Persia has white petals and white seeds, that in Asia Minor purple petals and dark seeds; they are called respectively *white* and *black poppy.* The common red poppy, corn-poppy, or corn-rose is *P. Rhœas*, abounding in central and southern Europe and western Asia. The petals are deep-red or scarlet with a dark eye, or when doubled varying in color. The long-headed poppy, *P. dubium*, has smaller flowers of a lighter red, the capsule elongated. The Oriental poppy, *P. orientale*, has a very large deep-red flower on a tall peduncle, and is the most showy species.

Poppy (*Papaver somniferum*).
a, the upper part of the stem with the flower; *b*, the lower part of the plant; *c*, the fruit.

populace (pop'ū-lās), *n.* [< F. *populace*, OF. *populas* = Sp. *populacho, populazo* = Pg. *populaça, populacho*, < It. *popolaccio, popolazzo*, the common people, the populace, with a depreciative suffix *-accio* (see *-ace*), < *popolo*, people, < L. *populus*, people: see *people.*] The common people; the vulgar; the multitude, comprehending all persons not distinguished by rank, education, office, or profession.

The *populace* hooted and shouted all day before the gates of the royal residence.
Macaulay, Nugent's Hampden.

=**Syn.** *Populace, Mob, Rabble*, crowd, masses. *Populace* is used to represent the lower classes, the body of those without wealth, education, or recognized position; it is, however, much less opprobrious than *mob* or *rabble*. *Mob* is a very strong word for a tumultuous or even riotous assembly, moved to or toward lawlessness by discontent or some similar exciting cause. *Rabble* is a contemptuous word for the very lowest classes, considered as confused or without sufficient strength or unity of feeling to make them especially dangerous.

That vast portion, lastly, of the working class which, raw and half-developed, has long lain half-hidden amidst its poverty and squalor, and is now issuing from its hiding-place to assert an Englishman's heaven-born privilege of doing as he likes, and is beginning to perplex us by marching when it likes, meeting where it likes, bawling what it likes, breaking what it likes—to this vast residuum we may with great propriety give the name of *Populace*.
M. Arnold, Culture and Anarchy, iii.

A *mob* is at first an irregular, then a regular army; but in every stage of its progress the mere blind instrument of its leaders. *Ames*, Works, II. 228.

Follow'd with a *rabble* that rejoice
To see my tears and hear my deep-fet groans.
Shak., 2 Hen. VI., ii. 4. 32.

populacy† (pop'ū-lā-si), *n.* [< *populace*, irreg. conformed to nouns in *-acy*.] The populace or common people; the rabble. *Decay of Christian Piety.*

popular (pop'ū-lăr), *a.* [= D. *populair* = G. *popular, populär* = Sw. *populär* = Dan. *populær*, < F. *populaire* = Sp. Pg. *popular* = It. *popolare*, < L. *popularis*, of the people, belonging to the people, of the same people or country (as a noun, a fellow-countryman), agreeable to the people, popular, attached or devoted to the people, democratic, etc., < *populus*, the people: see *people*.] 1. Of or pertaining to the people; constituted by or depending on the people, especially the common people: as, the *popular* voice; *popular* elections; *popular* government.

Antinous, by my shame observe
What a close witchcraft *popular* applause is.
Beau. and Fl., Laws of Candy, v. 1.

2. Suitable to or intended for common people; easy to be comprehended; not technical or abstruse; plain; familiar: as, a *popular* treatise on astronomy.

Homilies are plain and *popular* instructions.
Hooker, Eccles. Polity.

"Piers Ploughman" is the best example I know of what is called *popular* poetry—of compositions, that is, which contain all the simpler elements of poetry, but still in solution, not crystallized around any thread of artistic purpose.
Lowell, Study Windows, p. 263.

3. Enjoying the favor of the people; pleasing to people in general: as, a *popular* preacher; a *popular* war or peace.

In their sermons they were apt to enlarge on the state of the present time, and to preach against the sins of princes and courts, a topic that naturally makes men *popular*.
Ep. Burnet.

An author may make himself very *popular*, however, and even justly so, by appealing to the passion of the moment, without having anything in him that shall outlast the public whim which he satisfies.
Lowell, Study Windows, p. 117.

4†. Desirous of obtaining the favor of the people; courting the vulgar; of demagogic proclivities.

Divers were of opinion that he [Caius Gracchus] was more *popular* and desirous of the common people's good will and favour then his brother had been before him. But indeed he was clean contrary.
North, tr. of Plutarch, p. 690. (*Trench.*)

5. Prevailing among the people; epidemic. *Johnson.* [Rare.]

The world 's a *popular* disease, that reigns
Within the froward heart and frantic brains
Of poor distemper'd mortals.
Quarles, Emblems, i. 8.

6†. Plebeian; vulgar.

Discuss unto me: art thou officer?
Or art thou base, common, and *popular*?
Shak., Hen. V., iv. 1. 38.

7. Conceited. [Vulgar, U. S.]

Popular: conceited. . . . "*Pop'lar* as a hen with one chicken." *Lowell*, Biglow Papers, 2d ser., Int.

Popular action, in *law*, an action for a penalty given by statute to the person who sues for the same.—**Popular sovereignty**, in *U. S. hist.*, the theory that the right to decide whether slavery should exist in a territory rested with the people of that territory, and not with Congress. It was advocated especially by Democrats during the period 1847–61, and its leading champion was Douglas. It was often termed "squatter sovereignty," with which it was nearly identical.=**Syn. 3.** Favorite, current, prevailing.

popularisation, popularise, etc. See *popularization*, etc.

popularity (pop-ū-lar'i-ti), *n.* [= F. *popularité* = Sp. *popularidad* = Pg. *popularidade* = It. *popolarità* = D. *populariteit* = Sw. Dan. *popularitet*, < L. *popularita(t-)s*, a being of the same country, also a courting of popular favor, popular bearing, < *popularis*, of the people: see *popular*.] 1. Popular character or quality; favor in the eyes of the people; acceptance or acceptability among the people; the fact of being favored by or of having the approbation of the people: as, the *popularity* of a measure; the *popularity* of a public officer; the *popularity* of a book or of a preacher.

The best temper of minds desireth good name and true honour; the lighter, *popularity* and applause; the more depraved, subjection and tyranny. *Bacon.*

2†. That which catches public favor; anything suited to the vulgar fancy; a piece of claptrap.

Popularities . . . which sway the ordinary judgement. *Bacon.*

3†. A desire to obtain favor with the people; a currying of favor with the people.

Harold, lifted up in mind, and forgetting now his former shows of *popularity*, defrauded his soldiers their due and well-deserved share of the spoils. *Milton*, Hist. Eng., vi.

4†. Vulgarity; commonness.

This gallant, labouring to avoid *popularity*, falls into a habit of affectation ten thousand times hatefuler than the former. *B. Jonson.*

popularization (pop'ū-lăr-i-zā'shọn), *n.* [= F. *popularisation*; < *popularize* + *-ation*.] The act of making popular; adaptation to popular needs or capacities: as, the *popularization* of science. Also spelled *popularisation*.

popularize (pop'ū-lăr-īz), *v. t.*; pret. and pp. *popularized*, ppr. *popularizing*. [= F. *populariser* = Sp. *popularizar* = Pg. *popularisar*; as *popular* + *-ize*.] To make popular; treat in a popular manner, or so as to be generally intelligible to common people; spread among the people. Also spelled *popularise*.

The *popularizing* of religious teaching. *Milman.*

popularizer (pop'ū-lăr-ī-zėr), *n.* One who popularizes, or treats scientific or abstruse subjects in a popular manner. Also spelled *populariser*. *Athenæum.*

popularly (pop'ū-lăr-li), *adv.* 1. In a popular manner; so as to please the populace.

Why then should I, encouraging the bad,
Turn rebel and run *popularly* mad?
Dryden, Abs. and Achit., i. 836.

2. Among the people at large; currently; commonly; prevalently.

popularness (pop'ū-lăr-nes), *n.* The state of being popular; popularity.

Meretricious *popularness* in literature. *Coleridge.*

populate (pop'ū-lāt), *v.*; pret. and pp. *populated*, ppr. *populating*. [< ML. *populatus*, pp. of *populare* (> It. *popolare*), people, populate, < L. *populus*, people: see *people*, *n.*, and cf. *people*, *v.* Cf. L. *populari*, *populare*, devastate, lay waste: see *depopulate*.] **I.** *trans.* To furnish with inhabitants, either by natural increase or by immigration or colonization; people.

II. *intrans.* To breed; propagate; increase in number.

Great shoals of people which go on to *populate*.
Bacon, Vicissitudes of Things.

populate (pop'ū-lāt), *a.* [= It. *popolato, populato*; < ML. *populatus*, pp. of *populare*, populate: see *populate*, *v.*] Populated; populous.

The countrie of Caldea, the situation whereof is vnder the fourth Climate, the Region after the floud first inhabited and *populate*.
Guevara, Letters (tr. by Hellowes, 1577), p. 376.

A prince . . . in the prime of his years, owner of the entire isle of Britain, enjoying Ireland *populate* and quiet.
Bacon, Notes of a Speech on Spain.

★**population** (pop-ū-lā'shọn), *n.* [= F. *population* = Sp. *población, población* = Pg. *população* = It. *popolazione*, < ML. *populatio(n-)*, population (LL. a people, multitude), < *populare*, pp. *populatus*, people: see *populate*.] 1. The act or process of populating or peopling: as, the rapid *population* of the country still continues.

The first radical impact of the principle of *population*, working in harmony with the repellent forces of savagery, tends to the speediest possible diffusion of population throughout the most accessible parts of the habitable world. *Amer. Anthropologist*, I. 17.

2. The whole number of people or inhabitants in a country, county, city, or other locality: as, the *population* has increased 20,000 in four years; also, a part of the inhabitants in any way distinguished from the rest: as, the German *population* of New York.

A country may have a great *population* and yet not be populous. *Tooke.*

In countries of the highest civilization which has yet been reached, armed with the resources of the best government, purest justice, truest morality, soundest economy, and most fruitful science attained by men, we find the greatest density of *population*, because the limits of *population* revolve more and more within the sphere of man's material, mental, and moral freedom.
Amer. Anthropologist, I. 11.

3. The state of a locality with regard to the number of its inhabitants; populousness.

Neither is the *population* to be reckoned only by number, for a smaller number, that spend more and earn less, do wear out an estate sooner than a greater number that live low and gather more. *Bacon*, Seditions and Troubles.

populator (pop'ū-lā-tọr), *n.* [= It. *popolatore*, < ML. *populator*, one who peoples, < *populare*, pp. *populatus*: see *people* and *populate*.] One who or that which populates or peoples.

populicide (pop'ū-li-sīd), *n.* [= F. *populicide*; < L. *populus*, people, + *cædere*, kill.] Slaughter of the people. *Eclectic Rev.* [Rare.]

populin (pop'ū-lin), *n.* [= F. *populine*; < L. *populus*, poplar, + *-in*².] A crystallizable glucoside ($C_{20}H_{22}O_8$) found in the bark, root, and leaves of the aspen, *Populus tremula*, along with salicin. It forms delicate white needles, which have a sweet taste like that of licorice.

populinate (pop'ū-lin-āt), *v. t.* [< *populin* + *-ate*².] To impregnate with populin, as lard, to prevent a tendency to rancidity. *U. S. Dispensatory*, p. 1489.

Populist (pop'ū-list), *a.* and *n.* **I.** *a.* Of or pertaining to the People's party, a political organization established in the United States in 1891, having for its chief objects expansion of the currency, state control of railways, and the placing of restrictions upon the ownership of land.

II. *n.* A member of the People's party.

populosity† (pop-ū-los'i-ti), *n.* [= F. *populosité*, < LL. *populosita(t-)s*, < L. *populosus*, populous: see *populous*.] Populousness.

The length of men's lives conduced unto the *populosity* of their kind. *Sir T. Browne*, Vulg. Err., vi. 6.

populous (pop'ū-lus), *a.* [< F. *populeux* = Sp. Pg. *populoso* = It. *populoso, popoloso*, < L. *populosus*, full of people, populous, < *populus*, people: see *people*.] 1. Full of people; containing many inhabitants in proportion to the extent of the country.

You will finde it a *populous* towne, and well inhabited.
Coryat, Crudities, I. 9.

They passed not farre frome an other Ilande which the captyues sayde to bee verye *peopulous*, and replenyshed with all thynges necessarie for the life of man.
Peter Martyr (tr. in Eden's First Books on America, ed. [Arber, p. 69).

2†. Numerous; multitudinous.

Yt was shewed hym that Kynge Rycharde was at hande wyth a stronge powre and a *populous* armye.
Hall, Rich. III., fol. 29, a., quoted in Wright's Bible [Wordbook.

The dust
Should have ascended to the roof of heaven,
Raised by your *populous* troops.
Shak., A. and C., iii. 6. 50.

3†. Pleasing or acceptable to the people; popular.

He I plead for
Has power to make your beauty *populous*.
Webster, Appius and Virginia, ii. 1.

4†. Suited to the populace; coarse; vulgar.

It should have been some fine confection,
That might have given the broth some dainty taste;
This powder was too gross and *populous*.
Arden of Feversham, i. 3.

populously (pop'ū-lus-li), *adv.* In a populous manner; with many inhabitants in proportion to the extent of the country.

populousness (pop'ū-lus-nes), *n.* The state of being populous, or of having many inhabitants in proportion to extent of territory.

Populus (pop'ū-lus), *n.* [NL. (Tournefort, 1700), < L. *populus*, poplar: see *popple*², *poplar*.] A genus of dicotyledonous trees of the family *Salicaceæ*, including the poplar and aspen, having dicœcious flowers in catkins without floral envelops, and distinguished from *Salix*, the willow, by the numerous ovules, obliquely lengthened and cup-shaped disks, broad and toothed bracts, loosely flowered and generally pendulous catkins, and broad leaves. The species (about 25) are natives of the northern hemisphere. They are trees with angled or sometimes cylindrical branches, scaly resinous buds coated externally with varnish before opening, and catkins appearing before the leaves, which are alternate and slender-petioled, feather-veined and three-nerved, sometimes entire and triangular, often toothed or lobed. Most species have long drooping catkins, red anthers, and white-fringed scales. The fertile catkins discharge innumerable seeds, each enveloped in white cottony down, which fill the air about the trees in May, and collect in small drifts like snow; hence the name *cottonwood*, which is in use for several American species. *P. tremula* of Europe and *P. tremuloides* of America, the aspens, are remarkable for the tremulous motion of their leaves, due to the vertical flattening of their leafstalks (see cut under

petiole). See *quaking asp* (under *asp*[1]), *aspen, auld wives' tongues* (under *auld*), and *corticine*. For other species, see *poplar*, the general name of the genus.

popweed (pop′wēd), *n.* The common bladderwort. See *Utricularia*.

I stuck awhile with my toe-balls on the slippery links of the *pop-weed*, and the world was green and gliddery, and I durst not look behind me.
R. D. Blackmore, Lorna Doone, vii.

poquauhock, *n.* [Said to be Algonkin, a fuller form of *quahaug*.] The round hard clam, or quahaug, *Venus mercenaria*. Also *poquanhock*. See *sequannock*.

por-. [L. *por-*: see *pro-*.] A prefix of Latin origin, ultimately a form of *pro-*. It occurs in *portend*, *portent*, etc.

porailleţ, *n.* [ME., < OF. *povraille*, poor people, < *povre*, poor: see *poor*.] The poor; poor people.

For the parisch prest and the pardonere parten the siluer, That the *poraille* of the parisch shold haue ȝif thei nere.
Piers Plowman (B), Prol., l. 82.

It is not honest, it may not avaunce,
For to delen with no swich *poraille*.
Chaucer, Gen. Prol. to C. T., l. 247.

Al be it the *poraylle* and needy people drewe vnto hym, & were parteners of yt ille. *Fabyan*, Chron., I., an. 1550.

poral (pō′ral), *a.* [< *pore*[2] + *-al*.] Of or pertaining to the pores of the body.

Giving only of our waste; . . . by form of perspiration, radiation, if you like; unconscious *poral* bountifulness.
G. Meredith, The Egoist, xiv.

porbeagle (pôr′bē″gl), *n.* [Said to be for **porcbeagle*, < F. *porc*, hog, + E. *beagle* (applied to several sharks). Cf. *porpoise*.] Any shark of the family *Lamnidæ*, and especially of the genus *Lamna*; a kind of tope or mackerel-shark. The name originally applied to *L. cornubica*, a British species occurring also in the North Atlantic at large, and also known as the *Beaumaris shark*. It is a large fierce shark, of a gray color. Species of *Isurus* are mackerel-sharks to which the name also applies, as *I. glaucus* or *I. oxyrhynchus* of the Atlantic. See cut under *mackerel-shark*.

porcate (pôr′kāt), *a.* [< L. as if **porcatus*, < *porca*, a ridge between two furrows: see *furrow*.] Ridged; formed in ridges; specifically, in *entom.*, marked by longitudinal deep furrows separated from one another by narrow ridges.

porcated (pôr′kā-ted), *a.* [< *porcate* + *-ed*[1].] Same as *porcate*.

porcelain[1] (pôrs′lān or pōrs′lān), *n.* and *a.* [Formerly also *porcellan*, *porcelane*, also irreg. *purslaine*, *purslane*, *purslen* (by confusion with *purslane*[1], which was also written *porcelain*); = D. *porselein* = G. *porzellan*, *porcellan* = Dan. *porcellæn* = Sw. *porslin*, < OF. *porcellaine*, *pourcelaine*, *porchelaine*, *porcelaine*, porcelain, china, chinaware, also the purple-fish, the Venus-shell, F. *porcelaine*, porcelain, china, cowry, sea-snail, = Sp. *porcelana* = Pg. *porcellana*, *porcelana*, porcelain, < It. *porcellana*, porcelain (so called because its finely polished surface was compared with that of the Venus-shell), also the purple-fish, the Venus-shell, so called because the curved shape of the upper surface resembles the curve of a pig's back, < *porcella*, a little pig, a pig, dim. of *porco*, m., *porca*, f., a hog, pig: see *pork*.] **I.** *n.* A ceramic ware having a translucent body, and when glazed (see *biscuit*, 3) a translucent glaze also. It is of various kinds: (*a*) Hard-paste (or natural) porcelain, of which the principal material is a peculiar clay commonly known as *kaolin*, with which is combined some silicious material (in China, petuntse; at Sèvres and elsewhere in Europe, white sand, and sometimes chalk, or roasted and ground flints). The glaze is of similar composition, the silicious ingredient being sometimes rock-crystal ground to powder. (*b*) Soft-paste (or artificial) porcelain, of which the composition varies; it was originally an attempted imitation of the hard porcelain brought from China and Japan, and is of two distinct kinds: (1) French soft-paste, composed of sand, niter, soda (or other alkaline substance), gypsum, salt, and other ingredients; (2) English bone china, made principally of clay and calcined bone, and with a softer glaze. (*c*) Hybrid or mixed porcelain, which is also a compound produced in attempted imitation of Oriental porcelain, containing a certain amount of a kaolinic clay. Of these three varieties, Chinese and Japanese porcelain, the porcelain of Dresden, Limoges, Vienna, and Sèvres (since about 1770), and in England that of Bristol and Plymouth are of the first; St. Cloud, Sèvres (before 1770), and most English wares are of the second; and the medieval Italian wares, with some English ones and perhaps some modern ones of the European continent, belong to the third; but the distinction between the second and third is often hard to fix or ascertain.—**Alcora porcelain**, a rich porcelain having a metallic luster not unlike that of majolica, made at Alcora in Spain, toward the end of the eighteenth century. The mark is an A in gold-colored luster.—**Amstel porcelain**, porcelain made near Amsterdam in the Netherlands, first at a factory called Old Amstel from 1782 to 1807, and then at the factory of New Amstel for two or three years only. The ware of both is marked Amstel in full, or with an A, and is of great excellence of manufacture, rarely in decorative pieces, but in table-services of great variety, and decorated in a simple way, especially with small paintings of birds.—**Arita porcelain**, the more exact name of the fine Japanese porcelain commonly known as Old Japan, Hizen porcelain, and Imari porcelain, the greater part of which was made at the town of Arita. See *Hizen porcelain*.—**Berlin porcelain**, porcelain made at Berlin, Prussia, especially a hard-paste porcelain made at the royal factory (founded by a private person in 1750, and bought by Frederick the Great thirteen years later). This ware has been made down to the present day. The mark has usually been a scepter in blue under the glaze, to which has been added K. P. M., for Königl. Porzellan Manufaktur; but the recent productions are marked with a circular seal having the above German words in full around the rim and the royal eagle in the middle. The uses to which this ware is put are extremely varied, and decoration of every sort has been tried in it, and generally with success. Lithophanie belongs to it, as well as a curious manufacture called *porcelain-lace*, which is added to decorative figures, and is produced by soaking lace or a similar fabric in the porcelain-slip, and then firing, by which the threads are destroyed and the pattern left in thin filaments of porcelain.—**Bone porcelain**. See above.—**Bow porcelain**, a soft-paste porcelain made at Stratford-le-Bow, near London, generally decorated by figures in relief and in painting of the simplest character. It is the earliest English porcelain. A frequent decoration is what is called the hawthorn pattern (thorny branches covered with blossoms, frequently in slight relief). A frequent mark of Bow china is a bent bow with an arrow on the string.—**Brandenburg porcelain**, porcelain made at a factory near Brandenburg between 1717 and 1729. The founder of the factory appears to have been a workman from Meissen.—**Bristol porcelain**, porcelain made at Bristol in England, especially a ware made in the eighteenth century from the Cornwall china-stone, and directed by a potter named Champion, who bought out Cookworthy's interest. See *Cookworthy porcelain*.—**Budweis porcelain**, a hard-paste porcelain made at Budweis in Bohemia in modern times.—**Burslem porcelain**, a name given to some of the finer wares made at the first Wedgwood factory in Burslem. They are not strictly porcelain in any sense, but are described by Wedgwood, in catalogues, etc., as "fine porcelain bisque" and the like, whence probably the term came to be used.—**Caen porcelain**, porcelain made at Caen in Normandy, especially a hard-paste ware made during the early years of the French revolution, and commonly marked with the word Caen in full. It is extremely rare, the manufacture having lasted but a few years.—**Capodimonte porcelain**, porcelain made at Capodimonte, a suburb of Naples, especially that of the royal factory, which was continued through the greater part of the eighteenth century. The most celebrated variety is that which is decorated with figures in high relief, not very finely modeled, but decorative in their disposition, and then touched with red applied in the pointillé manner to the less prominent parts of the relief, as if with the intention of giving a flesh-like warmth to the shadows.—**Cast porcelain**, a semi-transparent or milky-white glass made of silica and cryolite with oxid of zinc. Also called *milk-glass*, *fusible porcelain*, *cryolite glass*, and *hot-cast porcelain*.—**Chantilly porcelain**, porcelain made at Chantilly, near Paris. Especially—(*a*) A soft-paste porcelain made under the patronage of the Prince de Condé from 1725, the mark of which was a hunting-horn in blue, red, or impressed. The glaze of this porcelain was made opaque by tin, so as to be practically a thin coat of enamel. A design consisting of small detached flowers painted in blue became very popular, and was known as the *Chantilly sprig pattern*. (*b*) A hard-paste porcelain made in the early part of the nineteenth century.—**Chelsea porcelain**, a porcelain made at Chelsea in England, especially a soft-paste porcelain made from 1745, the most admired of the old English porcelains. Later, *Chelsea-Derby*.—**Chemical porcelain**, a fine porcelain nearly completely vitrified, so as to be almost an opaque glass, made at the works of Granger & Co. at Worcester, England, about 1860.—**Cookworthy porcelain**, porcelain made at Plymouth, England, from about 1755, by W. Cookworthy, who discovered the Cornish clay (see *china-stone* (*b*)) independently of Champion. This was the most important of the Plymouth porcelain manufactures.—**Copenhagen porcelain**, porcelain made at Copenhagen. Especially—(*a*) A hard-paste porcelain made from 1760 for a few years, and from 1772, soon after which time it was taken up by the government. The well-known mark is three waving lines supposed to represent the Sound and Great and Little Belts. (*b*) A modern porcelain, of which the variety best known is unglazed works of art, such as statuettes and groups. Thorwaldsen's works, especially, have been copied in this ware.—**Crown Derby porcelain**, a variety of Derby porcelain, bearing a royal crown as a distinguishing mark. In some cases a D only is crowned, sometimes the initial D with crossed swords between is used, this mark being sometimes in red, sometimes in violet, and sometimes impressed.—**Derby crown porcelain**, a modern porcelain made at Derby in imitation of the old Crown Derby ware and also from new designs. The mark adopted by the company is a cipher of D. D. surmounted by a crown.—**Derby porcelain**, porcelain made at Derby in England, especially a soft-paste porcelain made from 1751. The ware is very translucent, and some of the colors are of unusual brilliancy, especially the blue. One of the specialties of the Derby fabric is the unglazed biscuit-ware, of which figures and groups were made for the decoration of the table; this is unmatched by any recent wares, the Parian being generally inferior to it. An old mark of Derby ware is a D and the name of the potter Bloor, with the word Derby, and a crown has been used since 1830.—**Dresden porcelain**, a hard-paste porcelain made at the royal factory of Meissen, near Dresden in Saxony, beginning with the year 1707. This was the first hard-paste porcelain made in Europe, and the manufacture has continued to the present day, including pieces for decoration, for uses of every kind and decoration of every variety, both in relief and in color and gold. The small figures and groups, brilliantly painted, and especially those in which shepherds and shepherdesses are represented, have been especially popular for many years. A common name for the old Dresden porcelain is *vieux Saxe*. The best-known mark of this factory is two swords crossed, but a number of Oriental marks are roughly imitated on certain pieces. Pieces that are sent out from the royal factory white can be known by a cut or scratch through the two swords which form the mark; such pieces, if decorated, have been decorated outside. Compare *Sèvres porcelain*.—**Embossed porcelain**, porcelain the decoration of which is in slight relief. Especially—(*a*) When the relief is obtained by the decoration itself, as in *pâte sur pâte*. (*b*) Less properly, when the decoration is produced by casting or pressing the whole surface before the color is applied.—**False porcelain**, a name given by the first makers of hard-paste porcelain in England to the artificial or soft-paste porcelain.—**Hizen porcelain**, porcelain made in Japan, in the province of Hizen, and often known as *Imari porcelain*, from the name of the seaport whence it is exported. The ware specially known as *Hizen* or *Imari* is decorated with blue under the glaze, and with red and sometimes green and gold upon the glaze, the green forming translucent enamels in slight relief. This ware was brought to Europe by the Dutch during the seventeenth and eighteenth centuries, and was known as Old Japan, until the recent investigation into the history of Japanese ceramics. Compare *Arita porcelain*.—**Imari porcelain**, Japanese porcelain exported from the seaport of Imari, in the province of Hizen. See *Hizen porcelain*.—**Iran porcelain**, a name given to a hard white ware, with blue decoration in the Chinese style, which has many of the characteristics of porcelain. See *Kashee ware*, under *ware*[2].—**Kiyomizu porcelain**, a variety of Japanese porcelain the body of which is said to be artificial, composed of clay mixed with powdered silicious stone and having peculiarities also in the composition of the glaze.—**Kouan-Ki porcelain**, a name given to certain vases of Chinese porcelain of blue decoration, and marked with one or other of certain well-known emblems of the Chinese magistracy, such as the pearl (considered the emblem of talent or ability), the sacred ax, the sonorous stone, and a group of writing-materials.—**Limoges porcelain**, porcelain made at Limoges, in the department of Haute-Vienne, France. Especially—(*a*) A soft-paste porcelain made from 1773. (*b*) A hard-paste porcelain made from 1779 to the present day. The kaolin was obtained from St. Yrieix in the neighborhood, and the ware was especially brilliant and translucent as long as this alone was used. The modern porcelain includes much of the most important ceramic production of modern France.—**Lowestoft porcelain**, a soft-paste porcelain made at Lowestoft in Suffolk, from about 1762 to 1789. Examples of genuine Lowestoft are exceedingly scarce, the hard-paste ware known by that name being an inferior Chinese product made for the foreign trade. The Lowestoft works were closed in 1804.—**Lunéville porcelain**, a soft-paste porcelain made at Lunéville in France, especially famous for the statuettes and groups in biscuit, of which the chief maker was Paul Louis Cyffle. The paste of these seems to have been gradually improved by Cyffle or others from the original *terre-de-Lorraine*, and the improved paste was called *pâte-de-marbre*. The name Cyffle is commonly marked on these pieces.—**Medici porcelain**, a translucent ceramic ware produced in or near Florence, under the Medicean grand dukes, in the sixteenth century. Pieces of this ware are of great rarity. The mark is sometimes the balls (palloni) of the Medici, and sometimes a rude picture of the dome of the Cathedral of Florence.

The discovery of the existing specimens of *Medici porcelain* is due to Alessandre Foresi, who observed its peculiar texture and, in some cases, slight transparency, and found pieces marked at the back in a way that quite confirmed his theory. . . . Scarcely forty specimens of the ware are known. *Encyc. Brit.*, XIX. 636.

Meissen-Saxony porcelain, the name more properly given to the Dresden porcelain.—**Natural soft-paste porcelain**, a name given by M. Brongniart, chief of the Sèvres works for many years, to those soft-paste porcelains which have clay for their basis, and therefore are properly ceramic wares.—**Petit porcelain**, porcelain made by a potter named Jacob Petit, established in 1790, and of late years at Paris. This ware is of remarkable excellence, and the pieces of original design are important in the development of ceramic decoration; but the greater number of the present products are imitations of Dresden and other celebrated wares.—**Réaumur's porcelain**, an artificial or hybrid production of the eminent scientist Réaumur, differing from all porcelains properly so called, and not strictly a soft-paste porcelain, but rather a glass that has been exposed to a long-continued heat, which makes it opaque and of a milky white. This substance is called by the Germans *milch-glass*. The discovery had no important results.—**Rose porcelain**, Chinese porcelain in the decoration of which large surfaces of brilliant red enamel are used. Plates and dishes of which the outside is covered with this enamel are called *rose-back plates*, etc. The rose porcelain is to be distinguished from the porcelain of the so-called rose family, or *famille rose*.—**Royal Worcester porcelain**. See *Worcester porcelain*.—**Sèvres porcelain**, porcelain made at Sèvres, near Paris. Especially—(*a*) A soft-paste porcelain made from 1756, in which year the manufacture was removed from Vincennes. The celebrated colors *bleu du roi*, *bleu turquoise*, *rose Pompadour* (more commonly called *rose du Barry*), and others, were introduced for the soft-paste ware; and the decoration in gold raised in slight relief above the glaze, the addition of jewels, and the style of the paintings in medallions, all have their origin in this soft-paste ware, which was the only ware made at Sèvres before 1769, although the true hard porcelain had already been made at Meissen sixty years before. (See *Dresden porcelain*.) The soft-paste porcelain, now greatly in demand as a rarity, has one advantage over the hard-paste—in the slight absorption of the color by the paste, giving a pleasant softness of effect. (*b*) A hard-paste porcelain made from 1769, in consequence of the discovery of deposits of kaolin in France. This manufacture has reached greater merit of late years than before the revolution; in size and perfection the pieces surpass anything produced elsewhere, and the painting shows unparalleled skill and mastery of the material, whatever may be thought of its appropriateness and good taste as decoration. The mark under the kings of the old régime was always the royal cipher L L, front to front, crossing above and below, and within the space so inclosed a letter denoting the year of manufacture, a double alphabet beginning in 1778, AA, etc. Under the republic, the word Sèvres, and R. F. for République Française, were used; under the empire, M. Imple. de Sèvres, sometimes with the imperial eagle, was used. The restored kings used a cipher of LL and one

of CC; Louis Philippe, a cipher L. P., and often the name of the palace for which the ware was made. The 1848 republic restored the R. F.; and the second empire, a crowned N, with S for Sèvres, and the date, as 56, 57. But since about 1830 all pieces are marked before decorating with the letter S, and a date in green included in a cartouche, and, when the piece is sold undecorated, this mark is cut through by a touch to a grinding-wheel.—**Solon porcelain,** porcelain made either at the national factory at Sèvres or at Minton's, England, and decorated by an artist named Solon; especially, those pieces decorated in low relief by layers or coats of kaolinic slip applied one upon another, producing a bas-relief more or less translucent, according as the application is less or more thick.—**Swansea porcelain,** porcelain made at Swansea from about 1814 till 1820, when the factory was removed to Coalport. But little porcelain was made, as the factory was devoted chiefly to delf and what was called *opaque china;* but the quality of it was excellent, and it is ranked by some as the most perfect porcelain ever produced in England. The word Swansea, sometimes combined with a trident or with two tridents crossed, and sometimes with the name of the director for the time being, is used as a mark.—**Tender porcelain,** artificial soft-paste porcelain of France, made of a frit composed of various ingredients, known as *pâte tendre.* See *soft-paste,* above.—**Worcester porcelain,** a soft-paste porcelain made at Worcester in England, from 1751, by an association called the Worcester Porcelain Company. Transfer printing was used on this ware at a very early time, and the association also produced a blue and white ware imitated from the Chinese, and made up in decorative pieces. A peculiar mottled quality of the blue, produced by the running of the color in firing, was especially admired. The manufacture is still continued by a joint-stock company. The epithet "Royal," often prefixed to the name "Worcester Porcelain," dates from 1788, when George III., on the occasion of a visit to the factory, conferred this appellation upon it. The paste was a very artificial composition, having little or no clay in it. The old Worcester porcelain seems to have had no mark peculiarly its own, excepting a crescent, or some one of several "seal-marks" copied from Chinese porcelain, or a group of characters imitating Chinese but without signification; but from 1788 the mark of Chamberlain, and since 1852 a combination of W. W. W. W. with a date in the middle, have been used by the chief factory.

II. *a.* Of the nature of or consisting of porcelain: as, *porcelain* adornments.—**Porcelain mosaic,** a name given to tile-work in which the separate tiles are of uniform or nearly uniform color and composed of porcelain or fine pottery such as white stoneware.

porcelain[2]†, *n.* An obsolete form of *purslane.*

porcelain-cement (pôrs'lān-sē-ment″), *n.* A cement, variously constituted, for mending chinaware or glassware.

porcelain-clay (pôrs'lān-klā), *n.* Kaolin.

porcelain-color (pôrs'lān-kul″ọr), *n.* A pigment used for painting on porcelain. Such pigments are either colored glasses reduced to powder, which, when fired or subjected to the action of heat, fuse upon the surface of the ware, or fluxes combined with metallic colors, usually oxids.

porcelain-crab (pôrs'lān-krab), *n.* A crab of the genus *Porcellana:* so called from its shell, which is smooth and polished, as if made of porcelain. Several species are found on British coasts, the most interesting being the broad-clawed porcelain-crab, *P. platycheles,* taking its name from its singular flat broad claws, each of which is almost as large as the whole body. See *Porcellana,* 1.

porcelain-gilding (pôrs'lān-gil″ding), *n.* A gold pigment used in decorating porcelain. It is a magma of gold, quicksilver, and flux, thinned with oil and turpentine. When fired, the volatile ingredients are sublimed, and the black magma assumes a dead-gold surface, which must be burnished to acquire the bright metallic appearance. Other compounds give a bright metallic surface from simple firing, but this is less durable than the burnished gold.

porcelainised, *a.* See *porcelainized.*

porcelainist (pôrs'lān-ist), *n.* [< *porcelain*[1] + *-ist.*] 1. A student or collector of porcelain; also, an authority on porcelains.—2. A decorator of porcelain.

porcelainite (pôrs'lān-īt), *n.* [< *porcelain*[1] + *-ite*[2].] A trade-name of certain kinds of fine white stoneware, jasper-ware, etc.

porcelainized (pôrs'lān-īzd), *a.* [< *porcelain*[1] + *-ize* + *-ed*[2].] Baked like potters' clay; specifically, in *geol.,* hardened and altered, by contact or other metamorphism, so as to resemble in texture porcelain or earthenware: said of clays, shales, and other stratified rock. Also spelled *porcelainised.*

porcelain-jasper (pôrs'lān-jas″pėr), *n.* See *jasper,* 2.

porcelain-lace (pôrs'lān-lās), *n.* See *Berlin porcelain,* under *porcelain*[1].

porcelain-oven (pôrs'lān-uv″n), *n.* The firing-kiln used in baking porcelain. Each oven is heated by a number of fireplaces arranged radially around its base, with flues converging to a central opening in the floor, through which the heated gases enter the oven. Other flues pass from the fireplaces (or *mouths,* as they are technically called) up in the sides of the ovens, and open into the interior about four feet above the floor. The oven is conoidal in form, and has an opening at its apex for the escape of gases and vapor. A number of these ovens or kilns are clustered about a central furnace called a *hovel.*

porcelain-paper (pôrs'lān-pā″pėr), *n.* A glazed French paper, plain, gilt, painted, or figured.

porcelanaceous (pôr″se-lā-nā′shius), *a.* [< *porcelain*[1] (*porcellan*) + *-aceous.*] Same as *porcelanous.*

porcelane (pôr′se-lān), *n.* [< Sp. *porcelana* = Pg. *porcellana, porcelana,* < It. *porcellana,* Venus-shell, porcelain: see *porcelain*[1].] The money-cowry, *Cypræa moneta.*

The cowry shells, which, under one name or another—chamgos, zimbis, bouges, *porcelanes,* etc.—have long been used in the East Indies as small money.

Jevons, Money and the Mechanism of Exchange, p. 24.

porcelane, porcellane (pôr′se-lān), *a.* [< *porcelain*[1] (*porcellan*).] Same as *porcelanous.*

porcelaneous (pôr-se-lā′nē-us), *a.* [< *porcelain*[1] (*porcellan*) + *-eous.*] Same as *porcelanous.*

porcelanian, porcellanian (pôr-se-lā′ni-an), *a.* [< *porcelain*[1] (*porcellan*) + *-ian.*] Porcelanous; specifically, noting the porcelain-crabs.

porcelanite, porcellanite (pôr′se-lā-nīt), *n.* [= F. *porcellanite* = Pg. *porcelanite* = It. *porcellanite;* as *porcelain*[1] (*porcellan*) + *-ite*[2].] Clay metamorphosed into a rock resembling porcelain or earthenware in texture and appearance.

porcelanous, porcellanous (pôr′se-lā-nus), *a.* [< *porcelain*[1] (*porcellan*) + *-ous.*] 1. Pertaining to or of the nature of porcelain.—2. Resembling porcelain in structure or appearance; hard, smooth, and opaque-white, as the shell of a mollusk or the carapace of a crustacean. Among foraminifers, a type of test is distinguished as *porcelanous* from *hyaline* or *vitreous;* and the three-layered type of mollusk-shell, each layer composed of plates set on edge, is called *porcelanous.*

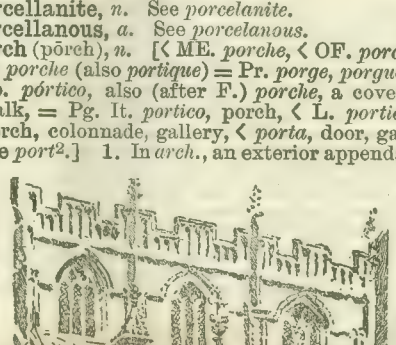
porcellant†, *n.* and *a.* An obsolete form of *porcelain*[1].

Porcellana (pôr-se-lā′nä), *n.* [NL., < It. *porcellana,* porcelain: see *porcelain*[1].] 1. The typical genus of *Porcellanidæ,* founded by Lamarck in 1801. *P. platycheles* and *P. longicornis* are two European species of porcelain-crabs.—2. A genus of mollusks.

porcellanaceous (pôr″se-lā-nā′shius), *a.* [< *porcelain*[1] (*porcellan*) + *-aceous.*] Same as *porcelanous.*

porcellane, *a.* See *porcelane.*

porcellaneous (pôr-se-lā′nē-us), *a.* [< *porcelain*[1] (*porcellan*) + *-eous.*] Same as *porcelanous.*



porcellanian, *a.* See *porcelanian.*

Porcellanidæ (pôr-se-lan′i-dē), *n. pl.* [NL., < *Porcellana* + *-idæ.*] 1. A family of short-tailed ten-footed crustaceans, typified by the genus *Porcellana,* so called from the smoothness and hardness of the shell; the porcelain-crabs. The antennæ are very long, and the chelæ of great size.—2. In *conch.,* a family of gastropods: commonly called *Marginellidæ.*

porcellanite, *n.* See *porcelanite.*

porcellanous, *a.* See *porcelanous.*

porch (pôrch), *n.* [< ME. *porche,* < OF. *porche,* F. *porche* (also *portique*) = Pr. *porge, porgue* = Sp. *pórtico,* also (after F.) *porche,* a covered walk, = Pg. It. *portico,* porch, < L. *porticus,* porch, colonnade, gallery, < *porta,* door, gate: see *port*[2].] 1. In *arch.,* an exterior appendage to a building, forming a covered approach or vestibule to a doorway; a covered way or entrance, whether inclosed or uninclosed. Many church and cathedral porches are magnificent in proportions and decoration. See also cut under *caryatid.*

Porch.—South door of Gloucester Cathedral, England.

Into a church-*porch* then they went,
To stand out of the raine and wet.
Duchess of Suffolk's Calamity (Child's Ballads, VII. 303).

To the *porch,* belike with jasmine bound
Or woodbine wreaths.
Wordsworth, Descriptive Sketches.

2. A covered walk, or portico; a stoa.

And in a *porche,* bilt of square stones
Full mightily enarched enuiron,
Where the domes and ples [pleas] of the town
Were executed, and lawes of the king.
Lydgate, Story of Thebes, ii.

Repair to Pompey's *porch,* where you shall find us.
Shak., J. C., i. 3. 147.

3. A veranda. [Local, U. S.]—4. Figuratively, the beginning or entrance.

Cet. No age was spared, no sex.
Cat. Nay, no degree.
Cet. Not infants in the *porch* of life were free.
B. Jonson, Catiline, i. 1.

Solomon's Porch, a porch connected with and forming a part of Herod's Temple at Jerusalem, minutely described by Josephus.—**The Porch,** the Stoa Pœcile, one of the public porticos on the agora of ancient Athens, whither the Stoic philosopher Zeno resorted with his disciples. It was called the *Painted Porch,* from the pictures of Polygnotus and other eminent painters with which it was adorned. Hence, *the Porch* is equivalent to the *school of the Stoics.*

porcine (pôr′sin), *a.* [= F. *porcine* = Sp. Pg. It. *porcino,* < L. *porcinus,* of a hog, < *porcus,* hog: see *pork.*] 1. In *zoöl.,* resembling or related to swine; suilline: as, *porcine* characters or affinities.—2. Swinish; hoggish; piggish: applied to persons in derision or contempt.

His large *porcine* cheeks, round, twinkling eyes, and thumbs habitually twirling, expressed a concentrated effort not to get into trouble. *George Eliot,* Felix Holt, xx.

porcupigt (pôr′kū-pig), *n.* Same as *porcupine.*

You would have thought him for to be
Some Egyptian *porcupig.*
Dragon of Wantley, l. 84. (*Percy's Reliques.*)

porcupiket, *n.* Same as *porcupine.* *Holyoke.*

porcupine (pôr′kū-pīn), *n.* [< ME. *porkepyn,* also, then or later, reduced to *porkpen, porpyn, porpin, porpint, porkpoint, porpoint, perpoint, porpoynte* (simulating *point*), whence *porpentine, purpentine;* < OF. *porc espin, porch espin,* also *porc d'espine,* F. *porte-espine* (simulating *porter,* carry, as if 'carry-spine') (OF. also *porc-espic, porc-espi,* F. *porc-épic* (whence obs. E. *porkespick,* also *porcupike,* simulating *pike*[1], and *porcupig,* simulating *pig*[1]) = Pr. *porc-espi:* simulating OF. *espic,* spike) = Sp. *puerco espín* = Pg. *porco espinho* = It. *porco spino* (also *porco spinoso,* < ML. *porcus spinosus*), a porcupine, lit. D. *stekel-varken, stekelzwijn,* G. *stachelschwein,* 'thorn-hog'; Sw. *pinsvin* = Dan. *pindsvin,* 'pin-hog.'] 1. A hystricomorphic rodent quadruped of the family *Hystricidæ,* of which there are several genera and many species, representing two subfamilies, the *Hystricidæ* or old world porcupines, which are all terrestrial and fossorial animals, and the *Erethizontidæ* or new world porcupines, more or less arboreal, and in some cases having a prehensile tail. The spines or quills with which these animals are beset reach their highest development in species of *Hystrix* proper, as *H. cristata,*

European Porcupine (*Hystrix cristata*).

the common porcupine of southern Europe and northern Africa. Such quills may be a foot long; they are prettily variegated in color, and much used for penholders. Brush-tailed porcupines constitute the genus *Atherura,* and inhabit the Malay region and Africa. The only North American porcupines belong to the genus *Erethizon,* of which there are 2 species, the common eastern *E. dorsatus,* and the western yellow-haired *E. epixanthus;* in both the spines are only an inch or two long, and mostly hidden in long hair. They are of large size, reaching 2½ feet in length, and of ungainly form and ugly visage, with an extremely stout and clumsy body and broad, flat, blunt tail. One or the other species is found from the northern limit of trees through the greater part of the United States,

The spines grow mostly on the rump and back of the broad flat tail; they are quite loosely attached, and when the animal slaps with its tail (its usual mode of defense) some quills may be flirted to a distance. Something like this, no doubt, gives rise to the popular notion that the porcupine "shoots" its quills at an enemy. These small quills are strikingly like the spines of the prickly-pear (*Opuntia*) in size and shape, and like them are minutely barbed at the end, so that they stick in the flesh of one who receives a blow from the tail. They are much used by the Indians for trimming buckskin garments and ornamenting moccasins. Other American tree-porcupines constitute the genera *Coendou* and *Chætomys;* they are of smaller size and arboreal habits, and range from southern Mexico through a great part of South America. See *Hystricidæ*, *Hystrix;* also cut under *prehensile-tailed.*

Urson, or Canada Porcupine (*Erethizon dorsatus*).

2. (*a*) An apparatus for heckling flax. (*b*) A cylindrical heckle for worsted yarn. *E. H. Knight.*

—**Porcupine ant-eater**, a monotreme of the family *Echidnidæ* or *Tachyglossidæ*, having spines or quills in the pelage resembling those of the porcupine. *Echidna* or *Tachyglossus hystrix* is the best-known species, inhabiting Australia. There are several others. See cut under *Echidnidæ.*

porcupine† (pôr'kū-pīn), *v. t.* [< *porcupine*, *n.*] To cause to stand up like a porcupine's quills. [Rare.]

Thus did the cooks on Billy Ramus stare,
Whose frightful presence *porcupined* each hair.
Wolcot (Peter Pindar), The Lousiad, iv.

porcupine-crab (pôr'kū-pīn-krab), *n.* A kind of crab, *Lithodes hystrix*, inhabiting Japan, having the carapace and limbs spiny.

porcupine-disease (pôr'kū-pīn-di-zēz″), *n.* Same as *hystricismus.*

porcupine-fish (pôr'kū-pīn-fish), *n.* A diodontoid fish, as *Diodon hystrix*, whose skin is studded with prickles; a sea-porcupine. The various species inhabit tropical seas. See *Diodontidæ*, and cuts under *Diodon* and *swell-fish.*

★**porcupine-grass** (pôr'kū-pīn-gras), *n.* A grass, *Stipa spartea*, found from Illinois and Kansas northwestward: so named from the long, strong awns of its flowering glume.

porcupine-wood (pôr'kū-pīn-wud), *n.* The outer wood of the cocoanut-palm, which is very hard and durable, and when cut horizontally displays beautiful markings resembling those of porcupine-spines.

pore[1] (pōr), *v. i.*; pret. and pp. *pored*, ppr. *poring.* [Early mod. E. also *poar;* < ME. *poren*, *pouren*, prob. < Sw. dial. *pora*, *pura*, *påra*, work slowly and gradually, do anything slowly, Sw. *purra*, turn out; cf. pore[2] (pōr), *n.* [< F. *pore* = Pr. *pors* = Sp. Pg. It. *poro* = D. *porie* = G. *pore* = Sw. *por* = Dan. *pore*, < L. *porus*, a pore, < Gr. πόρος, a pore, ford, passage, way, means, pore, fiber of the nerves, etc., < √ *περ* in περᾶν, pass: see *fare*[1], *ford.*] 1. A small opening or orifice; a hole, aperture, or perforation; a foramen; an opening in general: as, the *pores* of a sponge. The term is especially used for a minute perforation, invisible to the naked eye, in a membrane, through which fluids may pass. Such are the pores of the skin, formed by the ducts of the sweat-glands.

The sweate came gushing out of euery *pore.*
Chapman, Odyssey, xi.

And gathering virtue in at every *pore.*
Lowell, Under the Willows.

2. One of the small interstices between the particles or molecules of the matter of which a body is composed. The compressibility of matter, its expansion and contraction with changes of temperature, and other considerations lead to the conclusion that even the densest bodies are porous — that is, that the molecules forming them are not in actual contact, but separated by spaces which, though extremely minute, may have a magnitude considerable as compared with their own size.

Which Atoms are still hovering up and down, and never rest till they meet with some *Pores* proportionable and cognate to their Figures, where they acquiesce.
Howell, Letters, iv. 50.

3. In *bot.*, a small aperture or hole, as that at the apex of the anthers in certain *Ericaceæ;* in *Pyrenomycetes*, same as *ostiole;* in *Hymenomycetes*, same as *tubulus.* See cut under *anther.*

—**Abdominal, branchial, calycine pore.** See the adjectives.—**Cortical pore**, in *bot.*, same as *lenticel.*—**Crural** or **femoral pores.** See *crural.*—**Metasternal pores.** See *metasternal.*

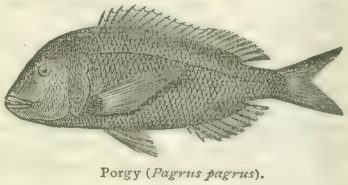
pore[3]†, *v.* An obsolete form of *pour*[1].

pore[4], *a.* An obsolete or dialectal form of *poor.*

poreblind†, *a.* An obsolete form of *purblind.*

porencephalia (pō-ren-se-fā'li-ạ), *n.* [NL., < Gr. πόρος, pore, + ἐγκέφαλος, brain.] The presence of a defect in the cerebral hemisphere such that a depression or hollow, which may lead into the ventricle, is formed. It is congenital, or from early life, and may be caused by inflammation, embolus, or hemorrhage.

porencephalic (pō-ren-se-fal'ik or po-ren-sef'ạ-lik), *a.* [< *porencephal-y* + *-ic.*] Of or pertaining to or of the nature of porencephaly; porencephalous.



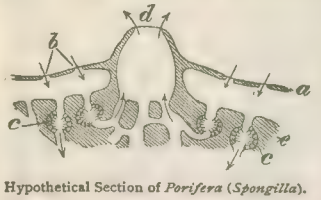
porencephalous (pō-ren-sef'ạ-lus), *a.* [< *porencephal-y* + *-ous.*] Pertaining to, of the nature of, or characterized by porencephalia.

porencephaly (pō-ren-sef'ạ-li), *n.* [< NL. *porencephalia.*] Same as *porencephalia.*

poret†, *n.* See *porret.*

porfil†, *v.* and *n.* See *purfle.*

porgy (pôr'gi), *n.*; pl. *porgies* (-giz). [Also *porgie*, *poggy*, *poggie*, *paughie;* said to be < Narraganset (*scup*)*paug.* See *scup*[2].] One of several different fishes. (*a*) A fish of the genus *Sparus* in a restricted sense, or of the genus *Pagrus;* specifically, *Pagrus pagrus* or *Pagrus vulgaris*, supposed to be the *pagrus* of the ancients, inhabiting the Mediterranean and Atlantic waters, of a silvery color, with the back rosy. (*b*) A fish of the related genus *Stenotomus.* *S. argyrops* is the well-known porgy, scup, or scuppaug, found from Cape Cod to Florida. See *scup*[2]. (*c*) An ephippioid fish, *Chætodipterus faber*, the angel-fish. See cut under *Chætodipterus.* (*d*) One of several viviparous perches, or embiotocoids, as *Ditrema jacksoni* or *Damalichthys argyrosomus* (or *vacca*). [California.] (*e*) A clupeoid fish, the menhaden, *Brevoortia tyrannus:* by confusion with a different word, *pogy.* [Local, U. S.] (*f*) The toadfish, *Chilomycterus schœpfi.* [Florida.] (*g*) With a qualifying word, one of several other fishes. See phrases below.—**Flannel-mouthed porgy**, *Orthopristis chrysopterus.*—**Jolthead porgy**, *Calamus bajonado.* [Bermudas.]—**Rhomboidal porgy**, *Lagodon rhomboides.*—**Saucer-eye porgy.** (*a*) *Calamus calamus.* (*b*) A scaroid fish, *Sparisoma radians.*—**Sheep's-head porgy**, *Calamus penna.* [Bermudas.]—**Three-tailed porgy**, the moonfish, *Chætodipterus faber.*



Porgy (*Pagrus pagrus*).

pori, *n.* Plural of *porus.*

porifer (pō'ri-fėr), *n.* [< NL. *porifer*, having pores: see *poriferous.*] That which has pores, as a sponge; a member of the *Porifera.*

Porifera (pō-rif'ẹ-rạ), *n. pl.* [NL., neut. pl. of *porifer*, q. v.] 1. The sponges as a phylum and class of the animal kingdom, or superclass of *Cœlentera*, having a system of pores or incurrent and excurrent openings, but no stinging-organs. Formerly a name of sponges when these were regarded as cœlenterates, to distinguish them from the true cœlenterates, then called *Nematophora.* Sollas divides the *Porifera* into the classes *Calcarea*, the chalk-sponges; *Hexactinellida*, with primitively six-rayed silicious spicules; and *Demospongiæ*, of various structure but including all the most familiar examples of the phylum; but nearly every writer on sponges has his own classification. See *Spongiæ*, and cuts under *sponge* and *Spongilla.* Also called *Poriferata.*

Hypothetical Section of *Porifera* (*Spongilla*).

a, superficial layer; *b*, inhalent apertures; *c*, ciliated or flagellated chambers, lined with a layer of sponge-cells, which closely resemble choanoflagellate protozoans, all the rest of the structure being the sponge tissue and skeleton; *d*, an osculum, or exhalent aperture; *e*, deeper substance of the sponge.

2. Same as *Foraminifera.*

poriferal (pō-rif'ẹ-rạl), *a.* [< *porifer-ous* + *-al.*] Poriferous, as a sponge; of or pertaining to the *Porifera* or *Spongiæ.*

poriferan (pō-rif'ẹ-rạn), *n.* and *a.* [< *porifer-ous* + *-an.*] I. *n.* A porifer; a sponge.

II. *a.* Same as *poriferous.*—**Poriferan theory**, that theory which considers the tracheæ or tubes of some animals as having a common origin with the incurrent tubes of the *Porifera* or sponges.

poriferous (pō-rif'ẹ-rus), *a.* [< NL. *porifer*, having pores, < L. *porus*, pore, + *ferre* = E. *bear*[1].] Provided with pores; specifically, of or pertaining to the *Porifera;* poriferal: distinguished from *osculiferous.*

poriform (pō'ri-fôrm), *a.* [< L. *porus*, a pore, + *forma*, form.] Having the character or form of a pore.

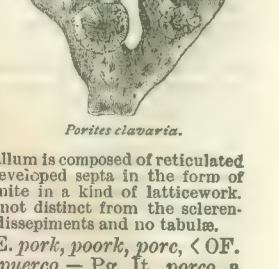
porime (pō'rīm), *n.* Same as *porism.*

porism (pō'rizm), *n.* [ME. *porysme*, < OF. (and F.) *porisme* = Sp. *porisma* = It. *porisma*, *porismate*, *porismato;* < Gr. πόρισμα(τ-), a corollary, < πορίζειν, bring about, procure, deduce. < πόρος, a way, passage: see *pore*[2], *n.*] A form of mathematical proposition among the Greeks, concerning the nature of which there continues to be much dispute. The corollaries to Euclid's elements — that is, extra propositions, inserted by commentators and readily deducible from his theorems — are called by this name. But the word had a more general meaning, which Chasles defines as follows: A porism is an incomplete theorem expressing a relation between things variable according to a common law, the statement being left incomplete in regard to some magnitude which would be stated in the theorem properly so called. For example, to say that there is within every triangle a point every line through which has for the sum of its distances from the two vertices which lie on one side of it its distance from the third vertex, is a porism in substance. But the porism was further distinguished by a peculiar mode of enunciation, namely, that which in modern language is made to be constant, is called in the porism "given." The definition of Playfair, which has had great currency, is as follows: A porism is a proposition affirming the possibility of finding such conditions as will render a certain problem indeterminate, or capable of innumerable solutions. This is the sense in which the word would ordinarily be understood to-day. Other widely different definitions have been given.

Ryht as thyse geometryens, whan they have shewyd hyr proposiciouns, ben wont to bryngen in thinges that they clepen *porysmes*, or declaraciouns of forseyde thinges.
Chaucer, Boëthius, iii. prose 10.

=Syn. See *inference.*

porismatic (pō-ris-mat'ik), *a.* [< Gr. πόρισμα(τ-), a porism, + *-ic.*] Of or pertaining to a porism. [As used by modern mathematicians, it usually refers to Playfair's sense of *porism.* See *porism.*]



porismatical (pō-ris-mat'i-kạl), *a.* [< *porismatic* + *-al.*] Same as *porismatic.*

poristic (pō-ris'tik), *a.* [= F. *poristique* = Pg. *poristica* = It. *poristico;* < Gr. ποριστικός, able to bring about or procure, < πορίζειν, bring about, procure: see *porism.*] Reducing a determinate problem to an indeterminate one.—**Poristic points**, a set of points of the number which usually suffice to determine a curve of a given order, but so situated that an indefinite number of such curves can be drawn through them.

poristical (pō-ris'ti-kạl), *a.* [< *poristic* + *-al.*] Same as *poristic.*

porite (pō'rīt), *n.* [< NL. *Porites.*] A coral of the family *Poritidæ.*

Porites (pō-rī'tēz), *n.* [NL., < L. *porus*, a pore: see *pore*[2].] 1. The typical genus of the family *Poritidæ*, established by Lamarck.—2. A genus of millepores. Also *Heliolites.* *Lonsdale*, 1849.

Porites clavaria.

Poritidæ (pō-rit'i-dē), *n. pl.* [NL., < *Porites* + *-idæ.*] A family of perforate sclerodermatous corals, typified by the genus *Porites.* The corallum is composed of reticulated sclerenchyme, with well-developed septa in the form of stylate processes which unite in a kind of latticework. The walls are reticulate, not distinct from the sclerenchyme, and there are few dissepiments and no tabulæ.

pork (pōrk), *n.* [< ME. *pork*, *poork*, *porc*, < OF. (and F.) *porc* = Sp. *puerco* = Pg. It. *porco*, a hog, pork, < L. *porcus* (= Gr. (Italic ?) πόρκος),

a swine, hog, pig (*porca*, f., or *porcus femina*, a sow), = Lith. *parszas* = W. *porch* = Ir. *orc* (with reg. loss of initial *p*) = AS. *fearh*, E. *farrow*, a pig: see *farrow*[1].] **1.** A swine; hog; pig; porker.

> Poveralle and pastorelles passede one aftyre,
> With *porkes* to pasture at the price gates.
> *Morte Arthure* (E. E. T. S.), l. 3122.

2. The flesh of swine, used as meat.

> Then for ten days did I diet him
> Only with burnt *pork*, sir, and gammons of bacon.
> *Fletcher (and another)*, Love's Cure, iii. 2.

3†. A stupid, obstinate, or ignorant person; a pig-headed fellow.

> I mean not to dispute philosophy with this *pork*, who never read any. *Milton*, Colasterion.

Mess pork, the best quality or grade of pork: so called originally because in the navy the best pork was supplied to the officers' mess.

pork-butcher (pôrk'bu̇ch″ėr), *n.* One who kills pigs.

pork-chop (pôrk'chop'), *n.* A slice from the ribs of a pig.

pork-eater (pôrk'ē″tėr), *n.* One who feeds on swine's flesh.

> If we grow all to be *pork-eaters*, we shall not shortly have a rasher on the coals for money.
> *Shak.*, M. of V., iii. 5. 27.

porker (pôr'kėr), *n.* [< *pork* + *-er*[1]; perhaps orig. for *porket*.] A hog; a pig; especially, one fatted for killing.

> Straight to the lodgments of his herd he run,
> Where the fat *porkers* slept beneath the sun.
> *Pope*, Odyssey, xiv. 86.

porkespick†, *n.* Same as *porcupine*.

> He gaue for his deuice the *porkespick* with this posie, pres et loign, both farre and neare.
> *Puttenham*, Arte of Eng. Poesie, p. 118.

porket (pôr'ket), *n.* [< OF. *porquet, porchet, pourchet* (= It. *porchetto*), dim. of *porc*, a hog: see *pork*.] A young hog.

> We now are Gergesites, that would rather lose Christ than our *porkets*.
> *J. Bradford*, Letters (Parker Soc., 1853), II. 64.

porkling (pôrk'ling), *n.* [< *pork* + *-ling*[1].] A young pig.

> Through plenty of acorns the *porklings* to fat.
> *Tusser*, October's Husbandry, st. 34.

porknell†, *n.* [ME., < *pork* + double dim. *-n-el*.] A little pig; also, a gross, fat person.

> Polidárius, the *porknell*, and his pere Machaon,
> Suet with the xvij, sad men & noble.
> *Destruction of Troy* (E. E. T. S.), l. 6368.

pork-pie (pôrk'pī'), *n.* A pie made of pastry and minced pork.—**Pork-pie hat**, the popular name of a hat resembling a deep meat-pie, worn by both men and women about 1860, distinguished by a brim which turned up around the crown, leaving but a narrow space between the crown and itself, the crown being low and the brim sloping slightly outward.

pork-pit (pôrk'pit), *n.* That part of the floor of a produce-exchange in which dealers in pork congregate and transact their business.

pork-pork† (pôrk'pôrk), *v. i.* [Imitative. Cf. *more-pork*.] To utter the cry of the raven; sound like the cry of a raven.

> From the mountains nigh,
> The rav'ns begin with their *pork-porking* cry.
> *Sylvester*, tr. of Du Bartas's Weeks, ii., The Schisme.

pork-sausage (pôrk'sâ″sāj), *n.* A sausage made of minced pork with various seasoning or flavoring ingredients.

porkwood (pôrk'wu̇d), *n.* The pigeonwood, beefwood, or corkwood, *Pisonia longifolia*.

porky (pôr'ki), *a.* [< *pork* + *-y*[1].] **1.** Porklike: as, a *porky* odor permeated the whole place.—**2.** Fat; plump.

> Mr. Sponge was a good deal more put out by the incident . . . than his *porky* host.
> *R. S. Surtees*, Sponge's Sp. Tour, li.

> *Mrs. Riddell*, Race for Wealth, xxix.

pornocracy (pôr-nok'rą-si), *n.* [< Gr. *πόρνη*, a prostitute (prob. orig. 'a bought female captive,' < *περνάναι* (*πέρνημι*), send or export for sale, sell, esp. of captives who were transported and sold: akin to L. *pretium*, price: see *price*), + *-κρατία*, < *κρατεῖν*, rule.] The rule of prostitutes; dominating influence of courtezans.—**The Pornocracy**, a party which controlled the government of Rome and the elections to the papacy throughout the first half of the tenth century; the rule or government of this party: so called from the paramount influence of three women of noble family but profligate lives, Theodora and her daughters Theodora and Marozia (Mary).

pornograph (pôr'nō-grâf), *n.* [< LGr. *πορνογράφος*, writing of prostitutes: see *pornography*.] An obscene picture or writing.

pornographer (pôr-nog'rą-fėr), *n.* [< *pornograph-y* + *-er*.] One who writes of prostitutes or obscene subjects.

> The literary offences of French *pornographers* and coprologists. *Fortnightly Rev.*, N. S., XLIII. 745.

pornographic (pôr-nō-graf'ik), *a.* [< *pornograph-y* + *-ic*.] Of, pertaining to, or of the nature of pornography; describing or descriptive of prostitutes; having to do with pornographs.

pornography (pôr-nog'rą-fi), *n.* [= F. *pornographie*; LGr. as if **πορνογραφία*, < *πορνογράφος*, writing of prostitutes, painting prostitutes, < Gr. *πόρνη*, a prostitute, + *γράφειν*, write.] A description of or treatise on prostitutes or prostitution; hence, obscene writing.

porodinic (pō-rō-din'ik), *a.* [< Gr. *πόρος*, a pore, + *ὠδίς*, the pangs of labor.] Reproducing or bringing forth by means of a special pore or opening of the body, through which the genital products are extruded: distinguished from *schizodinic*. Two porodinic methods are distinguished as *nephrodinic* and *idiodinic*. *Encyc. Brit.*, XVI. 682.

porophyllous (pō-rō-fil'us), *a.* [< Gr. *πόρος*, pore, + *φύλλον*, leaf.] Having leaves sprinkled with transparent points. *Thomas*, Med. Dict.

Porosa (pō-rō'są), *n. pl.* [NL., neut. pl. of *porosus*: see *porose*.] Perforate or porose corals: distinguished from *Aporosa* or *Eporosa*. *Perforata* is a synonym.

porose (pō'rōs), *a.* [< NL. *porosus*, full of pores: see *porous*.] **1.** Containing pores; porous; perforate. Specifically—(*a*) Of corals, perforate: distinguished from *aporose* or *eporose*. (*b*) Of the sculpture of insects, dotted or pitted as if full of little holes. The elytra of species of *Apion*, for example, are porose.

2. In *bot.*, pierced with small holes or pores.

porosis (pō-rō'sis), *n.* [NL., < Gr. *πώρωσις*, the process by which the extremities of fractured bones are reunited, < *πωροῦν*, cause a callus to form, unite (fractured bones) by a callus, < *πῶρος*, a node on the bones.] Formation of callus, as in the knitting together of broken bones.

porosity (pō-ros'i-ti), *n.* [= F. *porosité* = Sp. *porosidad* = Pg. *porosidade* = It. *porosità*, < NL. **porosita(t-)s*, < *porosus*, porous: see *porous*.] **1.** The state or quality of being porose, porous, or pervious; perforation.

> The fifteenth [cause] is the *porosity* or imporosity betwixt the tangible parts, and the greatness or smallness of the pores. *Bacon*, Nat. Hist., § 846.

> All matter is porous or possesses *porosity*. Hydrogen gas leaks through white-hot iron under pressure; cold water can be pressed through iron . . . or through lead.
> *Daniell*, Prin. of Physics, p. 194.

2. A pore or perforation.

> The nerves with their invisible *porosities*.
> *Dr. H. More*, Immortal. of Soul, ii. 8.

porotype (pō'rō-tīp), *n.* [< Gr. *πόρος*, a pore, + *τύπος*, impression.] A print produced by exposing another print or a writing, placed on the surface of chemically prepared paper, to a gas which permeates those parts of the thing to be copied which are not rendered impervious by the ink, and thus acts upon the chemical surface in the same way that light acts upon the sensitized film of paper exposed under a photographic negative.

porous (pō'rus), *a.* [= D. *poreus* = G. Sw. Dan. *porös* = OF. *poreux*, F. *poreux* = Pr. *poros* = Sp. Pg. It. *poroso*, < NL. *porosus*, porous, < L. *porus*, pore: see *pore*[2].] Having pores; porose; pervious by means of minute interstices.

> Through veins
> Of *porous* earth, with kindly thirst up drawn,
> Rose a fresh fountain. *Milton*, P. L., iv. 228.

> According to what is here presented, what is most dense and least *porous* will be most coherent and least discernible. *Glanville*, Vanity of Dogmatizing, v.

> A sponge is *porous*, having small spaces between the solid parts.
> *Theodore Parker*, Ten Sermons, Justice and her Conscience.

Porous cup, a vessel of unglazed earthenware used in a voltaic cell to separate the two liquids employed. See *cell*, 8.—**Porous plaster.** See *plaster*.

porously (pō'rus-li), *adv.* By means of pores; in a porous manner; perviously; interstitially.

porousness (pō'rus-nes), *n.* **1.** Porosity.

> Some fish have no mouths, but are nourished and take breath by the *porousness* of their gills.
> *I. Walton*, Complete Angler, p. 73.

2. The pores or porous parts of anything. [Rare.]

> They will forcibly get into the *porousness* of it, and pass between part and part. *Sir K. Digby*, Nature of Bodies.

porpaise†, *n.* An obsolete form of *porpoise*.

porpentine†, *n.* Same as *porcupine*.

porpesse†, *n.* An obsolete form of *porpoise*.

porpezite (pôr'pez-īt), *n.* [< *Porpez* (see def.) + *-ite*[2].] A variety of native gold containing a small percentage of palladium. That first described was from Porpez in Brazil.

porphire†, *n.* An obsolete variant of *porphyry*.

porphurie†, *n.* An obsolete variant of *porphyry*.

Porphyra (pôr'fi-rą), *n.* [NL. (Agardh), < Gr. ★*πορφύρα*, purple: see *porphyry*.] A small genus of florideous algæ, now generally included in the order *Bangiales*. The fronds are gelatinous, membranaceous, and composed of a single layer of brownish-red cells bearing the spores in groups of from four to thirty-two, over the surface of the whole frond. *P. laciniata*, the laver, is the best-known and most widely distributed species. It has fronds from 4 to 40 inches in length, of a livid-purple color. See *marine sauce*.

porphyraceous (pôr″fi-rā'shius), *a.* [< *porphyr-y* + *-aceous*.] Same as *porphyritic*.

porphyret (pôr'fir), *n.* An obsolete form of *porphyry*.

> Consider the red and white colours in *porphyre*; hinder light but from striking on it, its colours vanish, and produce no such ideas in us; but upon the return of light it produces these appearances again. *Locke*.

Porphyreæ (pôr-fir'ē-ē), *n. pl.* [NL., < *Porphyra* + *-eæ*.] A former suborder of florideous algæ, typified by the genus *Porphyra*, and characterized by having brownish-purple fronds, which are composed of cells embedded in a gelatinous network, and arranged in filaments or in membranes formed of a single layer of cells. The spores are formed by successive divisions of each mother-cell and are arranged in two layers; the antherozoids are spherical, colorless, and formed by the division of a mother-cell into 32 or 64 parts.

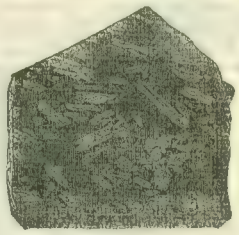
Porphyrio (pôr-fir'i-ō), *n.* [NL. (Brisson, 1760), < L. *porphyrio(n-)* (> It. *porfirione* = Sp. *porfirion* = Pg. *porfirião* = F. *porphyrion*), < Gr. *πορφυρίων*, the purple gallinule (*Porphyrio veterum*), < *πορφύρα*, purple: see *porphyry*.] **1.** A genus of *Rallidæ*, representing a subfamily *Porphyrioninæ*; the porphyrios, sultans, hyacinths, or hyacinthine gallinules. These birds are closely related to the common gallinules or water-hens, but are generally of larger size, with stouter bill and longer legs, and more stately carriage; the plumage is very rich and elegant, with intense blue, purple, and other striking tints. There are about 12 species, inhabiting warm temperate and tropical countries of both hemispheres. They live in marshes, like other ralliform or paludicole birds of the same family, and their habits are similar. *P. veterum* is the form of

Black-backed Sultan (*Porphyrio melanotus*).

southern Europe and northern Africa; *P. smaragnotus* is African, *P. melanotus* Australian. The purple gallinule of America is *P. martinicus*, often placed in a separate genus *Ionornis*. See *gallinule*.

2. [*l. c.*] A bird of this genus; a sultan; a purple gallinule.

Porphyrioninæ (pôr-fir″i-ō-nī'nē), *n. pl.* [NL., < *Porphyrio(n-)* + *-inæ*.] A subfamily of paludicole or ralliform wading birds of the family *Rallidæ*, represented by the genus *Porphyrio*, having the bill stout, with the base of the culmen mounting on the forehead as a frontal shield, the legs long and strong, and the toes margined; the purple gallinules, usually retained in *Gallinulinæ*.



porphyrionine (pôr-fir'i-ō-nin), *a.* [< NL. *Porphyrioninæ*, q. v.] Belonging to the *Porphyrioninæ*.

porphyrisation, porphyrise. See *porphyrization, porphyrize*.

porphyrite (pôr'fi-rīt), *n.* [< L. *porphyrites*: see *porphyry*.] In *petrog.*, a name now given to pre-Tertiary igneous rocks of porphyritic texture, equivalent to andesites. It was originally used by Pliny for the red porphyry of Egypt. In the early days of petrography it was employed to designate quartz-free porphyries and somewhat later came to mean a porphyry rich in lime-soda feldspar (plagioclase) as opposed to quartz-porphyry which is characterized by orthoclase. In recent years the term has been applied to the ancient andesites, and its varieties are called *diorite-porphyrite, diabase-porphyrite, hornblende-porphyrite, augite-porphyrite*, etc. With British authors the term implies more or less advanced decomposition of the rock. It is more commonly used in Europe than in America.

porphyritic (pôr-fi-rit'ik), *a.* [= F. *porphyritique* = It. *porfiritico*, < L. *porphyrites*: see *por-*

phyry.] Containing or resembling porphyry; composed of a fine-grained ground-mass in which distinct crystals or grains of feldspar or some other minerals are embedded: as, *porphyritic* granite. Also *porphyraceous*, and sometimes, incorrectly, *porphyroid*.

Porphyritic Structure.

porphyritical (pôr-fi-rit'i-kal), *a.* [< *porphyritic* + *-al.*] Same as *porphyritic*.

porphyritically (pôr-fi-rit'i-kal-i), *adv.* In a porphyritic manner; as in porphyry.

They [crystals of black hornblende] are *porphyritically* scattered through the gray ground-mass.
Amer. Jour. Sci., 3d ser., XXXI. 40.

porphyrization (pôr″fi-ri-zā'shon), *n.* [= F. *porphyrisation* = Pg. *porphyrisação*; as *porphyrize* + *-ation.*] 1. The act of porphyrizing, or the state of being porphyrized.—2. The process of grinding a substance with a muller on a slab of porphyry or other hard stone. It is much used in the preparation of colors, and takes its name from the especial suitability of porphyry, from its hardness, as a bed for grinding upon.

Also spelled *porphyrisation*.

porphyrize (pôr'fi-rīz), *v. t.*; pret. and pp. *porphyrized*, ppr. *porphyrizing*. [= F. *porphyriser* = Pg. *porphyrisar*; < *porphyr-y* + *-ize*. Cf. Gr. *πορφυρίζειν*, be purplish.] 1. To cause to resemble porphyry.—2. To grind with a muller upon a slab of porphyry, as painters' colors.

Also spelled *porphyrise*.

porphyrogeniti, *n.* Plural of *porphyrogenitus*.

porphyrogenetic (pôr″fi-rō-jē-net'ik), *a.* [< *porphyr-y* + Gr. *γεννητικός*, productive: see *genetic.*] Producing porphyry. *Imp. Dict.*

porphyrogenitism (pôr″fi-rō-jen'i-tizm), *n.* [< *porphyrogenitus* + *-ism.*] That principle of succession in royal families, especially in the families of the Byzantine emperors, in accordance with which a younger son, if born in the purple—that is, after the succession of his parents to the throne—was preferred to an older son who was not.

Henry the porphyrogenitus, though a younger son relatively to Otho, who was the eldest son of royal blood, first-born after the accession of Duke Henry to the throne of Charlemagne, the first-born of Henry, King of Germany. . . . The doctrine of *porphyrogenitism*, congenial to popular sentiment, and not without some foundation in principle, prevailed influentially and widely in many countries and through many ages.
Sir F. Palgrave, Hist. Eng. and Normandy, II. 210.

porphyrogenitus (pôr″fi-rō-jen'i-tus), *n.*; pl. *porphyrogeniti* (-tī). [ML. (> It. *porfirogenito* = Pg. *porphyrogenito* = F. *porphyrogénète*, a.); adapted (with L. *genitus*) < LGr. *πορφυρογέννητος*, born in the purple, < Gr. *πορφύρα*, purple (see *purple*), + *γεννητός*, begotten, < *γενναῖν*, beget: see *genetic.*] A title given, especially in the Byzantine empire, to those sons of a sovereign who are born after his accession to the throne. See *porphyrogenitism*.

porphyroid (pôr'fi-roid), *n.* [< Gr. *πορφύρα*, purple, + *εἶδος*, form.] A sedimentary rock, originally (in some cases at least) a clay slate, or quartzite, which has been altered by dynamic metamorphism or by some other metamorphic agency so as to take on a slaty and more or less perfectly developed porphyritic structure. The occurrence of this slaty structure is accompanied by the development of some micaceous mineral, usually sericite or paragonite. Rocks to which the name *porphyroid* has been applied, and in regard to the exact nature and origin of which lithologists are not entirely in agreement, have been described from Saxony, the Ardennes, Westphalia, Nevada, etc.

Porphyrophora (pôr-fi-rof'ō-rä), *n.* [NL., < Gr. *πορφύρα*, purple, + *φέρειν* = E. *bear*[1].] A genus of *Coccidæ* or scale-insects. *P. polonica*, formerly *Coccus polonicus*, the Polish berry, is a scale long known as yielding a kind of red dye. Compare *Margarodes*.

porphyry (pôr'fi-ri), *n.* [Formerly also *porphirie* (and *porphire, porphyre*); < ME. *porphurie, porfurie* = D. *porfier, porphier* = G. *porphyr* = Sw. Dan. *porfyr*, < OF. *porphyre*, F. *porphyre* = Pr. *porfire* = Sp. *pórfiro, pórfido* = Pg. *porphyro, porfido* = It. *porfiro, porfido*, porphyry; in form as if < Gr. *πόρφυρος*, purple, but in sense depending on L. *porphyrites*, < Gr. *πορφυρίτης* (sc. *λίθος*), porphyry, prop. adj., like purple, < *πορφύρα*, purple: see *purple.*] 1. The English form of the Latin word *porphyrites*, used by the Romans to designate a certain rock having a dark-crimson ground through which are scattered small crystals of feldspar. In Pliny's time this rock, which was quarried in Egypt, was used extensively for architectural and ornamental purposes, and especially for the base or lower part of busts of which the upper part was made of bronze or marble. Later on, a similar stone appears to have been procured from nearer localities, as from the island of Sardinia. To the Italians it became known as *porfido rosso antico*. Other rocks having a similar structure, commonly called *porphyritic*, were used in Italy, and designated, in accordance with the predominating color, as *porfido nero, porfido verde*, etc. In modern times the term *porphyry* has come to be used as the name of any rock consisting of a very fine-grained or microcrystalline ground-mass through which are disseminated distinctly recognizable crystals of some mineral; but the popular use of the word is frequently extended so as to include any igneous rock of fine grain whether actually characterized by a porphyritic texture or not. *Porphyry* has become an important term in the nomenclature of rocks, especially of igneous rocks. It is used alone for rock of porphyritic texture; in conjunction with the name of some mineral occurring in prominent crystals (phenocrysts), as *quartz-porphyry, feldspar-porphyry, augite-porphyry*, etc.; with a term referring to the character of the ground-mass, as *felsite-porphyry*; with the name of a granular rock to indicate its porphyritic form, as *granite-porphyry, diorite-porphyry*, etc. In Germany and to some extent elsewhere *porphyry* has been applied only to rocks rich in alkali feldspar, while *porphyrite* has been used for rocks containing soda-lime feldspar (plagioclase). This custom is less current now than formerly. Porphyry has been defined by Rosenbusch as an igneous rock in which there has been a formation of some constituent in two or more generations, as contrasted with a *granular* rock, in which all constituents belong to a single period. See *porphyrite*, and cut under *porphyritic*.

Now, far from noise, he creepeth covertly
Into a Caue of kindly *Porphyry*.
Sylvester, tr. of Du Bartas's Weeks, ii., Eden.

Within the which [labyrinth] a number of columns and statues there be, all of *porphyrit* or red marble.
Holland, tr. of Pliny, xxxvi. 13.

The mind of man hath two *ports*, the one always frequented by the entrance of manifold vanities, the other desolate and overgrown with grass, by which enter our charitable thoughts and divine contemplations.
Raleigh (Arber's Eng. Garner, I. 199).

Each order, age, and sex amazed at other,
And at the *ports* all thronging out.
B. Jonson, Catiline, iii. 4.

Towards the streete, at a back gate, the *port* is so handsomely cloath'd with ivy as much pleas'd me.
Evelyn, Diary, Nov. 28, 1644.

2. An opening in the side of a ship; specifically, an embrasure in the side of a ship of war, through which cannon are pointed; a port-hole; also, the covering or shutter of such an opening. Ports in merchant ships are square openings in the sides, bow, or stern of the vessel for loading and discharging cargo or ballast. See cut under *lumber-port*.

3. In *her.*, the door or gate of a castle, used as a bearing.—4. An aperture for the passage of steam, air, water, etc. In steam-engines the ports are two passages leading from the steam-chest to the inside of the cylinder, by means of which the steam enters and returns above and below the piston: the former is called the *steam-* or *induction-port*, the latter the *exhaust-* or *eduction-port*. See cut under *piston*.

5. In harness, a curved piece of metal used as a mouthpiece in some forms of bit. Such a bit is called a *port-bit*.—6. port[4] (pōrt), *n.* [See *port*[4], *v.*] *Naut.*, the larboard or left side of a ship (when one is looking forward): as, "the ship heels to *port*"; "hard a *port*." See the quotations below.

U. S. Navy Department, Washington, Feb. 18, 1846.
It having been repeatedly represented to the Department that confusion arises from the use of the words "larboard" and "starboard" in consequence of their similarity of sound, the word "*port*" is hereafter to be substituted for "larboard." *George Bancroft*, Sec. of the Navy.

Navy Department, Washington, D. C., May 5, 1913.
General Order No. 30.
1. On and after July 1, 1913, the present designations "starboard" and "*port*" governing movements of a ship's helm are hereby ordered discontinued in orders or directions to the steersman, and the terms "right" and "left," referring to movement of the ship's head, shall thereafter be used instead.
F. D. Roosevelt, Acting Secretary of the Navy.

port[5] (pōrt), *n.* [= F. *porto*; abbr. of *port wine*, prop. *Port wine*, *Port* being an English form of Pg. *Oporto* or *Porto* (orig. *o porto*, 'the port' or 'harbor'), a city in Portugal, whence the wine was orig. shipped: *o*, the, < L. *ille*, that; *porto*, < L. *portus*, harbor: see *port*[1].] A wine of Portugal, named from Oporto (see above). The name is usually given to a very dark-red or purplish wine, but it is sometimes pale. The wine usually sold under the name of *port* is partly artificial, prepared or "doctored" by blending, etc. Wine of absolutely pure growth is seldom to be got under the name. This wine is a favorite for imitation by blending and sweetening, etc., in American wines, both east and west, which are sold as American port.

In England *port* is adulterated with the red Spanish wine of Tarragona, which is a true wine, but procurable at half the cost of the cheapest port.
Encyc. Brit., XVII. 795.

In fact, when people spoke of wine in these days, they generally meant *port*. They bought *port* by the hogshead, had it bottled, and laid down. They talked about their cellars solemnly; they brought forth bottles which had been laid down in the days when George the Third was king; they were great on body, bouquet, and beeswing; they told stories about wonderful *port* which they had been privileged to drink; they looked forward to a dinner chiefly on account of the *port* which followed it; real enjoyment only began when the cloth was removed, the ladies were gone, and the solemn passage of the decanter had commenced. *W. Besant*, Fifty Years Ago, p. 166.

port[6] (pōrt), *n.* [< Gael. Ir. *port*, a tune.] Martial music adapted to the bagpipes.

The pipe's shrill *port* aroused each clan.

portal[1] (pōr′tal), *a.* [< ML. *portalis*, pertaining to a gate (as a noun, a porter), < L. *porta*, a gate. Cf. *portal*[1], *n.*] In *anat.*: (*a*) Pertaining to the hepatic porta, or great transverse fissure of the liver. (*b*) Pertaining to the vena portæ, or portal vein.—**Accessory portal veins**, a number of small veins which collect blood from the areolar tissue and peritoneal folds around the liver, and discharge into branches of the portal vein.—**Portal canals**, tubular passages in the substance of the liver, invested by the capsule of Glisson, and containing each a branch of the portal vein, hepatic artery, and hepatic duct.—**Portal circulation**, the passage of venous blood from the capillaries of one organ to those of another before reaching the heart. There are two such circulations, through the liver and through the kidneys, distinguished as *hepatoportal* and *reniportal*. Only the former occurs in man, whence the specific use of the phrase in reference to this only. In this form of portal circulation, the venous blood from the capillaries of the stomach, spleen, and intestine or chylopoietic viscera collectively is gathered by the gastric, splenic, and mesenteric veins into a common venous channel, the vena portæ or portal vein, which conducts it into the liver. See *reniportal*, and cuts under *embryo* and *liver*.—**Portal fissure.** See *fissure*.—**Portal system**, the portal vein with its tributaries and its distributing branches.

With a dose of cleansing calomel
Unload the *portal system* (that sounds well!).
O. W. Holmes, Rip Van Winkle, M. D.

Portal vein, a large, short trunk receiving the blood from the chylopoietic viscera, formed from the union of the splenic and superior mesenteric veins. It enters the transverse fissure of the liver, where it divides into a right and a left branch, which again subdivide to be distributed to the substance of the liver. Also called *vena portæ* or *portarum*.

These solemn attendants simply *posed*, and never moved.
T. C. Crawford, English Life, p. 35.

pose[2] (pōz), *n.* [< F. *pose*, standing, attitude, posture, pose, < *poser*, put, refl. put oneself in an attitude: see *pose*[2], *v.*] 1 Attitude or position, whether taken naturally or assumed for effect: as, the *pose* of an actor; especially, the attitude in which any character is represented artistically; the position, whether of the whole person or of an individual member of the body: as, the *pose* of a statue; the *pose* of the head. In physiology the pose of a muscle is the latent period between the stimulation of a muscle-fiber and its contraction.

2. A deposit; a secret hoard. [Scotch.]

Laying by a little *pose*, even out of such earnings, to help them in their old age.
Noctes Ambrosianæ, April, 1832.

=**Syn. 1.** *Position*, *Attitude*, etc. See *posture*.

pose[3] (pōz), *v. t.*; pret. and pp. *posed*, ppr. *posing*. [Formerly also *pozc*; < ME. *posen*, by apheresis from *apposen*, *aposen*, a corruption of *oposyn*, *opposen*: see *oppose*. The method of examination in the schools being by argument, to examine was to oppose. Hence *puzzle*.] 1†. To put questions to; interrogate closely; question; examine.

If any man rebuke them with that, they persecute him immediately, and *pose* him in their false doctrine, and make him an heretic.
Tyndale, Ans. to Sir T. More, etc. (Parker Soc., 1850), p. 104.

She . . . *posed* him, and sifted him, to try whether he were the very Duke of York or no.
Bacon, Hist. Henry VII., p. 119.

2. To puzzle, nonplus, or embarrass by a difficult question.

I still am *pos'd* about the case,
But wiser you shall judge.
J. Beaumont, Psyche, i. 110.

A thing which would have *pos'd* Adam to name.
Donne, Satires (ed. 1819).

A sucking babe might have *posed* him.
Lamb, South-Sea House.

posé (pō-zā′), *a.* [F., pp. of *poser*, place: see *pose*[2].] In *her.*, standing still, with all the feet on the ground; statant: said of a lion, horse, or other animal used as a bearing.

posed† (pōzd), *p. a.* [< *pose*[2] + *-ed*[2].] Balanced; sedate: opposed to *flighty*.

An old settled person of a most *posed*, staid, and grave behaviour.
Urquhart, tr. of Rabelais, iii. 19. (*Davies*.)

Poseideon (pō-sī′dē-on), *n.* [Gr. Ποσειδεών: see def.] The sixth month of the ancient Athenian year, corresponding to the latter half of our December and the first half of January.

Poseidon (pō-sī′dọn), *n.* [< Gr. Ποσειδῶν: see def.] 1. In *Gr. myth.*, one of the chief Olympians, brother of Zeus, and supreme lord of the sea, sometimes looked upon as a benignant promoter of calm and prosperous navigation, but more often as a terrible god of storm. His consort was the Nereid Amphitrite, and his attendant train

Poseidon overwhelming the giant Polybotes, for whom Ge or Gaia (on the left) makes intercession. (From a Greek red-figured vase of the 4th century B. C.)

was composed of Nereids, Tritons, and sea-monsters of every form. In art he is a majestic figure, closely approaching Zeus in type. His most constant attributes are the trident and the dolphin, with the horse, which he was reputed to have created during his contest with Athena for supremacy in Attica. The original Roman or Italic Neptune became assimilated to him.

2. In *zoöl*: (*a*) A genus of worms. (*b*) A genus of hemipterous insects of the family *Scutelleridæ*. *Snellen*, 1863. (*c*) A genus of crustaceans.

Poseidonian (pō-sī-dō′ni-ạn), *a.* [< Gr. Ποσειδώνιος, of Poseidon (< Ποσειδῶν, Poseidon), + *-an.*] Of or pertaining to Poseidon.

Poseidon, the great and swarthy race-god of the South, is readily enough conceived of as coming into conflict with Zeus, when immigrants arriving in the country bring with them a *Poseidonian* worship.
Gladstone, Contemporary Rev., LI. 766.

poser (pō′zẽr), *n.* [< *pose*[3] + *-er*[1].] 1. One who poses or puts questions; one who questions or interrogates closely: an examiner.

Let his questions not be troublesome, for that is fit for a *poser*. *Bacon*, Discourse (ed. 1887).

The university [of Cambridge] . . . appointed Doctor Cranmer (afterwards Archbishop of Canterbury) to be the *poser*-general of all candidates in Divinity.
Fuller, Worthies, Norfolk, II. 462.

2. A question that poses or puzzles; a puzzling or difficult question or matter.

"What do you think women are good for?" "That's a *poser*." *C. D. Warner*, Backlog Studies, p. 161.

posied (pō′zid), *a.* [< *posy* + *-ed*[2].] Inscribed with a posy or motto.

Some by a strip of woven hair
In *posied* lockets bribe the fair.
Gay, To a Young Lady, with some Lampreys.

posit (poz′it), *v. t.* [< L. *positus*, pp. of *ponere*, place: see *position*.] 1. To dispose, range, or place in relation to other objects.

That the principle that sets on work these organs and worketh by them is nothing else but the modification of matter, or the natural motion thereof, thus or thus *posited* or disposed, is most apparently false.
Sir M. Hale, Orig. of Mankind, p. 49.

2. To lay down as a position or principle; assume as real or conceded; present as a fact; affirm.

In *positing* pure or absolute existence as a mental datum, immediate, intuitive, and above proof, he mistakes the fact. *Sir W. Hamilton.*

When it is said that the ego *posits* itself, the meaning is that the ego becomes a fact of consciousness, which it can only become through the antithesis of the non-ego.
Chambers's Encyc.

★ **position** (pō-zish′ọn), *n* [< F. *position* = Sp. *posición* = Pg. *posição* = It. *posizione*, < L. *positio*(*n-*), a putting, position, < *ponere*, pp. *positus*, put, place: see *ponent*. Cf. *apposition*, *composition*, *deposition*, and the similar verbs *appose*, *compose*, *depose*, etc.: see *pose*[2].] 1. The aggregate of spatial relations of a body or figure, considered as rigid, to other such bodies or figures; the definition of the place of a thing; situation.

We have different prospects of the same thing according to our different *positions* to it. *Locke.*

The absolute *position* of the parties has been altered; the relative *position* remains unchanged.
Macaulay, War of the Succession in Spain.

Position, Wren said, is essential to the perfecting of beauty; — a fine building is lost in a dark lane; a statue should stand in the air. *Emerson*, Woman.

The exceptional miracles were those of exorcism, which occupied a very singular *position* in the early Church.
Lecky, Europ. Morals, I. 404.

Hence — 2. Status or standing, social rank or condition: as, social *position*; a man of *position*.

Such changes as gave women not merely an advisory but an authoritative *position* on this and similar boards.
N. A. Rev., CXXXIX. 409.

3. The act of positing or asserting; also, the assertion itself; affirmation; principle laid down.

From Gods word I'me sure you never tooke
Such damnable *positions*.
Times' Whistle (E. E. T. S.), p. 12.

In order to be a truly eloquent or persuasive speaker, nothing is more necessary than to be a virtuous man. This was a favourite *position* among the ancient rhetoricians.
H. Blair, Rhetoric, xxxiv.

4. A place occupied or to be occupied. (*a*) *Milit.*, the ground occupied by a body of troops preparatory to making or receiving an attack. (*b*) An office; a post; a situation: as, a *position* in a bank. (*c*) In *music*: (1) The disposition of the tones of a triad or other chord with reference to the lowest voice-part — the *first*, original, or fundamental position having the root of the chord in that part, the *second* position having the next or second tone of the chord there, etc., and all positions except the first being also called *inverted positions* or *inversions*. (2) The disposition of the tones of a triad or other chord with reference to their nearness to each other, *close* position having the tones so near together that an outer voice-part cannot be transposed so as to fall between two middle parts, and *open* or dispersed position being the reverse of this. See *open* and *close harmony*, under *harmony*, 2 (*d*). (3) In viol-playing, same as *shift*.

5. Posture or manner of standing, sitting, or lying; attitude: as, an uneasy *position*.

Miss Eyre, draw your chair still a little farther forward; you are yet too far back; I can not see you without disturbing my *position* in this comfortable chair, which I have no mind to do. *Charlotte Brontë*, Jane Eyre, xiv.

6. Place; proper or appropriate place: as, his lance was in *position;* specifically (*milit.*), the proper place to make or receive an attack.

As I expected, the enemy was found in *position* on the Big Black. *U. S. Grant*, Personal Memoirs, I. 523.

7. In *arith.*, the act of assuming an approximate value for an unknown quantity, and thence determining that quantity by means of the data of a given question. A value of the unknown quantity is posited or assumed, and then, by means of the given connection between the unknown and a known quantity, from the assumed value of the unknown a value of the known is calculated. A new value of the unknown is then assumed, so as to make the error less. In the rule of *simple position*, only one assumption is made at the outset, and this is corrected by the rule of three. In the far superior rule of *double position*, two values are assumed, and the corrected value of the unknown is ascertained by the solution of a linear equation. Also called the *rule of supposition*, *rule of false*, and *rule of trial and error*.

8. In *logic*, the laying down of a proposition, generally an arbitrary supposition; also, the proposition itself. Thus, in the school disputations, the opponent would say: "*Pono* that a man says that he is lying." Then this act, as well as the proposition so advanced, is a *position*.

9. In *anc. pros.*, the situation of a vowel before two or more consonants or a double consonant, tending to retard utterance and consequently to lengthen the syllable; such combination of consonants, or the prosodic effect produced by it. A short vowel so situated is said to be *in position*, the syllable to be *long by position*, and the consonants to *make position*. A mute with succeeding liquid does not always make position, and the situation of a short vowel before such a combination, or the combination itself, is known as *weak position*.

10. In *obstet.*, the relation between the body of the fetus and the pelvis of the mother in any given presentation. There are in vertex presentations four positions, named according to the direction of the occiput, which the fetal head may occupy: (1) *first* or *left occipitocotyloid position*, in which the occiput points to the left foramen ovale — the most frequent position; (2) *second* or *right occipitocotyloid position*, in which the occiput points to the right foramen ovale; (3) *third* or *right sacro-iliac position*, in which the occiput points to the right sacro-iliac synchondrosis; (4) *fourth* or *left occipito-sacro-iliac position*, in which the occiput points to the left sacro-iliac synchondrosis. See *presentation*[1], 6. — **Absolute position**, **apparent position**. See the adjectives. — **Angle of position**, in *astron.*, the angle which the line joining two neighboring celestial objects makes with the hour-circle passing through that one of the two which is regarded as the principal one, and is taken as the point of reference. The angle is reckoned from the north point through the east, counter-clockwise, completely around the circumference. — **Center of position**, the same as the center of gravity and center of inertia: but when a body is viewed as composed of physical points, and the center of gravity is considered in relation to their positions, geometers designate that point the *center of position*. — **Contrariety of position**. See *contrariety*. — **Eastward position**. See *eastward*. — **Energy of position**. See *energy*, 7. — **Geographical position**. See *geographical*. — **Geometry of position**. See *geometry*. — **Guns of position**. See *gun*[1]. — **Inverted position**. See def. 4 (*c*) (1). — **Long by position**. See *long*[1]. — **Mean position**. See *mean*[3]. — **Original position**, in *music*, that disposition of the tones of a triad or chord in which the root is at the bottom: opposed to *inversion* or *inverted position*. — **Position angle**. See *angle*[3]. = Syn. 1. Station, spot, locality, post. — 3. Thesis, assertion, doctrine. — 5. *Attitude*, *Pose*, etc. See *posture*.

position (pō-zish′ọn), *v. t.* [< *position*, *n.*] To place with relation to other objects; set in a definite place.

They are always *positioned* so that they stand upon a solid angle with the "basal plane." *Encyc. Brit.*, XVI. 348.

positional (pō-zish′ọn-ạl), *a.* [< *position* + *-al.*] Of or pertaining to position; relating to or depending on position.

A strange conceit, ascribing unto plants *positional* operations. *Sir T. Browne*, Vulg. Err., ii. 7.

position-finder (pō-zish′ọn-fīn″dẽr), *n.* An instrument for determining the exact distance and direction of an object, used especially in sea-coast fortifications that the large cannon may be accurately pointed. The position-finder is placed at some distance from the cannon, and concealed as far as possible from the view of an enemy. This necessitates some replotting device for the purpose of converting range and azimuth as measured from the position-finder into corresponding range and azimuth from the cannon; this information is telephoned or otherwise communicated to the gunner, who is thus able to point the cannon at the object when it is not visible to him. In practice the position-finder tracks a vessel and keeps a chart of her movements from which her position at the end of a short interval of time may be predicted.

position-micrometer (pō-zish′ọn-mī-krom′e-tẽr), *n.* A micrometer for measuring angles of position (see *angle of position*, under *position*), which are read upon a graduated circle. It has a single thread, or a pair of parallel threads, which can be revolved around the common focus of the object-glass and eye-glass in a plane perpendicular to the axis of the telescope.

★ **positive** (poz′i-tiv), *a.* and *n.* [< ME. *positif* (= D. *positief* = G. Sw. Dan. *positiv*), < OF. (and F.) *positif* = Sp. Pg. It. *positivo*, < L. *positivus*, settled by arbitrary appointment or agreement, positive, < *positus*, pp. of *ponere*, put: see *position*.] I. *a.* 1. Laid down as a proposition; affirmed; stated; express: as, a *positive* declaration. — 2. Of an affirmative nature; possessing definite characters of its own; of a kind to excite sensation or be otherwise directly experienced; not negative. Thus, light is *positive*, darkness negative; man is *positive*, non-man negative.

To him, as to his uncle, the exercise of the mind in discussion was a *positive* pleasure. *Macaulay.*

The force of what seems a *positive* desire for an object is in many cases derived from a negative desire or aversion to some correlative pain.
J. Sully, Outlines of Psychol., p. 581.

3. Arbitrarily laid down; determined by declaration, enactment, or convention, and not by nature: opposed to *natural*. Thus, the phenomenon of onomatopœia shows that words are in some degree natural, and not altogether *positive;* so, *positive* law, *positive* theology. [This sense, the original one in Latin, is a translation of Greek θέσει.]

4. Imperative; laid down as a command to be followed without question or discretion: as, *positive* orders.

In laws, that which is natural bindeth universally; that which is *positive*, not so. . . . Although no laws but *positive* are mutable, yet all are not mutable which be *positive*.
Hooker.

5. Unquestionable; indubitable; certain; hence, experiential.

'Tis *positive* against all exceptions, lords,
That our superfluous lackeys . . . were enow
To purge this field of such a hilding foe.
Shak., Hen. V., iv. 2. 25.

The unity and identity of structure in an organism in which a law of action may be inferred form the condition of *positive* science.
E. Mulford, The Nation, The Foundation of Civil Order, i.

6. Confident; fully assured.

I am sometimes doubting when I might be *positive*.
Rymer.

7. Over-confident in opinion and assertion; dogmatic.

Some *positive* persisting fops we know,
That, if once wrong, will needs be always so.
Pope, Essay on Criticism, l. 568.

Where men of judgment creep and feel their way,
The *positive* pronounce without dismay.
Cowper, Conversation.

8†. Actually or really officiating or discharging the duties of an office.

I was, according to the Grand Signior his commandement, very courteously interteined by Peter, his *positive* prince. *Hakluyt's Voyages*, II. 289.

9. Not reversed. (*a*) Greater than zero; not measured in a reversed direction: signifying the absence of such reversal. (*b*) In *photog.*, representing lights by lights and shades by shades, and not the reverse. (*c*) Being that one of two opposite kinds which is arbitrarily considered as first: as, *positive* electricity. In all these senses opposed to *negative*.

10. Not comparative. Especially, in *gram.*, signifying a quality without an inflection to indicate comparison as to the intensity of that quality.—**Positive allegation,** in *law*, an allegation made without reserve, as distinguished from an allegation made on information and belief or argumentatively.—**Positive attribute,** an attribute whose real nature is analogous to the form of a positive term.—**Positive colors.** See *color.*—**Positive crystal.** See *refraction* and *hemihedrism.*—**Positive degree,** in *gram.*, the simple value of an adjective or adverb, without comparison or relation to increase or diminution: used by antithesis to *comparative* and *superlative degree:* see *comparison,* 5.—**Positive discrepancy,** the relation between the testimony of two witnesses one of whom explicitly affirms what the other explicitly denies.—**Positive distinction,** a distinction which distinguishes two real existences: opposed to *negative distinction,* which distinguishes an existence from a non-existence.—**Positive electricity, ens, entity, evidence, eyepiece.** See the nouns.—**Positive judgment,** in *logic,* an affirmative proposition.—**Positive law,** in the philosophy of jurisprudence and legislation, the body of laws prescribed or controlling human conduct, as distinguished from laws so called which are merely generalizations of what has been observed to take place; law set as a rule to which itself requires conformity. Some have included divine law, others only human law; judicial as well as statutory law is included.—**Positive misprision, motion, organ.** See the nouns.—**Positive philosophy,** a philosophical system founded by Auguste Comte (1798–1857). Its main doctrines are as follows. All speculative thought passes through three stages—the theological, the metaphysical, the positive. The theological stage is that in which living beings with free will are supposed to account for phenomena; the metaphysical is that in which unverifiable abstractions are resorted to; the positive is that which contents itself with general descriptions of phenomena. The sciences are either abstract or concrete. The abstract discover regularities, the concrete show in what manner these regularities are applicable to special cases. The abstract sciences are (1) mathematics, (2) astronomy, (3) physics, (4) chemistry, (5) biology, (6) sociology. They must be studied in this order, since each after the first rests on the preceding. Especially, sociology must be founded on biology. The development of civilization has taken place according to certain laws or regularities. The civilized community is a true organism—a Great Being—to which individuals are related somewhat as cells to an animal organism. This Great Being should be an object of worship; and this worship should be systematized after the model of the medieval church.—**Positive pleasure** or **pain,** a state of pleasure or pain exceeding the neutral point; a pleasure or pain which is such irrespective of comparison with other states.—**Positive pole of a voltaic pile** or **battery.** See *pole*[2] and *electricity.*—**Positive precision.** See *precision.*—**Positive prescription.** See *prescription,* 3 (*a*).—**Positive proof,** direct proof deducing the conclusion as a particular case of some general rule, without the use of the reductio ad absurdum, etc.—**Positive quantity,** in *alg.*, an affirmative or additive quantity, which character is indicated by the sign + (plus) prefixed to the quantity, called in consequence the *positive sign. Positive* is here used in contradistinction to *negative.*—**Positive term,** a term not in form affected with the negative sign.—**Positive whole,** a whole which has parts: opposed to a *negative whole,* or something called a whole as being indivisible.

II. *n.* **1.** That which settles by absolute appointment.

> *Positives* . . . while under precept cannot be slighted without slighting morals also.
> *Waterland,* Scripture Vindicated, iii. 37.

2. That which is capable of being affirmed; reality.

> Rating *positives* by their privatives.
> *South,* Sermons, I. ii.

3. In *gram.*, the positive degree.—**4.** In *photog.*, a picture in which the lights and shades are rendered as they are in nature: opposed to *negative.* Positives are usually obtained by printing from negatives. See *negative* and *photography.*—**5.** Same as *positive organ.*—**Alabastrine positive.** See *alabastrine.*

positively (poz'i-tiv-li), *adv.* In a positive manner. (*a*) Absolutely; by itself; independently of anything else; not comparatively.

> The good or evil which is removed may be esteemed good or evil comparatively, and not *positively* or simply.
> *Bacon.*

(*b*) Not negatively; really; in its own nature; directly; inherently: thus, a thing is *positively* good when it produces happiness by its own qualities or operation: it is *negatively* good when it prevents an evil or does not produce it. (*c*) Certainly; indubitably; decidedly.

> Give me some breath, some little pause, my lord,
> Before I *positively* speak herein.
> *Shak.,* Rich. III., iv. 2. 25.
>
> So, Maria, you see your lover pursues you; *positively* you sha'n't escape. *Sheridan,* School for Scandal, i. 1.

(*d*) Directly; explicitly: as, the witness testified *positively* to the fact. (*e*) Peremptorily; in positive terms; expressly.

> I would ask . . . whether the whole tenor of the divine law does not *positively* require humility and meekness?
> *Bp. Sprat.*
>
> The Queen found it expedient to issue an order *positively* forbidding the torturing of state-prisoners on any pretence whatever. *Macaulay,* Lord Bacon.

(*f*) With full confidence or assurance: as, I cannot speak *positively* in regard to the fact. (*g*) By positive electricity: as, *positively* electrified. See *electricity.*

positiveness (poz'i-tiv-nes), *n.* The state of being positive; actualness; reality of existence; not mere negation; undoubting assurance; full confidence; peremptoriness.

positivism (poz'i-tiv-izm), *n.* [= F. *positivisme;* as *positive* + *-ism.*] **1.** Actual or absolute knowledge.

> The metaphysicians can never rest till they have taken their watch to pieces and have arrived at a happy *positivism* as to its structure.
> *Lowell,* Among my Books, 1st ser., p. 150.

2. [*cap.*] The Positive philosophy (which see, under *positive*).

Positivist (poz'i-tiv-ist), *n.* [= F. *positiviste;* as *positive* + *-ist.*] One who maintains the doctrines of the Positive philosophy.

positivistic (poz″i-ti-vis'tik), *a.* [< *Positivist* + *-ic.*] Of or pertaining to the Positivists or Positivism.

positivity (poz-i-tiv'i-ti), *n.* [= F. *positivité;* as *positive* + *-ity.*] Positiveness in any sense.

> There is a time, as Solomon . . . teaches us, when a fool should be answered according to his folly, lest he be wise in his own conceit, and lest others too easily yield up their faith and reason to his imperious dictates. Courage and *positivity* are never more necessary than on such an occasion. *Watts,* Improvement of Mind, i. 9.
>
> The property which renders a structure capable of undergoing excitatory change is expressed by relative *positivity,* the condition of discharge by relative negativity.
> *Nature,* XXXVIII. 141.

positor† (poz'i-tor), *n.* [< L. *positor,* one who lays, a builder, founder, < *ponere,* pp. *positus,* put, lay: see *posit.*] A depositor. *Hakluyt's Voyages,* II. 249.

posture† (poz'i-tūr), *n.* [< OF. *posture* = Sp. Pg. It. *postura,* < L. *positura,* position, posture, < *ponere,* pp. *positus,* put, place: see *posit,* and cf. *posture.*] Posture.

> First he prayed, and then sung certain Psalmes, . . . resembling the Turks in the *posture* of their bodies and often prostrations. *Sandys,* Travailes, p. 96.

posnet (pos'net), *n.* [Early mod. E. also *postnet, posenet;* < ME. *posnett, posnette, postnet,* < OF. *pocenet, pozonet, poçonet,* dim. of *poçon,* a pot, < *pot,* a pot: see *pot.*] A small basin or porringer; also, a small vessel of fanciful form.

> The cunning man biddeth set on a *posnet,* or some pan with nayles, and seeth them, and the witch shal come in while they be in seething, and within a fewe daies after her face will be all bescratched with the nayles.
> *Gifford,* Dialogue on Witches (1603). (*Halliwell.*)
>
> Then skellets, pans, and *posnets* put on,
> To make them porridge without mutton.
> *Cotton's Works* (1734), p. 17. (*Halliwell.*)
>
> A silver *posnet* to butter eggs. *Steele,* Tatler, No. 245.

posologic (pos-ō-loj'ik), *a.* [= F. *posologique;* < *posology* + *-ic.*] Of or pertaining to posology.

posological (pos-ō-loj'i-kal), *a.* [< *posologic* + *-al.*] Same as *posologic.*

posology (pō-sol'ō-ji), *n.* [= F. *posologie;* < Gr. πόσος, how much, + *-λογία,* < λέγειν, speak: see *-ology.*] The doctrine of quantity. (*a*) A name suggested by Bentham for the science of quantity. (*b*) That part of medical science which is concerned with the doses or quantities in which medicines ought to be administered.

poss, *v.* An obsolete or dialectal form of *push.*

posse (pos'ē), *n.* [< ML. *posse,* power, a noun use of the L. inf. *posse,* be able: see *potent* and *power.*] **1.** Possibility. A thing is said to be *in posse* when it may possibly be (in familiar language, often a softened denial of existence; in philosophical language, ready to be, in germ); *in esse,* when it actually is.

> Those are but glorious dreams, and only yield him
> A happiness *in posse,* not in esse.
> *Fletcher* (*and another*), Elder Brother, i. 1.

2. A sheriff's posse comitatus (see below); in general, a body or squad of men.

> It was high noon, and the *posse* had been in saddle since dawn.
> *M. N. Murfree,* Prophet of Great Smoky Mountains, p. 20.

Posse comitatus, the power of the county; in *law,* the body of men which the sheriff is empowered to call into service to aid and support him in the execution of the law, as in case of rescue, riot, forcible entry and occupation, etc. It includes all male persons above the age of fifteen. In Great Britain peers and clergymen are excluded by statute. The word *comitatus* is often omitted, and *posse* alone is used in the same sense (see def. 2).

possede†, *v. t.* [< OF. *posseder,* possess: see *possess.*] To possess.

> None other persone may . . . *possede* it or clayme it.
> *Sir T. Elyot,* The Governour, iii. 3.

possess (pō-zes'), *v. t.* [< ME. *possessen,* < OF. *possesser,* possess, < L. *possessus,* pp. of *possidere* (> It. *possedere, possidere* = Sp. *poseer* = Pg. *possuir* = Pr. *possedir, possider* = F. *posséder*), have and hold, be master of, possess, perhaps orig. 'remain near,' < *po-,* **post-,* akin to *pro-,* before, + *sedere,* sit, dwell: see *sit.* Cf. *obsess, assessor, siege,* etc.] **1.** To own; have as a belonging, property, characteristic, or attribute.

> So shall you share all that he doth *possess,*
> By having him. *Shak.,* R. and J., i. 3. 93.
>
> These *possess* wealth as sick men *possess* fevers,
> Which trulier may be said to *possess* them.
> *B. Jonson,* Volpone, v. 8.
>
> St. Peter's can not have the magical power over us that the red and gold covers of our first picture-book *possessed.*
> *Emerson,* Domestic Life.

2. To seize; take possession of; make one's self master of.

> Let us go up at once and *possess* it; for we are well able to overcome it. Num. xiii. 30.
>
> Remember
> First to *possess* his books.
> *Shak.,* Tempest, iii. 2. 100.
>
> The English marched toward the river Eske, intending to *possess* a hill called Under-Eske. *Sir J. Hayward.*

3. To put in possession; make master or owner, whether by force or legally: with *of* before the thing, and now generally used in the passive or reflexively: as, to *possess one's self of* another's secret; to be or stand *possessed of* a certain manor.

> Sithe god hathe chose the to be his knyȝt,
> And *possesside the* in thi right,
> Thoue him honour with al thi myght.
> *Political Poems,* etc. (ed. Furnivall), p. 4.
>
> The plate, coin, revenues, and moveables,
> Whereof our uncle Gaunt did stand *possess'd.*
> *Shak.,* Rich. II., ii. 1. 162.

Spenser, F. Q., III. iii. 51.

=**Syn.** *Have, Possess, Hold, Own, Occupy.* *Have* is the most general of these words; it may apply to a temporary or to a permanent *possession* of a thing, to the *having* of that which is one's own or another's: as, to *have* good judgment; to *have* another's letter by mistake. *Possess* generally applies to that which is external to the possessor, or, if not external, is viewed as something to be used: as, to *possess* a library; if we say a man *possesses* hands, we mean that he *has* them to work with; to *possess* reason is to *have* it with the thought of what can be done with it. To *hold* is to *have* in one's hands to control, not necessarily as one's own: as, to *hold* a fan or a dog for a lady; to *hold* a title-deed; to *hold* the stakes for a contest. To *own* is to have a good and legal title to; one may *own* that which he does not *hold* or *occupy* and cannot get into his *possession*, as a missing umbrella or a stolen horse. *Occupy* is chiefly physical: as, to *occupy* a house; one may *occupy* that which he does not *own*, as a chair, room, office, position.

Let me *have* the land

★**possession** (pọ-zesh′ọn), *n.* [< ME. *possession, possessyone, possessioun*, < OF. (and F.) *possession* = Sp. *posesión* = Pg. *possessão* = It. *possessione, possessio*, < L. *possessio(n-)*, a seizing, possession, < *possessus*, pp. of *possidere*, possess: see *possess*.] **1.** The act of possessing, or the state of being possessed; the having, holding, or detaining of property in one's power or control; the state of owning or controlling; actual seizing or occupancy, either rightful or wrongful. One man may have the *possession* of a thing, and another may have the right of property in it.

Lest total darkness should by night regain
Her old *possession*, and extinguish life
In nature and all things. *Milton*, P. L., iv. 666.

It is ill going to law for an estate with him who is in *possession* of it, and enjoys the present profits, to feed his cause. *Dryden*, Ded. of Third Misc.

You see in their countenances they are at home, and in quiet *possession* of their present instant as it passes.
Steele, Spectator, No. 49.

If the *possession* be severed from the property, if A. has the jus proprietatis, and B. by some unlawful means has gained *possession* of the lands, this is an injury to A. Thus . . . B. . . . hath only . . . a bare or naked *possession*. *Blackstone*, Com., III. x.

If . . . mere *possession* could confer sovereignty, they had that *possession*, and were entitled to that sovereignty.
Story, Discourse, Sept. 18, 1828.

2. In *law*, the physical control which belongs of right to unqualified ownership; the having a thing in such manner as to exclude the control of other persons; that detention of or dominion over a thing by one person which precludes others from the adverse physical occupancy of or dominion over it. In modern law the legal conception of possession is intermediate between the conception of right and that of physical occupancy, and shares something of the qualities of both; but there is great difference of view as to the precise signification and the resulting proprieties of use. In general, all are agreed that a master has possession of a thing which belongs to him but is in the hand of his servant, however far away; but a lender has not possession of a chattel in the hand of the borrower. In respect to real estate, the landlord was formerly said to have possession, and the tenant was not said to *possess* or *have possession*, but only to *be in possession*. The distinction is now more commonly expressed by saying that the tenant has actual possession (*pedis possessio*), although the legal possession may be in the landlord. The servant's or tenant's possession is legal in the sense of being lawful, but is not the legal possession in the sense in which that term is used in contrast to mere physical occupancy without any right of ownership. *Possession* is sometimes said to involve the intent to exclude others, but a man may have possession without such intent, as where he has given a thing away, and it has not been removed; or even without the consciousness of possessing, as where a thing is forgotten or supposed to be lost. In Roman law, *possession* required not only physical control, but also the animus domini. When these two elements concurred, there existed a right which was protected against everybody, including the rightful owner. If he disturbed the possession, he could not in defense to the action (interdict) brought by the possessor plead title, but he had to resort to a separate action in order to assert his right. It was not necessary in order to make this protection that the possession should be in good faith, but good faith was necessary in order to make possession ripen into title by prescription. In some modern systems of law, for example the French code, possession acquired in good faith gives an ownership of chattels.

3. The thing possessed; in the plural, goods, land, or rights owned; belongings: as, your friendship is one of my richest *possessions;* the French *possessions*.

The house of Jacob shall possess their *possessions*.
Obadiah 17.

When the young man heard that saying, he went away sorrowful; for he had great *possessions*. Mat. xix. 22.

Neither your letters nor silence needs excuse; your friendship is to me an abundant *possession*, though you remember me but twice in a year. *Donne*, Letters, xli.

Hence—**4.** Property; wealth.

Fy on *possessioun*
But if a man be vertuous withal.
Chaucer, Prol. to Franklin's Tale, l. 14.

5. In *international law*, a country or territory held by right of conquest. *Bouvier.*—**6.** Persuasion; conviction.

I have a strong *possession* that with this five hundred I shall win five thousand. *Cibber*, Provoked Husband, i.

Whoever labours under any of these *possessions* is as unfit for conversation as a madman in Bedlam.
Swift, Conversation.

7. The state of being under the control of evil spirits or of madness; madness; lunacy: as, demoniacal *possession*.

I knew he was not in his perfect wits. . . .
How long hath this *possession* held the man?
Shak., C. of E., v. 1. 44.

There are some sins so rooted, so rivetted in men, so incorporated, so consubstantiated in the soul, by habitual custom, as that those sins have contracted the nature of ancient *possessions*. *Donne*, Sermons, xiv.

Forms of madness which were for ages supposed to result from *possession* are treated successfully in our hospitals. *Lecky*, Europ. Morals, I. 375.

Actual possession, sometimes called *natural possession*, occupancy to the actual exclusion of possession by any others, except such as hold as the servants of the possessor or as representing him, and so hold without any right to detain as against him. Thus, a man is in *actual possession* of his house when he leaves it in charge of his wife or servant, but not when he leaves it in charge of a tenant having a right to retain it.—**Adverse possession.** See *adverse*.—**Chose in possession.** See *chose*[2].—**Constructive possession**, possession in law, sometimes called *civil* or *juridical possession*, a possession through the occupancy of others, or that possession which is imputed by the law to one who has title to a thing of which no one is in *actual possession*, as for instance wild and unoccupied land. See *seizin*.—**Delivery of juridical possession.** See *delivery*.—**Demoniacal possession.** See *demoniacal*.—**Envoi in possession**, the authority granted by a court to the presumptive heirs of an absentee, who has not been heard of for a certain period of years, to take possession of his property.—**Estate in possession**, technically, an estate so created as to vest in the owner thereof a present right of present enjoyment: referring not to the fact of the thing owned being in the owner's possession, which may or may not be the case, but to the fact that the right of present possession is an estate or title in the owner, as distinguished from an *expectant estate*.—**In possession**, said of a person in actual possession of a thing, or a thing in the actual possession of a person, as distinguished from mere ownership. Thus, when a testator gives all his possessions or everything which he may possess at death, he gives not only the things of which he may be in possession, but also his property of which others may be in possession. When used of an estate, it designates such an estate or interest as gives a right of possession, as distinguished from an expectant estate. Thus, a gift to one person to take effect after the death of another is said to vest *in possession* when the death occurs irrespective of actual taking possession.—**Juridical possession.** See *constructive possession*, above, and *delivery*.—**Naked possession**, mere possession without color of right.—**Natural possession.** Same as *actual possession*.—**To give possession**, to put into another's control or occupancy.—**To take possession**, to enter upon or to take under control or occupancy.

The Lord of Love went by

possessive (pọ-zes′iv), *a.* and *n.* [< F. *possessif* = Sp. *posesivo* = Pg. It. *possessivo*, < L. *possessivus*, possessive (in gram.), < *possessus*, pp. of *possidere*, possess: see *possess*.] **I.** *a.* Pertaining to or denoting possession; expressing possession: as in a *lady's* dress, *their* house, a mere notion of *John's*.

What mean these liv'ries and *possessive* keys?
What mean these bargains, and these needless sales?
Quarles, Emblems, v. 9.

Possessive case, in *gram.*, the genitive case, or the case of nouns, pronouns, etc., which expresses possession and other kindred and derived relations.

The supposition that the apostrophe 's as a mark of the *possessive case* is a segment of his, a question which has been lately revived, is here denied.
A. Hume, Orthographie (E. E. T. S.), p. 37.

Possessive pronoun, a derivative adjective formed from a personal pronoun, and denoting possession or property, as in *my* book *your* hand.

II. *n.* **1.** A pronoun or other word denoting possession.—**2.** The possessive case.

Their and theirs are the *possessives* likewise of they, when they is the plural of it, and are therefore applied to things. *Johnson*, English Grammar.

possessively (pọ-zes′iv-li), *adv.* In a manner denoting possession.

★**possessor** (pọ-zes′ọr), *n.* [Formerly *possessour;* < F. *possesseur* = Sp. *posesor* = Pg. *possessor* = It. *possessore*, < L. *possessor*, possessor, < *possidere*, pp. *possessus*, possess: see *possess*.] One who possesses; one who has or enjoys anything; one who owns; one who holds, occupies, or controls any species of property, real or personal.

Whereby great riches, gathered manie a day,
She in short space did often bring to nought,
And their *possessours* often did dismay.
Spenser, F. Q., IV. i. 29.

And yet he lived as chearfully and contentedly, by the faith he had in God's goodness, as if he had been *possessor* of the whole world. *Sharp*, Works, V. iv.

Riches are the instruments of serving the purposes of heaven or hell, according to the disposition of the *possessor*. *Steele*, Spectator, No. 466.

Bona-fide possessor. See *bona fide*.=**Syn.** Owner, proprietor, holder, master, lord.

possessory (pọ-zes′ọ-ri), *a.* [< F. *possessoire* = Sp. *posesorio* = Pg. It. *possessorio*, < LL. *possessorius*, possessory, < L. *possessor*, a possessor: see *possessor*.] **1.** Pertaining to possession.

A *possessory* feeling in the heart. *Chalmers.*

But it will be based upon fear, and, among lower animals, inherited habit, rather than upon any sense of *possessory* right. *Westminster Rev.*, CXXVI. 134.

2. Having possession: as, a *possessory* lord.

Absolute equality among nations is established, and their commercial rights are to be held the same as those of the *possessory* government. *N. A. Rev.*, CXLII. 125.

3. In *law*, arising from possession: as, a *possessory* interest.

The motive of the guardian must not be tainted by a selfish greed to get the land which the ward held by *possessory* right. *N. A. Rev.*, CXLIII. 438.

Possessory action, an action to determine the right of possession, as distinguished from one to determine the title to the thing. See *petitory*.

If a *possessory action* be brought within six months after the avoidance, the patron shall (notwithstanding such usurpation and institution) recover that very presentation which gives back to him the seisin of the advowson. *Blackstone*, Com., III. xvi.

Possessory judgment, in *Scots law*, a judgment which entitles a person who has been in uninterrupted possession for seven years to continue his possession until the question of right shall be decided at law.

Either touching *possessory judgments* of ecclesiastical livings, or concerning nominations thereunto.
Hooker, Eccles. Polity, viii. 6.

posset (pos′et), *n.* [< ME. *posset, possett, possyt* (cf. F. *posset, possette*, < E.?); perhaps < Ir. *pusoid*, a posset; cf. W. *posel*, curdled milk, a posset, < *posiaw*, gather, heap. The L. *posca*,

a drink of mingled vinegar and water, is prob. not concerned.] A drink composed of hot milk curdled by some infusion, as wine or other liquor, formerly much in favor both as a luxury and as medicine.

I have drugg'd their *possets*,
That death and nature do contend about them,
Whether they live or die. *Shak.*, Macbeth, ii. 2. 6.

After supper to dancing and singing till about twelve at night; and then we had a good sack *possett* for them, and an excellent cake. *Pepys*, Diary, Jan. 6, 1667.

Having had several violent fits of an ague, recourse was had to . . . drinking carduus *posset*, then going to bed and sweating. *Evelyn*, Diary, Feb. 7, 1682.

Posset is an excellent mixture of hot ale, milk, sugar, spices, and sippets or dice of bread or oat cake, almost if not quite universal for supper on Christmas eve.
L. Jewitt, Ceramic Art of Gr. Britain (first ed.), I. 108.

posset† (pos'et), *v. t.* [< *posset*, *n.*] To curdle; coagulate. [Rare.]

And with a sudden vigour it doth *posset*

Possibilist (pos'i-bil-ist), *n.* [< F. *possibiliste* = Sp. *Posibilista;* as L. *possibilis*, possible, + *-ist*.] 1. A member of a Spanish political party which aims at the establishment of a republic by constitutional means.

Thus Castelar and his followers constitute what is called the *Possibilist* party, which, although numbering few partisans among the people, yet comprises several distinguished and upright individuals.
Fortnightly Rev., XXXIX. 115.

2. A member of a modern socialistic faction in France.

possibility (pos-i-bil'i-ti), *n.*; pl. *possibilities* (-tiz). [< ME. *possibilitee, possybilite,* < OF. *possibilite*, F. *possibilité* = Sp. *posibilidad* = Pg. *possibilidade* = It. *possibilità*, < LL. *possibilita(t-)s*, possibility, < L. *possibilis*, possible: see *possible*.] 1. The mode of that which is possible; the fact of being possible.

There is no let but that, as often as those books are read, and need so requireth, the stile of their differences may expressly be mentioned to bar even all *possibility* of error.
Hooker.

It is pleasant to see great works in their seminal state, pregnant with latent *possibilities* of excellence. *Johnson.*

He looked so virtuous that he might commit any crime and no one would believe in the *possibility* of his guilt.
Lady Holland, Sydney Smith, vi.

2. A thing possible; that which may take place or come into being.

Consider him antecedently to his creation, while yet he lay in the barren womb of nothing, and only in the number of *possibilities*, and consequently could have nothing to recommend him to Christ's affection. *South.*

Never country had such a fortune, as men call fortune, as this, in its geography, its history, and in its majestic *possibilities*. *Emerson*, Fortune of the Republic.

3. Specifically, in *law*, a chance or expectation; an uncertain thing which may or may not happen. It is *near* or *ordinary*, as where an estate is limited to one after the death of another; or *remote* or *extraordinary*, as where it is limited to a man provided he shall be married to a certain woman, and then that she shall die, and he be married to another. *Wharton.*—**Logical possibility.** See *logical.*—**Permanent possibility.** See *permanent.*—**Physical possibility**, compatibility with the laws of nature.—**Possibility of issue extinct**, a term, formerly of some importance in the law of real property, used to designate the effect of the age of a woman under a gift conditioned on having issue. The highest authorities in medical jurisprudence sustain the proposition that a woman beyond the age of fifty-five has, in the legal sense, no possibility of issue. Extinction of possibility may be inferred at an earlier age, varying with the evidence as to the length of married life and the condition of health.—**Practical possibility**, capability of being realized by means within the power of the persons considered.—**Real possibility**, indeterminateness in things as to the future happening or non-happening of something which lies within the power of a free agent.

possible (pos'i-bl), *a.* [< ME. *possible, possybylle,* < OF. (and F.) *possible* = Sp. *posible* = Pg. *possivel* = It. *possibile, possevole,* < L. *possibilis*, possible, < *posse*, be able: see *power*.] That may be; not known not to be true; not known not to be true in some hypothetical state of information. The only kind of object which in strict propriety of language can be called *possible* is the truth of a proposition; and when a kind of *thing* is said to be *possible*, this is to be regarded as an elliptical expression, meaning that it is of such a general description that we do not know it does not exist. So an event or act is said to be *possible*, meaning that one would not know that it would not come to pass. But it is incorrect to use *possible* meaning *practicable; possible* is what may be, not what can be. A proposition is *logically possible*, if it would not be known not to be true by a person who should know nothing but the principles of logic and the meanings of words; *physically possible*, if it would not be known not to be true by one who should know all the laws of nature, but none of the particular facts; *practically possible*, if it were not known not to be about to be accomplished to one who should know what was in the power of the persons concerned, but not their dispositions, etc.

Desire things *possible*,
Thou foolish young man; nourish not a hope
Will hale thy heart out. *Fletcher*, Mad Lover, ii. 2.

I take it those things are to be held *possible* which may be done by some person, though not by every one.
Bacon, Advancement of Learning, ii. 118.

In such an age, it is *possible* some great genius may arise, to equal any of the ancients; abating only for the language. *Dryden*, Orig. and Prog. of Satire.

Is it *possible* that, when the necessities of life are supplied, a man would flatter to be rich!
Steele, Tatler, No. 251.

The marvellous is so fascinating that nine persons in ten, if once persuaded that a thing is *possible*, are eager to believe it probable, and at last cunning in convincing themselves that it is proven.
Lowell, Among my Books, 2d ser., p. 144.

Possible intellect. See *intellect*, 1.—**Syn.** *Possible, Practicable.* See *practicable*.

possibly (pos'i-bli), *adv.* 1. In a possible manner; by any power, moral or physical, really existing; by possibility.—2. Perhaps; perchance.

possum (pos'um), *n.* [Formerly also *possoune, possowne*, etc.; by apheresis from *opossum*.] Same as *opossum*. [Colloq.]

Amongst the Beasts in Virginia there are two kinds most strange. One of them is the Female *Possowne*, which hath a bag under her belly, out of which she will let forth her young ones, and take them in again at her pleasure.
S. Clarke, Four Plantations in America (1670), p. 14.

To play possum, to act possum, to feign; dissemble: in allusion to the habit of the opossum, which feigns death on the approach or attack of an enemy, and may allow itself to be tormented to death without showing a sign of life.

possum (pos'um), *v. i.* [< *possum*, *n.*] To play possum; feign death. [Colloq.]

When disturbed they [certain beetles] drop to the ground . . . after *possuming* awhile.
Insect Life, Jan., 1889, p. 220.

possum-oak (pos'um-ōk), *n.* Same as *water-oak*.

A piece of timber, metal (solid or built up), or other solid substance, of considerable size, set upright, and intended as a support to a weight or structure resting upon it, or as a firm point of attachment for something: as, the *posts* of a door or of a gate; a king-*post*, queen-*post*, truss-*post*, bed-*post;* iron *posts* supporting the floor of a building; a hitching-*post*, etc.

And Samson . . . took the doors of the gate of the city, and the two *posts*, and went away with them, bar and all.
Judges xvi. 3.

Through the glass the clothes-line *posts*
Looked in like tall and sheeted ghosts.
Whittier, Snow-Bound.

Specifically—(*a*†) A piece of timber set in any position; a beam.

It is intended particularly for the convenience of persons passing through a country or town where they have no fixed residence.

posterial (pos-tē'ri-al), *a.* [For **posterioral*, < *posterior* + *-al*.] Of or relating to the posterior or posteriors; posterior.

No license of fashion can allow a man of delicate taste to adopt the *posterial* luxuriance of a Hottentot.
Carlyle, Sartor Resartus (ed. 1831), p. 193.

posterior (pos-tē'ri-ọr), *a.* and *n.* [Formerly also *posteriour*; < OF. *posterieur*, F. *postérieur* = Sp. Pg. *posterior* = It. *posteriore*, < L. *posterior*, compar. of *posterus*, coming after, following, next, next in order, time, or place, later, latter, hinder, < *post*, after: see *post*[5].] **I.** *a.* 1. Later in position in a series or course of action; coming after.

So it is manifest that, where the anteriour body giveth way as fast as the *posteriour* cometh on, it maketh no noise, be the motion never so great or swift.
Bacon, Nat. Hist., § 115.

2. Especially, later or subsequent in time: opposed to *prior*.

Hesiod was *posterior* to Homer. *W. Broome.*

No care was taken to have this matter remedied by the explanatory articles *posterior* to the report. *Addison.*

What is *posterior* in the order of things does not act from itself, but from something prior to it.
Swedenborg, Christian Psychol. (tr. by Gorman), p. 64.

3. Situated behind; hinder: opposed to *anterior*. In most cases, in anatomy and zoölogy, *posterior* is said of parts behind the central portion of the backbone; in man, also of parts lying behind the front of the body: in the former case synonymous with *caudal*, in the latter with *dorsal*. See cuts under *bivalve* and *Dromæus*.

4. In *bot.*, situated on the side nearest the axis; superior: said of the parts of an axillary flower. Compare *anterior*.—**Posterior area of the medulla**, a somewhat oval area seen in transverse sections of the lower part of the oblongata on each side, at the posterior part, bounded in front by bundles of nerve-

root fibers of the spinal accessory.—**Posterior communicating artery of the brain,** a branch connecting the internal carotid with the posterior cerebral artery, and forming part of the circle of Willis; the postcommunicant artery.—**Posterior ethmoidal canal.** See *ethmoidal*.—**Posterior extremity,** the leg of man, or the hind leg of any animal.—**Posterior line,** or **posterior basal line,** a more or less angulated and curved line crossing the anterior wing about midway between the base and the center, found in many moths.—**Posterior margin,** in *conch.*, that side of the bosses of acephalous bivalves which contains the ligament.—**Posterior margin of the wing,** in *entom.*, generally the edge of the wing opposed to the costa or front border; but in those *Lepidoptera* and *Hymenoptera* which have the borders of the wings naturally divided into three parts *posterior margin* is often understood to mean the outer one, or that between the apex and the inner angle, the latter being also called the *posterior angle*.—**Posterior mediastinum, nares,** etc. See *mediastinum, naris,* etc.—**Posterior palpi,** in *entom.*, those palpi that are on the labium; the labial palpi.—**Posterior sulcus of Reil,** a deep groove between the island of Reil and the upper surface of the temporosphenoidal lobe.

II. *n.* **1.** The hinder part; in the plural, the hinder parts of the body of man or any animal.

When [matters] . . . are resolved upon, I believe then nothing is so advantageous as Speed, . . . for Expedition is the Life of Action, otherwise Time may shew his bald occiput, and shake his *Posteriors* at them in Derision.
Howell, Letters, ii. 17.

2†. *pl.* The latter part. [A whimsical use.]

Sir, it is the king's most sweet pleasure and affection to congratulate the princess at her pavilion in the *posteriors* of this day, which the rude multitude call the afternoon.
Shak., L. L. L., v. 1. 94.

posterioristic (pos-tē″ri-o-ris′tik), *a.* [< *posterior* + *-istic*.] Pertaining to the two books of the Posterior Analytics of Aristotle. There are some discrepancies between the doctrine of the Prior and that of the Posterior Analytics, and these are distinguished as the *prioristic* and the *posterioristic doctrines*.—**Posterioristic universal,** a proposition de omni according to the definition given in Anal. Post. I. cap. 4, where the term is limited to true propositions: opposed to *prioristic universal*, a proposition de omni according to the definition given in Anal. Prior. I. cap. 1, according to which a false proposition may be said de omni.

posteriority (pos-tē-ri-or′i-ti), *n.* [= F. *postériorité* = Sp. *posterioridad* = Pg. *posterioridade*, < NL. *posteriorita(t-)s*, < L. *posterior*, posterior: see *posterior*.] The state of being later or subsequent: opposed to *priority*.

A priority and *posteriority* of dignity as well as order.
Cudworth, Intellectual System, p. 598.

posteriorly (pos-tē′ri-or-li), *adv.* In a posterior manner; subsequently; behind; specifically, in *zoöl.*, toward or near the posterior or caudal end of an animal; caudad; in *human anat.*, toward the back; dorsad: as, a line directed *posteriorly*; organs situated *posteriorly*.

Yet it was said
It [the crown] should not stand in thy *posterity*.
Shak., Macbeth, iii. 1. 4.

From whom a Race of Monarchs shall descend,
And whose *Posterity* shall know no End.
Congreve, Hymn to Venus.

2. Succeeding generations collectively.

Methinks the truth should live from age to age,
As 'twere retail'd to all *posterity*.
Shak., Rich. III., iii. 1. 77.

My lords, how much your country owes you both,
The due reward of your desertful glories,
Must to *posterity* remain.
Beau. and Fl., Laws of Candy, i. 2.

What has *posterity* done for us,
That we, lest they their rights should lose,
Should trust our necks to gripe of noose?
J. Trumbull, McFingal, ii. 124. (*Bartlett.*)

3. Posteriority. [Rare.]

There is no difference of time with him [God]; it is dangerous to dispute of priority or *posterity* in nature.
Baxter, Saints' Rest, i. 8.

=**Syn. 1.** *Issue, Progeny*, etc. See *offspring*.

postern (pōs′tėrn), *n.* [< ME. *posterne, postyrn, postorne, postrene,* < OF. *posterne, posterle*, F. *poterne* = Pr. *posterla* = Sp. Pg. *poterna* = It. *postierla*, < LL. *posterula* (also, after OF., *posterna*), a small back door, a back way, dim. (sc. *janua*, door, or *via*, way), < L. *posterus*, hinder: see *posterior*.] **1.** A back door or gate; a private entrance; hence, any small door or gate. See cuts under *castle* and *barbican*.

post-exist (pōst-eg-zist′), *v. i.* [< L. *post*, after, + *existere*, exist: see *exist*.] To exist afterward; live subsequently. [Rare.]

Anaxagoras could not but acknowledge that all souls and lives did pre- and *post-exist* by themselves, as well as those corporeal forms and qualities, in his similar atoms.
Cudworth, Intellectual System, p. 37.

post-existence (pōst-eg-zis′tens), *n.* Subsequent or future existence.

As he [Simonides] has exposed the vicious part of women from the doctrine of pre-existence, some of the ancient philosophers have . . . satirized the vicious part of the human species in general from a notion of the soul's *post-existence*.
Addison, Spectator, No. 211.

post-existent (pōst-eg-zis′tent), *a.* Existent or living after or subsequently.

As for the conceit of Anaxagoras, of præ and *post-existent* atoms endued with all those several forms and qualities of bodies ingenerably and incorruptibly, it was nothing but an adulteration of the genuine atomical philosophy.
Cudworth, Intellectual System, p. 35.

postfact (pōst-fakt′), *a.* and *n.* [L. *post factus*, done after (ML. *post factum*, after the deed, after): *post*, after; *factus*, done: see *fact*.] **I.** *a.* Relating to a fact that occurs after another.

Such boxes in a post-office are generally numbered, and either have glass backs, to display their contents from the outside, or are provided with locking doors at the back, to which the lessee of the box holds the key, and are then called *lock-boxes*. [U. S.]—**Post-office car.** See *mail-car*.—**Post-office Department**, that branch of a government which supervises the post: in Great Britain the telegraph- and telephone-lines are also under its management. See *department*.—**Post-office order.** See *money-order*.—**Post-office savings-bank**, a bank connected with a local post-office where deposits not exceeding (in Great Britain) £50 in any year are received to an amount not exceeding £200, on government security, at a rate of interest of 2½ per cent. per annum. In the United States similar banks were opened in Jan., 1911.—**Railway post-office**, a railroad-car, or part of a railroad-car, in which the distribution of mail-matter is made.

postolivary (pōst-ol′i-vā-ri), *a.* [< NL. *post-olivaris*, < L. *post*, behind, + NL. *olivaris*, L. *olivarius*, olivary: see *olivary*.] Posterior to the oliva, or olivary body.—**Postolivary sulcus.** Same as *sulcus postolivaris* (which see, under *sulcus*).

postomosternal (pōst-ō-mō-stėr′nal), *a.* [< *postomostern-um* + *-al*.] Pertaining to the postomosternum.

postomosternum (pōst-ō-mō-stėr′num), *n.*; pl. *postomosterna* (-nä). [NL., < L. *post*, behind, + NL. *omosternum*, q. v.] A posterior omosternum.

post-operative (post-op′e-rā-tiv), *a.* [< L. *post*, after, + E. *operat(ion)* + *-ive*.] Occurring after an operation, as an examination ★ made after a surgical operation.

postoral (pōst-ō′ral), *a.* [< L. *post*, behind, + *os* (*or-*), the mouth: see *oral*.] Situated behind the mouth: specifically applied to certain of the visceral arches and clefts of the vertebrate embryo.—**Postoral arches**, visceral arches posterior to the mouth. Also called *pharyngeal arches*.—**Postoral segments**, in arthropods, those primary or theoretical segments which are situated behind the mouth, as distinguished from the *preoral segments*, which are morphologically anterior to the mouth, but are turned back to form the front or top of the head. The postoral cephalic segments of insects are the mandibular, first maxillary, and second maxillary or labial, each corresponding to the appendages from which they are named, and which answer to the ambulatory limbs of the thoracic segments; in spiders the labial segment is transferred to the thorax, the anterior pair of legs in that group being the homologues of the labium of insects. The postoral segments are closely united with one another and with the preoral segments, so that it is very difficult to trace them; probably the genæ, occiput, gula, and cervical sclerites represent them in the head of the perfect insect.

postorbital (pōst-ôr′bi-tal), *a.* and *n.* [< L. *post*, behind, + *orbita*, orbit: see *orbital*.] **I.** *a.* 1. In *anat.* and *zoöl.*: (*a*) Situated on the hinder part of the bony brim of the orbit of the eye. Since the frontal bone usually circumscribes more than half of this orbit, a postorbital process is usually also a postfrontal process. This process, when formed of the frontal bone, varies much in size and shape, and may be present or absent in the skulls of animals closely related, therefore furnishing a useful zoölogical character. Compare, for example, the large hooked postorbital process of the skull of the hare, figured under *Leporidæ*, with the absence of such a formation in the skull of another rodent, the beaver, figured under *Castor*. In man the corresponding formation is known as the *external angular process* of the frontal bone. (*b*) Bounding the orbit behind, as a separate bone of sundry reptiles. See the noun. (*c*) Lying backward (caudad) of the orbit of the eye, on the surface of the body; postocular: as, the *postorbital* part of the head. *Encyc. Brit.*, XII. 636.—2. In *entom.*, lying behind the compound eyes of an insect.

II. *n.* In *herpet.*, a separate bone which in some reptiles forms a posterior part of the orbit of the eye. Such a bone may come in behind another regarded as a postfrontal (see cut under *Ichthyosauria*), and is then unequivocal; but when only one bone, apart, that is, from the frontal, bounds the orbit in any part of its posterior half, it may be regarded as a postfrontal.

post-paid (pōst′pād), *a.* Having the postage prepaid: as, a *post-paid* letter.

postpalatal (pōst-pal′ā-tal), *a.* and *n.* [< L. *post*, behind, + *palatum*, palate: see *palatal*.] **I.** *a.* Situated behind the palate or palate-bones.

★ **II.** *n.* A postpalatal bone; a postpalatine.

postpalatine (pōst-pal′ā-tin), *n.* [< L. *post*, behind, + *palatum*, palate: see *palatine*[2].] The posterior portion of the palatine bone in birds. *W. K. Parker.*

★ **postparietal** (pōst-pā-rī′e-tal), *a.* and *n.* [< L. *post*, behind, + *paries* (*pariet-*), wall: see *parietal*.] **I.** *a.* In *herpet.*, situated behind the parietal plates of a serpent's head.

II. *n.* A postparietal plate.

post-partum (pōst-pär′tum), *a.* [< L. *post partum*, after birth: *post*, after; *partum*, acc. of *partus*, birth, < *parere*, bear, bring forth.] Taking place after the birth of a child: as, *post-partum* hemorrhage.

postpectoral (pōst-pek′tō-ral), *a.* [< *postpectus* (*-pector-*) + *-al*.] Of or pertaining to the postpectus.—**Postpectoral legs**, in *entom.*, the third pair, or hind legs.

postpectus (pōst-pek′tus), *n.* [NL., < L. *post*, behind, + *pectus*, breast: see *pectus*.] 1. In *zoöl.*, the hind-breast, or hinder part of the breast.—2. In *entom.*, a region corresponding to the metathorax.

postpeduncular (pōst-pē-dung′kū-lär), *a.* [< *postpeduncul-us* + *-ar*[3].] Of or pertaining to the postpedunculus.

postpedunculus (pōst-pē-dung′kū-lus), *n.*; pl. *postpeduncŭli* (-lī). [NL. (Wilder), < L. *post*, behind, + LL. *pedunculus*, a peduncle or pedicel: see *peduncle*.] The inferior peduncle of the cerebellum.

postpetiole (pōst-pet′i-ōl), *n.* [< L. *post*, behind, + *petiolus*, a petiole: see *petiole*.] In *entom.*, that part of a petiolate abdomen immediately behind the petiole or narrow basal section: generally the second segment is understood, especially if it is somewhat narrower than the succeeding segments.

postpharyngeal (pōst-fā-rin′jē-al), *a.* [< L. *post*, behind, + NL. *pharynx*, pharynx: see *pharyngeal*.] Behind the pharynx; retropharyngeal; situated in the posterior pharyngeal wall: as, a *postpharyngeal* abscess.

postpituitary (pōst-pit′ū-i-tā-ri), *a.* [< L. *post*, behind, + E. *pituitary*.] Situated behind the pituitary fossa.

Post-pliocene (pōst-plī′ō-sēn), *a.* and *n.* [= F. *post-pliocène*; as L. *post*, after, + E. *pliocene*.] In *geol.*, same as *Pleistocene*.

post-pocket (pōst′pok″et), *n.* In a railway stock-car, etc., an iron casting attached to the outside of the sill to receive and hold a post.

postponable (pōst-pō′na-bl), *a.* [< *postpone* + *-able*.] Admitting of postponement or delay.

postpone (pōst-pōn′), *v. t.*; pret. and pp. *postponed*, ppr. *postponing*. [= Sp. *posponer* = Pg. *pospor* = It. *posporre*, < L. *postponere*, put after, < *post*, after, + *ponere*, put: see *position*. Cf. *postpose*.] 1. To put off; defer to a future or later time; delay.

I will *postpone* common and every-day topics.
Peter Martyr, quoted in Bradford's Works (Parker Soc., [1853), II. 403.

His pray'r preferr'd to saints that cannot aid;
His praise *postpon'd*, and never to be paid.
Cowper, Truth, l. 86.

2. To set below (something else) in value or importance; rate as less important or inferior.

All other considerations should give way and be *postponed* to this. *Locke*, Education.

So shall each youth, assisted by our eyes, . . .
To headless Phœbe his fair bride *postpone*,
Honour a Syrian prince above his own.
Pope, Dunciad, iv. 367.

But the philosopher, not less than the poet, *postpones* the apparent order and relations of things to the empire of thought. *Emerson*, Nature.

=Syn. 1. To adjourn, procrastinate, stave off.

postponement (pōst-pōn′ment), *n.* [= It. *posponimento*; as *postpone* + *-ment*.] 1. The act of postponing, or deferring to a future time; temporary delay.

Persons and events may stand for a time between you and justice, but it is only a *postponement*. You must pay at last your own debt. *Emerson*, Compensation.

2. The act of placing after or below in importance or esteem; a subordinating.

The opportunities for that *postponement* of self to others which constitutes altruism as ordinarily conceived must, in several ways, be more and more limited as the highest state is approached. *H. Spencer*, Data of Ethics, § 96.

postponence† (pōst-pō′nens), *n.* [< L. *postponen(t-)s*, ppr. of *postponere*: see *postpone*.] Same as *postponement*, 2.

Noting preference, or *postponence*.
Johnson, in def. of Of.

postponer (pōst-pō′nėr), *n.* [< *postpone* + *-er*[1].] One who postpones; one who delays or puts off.

postpontile (pōst-pon′til), *a.* [< L. *post*, behind, + *pon(t-)s*, bridge: see *pontile*.] Situated behind the pons Varolii: opposed to *prepontile*: as, the *postpontile* recess, more commonly called *foramen cæcum*.

postpose† (pōst-pōz′), *v. t.* [< F. *postposer*, < L. *post*, after, + F. *poser*, put: see *pose*[2].] 1. To place after (something else).

We utter our wil be verbes signifying the form of our wil, or *postposing* the supposit [subject].
A. Hume, Orthographie (E. E. T. S.), p. 81.

2. To postpone; put off. *Fuller.* (*Imp. Dict.*)

postposit† (pōst-poz′it), *v. t.* [< L. *postpositus*, pp. of *postponere*: see *postpone*.] To postpone; treat or regard as of inferior value.

Often, in our love to her, our love to God is swallowed and *postposited*. *Feltham*, On St. Luke, 323. (*Latham.*)

postposition (pōst-pō-zish′on), *n.* [< F. *postposition* = Pg. *posposição* = It. *posposizione*; < L. *postpositus*, pp. of *postponere*, put after: see *postpone*.] 1. The act of postposing or placing after; the state of being put behind.

Nor is the *post-position* of the nominative case to the verb against the use of the tongue.
J. Mede, Daniel's Weeks, p. 36.

For purely intellectual writing, then, it seems that the French usage of *postposition* [of the adjective] is the best.
Amer. Jour. Philol., VI. 347.

2. In *gram.*, a word or particle placed after or at the end of a word: opposed to *preposition*. [Rare.]

In almost all the native languages of Asia, what we call prepositions follow their noun; often, like the article and reflective pronoun, coalescing with it, so as to form, or simulate, an inflection. The inconvenience of such a term as preposition is now manifest; nor is it much remedied when we allow ourselves to use the contradictory phrase postpositive preposition. What is really wanted is a general name for that part of speech under which preposition and *postposition* may stand as co-ordinate terms.
Latham, Dict., II. 568.

postpositional (pōst-pō-zish′on-al), *a.* [< *postposition* + *-al*.] Pertaining to a postposition.

postpositive (pōst-poz′i-tiv), *a.* [< F. *postpositif* = It. *pospositivo*, < L. *postpositus*, pp. of *postponere*, place after: see *postpone* and *positive*.] Placed after something else; suffixed; appended: as, a *postpositive* word.

We find here the *postpositive* article which constitutes so notable a feature of the Scandinavian languages.
The Nation, XLVIII. 391.

postprandial (pōst-pran′di-al), *a.* [< L. *post*, after, + *prandium*, dinner: see *prandial*.] Happening, uttered, done, etc., after dinner: as, a *postprandial* speech.

I was much cheered by the announcement of this Carlton Club; the very name seemed to have been chosen with an eye to the drooping condition of *post-prandial* business.
Noctes Ambrosianæ, Sept., 1832.

postpredicament (pōst-prē-dik′a-ment), *n.* [< ML. *postprædicamentum* (Abelard), < L. *post*, after, + ML. *prædicamentum*, predicament: see *predicament*.] One of the five subjects treated by Aristotle at the end of his book on the categories or predicaments, namely the explana-

tions concerning the conceptions of 'opposite,' 'before,' 'at once,' 'motion,' and 'to have.'

post-pridie (pōst-prid'i-ē), *n.* [L., < *post*, after, + *pridie*, day before.] In the *Mozarabic liturgy*, a variable prayer said immediately after the words of institution. It seems originally to have regularly contained the great oblation and epiclesis, as is apparent in a number of extant examples. In the Gallican office it is called the collect (*collectio*) *post Mysterium* or *post Secreta*. The present Mozarabic title, literally 'after the Pridie' (day before), seems to refer to the institution in its Roman and Gallican form, beginning "Who (or, "For he) on the day before he suffered," rather than the Mozarabic "Our Lord . . . in the night in which he was betrayed."

postpubic (pōst-pū'bik), *a.* [< *postpubis*, after *pubic*.] Of or pertaining to the postpubis.

postpubis (pōst-pū'bis), *n.*; pl. *postpubes* (-bēz). [NL., < L. *post*, behind, + NL. *pubis*, q. v.] The postacetabular part of the pubic bone, especially well developed in dinosaurs. The term was applied to the pubis of birds under the impression that this was homologous with the postpubis of dinosaurs, which is not the case, the pubis turning backward during development. See cuts under *epipleura* and *sacrarium*.

post-pyramidal (pōst-pi-ram'i-dal), *a.* [< L. *post*, after, + *pyramis* (*-mid-*), pyramid: see *pyramidal*.] **1.** Occurring or existing since the Egyptian pyramids were built. *R. A. Proctor.* —**2.** In *anat.*, pertaining to the funiculus gracilis, formerly sometimes called *posterior pyramid*.—**Postpyramidal nucleus**, the nucleus funiculi gracilis. See *funiculus*.

post-redemption (pōst-rē-demp'shọn), *a.* [< L. *post*, after, + *redemptio(n-)*, redemption.] Subsequent to redemption: used of reissues of United States government notes after their return to the Treasury in payment of dues to the government, or redemption in coin. The act of Congress of May 31st, 1878, forbade the Treasury to cancel unmutilated notes which had been received back, and required them to be reissued and kept in circulation, and such reissues were called *post-redemption issues*.

post-remote (pōst-rē-mōt'), *a.* More remote in subsequent time or order. *Darwin.* (*Imp. Dict.*)

postrhinal (pōst-rī'nạl), *a.* [< L. *post*, behind, + Gr. *ῥίς* (*ῥιν-*), nose: see *rhinal*.] Posterior and rhinal: applied by Wilder to a fissure of the brain called by Owen *basirhinal*.

post-rider (pōst'rī″dėr), *n.* One who rides post; a mounted mail-carrier.

post-road (pōst'rōd), *n.* **1.** A road on which are stations where relays of post-horses can be obtained.—**2.** In the United States, any road, way, or street, including water-routes, over which the United States mail is carried.

postrolandic (pōst-rō-lan'dik), *a.* [< L. *post*, after, + E. *Rolandic*.] Situated behind the Rolandic or central fissure of the cerebrum.

postrorse (pos-trôrs'), *a.* [< NL. **postrorsus*, irreg. < L. *post*, back, + *versus*, turned (in imitation of *introrse*, *retrorse*, *antrorse*).] Turned back; directed backward; retrorse: the opposite of *antrorse*.

postsacral (pōst-sā'krạl), *a.* [< L. *post*, behind, + NL. *sacrum*: see *sacral*.] Situated behind the sacrum; succeeding the sacral vertebræ, as the caudal or coccygeal vertebræ; urosacral.

postscalene (pōst-skā'lēn), *a.* [< NL. *postscalenus*.] Pertaining to the scalenus posticus, or postscalenus. *Coues.*

postscalenus (pōst-skā-lē'nus), *n.*; pl. *postscaleni* (-nī). [NL., < L. *post*, behind, + NL. *scalenus*, q. v.] The posterior scalene muscle of the neck; the scalenus posticus. *Coues.* See cut under *muscle*.

postscapular (pōst-skap'ū-lạr), *a.* [< L. *post*, behind, + NL. *scapula*, the shoulder-blade: see *scapular*.] Situated behind or below the spine of the scapula or shoulder-blade; infraspinous, with reference to the scapula: the opposite of *prescapular*: as, the *postscapular* fossa (the infraspinous fossa).

postscapularis (pōst-skap-ū-lā'ris), *n.*; pl. *postscapulares* (-rēz). [NL.: see *postscapular*.] A muscle of the postscapular or infraspinous aspect of the scapula; the infraspinatus. *Coues.*

postscenium (pōst-sē'ni-um), *n.* [L., also *postscænium*, *poscænium*, *postcenium*, *poscenium* (> It. *postscenio* = F. *postscénium*), < *post*, after, behind, + *scena*, *scæna*, stage: see *scene*.] In *arch.*, the back part of the stage of a theater, behind the scenes.

postschwartzian (pōst-schwärt'si-an), *n.* [< L. *post*, after, + E. *Schwartzian*.] In *math.*, a form obtained by operating on the Schwartzian with the generator for mixed reciprocants.

postscribe (pōst-skrīb'), *v. t.*; pret. and pp. *postscribed*, ppr. *postscribing*. [< L. *postscribere*, write after, < *post*, after, + *scribere*, write: see *scribe*.] To write after; append to.

And the second is but a consequent of the first, *postscribed* with that word of inference "Now then," &c., Rom. vii. 25. *Rev. T. Adams*, Works, I. 325.

postscript (pōst'skript), *n.* [= F. *postscript*, *postscriptum* = Pg. *postscripto* = It. *poscritto*, *poscritta*, < ML. *postscriptum*, a postscript, neut. of L. *postscriptus*, pp. of *postscribere*, write after, < *post*, after, + *scribere*, write.] An addition made to a written or printed composition as an afterthought, or to state something that has been omitted. (*a*) A supplement or appendix, as to a book or newspaper.

In the early days of the reign both these papers had manuscript *postscripts*, or supplements, when any fresh news arrived that was not in their last edition.
J. Ashton, Social Life in Reign of Queen Anne, II. 68.

(*b*) More commonly, a paragraph added to a letter which has already been concluded and signed by the writer.

Laer. Know you the hand?
King. 'Tis Hamlet's character. "Naked!"
And, in a *postscript* here, he says "alone."
Shak., Hamlet, iv. 7. 54.

Then came a *postscript* dash'd across the rest.
Tennyson, Princess, v.

Abbreviated *P. S.*

postscriptal (pōst'skrip-tạl), *a.* [< *postscript* + *-al*.] Of or relating to a postscript; of the nature of a postscript.

The *postscriptal* speech which he had to deliver six years after, in 1794, in answer to the pleas of Hastings's counsel.
Mrs. Oliphant, Sheridan, p. 142.

postscripted (pōst'skrip-ted), *a.* [< *postscript* + *-ed*[2].] Having a postscript; written afterward.
J. Quincy Adams. (*Imp. Dict.*) [Rare.]

postscutel (pōst-skū'tel), *n.* In *entom.*, same as *postscutellum*.

postscutellar (pōst-skū'te-lạr), *a.* [< *postscutell-um* + *-ar*[3].] In *entom.*, situated behind the scutellum; of or pertaining to the postscutellum.

postscutellum (pōst-skū-tel'um), *n.*; pl. *postscutella* (-ạ). [NL., < L. *post*, behind, + NL. *scutellum*, q. v.] In *entom.*, the fourth and last of the sclerites into which the pronotum, mesonotum, and metanotum of insects are severally typically divisible, situated behind the scutellum.

postsphenoid (pōst-sfē'noid), *n.* [< L. *post*, behind, + E. *sphenoid*.] The posterior part of the compound sphenoid bone, including the basisphenoid, alisphenoids, and pterygoids, separable in infancy.

postsphenoidal (pōst-sfē-noi'dạl), *a.* [< *postsphenoid* + *-al*.] Pertaining to the postsphenoid: as, the *postsphenoidal* parts or elements of the sphenoid bone.

post-stamp (pōst'stamp), *n.* Same as *postage-stamp*. [Great Britain.]

postsylvian (pōst-sil'vi-an), *a.* [< L. *post*, behind, + E. *Sylvian*.] Situated behind the Sylvian fissure of the brain.

post-systolic (pōst-sis-tol'ik), *a.* [< L. *post*, after, + NL. *systole*.] In *physiol.*, following the systole.

post-temporal (pōst-tem'pō-rạl), *a.* and *n.* [< L. *post*, after, + *tempus* (*tempor-*), temple: see *temporal*[2].] **I.** *a.* Situated behind the temporal region of the skull.

II. *n.* In *ichth.*, a bone of the scapular arch of some fishes by means of which that arch is attached to the back part of the skull. It may form an integral part of the skull. Also called *suprascapula* and *supraclavicle*. See first cut under *teleost*.

post terminum (pōst tėr'mi-num). [L.: *post*, after; *terminum*, acc. of *terminus*, a term, limit: see *term*.] In *law*, after the term.

Post-tertiary (pōst-tėr'shi-ā-ri), *a.* and *n.* The most recent division of the geological series, including all that is later than that which can properly be denominated Tertiary: frequently called *Quaternary*. The line of division between the Tertiary and the Quaternary is, in many regions, one which cannot be sharply drawn, and geologists differ essentially in regard to the nomenclature of the groups more or less vaguely designated by the terms *Post-tertiary*, *Pleistocene*, *Quaternary*, *recent*, and *diluvial*, as well as to the meaning and limitation of the term *glacial*, all these being subdivisions in use as designating more or less of the deposits later than the Tertiary. In general it may be stated that with rare exceptions the Post-tertiary invertebrates are extinct; deposits containing extinct forms of the higher animals, and probably also of plants, are by many geologists unhesitatingly called Post-tertiary. In the region where geology has been longest cultivated (northwestern Europe) ice has played an important part in Post-tertiary times; hence, a classification of deposits of this age is largely influenced by this circumstance, and a parallelism of the more recent deposits of glaciated and non-glaciated regions — the latter comprising much the larger part of the earth's surface — is greatly increased in difficulty. See *Quaternary* and *Pleistocene*.

post-tibial (pōst-tib'i-ạl), *a.* [< L. *post*, after, + *tibia*, tibia.] Situated upon the back of the lower leg; sural: as, a *post-tibial* muscle; the *post-tibial* nerve.

post-time (pōst'tīm), *n.* The time for the arrival of a postman, or for the despatch of letters by mail.

I was detained till after *post-time*.
Macaulay, in Trevelyan, II. 147.

post-tonic (pōst-ton'ik), *a.* [< L. *post*, after, + Gr. *τόνος*, tone: see *tonic*.] Following the accent or accented syllable.

In French the first of the two *post-tonic* vowels of a Latin proparoxytone always disappears. *Encyc. Brit.*, XIX. 869.

post-town (pōst'toun), *n.* **1.** A town on a post-route, where relays of post-horses can be obtained.—**2.** A town in which a post-office is established.

post-trader (pōst'trā″dėr), *n.* A trader at a military post: the official designation of a sutler. [U. S.]

post-tympanic (pōst-tim-pan'ik), *a.* and *n.* [< L. *post*, after, + E. *tympanic*.] **I.** *a.* Situated behind the tympanic bone, or external auditory meatus.—**Post-tympanic bone**, a small ossicle which lies over the squamosal and opisthotic bones of the bear and probably some other carnivores. *H. Allen*, 1886.—**Post-tympanic process**, a formation of the united squamosal and opisthotic bones in some carnivores.

II. *n.* The post-tympanic bone. *Huxley*, Anat. Vert., p. 308.

postulant (pos'tụ-lạnt), *n.* [< F. *postulant* = Pg. It. *postulante*, an applicant, candidate, prop. adj., < L. *postulan(t-)s*, ppr. of *postulare*, demand: see *postulate*, *n.*] One who or that which postulates, demands, or asks; specifically, a candidate for membership in a religious order during the period preparatory to his admission into the novitiate; in the American Episcopal Church, an applicant for admission to candidateship for the ministry, not yet received as candidate.

As some words, instinctively avoided, are constantly falling into desuetude, so others, often answering to calls too subtile for analysis, are constantly presenting themselves as *postulants* for recognition.
F. Hall, Mod. Eng., p. 98.

postulata, *n.* Plural of *postulatum*.

postulate (pos'tụ-lāt), *v.*; pret. and pp. *postulated*, ppr. *postulating*. [< L. *postulatus*, pp. of *postulare* (> OIt. *postulare* = Sp. Pg. Pr. *postular* = F. *postuler*), ask, demand, require, summon, prosecute, impeach, etc., also require or need; perhaps, as a freq. form, < *poscere* (pp. **posctus*, **postus*), ask, demand, perhaps orig. **porscere*, akin to *procare*, ask, demand, *procus*, a wooer, and *precari*, pray: see *procacious* and *pray*[1].] **I.** *trans.* **1.** To invite; solicit; require by entreaty. See def. 3.

A great alliance was projected among many Protestant Princes to disturb Cardinal Furstemberg in the possession of Cologne, to which he was *postulated* by the majority of the chapter. *Bp. Burnet*, Hist. Own Time, an. 1688.

2. To assume without proof; lay down as something which has to be assumed, although it cannot be proved; take for granted.

We conclude, therefore, that Being, intelligent, conscious Being, is implied and *postulated* in thinking.
J. D. Morell.

Symmetry and simplicity, before they were discovered by the observer, were *postulated* by the philosopher.
Max Müller, Sci. of Lang., 1st ser., p. 29.

3. In *eccles. law*, to ask legitimate ecclesiastical authority to admit (a nominee) by dispensation, when a canonical impediment is supposed to exist. *Lee*, Glossary.

II. *intrans.* To make postulates or demands; urge a suit.

The excellent Doctor had not even yet discovered that the King's commissioners were delighted with his postulates; and that to have kept them *postulating* thus five months in succession . . . was one of the most decisive triumphs ever achieved by Spanish diplomacy.
Motley, Hist. Netherlands, II. 397.

postulate (pos'tụ-lāt), *n.* [= F. *postulat* = Sp. Pg. *postulado* = It. *postulato*, < L. *postulatum*, a demand, prop. neut. of *postulatus*, pp. of *postulare*, demand: see *postulate*, *v.*] **1.** A petition; a suit; solicitation.

With the honest pride of a protocol-maker, he added, "our *postulates* do trouble the King's commissioners very much, and do bring them to despair."
Motley, Hist. Netherlands, II. 397.

2. A proposition proposed for acceptance without proof; something taken for granted; an assumption. Thus, the postulates of Euclid were as follows: (1) that a straight line may be drawn between any two points; (2) that any terminated straight line may be produced indefinitely; (3) that about any point as a center a circle with any radius may be described; (4) that all right angles are equal; (5) that if two straight lines

lying in a plane are met by another line, making the sum of the internal angles on one side less than two right angles, then those straight lines will meet, if sufficiently produced, on the side on which the sum of the angles is less than two right angles. See *axiom*.

'Tis a *postulate* to me that Methusalem was the longest lived of all the children of Adam.
Sir T. Browne, Religio Medici, i. 22.

When you assume a premise without demonstrating it, though it be really demonstrable, this, if the learner is favorable and willing to grant it, is an assumption or hypothesis valid relatively to him alone, but not valid absolutely; if he is reluctant or adverse, it is a *postulate*, which you claim whether he is satisfied or not. *Grote*, Aristotle, vii.

3. A self-evident practical proposition, to the effect that something is possible: opposed to an *axiom*, as a self-evident proposition that something is impossible. The fourth and fifth of Euclid's postulates (see def. 2) being converted into axioms in the modern editions, and his proved propositions being distinguished into theorems and problems, this new conception of a postulate naturally arose.

Before the injunction — Do this, there necessarily comes the *postulate* — It can be done. *H. Spencer*, Social Statics.

4. A condition for the accomplishment of anything.

The earnestness with which peace is insisted on as a *postulate* of civic well-being shows what the experience had been out of which Dante had constructed his theory.
Lowell, Among my Books, 2d ser., p. 29.

postulate† (pos'tū-lāt), *a.* [< L. *postulatus*, pp.: see *postulate*, *v.*] Postulated; assumed.

And if she [Nature] ever gave that boon
To man, I'll prove that I have one:
I mean, by *postulate* illation [that is, begging the question].
S. Butler, Hudibras, II. i. 763.

postulation (pos-tū-lā'shon), *n.* [< F. *postulation* = Sp. *postulación* = Pg. *postulação* = It. *postulazione*, < L. *postulatio*(*n*-), a demanding, < *postulare*, demand: see *postulate*, *v.*] 1. Supplication; prayer. [Rare.]

Presenting his *postulations* at the throne of God.
Bp. Pearson, Expos. of Creed. (*Latham.*)

2. The act of postulating, or assuming without proof; supposition; assumption.

I must have a second *postulation*, that must have an ingredient to elicit my assent, namely, the veracity of him that reports and relates it.
Sir M. Hale, Orig. of Mankind, p. 129.

3. In *eccles. law*, the presentation or election to any office of one who is in some way disqualified for the appointment.

By this means the cardinal's *postulation* was defective, since he had not two-thirds [of the voices].
Bp. Burnet, Hist. Own Time, an. 1688.

Nicolas IV. ordered that all *postulations*, that is, elections of persons disqualified, including translations, should be personally sued out at Rome.
Stubbs, Const. Hist., § 383, note.

postulatory (pos'tū-lā-tō-ri), *a.* [= Pg. It. *postulatorio*, < L. *postulatorius*, < *postulator*, one who demands or claims, < *postulare*, demand: see *postulate*, *v.*] 1. Supplicatory. [Rare.]

He easily recovers the courage to turn that deprecatory prayer into a *postulatory* one.
Clarendon, Tracts, 392. (*Latham.*)

2. Postulating; assuming without proof. *Johnson.* — 3. Assumed without proof. *Sir T. Browne*, Vulg. Err., ii. 6.

postulatum (pos-tū-lā'tum), *n.*; pl. *postulata* (-tă). [L.: see *postulate*, *n.*] A postulate.

postumbonal (pōst-um'bō-nal), *a.* [< L. *post*, behind, + NL. *umbo*(*n*-), umbo: see *umbo*.] In *conch.*, situated behind the umbo. See *Pholas*.

postume[1]†, *n.* [ME.: see *apostem*.] Same as *impostume*. *Chaucer*, Boëthius, iii. prose 4.

postume[2]†, *a.* See *posthume*.

postural (pos'tū-ral), *a.* [< *posture* + *-al*.] Pertaining or relating to posture: as, the *postural* ★treatment of a fractured limb. *Dunglison*.

posture (pos'tūr), *n.* [Formerly also *positure* (< L.); < F. *posture* = Sp. *postura*, *positura* = Pg. *postura* = It. *postura*, *positura*, < L. *positura*, position, posture: see *positure*.] 1. Position; situation; condition; state: as, the *posture* of public affairs.

This growing *posture* of affairs is fed by the natural depravity. *Bacon*, Political Fables, viii., Expl.

Concerning the *Posture* of Things here, we are still involved in a Cloud of Confusion, 'specially touching Church Matters. *Howell*, Letters, iv. 44.

They do speak very sorrowfully of the *posture* of the times. *Pepys*, Diary, III. 156.

Everybody clamored around the governor, imploring him to put the city in a complete *posture* of defence.
Irving, Knickerbocker, p. 223.

2. The disposition of the several parts of anything with respect to one another, or with respect to a particular purpose; especially, position of the body as a whole, or of its members; attitude; pose.

Some strange commotion
Is in his brain: he bites his lip and starts;
Stops on a sudden; . . . in most strange *postures*
We have seen him set himself.
Shak., Hen. VIII., iii. 2. 118.

The statues of the Sibyls are very finely wrought, each of them in a different air and *posture*, as are likewise those of the prophets underneath them.
Addison, Remarks on Italy (ed. Bohn), I. 409.

3†. Disposition; attitude of mind.

A good Christian . . . must always be in a travelling *posture*, and so taste sensual pleasures as one that is about to leave them. *Bp. Atterbury*, Sermons, I. xi.

=Syn. 2. *Position*, *Posture*, *Attitude*, *Pose*. These words agree in expressing the manner of standing, sitting, lying, etc. The first three may be used in a figurative sense: as, my *position* on that question is this; his *attitude* was one of hostility to the measure. *Position* is the most general word, and is applicable to persons or things. *Posture* is generally natural, and may be awkward. *Attitude* is generally studied for the sake of looking graceful; hence it is sometimes affected, the practice of it being then called *attitudinizing*. An *attitude* is often taken intentionally for the purpose of imitation or exemplification; generally *attitude* is more artistic than *posture*. *Posture* is generally used of the whole body; *attitude* has more liberty in referring to the parts of the body, especially the head; but *position* is more common in such cases. *Pose* is now confined to artistic positions, taken generally for effect, of part or the whole of a body or representation of a body, as a statue or a picture.

The absolute *position* of the parties has been altered; the relative *position* remains unchanged.
Macaulay, War of the Succession in Spain.

I have seen the goats on Mount Pentelicus scatter at the approach of a stranger, climb to the sharp points of projecting rocks, and attitudinize in the most self-conscious manner, striking at once those picturesque *postures* against the sky with which Oriental pictures have made us . . . familiar. *C. D. Warner*, In the Wilderness, iv.

It is the business of a painter in his choice of *attitudes* to foresee the effect and harmony of the lights and shadows with the colours which are to enter into the whole.
Dryden, tr. of Dufresnoy's Art of Painting, § 4.

Placed, . . . with the instinct of a finished artist, in the best light and most effective *pose*.
Lathrop, Spanish Vistas, p. 108.

posture (pos'tūr), *v.*; pret. and pp. *postured*, ppr. *posturing*. [< *posture*, *n.*] **I.** *trans.* 1. To place; set.

As pointed Diamonds, being set,
Cast greater Lustre out of Jet,
Those Pieces we esteem'd most rare
Which in Night-shadows *postur'd* are.
Howell, Letters, I. v. 22.

2. To place in a particular attitude; dispose for a particular purpose.

He was raw with *posturing* himself according to the direction of the chirurgeons. *Brook.*

II. *intrans.* 1. To dispose the body in a particular posture or attitude; put one's self in an artificial posture; specifically, to contort one's self.

What is meant by *posturing* is the distortion of the limbs, such as doing the splits, and putting your leg over your head, and pulling it down your back, . . . and such like business.
Mayhew, London Labour and London Poor, III. 98.

2. To assume an artificial position of the mind or character; change the natural mental attitude; hence, to be affected; display affectation.

Not proud humilities of sense
And *posturing* of penitence,
But love's unforced obedience.
Whittier, The Meeting.

She had forced her intelligence to *posture* before her will, as the exigencies of her place required.
O. W. Holmes, Elsie Venner, viii.

They are so affected! . . . You would say that they *posture* before the whole universe.
E. Schuyler, tr. of Turgénieff's Fathers and Sons, x.

posture-maker (pos'tūr-mā″kėr), *n.* A contortionist; an acrobat.

I would fain ask any of the present mismanagers — why should not rope-dancers, vaulters, tumblers, ladderwalkers, and *posturemakers* appear again on our stage?
Steele, Spectator, No. 258.

posture-making (pos'tūr-mā″king), *n.* The art or practice of posturing, or making contortions of the body.

Your comedy and mine will have been played then, and we shall be removed, O how far, from the trumpets, and the shouting, and the *posture-making!*
Thackeray, Vanity Fair, lxi.

posture-master† (pos'tūr-mās″tėr), *n.* Same as *posture-maker*.

Posture masters, as the acrobats were then called, abounded, and one of the chief among them was Higgins, . . . who could dislocate and deform himself at pleasure.
J. Ashton, Social Life in Reign of Queen Anne, I. 280.

posturer (pos'tūr-ėr), *n.* [< *posture* + *-er*[1].] A posture-maker; an acrobat.

postvide† (pōst-vīd'), *v. i.* [< L. *post*, after, + *videre*, see.] To take measures too late: opposed to *provide*.

"When the daughter is stolen, shut Peppergate;" . . . when men instead of preventing *postvide* against dangers.
Fuller, Worthies Chester, I. 200. (*Davies.*)

post-wagon (pōst'wag″on), *n.* A wagon for posting; a stage-wagon; a diligence.

We took our leave of those friends that had accompanied us thither, and began our journey in the common *post-wagon* to Osnabrug, where we came the fourth day following in the evening.
Penn, Travels in Holland, etc. (Works, III. 394).

postward (pōst'wärd), *adv.* [< *post*[2] + *-ward*.] Toward the post.

post-warrant† (pōst'wor″ant), *n.* An official warrant for accommodation for one traveling by post; a passport.

For better Assurance of Lodging where I pass, in regard of the Plague, I have a *Post-Warrant* as far as Saint David's: which is far enough, you will say, for the King hath no Ground further on this Island. *Howell*, Letters, I. iv. 23.

post-windlass (pōst'wind″las), *n.* A winding-machine worked by brakes or handspikes which have a reciprocating movement. *E. H. Knight.*

postzygapophysis (pōst-zī-ga-pof'i-sis), *n.*; pl. *postzygapophyses* (-sēz). [NL., < L. *post*, after, + NL. *zygapophysis*.] In *anat.* and *zoöl.*, an inferior or posterior zygapophysis; in man, an inferior oblique or articular process of a vertebra: opposed to *prezygapophysis*. See cuts under *lumbar*, *vertebra*, *dorsal*, and *zygantrum*.

posy (pō'zi), *n.*; pl. *posies* (-ziz). [Contr. of *poesy*, q. v.] 1. A verse of poetry attached to or inscribed on a ring, knife, or other object; hence, in general, a motto; an epigram; a legend; a short inscription.

And the tente was replenyshed and decked with this *posie:* After busy labor commeth victorious rest.
Hall, Hen. V., an. 7.

We call them [short epigrams] *Posies*, and do paint them now a dayes vpon the backe sides of our fruite trenchers of wood, or vse them as deuises in rings and armes and about such courtly purposes.
Puttenham, Arte of Eng. Poesie, p. 47.

A hoop of gold, a paltry ring
That she did give me, whose *posy* was
For all the world like cutler's poetry,
Upon a knife, "Love me, and leave me not."
Shak., M. of V., v. 1. 148.

2. A bunch of flowers, or a single flower; a nosegay; a bouquet. [Perhaps so called from the custom of sending verses with flowers as gifts.]

And I will make thee beds of roses,
And a thousand fragrant *posies*.
Marlowe, Passionate Shepherd to his Love.

Nature pick'd several flowers from her choice banks,
And bound 'em up in thee, sending thee forth
A *posy* for the bosom of a queen.
Fletcher (*and another*), Queen of Corinth, iii. 1.

Y' are the maiden *posies*,
And so grac't
To be plac't
'Fore damask roses. *Herrick*, To Violets.

A girl came with violet *posies*, and two
Gentle eyes, like her violets, freshened with dew.
F. Locker, Mr. Placid's Flirtation.

posy-ring (pō'zi-ring), *n.* A ring inscribed with a posy or short poetical motto. In some cases the posy consists of a single word formed by the initial letters of stones set around the ring. Also called ★*chanson*.

pot[1] (pot), *n.* [< ME. *pot*, *potte*, < AS. *pott* = OFries. *pot* = D. *pot* = MLG. *pot*, *put*, LG. *pot* (> G. *pott*) = Icel. *pottr* = Sw. *potta* = Dan. *pot*, *potte*, a pot. The F. *pot*, Pr. *pot*, Sp. Pg. *pote*, ML. *pottus*, *potus*, and the Ir. *pota*, Gael. *poit*, W. *pot*, Bret. *pōd*, are appar. all from LG. or E., but the word must have originated from the L. *pōculum*, *pōclum* (orig. **pōclom*, **pō-tlo-m*), a drinking-cup, < L. *potare*, drink: see *potation*.] 1. A vessel of earth, iron, brass, or other metal, usually of circular section and in shape rather deep than broad, employed for domestic and other purposes. (*a*) A vessel used in cooking, generally made of metal.

As the crackling of thorns under a *pot*, so is the laughter of the fool. Eccl. vii. 6.

(*b*) An earthen vessel, often for holding something distinctively specified; a jar or jug: as, a flower-*pot;* a cream-*pot.*

For he caused of all kindes of serpentes to be put into earthen *pots*, the whiche in the middes of the battell were cast into the enemyes shippes.
Golding, tr. of Justine, fol. 131.

Potamogale (pot-a-mog'a-lē), *n.* [NL. (Du Chaillu, 1860), < Gr. ποταμός, river, + γαλῆ, contr. of γαλέη, a weasel.] The typical genus of the family *Potamogalidæ;* the otter-shrews. The tibia and fibula are ankylosed, the muzzle is broad and flat with valvular nostrils, the limbs are short, the feet are not webbed, and the long cylindroid body is continued into the thick vertically flattened tail, which constitutes a powerful swimming-organ. The dental formula is 3 incisors, 1 canine, 3 premolars, and 3 molars in each half-jaw. *P. velox*, the only species known, is a large animal (for this order), being about 2 feet long, of which the tail is about half, dark-brown above and whitish below, of aquatic habits, and in general resembling a small otter, whence the name *otter-shrew.*

Potamogalidæ (pot″a-mō-gal'i-dē), *n. pl.* [NL., < *Potamogale* + *-idæ.*] A family of aquatic mammals of the order *Insectivora*, of equatorial Africa, containing the genus *Potamogale;* the otter-shrews.

Potamogeton (pot″a-mō-jē'ton), *n.* [NL. (Tournefort, 1700), < L. *potamogeton*, < Gr. ποταμογείτων, pondweed, < ποταμός, river, + γείτων, neighbor, inhabitant.] A genus of monocotyledonous fresh-water plants, the pondweeds, type of the family *Potamogetonaceæ.* Distinguished from the allied genus *Ruppia* by the sessile nutlets and also by the presence of a calyx, and further characterized by its numerical plan in fours, each flower with four roundish sepals, four stamens, four styles, and four distinct ovaries producing four small rounded drupes or nutlets, each with a thick, rigid, or spongy pericarp, and a single seed containing an annular or spirally coiled embryo. There are about 68 species, scattered throughout the world, growing in still rivers, ponds, and lakes, with one or two in brackish waters. (See *pondweed.*) A few species have acquired other names in local use, as, in England, *P. densus*, the frog's lettuce or water-caltrops, and *P. natans*, the tench-weed or deil's-spoons, and in America *P. amplifolius*, the cornstalk-weed. (See *heterophyllous*, I.) A large number of aquatic plants, supposed to belong to the genus *Potamogeton*, have been described under that name by paleobotanists; they come from various regions, and from several divisions of the Tertiary.

potamography (pot-a-mog'ra-fi), *n.* [= F. *potamographie* = It. *potamografia;* < Gr. ποταμός, river, + *-γραφία*, < γράφειν, write.] A description of rivers.

potamological (pot″a-mō-loj'i-kal), *a.* [< *potamology* + *-ic-al.*] Of or pertaining to potamology: as, a *potamological* table.

potamology (pot-a-mol′ǫ-ji), *n.* [< Gr. *ποταμός*, river, + *-λογία*, < *λέγειν*, say: see *-ology*.] The science or scientific study of rivers; also, a treatise on rivers.

potance (pō′tans), *n.* See *potence*.

potargo† (pō-tär′gō), *n.* Same as *botargo*.

> There 's a fishmonger's boy with caviare, sir,
> Anchovies, and *potargo*, to make you drink.
> *Fletcher (and another)*, Elder Brother, iii. 3.

★**potash** (pot′ash), *n.* [= D. *potasch* = G. *pottasche* = Sw. *pottaska* = Dan. *potaske*; as *pot*[1] + *ash*[1]. The F. *potasse* = Sp. *potasa* = Pg. It. *potassa*, with NL. *potassa*, are from G. or E.] A substance obtained by leaching wood-ashes, evaporating the solution obtained, and calcining the residuum; one of the fixed alkalis; the so-called vegetable alkali; more or less impure or crude potassium carbonate, or carbonate of potash as formerly generally (and still very frequently) designated. The name is also applied to potassium hydroxid or caustic potash. Potash-salts play a most important part in vegetable life, existing in all plants in various proportions, and in various combinations with both inorganic and organic acids. When plants are burned, the inorganic constituents remain behind in the ashes, and it is by the lixiviation or leaching of these ashes that potash was first obtained, a process with which the Greeks and Romans were acquainted, although they were unable clearly to distinguish potash from soda, calling them both by the same name (*νίτρον*, nitrum). The name *potash* is of comparatively modern origin, and is derived from the fact that the potassiferous solution from wood-ashes was boiled down or concentrated in pots. It was not until about the middle of the eighteenth century that the two alkalis, soda and potash, were clearly distinguished from each other; but they were considered to be simple substances until after the beginning of the nineteenth century, when their metallic bases were separated from them by Davy (1807–8). Up to comparatively recent times the potash compounds used in the arts—and they are numerous and of great importance—were chiefly obtained in the form of crude potash after the method indicated as having given origin to the name of this alkali, and this method is still in use, although much less important than it formerly was. Saltpeter, or the nitrate of potash, had been long known, and obtained in a very different way. (See *saltpeter*.) Since the beginning of the present century potash has been obtained in considerable quantity from the refuse of beet-root used in the manufacture of sugar, and from sheep's wool. It has also been got (in the form of the chlorid) from sea-water; but the most important source of supply is the region near Stassfurt in Prussia, where two minerals containing potassic compounds (carnallite, a double chlorid of potassium and magnesium, and cænite, containing sulphates of potash and magnesia with chlorid or magnesium) are found in abundance, and mined on a large scale. From these naturally occurring potassiferous compounds all the various salts of potash used in the arts are manufactured, and it is by using the potash-salts obtained at Stassfurt that the Chili saltpeter (nitrate of soda) is converted into common saltpeter or niter (nitrate of potash), a substance important as the principal ingredient in the manufacture of gunpowder.—**Caustic potash.** See *caustic*.—**Fish and potash-salts.** See *fish*[1].—**Lump-potash,** the trade-name for a crude potash containing about 8 per cent. of water.—**Potash alum.** See *alum*.—**Potash feldspar.** See *orthoclase, microcline, feldspar*.—**Potash kettle country.** See *kettle-moraine*.—**Potash lye,** the strong aqueous solution of caustic potash or of potassium carbonate.—**Potash mica.** See *muscovite*, 2, *mica*[2].—**Potash-water,** an aërated beverage consisting of carbonic-acid water to which is added potassium bicarbonate.

potass (pō-tas′), *n.* [< F. *potasse*, < NL. *potassa*: see *potassa*.] Same as *potash*.

potassa (pō-tas′ä), *n.* [NL.: see *potash*.] Potash.

potassamide, potassiamide (pot-as-am′id, pō-tas-i-am′id), *n.* [< NL. *potassium* + E. *amide*.] An olive-green compound (KNH_2) formed by heating potassium in ammonia gas.

potassic[1] (pō-tas′ik), *a.* [= F. *potassique*; as *potassium* + *-ic*.] Relating to potassium; containing potassium as an ingredient.

potassic[2] (pō-tas′ik), *a.* [< *potassa* + *-ic*.] Consisting of or related to potash.

potassiferous (pot-a-sif′e-rus), *a.* [< NL. *potassa*, potash, + L. *ferre* = E. *bear*[1].] Containing or yielding potash or potassic salts.

★**potassium** (pō-tas′i-um), *n.* [= F. *potassium* = Sp. *potasio* = Pg. *potassio, potassium* = It. *potassio*; < NL. *potassium*, < *potassa*, potash: see *potassa*.] Chemical symbol, K (for *kalium*); atomic weight, 39.10. The metallic base of the alkali potash, a substance not occurring uncombined in nature, but in various combinations widely diffused and of the highest importance. See *potash*. Potassium is silvery-white, and has a decided metallic luster. Its specific gravity is 0.875, and it is the lightest of all the metals with the exception of lithium. At the freezing-point of water it is brittle and has a crystalline fracture; at the ordinary temperature it is soft and may easily be cut with the knife. It was first obtained by Davy, in 1807, by the electrolysis of potash; but its preparation in the large way is effected by the ignition of a mixture of charcoal and potassium carbonate in a mercury bottle or iron tube coated with clay. In perfectly pure and dry air it undergoes no change; but in ordinary air it soon becomes coated with a film of potassium hydrate and carbonate. Its affinity for water is so great that when brought into contact with it immediate decomposition is effected, and sufficient heat evolved to set on fire the liberated hydrogen, which burns with the characteristic violet flame of potassium. Next to cæsium and rubidium it is the most electropositive element. It is a most powerful reducing agent, and hence has been largely employed for separating other metals from their various combinations; but at the present time sodium, being cheaper, is more generally employed for that purpose. Among the most important salts of potassium are the *chlorid* or *muriate*, KCl, mined at Stassfurt, Germany, and used as a fertilizer as well as the starting-point for the manufacture of other potash-salts; *potassium chlorate*, $KClO_3$, which is used in the arts as an oxidizing agent and in the manufacture of explosives; *potassium nitrate*, KNO_3, niter or saltpeter, made at present by the double decomposition of sodium nitrate and potassium chlorid, which is used in medicine and pyrotechny, but chiefly in the manufacture of gunpowder; *potassium carbonate*, K_2CO_3, which, under the commercial names of *potash* and *pearlash*, is largely used in the manufacture of soap and glass, and as a basis for making other potash-salts; *potassium cyanide*, KCN, a violent poison, used in photography and as a reducing agent; and *potassium bichromate*, $K_2Cr_2O_7$, red chromate of potash, much used in dyeing and calico-printing.—**Carbovinate of potassium,** more properly *ethyl-potassium carbonate*, $C_2H_5K.CO_3$, a white crystalline ether obtained by the action of carbon dioxid upon perfectly dry potassium hydrate in absolute alcohol.—**Cobalticyanide of potassium.** See *cobalticyanide*.—**Potassium bitartrate.** Same as *cream of tartar* (which see, under *cream*[1]).—**Potassium-chlorate battery,** an electric battery in which depolarization is produced by means of potassium chlorate with sulphuric acid.—**Potassium cyanide, ferrocyanide, myronate,** etc. See *cyanide*, etc.

potate†, *a.* [< L. *potatus*, pp. of *potare*, drink: see *potation*.] In *alchemy*, liquefied, as a metal; potable.

> Eight, nine, ten days hence
> He [Mercury] will be silver *potate*, then three days
> Before he citronize. *B. Jonson*, Alchemist, iii. 2.

potation (pō-tā′shǫn), *n.* [< OF. *potation, potacion* = OSp. *potacion* = It. *potagione, potazione*, < L. *potatio(n-)*, a drinking, < *potare*, pp. *potatus*, drink (= Ir. *potaim*, I drink); cf. *potus*, drunken (= Gr. *ποτός*, drunk: see below), *potus* (*potu-*), a drinking, *potio(n-)*, a drinking, drink; < √ *po* = Gr. √ *πο* in *ποτός*, drunk, for drinking (neut. *ποτόν*, what is drunk, drink), *πότος*, a drinking, prob. *ποταμός*, river, stream, √ *πι* in *πίνειν*, drink, = Skt. √ *pā*, drink. From the same (L.) source are ult. *potable, potion, poison, compotation*, and (from Gr.) *symposium*, etc.] 1. The act of drinking; drinking.

> Upon the account of these words so expounded by some of the fathers concerning oral manducation and *potation*, they believe themselves bound by the same necessity to give the eucharist to infants as to give them baptism.
> *Jer. Taylor*, On the Real Presence, iii. 3.

2. A drinking-bout; a drinking-party; a compotation; especially, an annual entertainment formerly given by schoolmasters to their pupils. See *potation-penny*.

> If I had a thousand sons, the first humane principle I would teach them should be, to forswear thin *potations* and to addict themselves to sack.
> *Shak.*, 2 Hen. IV., iv. 3. 135.

potation-penny (pō-tā′shǫn-pen″i), *n.* Money paid by the scholars or their friends to the master of a school to enable him to give an entertainment (usually in Lent) to the scholars on quitting school. In some counties of England this is still continued, and is called "the drinking." *Wharton*, Hist. Manchester Grammar School, p. 25.

> Under the head of Manchester School, Carlisle gives a copy of an indenture of feoffment by Hugh Bexwyke and Johnne Bexwyke, on April 1, 1524, containing ordinances, one of which is: "Item, that every schoolmaster . . . shall teach freely . . . without any money or other rewards taken therefore, as Cock-penny, Victor-penny, *Potation penny*, or any other whatsoever it be" (vol. i. p. 677).

★**potato** (pō-tā′tō), *n.*; pl. *potatoes* (-tōz). [Early mod. E. also *potatoe, pottatoe, potatus, potades* (quasi NL.); also *botatas* = G. *potate*, sweet potato, = Dan. *potet, potetes* = Sw. *potät, potates, potatis*, white potato (< E.); = F. *patate*, sweet potato (cf. *pomme de terre*, 'earth-apple,' white potato), < Sp. *patata*, white potato, *batata*, sweet potato, = Pg. *batata*, sweet potato (NL. *batatas*), < Haytian *batata*, sweet potato.] 1†. The sweet potato. See below. [This was the original application of the name, and it is in this sense that the word is generally to be understood when used by English writers down to the middle of the seventeenth century.]

> This Plant (which is called of some Sisarum Peruvianum, or Skyrrets of Peru) is generally of us called *Potatus* or *Potato's*. It hath long rough flexible branches trailing upon the ground, like unto those of Pompions, whereupon are set greene three cornered leaves very like those of the wilde Cucumber. . . . Clusius calleth it Batata, Camotes, Amotes, and Ignames: in English, *Potatoes, Potatus*, and *Potades*. *Gerarde*, Herball (1636), Of *Potato's*.

> Candied *potatoes* are Athenians' meat.
> *Marston*, Scourge of Villanie, iii.

2. One of the esculent tubers of the common plant *Solanum tuberosum*, or the plant itself. The potato is a native of the Andes, particularly in Chili and Peru, but in the variant *boreale* it reaches north to New Mexico. It was probably first introduced into Europe from the region of Quito by the Spaniards, about the middle of the sixteenth century. In 1586 it was brought to England from Virginia, where, however, it was probably derived from a Spanish source. Its progress in Europe was slow, its culture, even in Ireland, not becoming general till the middle of the eighteenth century; but it is now a staple food in most temperate climates. The fruit of the potato-plant is a worthless green berry; its useful product is the underground tubers, which in the wild plant are small, but are much enlarged under cultivation. These tubers, which are of a roundish or oblong shape, sometimes flattish, are set with "eyes," really the axils of rudimentary leaves, containing ordinarily several buds, and it is by means of these that the plant is usually propagated. The food-value of the potato lies mostly in starch, of which it contains from 15 to 20 or 25 per cent. It is deficient in albuminoids and phosphates. Besides their ordinary food-use, potatoes are a source of manufactured starch; and spirits are now distilled from them to a considerable extent, chiefly in Germany. The tops (in America called *vines*, in England *halms*, in Scotland *shaws*) contain, together with the fruit, a poisonous alkaloid, solanin, absent in the tubers except when exposed to the sun. The varieties of the potato are numerous. The crop is often seriously injured by the potato-beetle and the potato-rot. To distinguish it from the yellow sweet potato, this plant is sometimes called *white potato* or (from its being one of the chief food-staples in Ireland) *Irish potato*.

> Virginian *Potato* hath many hollow flexible branches trailing upon the ground, three square, uneven, knotted or kneed in sundry places at certaine distances: from the which knots cometh forth one great leaf made of divers leaves. . . . Because it hath not only the shape and proportion of Potato's, but also the pleasant taste and vertues of the same, we may call it in English *Potatoes* of America or Virginia.
> *Gerarde*, Herball (1636), Of *Potatoes* of Virginia.

> They dygge also owte of the ground certeyne rootes growynge of theim selues, whiche they caule *Botatas*. . . . The skyn is sumwhat towgher than eyther of nauies or mussheroms, and of earthy coloure: But the inner meate thereof is verye whyte.
> *Peter Martyr* (tr. in Eden's First Books on America, ed. [Arber, p. 131).

> I took to attendin' Baptist meetin', because the Presbyterian *minister* here is such *small potatoes* that 't wan't edifying to sit under his preachin'.
> *Mrs. Whitcher*, Widow Bedott Papers, p. 188.

Spanish potato, the sweet potato.—**Sweet potato.** (*a*) A plant of the convolvulus family, *Ipomœa Batatas*, or one of its spindle-shaped fleshy esculent roots. The plant is a creeping, rarely twining, vine, with variously heart-shaped, halberd-shaped, or triangular (sometimes cut-lobed) leaves, and a blossom like that of the common morning-glory, but less open, and rose-purple with a white border. Its value lies in the roots, which are richer in starch, and still more in sugar, than the common potato. Their use is very much that of the latter, but in Mexico they are said to be regarded as a sweetmeat, and in Spain they are made into a preserve. They are red, yellow, or white in different varieties, and range in weight from that of the common potato up to many pounds. A variety in the southern United States is called *yam*. The sweet potato appears to have originated in tropical America, but is referred by some to the East Indies, or to both hemispheres. It is widely cultivated in warm climates, and is successfully grown in the United States as far north as New Jersey and Illinois, and even Michigan. (*b*) In Bengal, the yam.—**Telinga potato,** *Candarum campanulatus*, an araceous plant much cultivated in India for its esculent tubers.—**White potato.** See def. 2.—

Wild potato, in Jamaica, *Ipomœa fastigiata,* a tuber-bearing plant, unlike the sweet potato in its climbing habit.

★**potato-beetle** (pō-tā′tō-bē″tl), *n.* A chrysomelid beetle, the *Leptinotarsa decemlineata,* which up to 1855 or 1856 lived in the Rocky Mountain region, feeding upon the wild *Solanum rostratum,* but which, as the cultivated potato reached its habitat, increased enormously and began to spread to the east. In 1874 it reached the Atlantic coast at several points, and it has since been a pest in almost the entire country. It has several times made its way to Europe, but has been stamped out. Both larva and beetle feed upon the leaves of the potato, and the pupa is formed in the earth at the foot of the plant. There are three generations annually, and the perfect beetles hibernate. The most common and effective remedy is Paris green. See cut under *beetle*[2].

potato-bing (pō-tā′tō-bing), *n.* A heap of potatoes. [Scotch.]

> *Potato-bings* are snugged up frae skaith
> Of coming Winter's biting frosty breath.
> *Burns,* Brigs of Ayr.

potato-blight (pō-tā′tō-blīt), *n.* See *potato-rot.*

potato-bogle (pō-tā′tō-bō″gl), *n.* A scarecrow. [Prov. Eng. and Scotch.]

potato-bread (pō-tā′tō-bred), *n.* A bread made of potatoes which have been boiled, pressed till they are dry, beaten up, kneaded with wheat-flour, aniseed, and yeast, and then baked.

potato-bug (pō-tā′tō-bug), *n.* Same as ★*potato-beetle.*

potato-digger (pō-tā′tō-dig″ėr), *n.* An implement, resembling a plow, used to remove potatoes from the ground. Some of these implements simply leave the potatoes on the surface, others screen the earth from the tubers, and other more complicated machines remove the potatoes from the soil, divest them of adherent earth, and deposit them in a receptacle.

potato-disease (pō-tā′tō-di-zez″), *n.* See *potato-rot.*

potato-eel (pō-tā′tō-ēl), *n.* A small threadworm or nematoid, of the family *Anguillulidæ,* infesting the potato.

potato-fern (pō-tā′tō-fėrn), *n.* A New Zealand fern, *Marattia fraxinea.* Its rootstock is a rounded, hard, fleshy mass, as large as the head, roasted and eaten by the natives, who call it *para.*

potato-finger† (pō-tā′tō-fing″gėr), *n.* A long thick finger, like a sweet potato: used in a loose, contemptuous sense. It is otherwise explained as 'a provocative.' [Rare.]

> How the devil Luxury, with his fat rump and *potato-finger,* tickles these together! *Shak.,* T. and C., v. 2. 56.

potato-fungus (pō-tā′tō-fung″gus), *n.* See *potato-rot.*

potato-grant (pō-tā′tō-grȧnt), *n.* A patch of land for growing vegetables, formerly granted by the owner to each of his slaves. *Bartlett.* [West Indies.]

potato-hook (pō-tā′tō-hůk), *n.* A hand-tool with bent fork-like tines, used for digging potatoes from the ground.

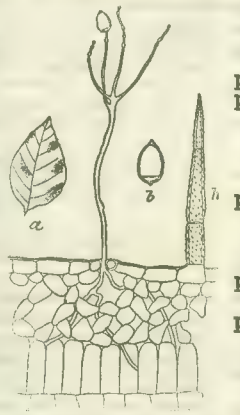
potato-mold (pō-tā′tō-mōld), *n.* Same as *potato-rot.*

potato-murrain (pō-tā′tō-mur″ạn), *n.* The potato-rot.

potato-oat (pō-tā′tō-ōt), *n.* A variety of the common oat. See *oat,* 1 (*a*).

potato-oil (pō-tā′tō-oil), *n.* Same as *oil of potatoes* (which see, under *potato*).

potato-onion (pō-tā′tō-un″yọn), *n.* See *Egyptian onion,* under *onion.*



potato-pen (pō-tā′tō-pen), *n.* *Naut.,* a wooden compartment or pen on deck, built with a view to thorough ventilation, for keeping potatoes and other vegetables during a voyage.

★**potato-planter** (pō-tā′tō-plan″tėr), *n.* An implement for planting seed-potatoes and covering them with soil. A planting-share plows a furrow, into which the potatoes are dropped by an automatic device, and a following covering-share turns the soil over them.

potator (pō-tā′tọr), *n.* [= OF. *potateur* = It. *potatore,* < L. *potator,* a drinker, < *potare,* pp. *potatus,* drink: see *potation.*] A drinker.

> Barnabee, the illustrious *potator,* saw there the most unbecoming sight that he met with in all his travels.
> *Southey,* The Doctor, xliv. (*Davies.*)

potato-rot (pō-tā′tō-rot), *n.* A very destructive disease of the potato, caused by a parasitic fungus, *Phytophthora infestans.* It seems to have been introduced from South America, about the year 1840, and since that time has been the cause of very serious losses, sometimes involving almost the entire crop. The fungus attacks the stem and leaves as well as the tubers, and when confined to the leaves and stem is usually called *potato-blight.* On the leaves it first appears as pale-yellowish spots, which soon turn brown and finally black, indicating the total destruction of the tissues. On the tubers the parasite attains a considerable growth within the tissues before there is any external manifestation of its presence. After a time depressed spots appear, and the skin covering these dies and becomes discolored. Underlying these spots the tissue will be found to be dark-colored to a considerable depth. The flesh in the center of the tuber may remain for some time healthy and normal, but in the end it also decays, with either dry or wet rot. See *Phytophthora* and *mildew.*

potatory (pō′tā-tọ-ri), *a.* [< LL. *potatorius,* belonging to drinking, < L. *potator,* a drinker, < *potare,* pp. *potatus,* drink: see *potation.*] Potable; drinkable. [Rare.]

> I attempted the soup, and . . . helped myself to the *potatory* food with a slow dignity that must have perfectly won the heart of the solemn waiter.
> *Bulwer,* Pelham, xxxix.

potato-scoop (pō-tā′tō-skōp), *n.* A hand-screen in the form of a grated shovel for taking up potatoes which have been dug by a potato-digger. The soil sifts through the grating-bars, which detain the tubers.

potato-spirit (pō-tā′tō-spir″it), *n.* An alcohol distilled from potatoes: it is made chiefly in Germany.—**Potato-spirit oil.** See *oil.*

potato-sugar (pō-tā′tō-shůg″ạr), *n.* A sugar obtained from the starch of potatoes.

potato-vine (pō-tā′tō-vīn), *n.* The potato-plant, especially the part above ground. [U. S.]—**Wild potato-vine.** See *Ipomœa* and *man-of-the-earth.*

pot-barley (pot′bär″li), *n.* See *barley*[1].

pot-bellied (pot′bel″id), *a.* Having a prominent belly; abdominous.

> He appears to be near forty; a little *pot-bellied* and thick-shouldered, otherwise no bad figure.
> *Gray,* To Mason. (*Latham.*)

pot-belly (pot′bel″i), *n.* **1.** A protuberant belly.—**2.** A person having a protuberant belly.

> He will find himself a forked straddling animal, and a *pot-belly.* *Arbuthnot and Pope.*

3. The lake-trout, *Cristivomer namaycush.* [Lake Huron.]

pot-boiler (pot′boi″lėr), *n.* **1.** A work of art or literature produced merely "to keep the pot boiling"—that is, for the sake of providing the necessaries of life.

> His [Raff's] very fertility is a misfortune; . . . writing *pot-boilers* has injured the development of a delicate feeling for what is lofty and refined.
> *Grove's Dict. Music,* III. 65.

> Murillo executed a few portraits about the time he was painting *pot-boilers* for sale at fairs and to sea-captains.
> *The American,* XIV. 301.

2. A housekeeper. Compare *pot-waller, pot-walloper.* *Halliwell.* [Prov. Eng.]

pot-boiling (pot′boi″ling), *n.* The practice of producing pot-boilers; working for a living rather than for love of art.

> Most earnestly is it to be hoped that a writer who has the faculty displayed in this book will not, like so many of his contemporaries, dissipate it in *pot-boiling* on a colossal scale. *The Academy,* July 20, 1889, p. 34.

pot-boy (pot′boi), *n.* A boy or man who has the charge of beer-pots. (*a*) An attendant on a bar; a man who assists the bartender in serving customers with porter, ale, or beer. (*b*) One who carries beer or ale in pots to customers, or for sale to passers-by. [Eng.]

> I could get a *pot-boy's* place again, but I'm not so strong as I were, and it 's slavish work in the place I could get.
> *Mayhew,* London Labour and London Poor, II. 17.

pot-cake (pot′kāk), *n.* A light Norfolk dumpling. *Halliwell.*

pot-celt (pot′selt), *n.* A celt having the hollow or opening comparatively large. This form of celt was long thought to be an ax-head, but is now regarded as a ferrule. See *amgarn.*

potch[1] (poch), *v. i.* A variant of *poach*[1].

potch[2]† (poch), *v. t.* An obsolete form of *poach*[3].

potch[3] (poch), *v. t.* In *paper-manuf.,* to perform gas-bleaching upon (paper-stock) in a potching-engine. The bleaching reagent is chlorin dissolved in water, or chlorin generated in the mass by the action of dilute sulphuric acid upon a solution of common salt, or a solution of salt and chlorid of manganese, called *bleaching-liquid.* The stock is placed in a machine constructed much like a breaking- or washing-engine, and called a *potching-engine.* The acid is very slowly dropped into the bleaching-liquid when the chlorin is to be generated in the mass, and, after the liberated chlorin has performed its work, the stuff is discharged into stone or earthenware chests having zinc strainers at the bottom, where the bleaching-liquid is drained off. When a solution of chlorin in water is used, it is added in proper quantity to the stock after washing, and the latter, after sufficient treatment, is drained as above described. See *bleaching* and *gas-bleaching.*

pot-cheese (pot′chēs), *n.* See *cheese*[1].

potcher (poch′ėr), *n.* Same as *potching-engine.*

> From this main tank the solution is pumped to the bleaching mill, . . . and is there discharged into *potchers* which contain the paper bulk to be bleached.
> *Elect. Rev.* (Amer.), XIII. xxiv. 2.

potcher-engine (poch′ėr-en″jin), *n.* In *paper-manuf.,* a machine for saturating washed rags thoroughly with a bleaching-solution of chlorid of lime. Also called *potching-machine.*

potching (poch′ing), *n.* [Verbal n. of *potch*[3], *v.*] In *paper-manuf.,* gas-bleaching. See *potch*[3].

potching-engine (poch′ing-en″jin), *n.* In *paper-manuf.,* a machine in which both washing and gas-bleaching are performed. It resembles in general construction a breaking- or washing-engine. In it the rags are first washed. The washer is then lifted out, and the bleaching-liquid introduced. The process thereafter proceeds as described under *potch*[3]. Also called *potcher.*

potching-machine (poch′ing-mạ-shēn″), *n.* Same as *potcher-engine.*

pot-claw (pot′klâ), *n.* A hook hung in an open chimney to support a pot or kettle. See *trammel.*

pot-clep (pot′klep), *n.* Same as *pot-claw.*

pot-companion (pot′kọm-pan″yọn), *n.* A comrade in drinking; a boon companion: applied generally to habitual topers.

> One *pot companion* and his fashion
> I will describe, and make relation
> Of what my selfe have seene.
> *Times' Whistle* (E. E. T. S.), p. 59.

> For fuddling they shall make the best *pot-companion* in Switzerland knock under the table.
> *Sir R. L'Estrange,* tr. of Quevedo. (*Latham.*)

Heavenly [Father], that admonisheth us of his *potency* and ability, that is ruler over all things.
Latimer, First Sermon on the Lord's Prayer.

When we will tempt the frailty of our powers,
Presuming on their changeful *potency*.
Shak., T. and C., iv. 4. 99.

'Tis always Springtime here; such is the grace
And *potency* of her who has the bliss
To make it still Elysium where she is.
J. Cook, Green's Tu Quoque.

Her spirit resembled, in its *potency*, a minute quantity of ottar of rose in one of Hepzibah's huge, iron-bound trunks, diffusing its fragrance through . . . whatever else was treasured there. *Hawthorne*, Seven Gables, ix.

(*b*) Potentiality; capability of development.

Books are not absolutely dead things, but doe contain a *potencie* of life in them to be as active as that soule was whose progeny they are. *Milton*, Areopagitica.

By an intellectual necessity I cross the boundary of the experimental evidence, and discern in that Matter which we, in our ignorance of its latent powers, and notwithstanding our professed reverence for its Creator, have hitherto covered with opprobrium, the promise and *potency* of all terrestrial Life. *Tyndall*, Belfast Address, 1874, p. 75.

(*c*) Efficacy; capability of producing given results: as, the *potency* of a medicine.

Use almost can change the stamp of nature,
And either master the devil, or throw him out
With wondrous *potency*.
Shak., Hamlet, iii. 4. 170. (*Furness.*)

(*d*) Specifically, in *homeopathy*, the power of a drug as induced by attenuation. Two scales of dilution or attenuation are employed, known as the *centesimal* and the *decimal*, the former being the one advocated by Hahnemann, and the latter of more recent introduction. In the decimal scale, one drop of the mother tincture is added to nine of the diluent, which is usually alcohol, with certain manipulations, and from this first decimal solution or potency one drop is taken, to form, with nine others of the diluent, the second decimal solution. This process is repeated till the required solution or potency is reached. Drugs of high potency are those of which the dilution has been frequently repeated, and the medicinal substance correspondingly attenuated; drugs of low potency, on the other hand, are those in a less diluted, more concentrated condition. The thirtieth (centesimal) potency was the highest recommended by Hahnemann.

2. Power dependent on external circumstances; material strength or force; authority.
